SUMMARY KEYWORDS

entities, literally, started, nathaniel, bigfoot, body, possess, women, called, big, put, podcast, fact, people, paranormal, woods, experience, correct, research, man

00:17

Coming from the city of the weird we're

00:21

exploring topics from the esoteric and unexplored two dimensions are known.

00:28

Shining a light of truth on the darkest corners of our reality.

00:33

Welcome to the curious realm

00:53

go let's see if we can get a hold of our guests now folks.

01:08

All right

01:24

let's see here if we can get our guests back to having a few problems with the system tonight, only about 18 problems. So sorry about that, folks. Once again, we will be talking with the amazing Bigfoot roadshow. Tonight. We will be talking with them at the end of the show. First

segment here as soon as I can, you know, get any of my communication systems to actively come online, we will have our first guest on Nathaniel Gillis.

 01:56

And we will be actively talking about alien Moltres, things like that. Let me see what I can do to get him on over here on another source real quick.

 02:07

Because you know, once again, can't just be a show. It's always got to be something.

 02:17

Let's see what can happen here.

 02:21

There it is. Sorry about that. Man. We literally had a major crash of our system as we brought you on board.

 02:29

Okay, it's okay, that it happened. Can't Yeah, I guess. So. Right after we had you on the show last time you actively went out and did a day long conference with Billy Carson and forbidden knowledge network. I am loving the stuff that he's doing over there. It was funny because it was right after we had Lindsey Charmin on as well. And both of you guys were part of that conference, but part of your topic of that conference was Moltres, things like that. So let's go ahead and start getting into that topic, and see what we can see what we can uncover.

 03:12

Yeah, so my lecture was on the motors and for those who aren't

 03:19

you aware of my research where we research is primarily centered around the Dubai phenomenon throughout history, and, and demonic possession, its origin and the role it plays in modernity. And as I was researching different behavioral patterns, I came across a certain species of demons, that it was literally a ghost, these entities were ghosts, and what they were doing is, whenever they would go into battle, they would leave their bodies before they would go into war, so that they could survive. And so they would, they would literally, scholars say they would dispossessed their bodies,

03:56

thus other bodies to stay alive. And so throughout history, what these entities have done is tried to recreate what are called replicas of life

04:07

itself if you will, in other words, you know that they're trying to create a new body to stay alive in and then no place there.

04:16

So it's literally a self replicating process. And I believe they're using our species to do that 100% Those are the voters

04:26

and when you when you say that they are using our species to do that specifically.

04:32

What do you mean by that? Just just humans can they embody animal form? I mean, of course, in in Yeah. Manik literature, at least in stories of demons from the Bible, things like that. Of course, demons have been cast into animals animals have been possessed all kinds of things, but with these in specific Is it is it something that they they can only survive in a human does it seem that way?

04:59

According to

05:00

To 16th century literature, when we started having possession cases that turned into pregnancies, these entities said they didn't like to possess animals because it was unlike a human. And so originally these were formerly human beings. And so what they were trying to do is not just possess a human body again, but they wanted a body that looked like their own apparitions.

05:24

And so so a lot of times what we were having is male and female possession. And that never really worked out and so these motors evolved into not just possessing Garin Edna, right to an end that doesn't look like the the entities that are possessing them. So over time, what we had was a entities that had their own apparitional manifestations. And so you would have a ghost of the actual body that they originally inhabited. And so what they were doing is literally, they got tired of inhabiting animals inhabiting statues, and they started to recreate a second body to step into. And it's, again, it's a way for them to stay alive. But yeah, so again, I can't stress it enough. It's not just that they're possessing, or they want to possess bodies, but they have apparitions. What they want are bodies that look like their own apparitions. And that's what the self replication program is about.

 06:21

Wow. And granted, we have had the conversation, we had the conversation with Lindsey Charmin when she was on, we've had the conversation with Carla Dagny kid in the past, about

 06:33

intergenerational reincarnation.

 06:37

Even right now, um, some of the things that my son says is a four year old, like, yeah, he's to be a grandpa.

 06:47

You know, so some of the things that he's brought up, where it's like, wow, Where'd you hear about that?

 06:54

It's been really, really interesting. And the idea that you bring up the fact that these entities have to embody something that looks like them.

 07:05

They it's not like a normal demoniacal possession, where as long as something is willing, they can take over the host. That is correct case, correct. This is their pathology is different, and that they did mutate in their possession cases. You know, like I said, in 2008, the University of Chicago. This is very narcissists, really where I started researching this phenomenon. But they sent out archaeologists to Turkey, on an exhibition and they dug up this stay late. And it was written on by a guy named Cata, moolah and ketemu. And mentioned she said, My soul is in a state of light.

07:46

And so our scholars started to realize okay, that even as late as early as late Iron Age, we have records of these people who were dying and transferring their consciousness out of their body dispossessing their body and placing it first it was in the statues.

08:04

And so that's why when you get into started Chronicles, Yahweh God in the Bible, he talks about those who are impoverished seek as an officer of metal, right, is talking about these Moltres, who were trying to put their consciousness in idols.

08:18

Very interesting. And so then, once again, these entities got tired of just, you know, living in idols, then they started to possess people. And that's why Numbers chapter 19, and 11, we have that extra cystic right where it's, in fact, you are possessed by one of these Moltres. They perform an exorcism to get that entity out of you. And then again, these entities mutated to where now it's not just on possessing people, or statues. Now, I want a body that looks like my ghosts.

08:49

And I want to make another key point, this is not this is a different way of reincarnation, that's actually trans migration, where it's not that I'm being reborn, it's literally that I'm transferring my consciousness into another body.

09:05

Right. So that's really how they stayed alive. And if we if we look closely enough to behavioral patterns in the UFO abduction phenomenon, we see that this is another aspect of this, you know, they're still creating children. And they're still inhabiting these these these babies, and I'll leave it there because I know it gets deep click. It gets deep, it gets thick, and well, the only way you can put it as a gift diabolic quick. Yeah. Correct. And,

09:38

you know, one one thought that you brought up a minute ago was the fact that these are disembodied souls that need somewhere to be and like you said, in Second Chronicles, it refers to the metal otter artificer

09:53

09:53

in the fact that they need they needed somebody to build something for them to embody and what

10:00

what this reminds me a lot of is

10:04

the

10:06

the story from Kabbalah of the Golem. Correct and, and the idea that it has a cause of course the irresponsibility of of the, I believe it was a rabbi and the story of the Golem who made the Golem was, well, you know what, what do you do when the Golem is done?

10:28

Right when the Golem is done with the task that you put in its mouth? What what do you do? Now you've created this thing, it has a need, it has a purpose.

10:39

Right? Right.

10:41

What does it do afterwards? Yeah, what does it do afterward and even even the fact of you know, an artisan who is releasing something and sculpting something out to be it, wood, stone, metal, whatever, you know, they, they are imbuing that with something I'm only a musical artist, correct. I'm only a musical artist, but I have had more than one person step into my studio and quote, jam with me. And after 3040 minutes, be like, Wow,

11:16

that felt really weird.

11:19

It because of the energy that I put off while I'm doing that, and not everybody can like Chai

vibe with that energy, you know, so very much the same way like my music is imbued with that energy.

11:34

And it same way with an artist whenever they paint something, sculpt something, what have you. So could it be that these things are remnants from golems? In the past? Something like, absolutely, you know, you first you have the consciousness, and then you have the image it wants to possess, you know, it gets back into what's called intramural burial, and antiquity, the idolaters that they had someone in our family die, it would go out, and they would make a statue in the image of that ancestor. And that ancestor was believed to possess the statue. Right? And then even even further on again, it's it's fascinating how these entities have evolved throughout history, because they're definitely not ignorant. You know what I mean? They're not, they're not the dumbest among us. They're very, very, very intelligent. And so so one of the footprints I've really noticed that I've been getting into lately, is this understanding that they have learned somehow to emerge their consciousness with metal, right? It wasn't a lot of people pay attention to the the image itself, but I'm more into Okay, how did they do that? Right? How did they know to do that? And, and we know they have that ability. Because if we get into the literature, we know that we're creating what are called Tara feet, where your idolaters and your necromancer they were taking small pieces of metal, carving the names of their ancestors, or in the Hebrews to Marula unclean spirits. They were carving their name in the bad metal, and then implanting that into bodies in the consciousness of that ghost would merge with the metal, and then take control over the body that it was implanted in.

13:15

Yeah, so yeah, these readings are highly evolved. And, you know, it's very interesting stuff. Well, and you know, specifically once again, the

13:28

because that it's really curious the idea of wanting to possess something that looks like them.

13:35

Correct. I mean, typical demonology, things like that, of course, demons are vain. Vanity was the whole reason for the fall. You know, so So being attracted to something, be it shiny, or, or even as it shows in the movie, Constantine? Like being enamored with their own reflection?

13:59

Yeah, there we go. Something like that. But

14:00

14:03

this is not so easily distracted, and seems a whole lot more purposefully targeted.

14:12

Because, once again, as opposed to the demon, which just exists, and it's just an energetic form, this is almost more of a thought form, and, and really much more of something that needs that energy in order to exist.

14:33

Correct? Correct. And they are parasitic in nature. So so like one of the biggest texts that I really like getting into is the Apocrypha of John, I talk about it everywhere I go, because, you know, I have a history of being in the Christian church, and I grew up hearing about Genesis six, but not believing all of that. And it never really made any sense to me. You know, your moralist talk about the great fall of the angels and how they made with the moralists, they you know that they were sexually attracted to them, but you

15:00

know all that stuff. And what's most interesting to me though is that these entities first appeared to women and the images of their husbands.

15:09

And so, you know, they literally took the appearance of the husband that these women were intimate with. And, and that is very interesting too, because the Apocrypha of John says that, that as they were, they were a costing them as they were assaulting these women, they changed their apparition of what they really looked like. And then they performed a ritual. And it's an abstracted ritual that they believe that whatever man, a woman was focused upon at the moment of insemination, she would birth the material image of in that man and that child, right, so So in other words, we have these apparitions who are trying to Father babies that look like their spirits, their own apparitions. And so what a lot of people miss is they confuse the software and the hardware because the software was the apparition. The hardware was the baby that it has stepped into. Make sense? Yeah, yeah. No, absolutely. And once again,

16:10

that is what makes it Oh, so nefarious. And just

16:16

mind numbingly frightening. Daniel? Oh, my God, you heard nothing. Yeah. Because we're looking at fleshly eyes with ghostly sight. Right? It's not just the eyeball that seeing Indo US. It's

the presence, the consciousness, the apparition? Yeah, that hovered over that baby, right, that's in it. And I'll tell you something else. It's very interesting. And this is that we're gonna get into some of the literature, what it has to say about the rest. I mean, because, you know, I really, I like all of the some of evangelical researchers that are, you know, researching the UFO phenomenon, and Giants and all that. But I think a lot of us focus too much on the hardware aspect, they don't realize that there was consciousness in these giants.

 17:00

And so, if we look at the software, we need to realize that that's a motor. You know, what's that? Once that body that is possessing dies? It's going to make a new one, it's going to step into a new body. Yeah. Yeah. It's not.

 17:21

Like, like, it's not going to not do that, like you said, it is a software, what it's embodying is hardware. Same thing as any virus like it's going to jump to the closest computer as a means of survival. Exactly. Exactly. Right. Yeah. And, you know, these entities have existed throughout history. And I think that's one of the most fascinating aspects of this. It's not just that they're replicating their species, but it's the programs, right, what they're doing to us in order to to do you know, in order to, to use us to self replicate, you know, I mean, we have cases throughout all of history where women are visited by Yankees in their dreams. And in the dream state, these women think, okay, there's no big deal. This is just a bad nightmare. It's not even real. And then they wake up the next day, you know, and, you know, it was actually it occurred, you know, what, they woke up with bruises they received in the tree, they just got out of

 18:20

it. And, you know, a lot of my research lately is not just understanding, okay, you know, it's, it's, it's one thing to say they're using it to self replicate, but how are they manipulating our senses to get us, you know, into the position of being manipulated, that's where I'm at right now, because their abilities are far beyond what I think many people are willing to admit. Well, well, I think that much like any problem Nathaniel, you first have to admit that you have a problem you first have to admit that it exists. You know, like we are just now getting to the point and granted rapidly to the list so rapidly to the point of disclosure and want to note Nathaniel that quite literally the term UFO denier is used by the media

 19:08

were five six years ago you know in anywhere before December 17 2017

 19:16

That would not have been the case that would not have been the correct UFO enthusiast. Maybe investigator but but typically local man with an interest in the paranormal, you know, and once again we have to be willing to admit that with or without our pension for religion

and once again, we have to be willing to admit that with or without our pension for religion Nathaniel and you you are by no means like a Bible thumping Christian man like I follow you.

 19:51

We swapped skate, dude. Like

 19:56

you know, I'm not I heck I used to be a Catholic seminary.

 20:00

Aryan and I'm not, because the logic of that the leaps of logic of that make no sense to me, my faith is shaken

 20:10

my faith in my god in something bigger than me in the universe, in my place in it as a cog in the machine in the watch, keeping time, unshaken

 20:23

my belief in a church and an institution and my faith in that more than shaking.

 20:31

But, but that doesn't mean that my eyes aren't open. And that doesn't mean that I'm not willing to accept the truth that there is good there is evil.

 20:41

Correct? And I think it exists. Yeah, yeah, it exists. And if you if you weren't willing to just say it exists, then the concept of this

 20:52

is fully allowed to run amok

 20:54

in the universe, because you are fully willing to unex to accept the fact that it is not there, that it does not exist.

 21:06

You know, and that was a lot of my problem with the church man, was the fact that I went to, I went to my spiritual director with a situation like that with a real question. And they were like, well, the church didn't really have a teaching on that. I'm like, Well, I kind of have a problem with better get one. Like,

 21:25

telling me that like, evil is stalking my soul around every corner. But now you know, the afterlife like that, you know, we don't really have a teaching on that. There's heaven there towel, but ghosts paranormal, you know, deep demons, whatnot. We don't? You know, I don't know about that. It's like, Wow, all right, you've literally asked me to accept everything on spectral evidence. But

 21:52

when it comes to that, not, we need something concrete.

 21:58

So they can somehow manipulate your experience to take authority over you, then all of a sudden, it's useful to them to acknowledge it, right. And that's not to say anything to the good men that were the caller that I am friends with, you know,

 22:14

the majority, much like the majority of society will not sit down and have that hard conversation with you.

 22:24

Right, you know, and it's, it has to do with Western scholarship, your Eastern

 22:30

literature does discuss these many issues, because they were experiencing the phenomenon they were willing to be open about it. You know, it's like I say this all the time. There's a lot of experiences of the church. Yeah, they just don't want to, they don't want to admit it. They're too afraid. And a lot of them are like me when I was growing up, like, I don't know what I've

experienced, like, I'm sure it's not gonna tell them about it if I do it, which I did a couple people and you know, they just didn't know what to do. And it ended up hurting me more than it helped me. Yep. But you know, they need to get a plan together because it's just like we were talking about either today or yesterday. Oh, my God, guys, this stuff shaping up quickly. The number one ducky number one, a duck D right now is being told by his mediator with the invisible college that the beach they're in contact with has given him permission to go into churches and delete hands on people now. So that mean, what does that mean? Because I mean, of course, a lot of people know, in the typical spiritual church since what laying on of hands means, you know, a healing a direct praying for something like that. But

23:39

the implications of this what?

23:43

Of this person being told that you now have the power within you to go lay hands on space? Oh, well, okay. So let's back up and say and let's talk about what the laying on hands was, was an exorcist, ik ritual. And other words that originated the fivefold ministry, the New Testament to lay hands on you and I'm gonna cap double out. And I'm gonna cast that out by virtue of the power that is in me. What they're literally telling this individual is that we're going to offer the power in you that you're going to use to heal these individuals with us.

24:24

Now,

24:26

I can't stress this enough guys. It's one thing to be a nuts and bolts you apologist who is atheistic about this phenomenon, say, you know, these are just aliens. Here's the question, what kind of aliens telling people to go lay hands on people at churches? Yeah.

24:42

Right. So what they're doing literally, in one fleeting moment, they're taking the conversation out of the hands of the agnostic and the atheist. Now it's placed to get straight in the hands of religion. Now we're going to talk about what this means, why they're doing this, why they think they can offer this function. It

25:00

If the implications here are deeply apocalyptic, yes, yeah. And like I said, Now that now you're starting to stretch into my, my understanding of, you know, exorcism and demonology.

Because Paul in the New Testament says, if another Jesus, which you have not received,

25:19

I'm gonna go down this route real quick. Go ahead, go go. I'm only doing this kind of stuff get real fast right doing this, because this is what they're bringing up.

25:27

Amen.

25:30

Yeah. So Paul is talking again, if we go back to the apocryphon of John, what occurred, it occurred, what occurred was an entity manifested as a husband, to a wife.

25:43

The symbolism here is not just the image. It's also the covenant that it's manifesting ads. Yes. And so what Paul is doing is he's telling people, Hey, listen, there's going to be another power. And that power is going to come to you and it's going to, you're going to take this Jesus and it's not,

26:03

oh, Lord, in vain, he goes even further, it's very interesting, this, this is killing, it doesn't just say, Okay, if another Jesus, which you have not preached comes to you, in that he says that another spirit,

26:15

which he has not received, if you receive that, we have a problem. And so what he's talking about, is this anti Jesus, this that and we get a lot of people get it wrong. They think that this is a is going to be an antichrist. And no, it's not a replacement cry. It's a movement that comes out of the spiritual realm that says, Listen, I know you have power, but I have power to. And now I want to tell you, I want you to start blaming. That's literally, I hate to say it like this because I used to, I used to have a dislike for a lot of evangelical researchers, because I thought they were so dogmatic. But this is literally coming from the head of the invisible college. Yeah. To the most famous abductee who is now actively laying hands on people and healing them. So this is literally right out of the Bible, whether we want to admit it or not.

27:07

.....

Yeah, yeah, no, I mean, it's it the laying on of hands is absolutely biblically founded.

 27:15

The it was a practice that was regularly used. And once again, has the the laying on of hands is something that is only aside from a general healing in the Catholic Church, something like that.

 27:33

Only only preserved for very few

 27:37

correct and correct it to

 27:40

to allow this one of the one of the things that we have talked about numerous times on this show, and that we talked about in that private conversation, or at least I brought up was the was the concept of operation Bluebeam.

 27:53

And what years ago, when we had the Incarnation dudes appear, and we first started having folks like you on folks like John Hall, stuff like that.

 28:06

I contacted a gentleman who will not be named, but helped start a major network involved with you ufology things like that.

 28:17

He listened and I want to say it was right after we had like the,

 28:23

the head of the Joseph Campbell society on and I sent him a copy of that. And he was like, great episode. That was fantastic. I would love to come on your show, but I don't do public appearance. I don't do public speaking anymore in that, right. And I was like, Oh, well, that's a shame. I would, I would love to talk with you about your years in work and the disclosure community, and everything that you did, and the founding of your channel, and how many

toward the mainstreaming of the cause of disclosure. And at that, he asked that we take the conversation private. And, man, this man laid out the fact He will not speak publicly anymore because he has too many friends in the world of you ufology and research who have been killed

 29:09

who too and he made no bones about it not like died under mysterious circumstances or you know, just just no killed. He said killed man man used those six letters killed.

 29:26

And he was like, I love my family too much. I cannot put them through that. I can't put them through the targeting that they would go through in this day and age with it much less what they went through back in the day. I wish you Godspeed. He was like But everything I am hearing

 29:44

from my military contacts high up like that. They are preparing for a Project Blue Beam type activity. There they are preparing people for World of disclosure.

 30:00

that will lead to a major incident that will basically cause what people will think and believe, is the second coming.

 30:13

All under the guise of control.

 30:16

The Second Coming, of course, coming about and saying, Listen, this is the whole reason for your problem here is that you don't have one world, everybody should be one

 30:27

in that whole thing.

 30:30

Say what you will about it. But boy, howdy, there's a lot of things going on right now.

 30:39

Moving towards a, definitely a cataclysm.

 30:43

Every second every moment, it seems like that clock

 30:47

is running, and we're running out of time. And it doesn't seem like we're getting anywhere with disclosure. I mean, you know, yeah, we have a couple of pictures. And you know, we have people like Mick West and a bunch of other people on Twitter that are doing their best.

 31:04

But, I mean, what did these people truly know? You know what I mean? I mean, and we've had fleeting moments. So, you know, when the veil sins, and we have John Doe, and different speakers come out and say, you know, what, you know, if we, if we knew the truth, or if the public knew the truth, it would be a very somber moment. You know, there was another guy, I forget his name. And he's talking about how he was briefed in the Pentagon. And, you know, when we were done being briefed, one man was bearberry, that says, His hands crying, he said, I don't want my daughters to grow up in this world. It doesn't seem like it's love and life

 31:38

just doesn't like it. So whatever they know,

 31:44

this isn't gonna be, you know, Fuzzy Wuzzy was a bear, this is gonna be like, Wait a minute. So, you know, I think we, as a movement, as a field of research need to prepare ourselves for the possibility

 31:58

that again, these entities are not aliens. And they're not just interdimensional. You know, it's like, we get back to that, you know, I see it, the number one experience, but he's what he's most famous at this point is most documented. And he's changing the whole narrative. You

know, the Pentagon keeps sending scientists to him for degrees, and he's saying, you know, the reason they're sending it to me is because they cannot contact these beings. I am. And what are these beings telling him? It's

 32:28

hate to Rambo, but it's a lot like what Diana, Asuka, you know, she's a religious scholar, why is she studying this phenomenon? Because it's almost like, like they're trying to start another religion. You know what I mean? It's it. I think it does fall back in about one world government because they're gonna want to have a leader? Well,

 32:47

I think unfortunately, most people are seeing that religion with a hard R. And a capital law. Yeah. And they are because you know, the, the one thing we bring up on the show all the time, man is the science, that religion of science. The fact that Well, science says, You know what, for a long time, science didn't say that. And if science didn't question the question themselves, that kind of sounds like a dogma and doctrine situation, not like a scientific method. Let's keep experimenting and test further hypotheses. Correct? Correct. It's a very unique situation, you know, like Java a for sure that we do we have metamaterials and that there is a technological aspect of it. But let me say this too. For all the listeners out there, we have a massive problem here. They had a bazooka with the Rice University and lecture and in her lecture, she says that the invisible college is using esotericism.

 33:49

Let's go reach the phenomenon. Now this is more than once I am aware of the invisible College. Let's let's cover that for a second. Because I think

 33:59

a lot of what we're talking about here, especially the exposure of this, like you're saying comes down to that and comes down to the understanding of that and the willingness to to accept that esoteric knowledge within the everyday world. You know, like we're getting ready to have

 34:21

a guest on in a couple of weeks, all about 32nd and above degree masonry.

 34:28

And

34:29

that really is one of those like esoteric schools you get you can get into the Illuminati and everything else. But it is a school of secrets. And the whole point is that as you grow and go down that path of the unfinished pyramid, that that your eyes are open to certain truths and along that way your world will be destroyed numerous times.

34:55

And what you know to be the world and the way the world works will be destroyed. New

35:00

numerous times, and we're up against right now as a society, Nathaniel, of correct what we know being the world around us being governments being religions, all of that is getting ready to come tumbling down.

35:19

And, like the prime example was the Vatican. And granted, they consulted with a bunch of theologians, they basically put into a study fund. And the study funds, part of it was some theologians talking about, you know, the implications of the finding of alien life.

35:40

Right? Well, we will we, will we allow ourselves to baptize them, right? All of them? Sure. Well, not only that, but it's one of those, you know, if you if you want to talk just

35:54

about wise, thought, principle wise.

35:57

If there's one group of people aside from traditional Judaism, that is, Can something pretty well unchanged, and kept their message pretty well, the same the whole world over? It's the church? So you want to get a unified message? Across to everybody? How do you do that?

36:20

across borders, across cultures?

36:24

You know, and a lot of that comes straight out of religion. How do you get them to accept it? Follow it? How do you how do you get them to accept it? Follow it, not change it? In two years, right. So

36:42

guys, go talk to some men with collars. They'll tell you exactly how that's done.

36:49

Absolutely. And this is very interesting, because since we're on the subject of esotericism, and societies, you know, Malecon Martin was virtually crucified because he went around everywhere telling people that there was Satan. Yep.

37:04

And yeah, I'm just gonna throw that out there. Don't don't crucify me. But you don't I mean, we have to look at this because, again, like you said, how do they propagate their gospel? I would they, you know, start creating new traditions. I tell people all the time that you know, it's not just that we have certain experiences that are actually manifesting these entities it's not that because I've never believed and just the miracle, right I'm after the message. And so you know, we yeah, we can have that original manifestation surely could see these guys on camera. What I what I when I really start paying attention is when they start teaching doctrine.

37:43

Right? Not just manifestation, not just the, you know, the white lady that manifests but what are they teaching you? Are they teaching you something? Are they giving you doctrine because again, when they start giving you doctrine, it's not like they're giving you recipes to cornbread. This is strictly you know, what I mean? This is doctrine doctrine. So that means that now we have to have a different discussion in its entirety. Now, we got to talk about religion. Now we have to read if we want to or not, now we have to get into okay, you know, like, okay, these are the center watchers. Well, what did they mean by that? Why would they, why would they think that would mean something to us? You know, and it's all it's all intertwined. But again, if these people are looking at us, lyricism, you know, if it's in the Vatican, or if it's in the Episcopal college, you know, we have to look into what they're researching and the text that they're researching, and I believe that was Sukkot and other researchers have pointed to some of the texts and some of the rituals that these people are performing and it has to do with Aleister Crowley and Jack Parsons

38:51

and you know when you're talking invisible College of course you know you're talking about

things like Bohemian Grove

38:58

all kinds of even here recently what was the as we talked about before the show the the Republican candidate who was talking about the orgy

39:11

drug party who was like yeah, you know, in here it is.

39:17

I've got it I've got it up right here at a Daily Beast angry GOP responds to Catherine's bizarre DC orgy claims and naming

39:28

I wouldn't go as far as to say bizarre because once again we have we have numerous situations where we have

39:36

senators congressmen caught up in human trafficking rings caught up in you know, sex for sale when with teenagers. Even you know, we brought up on the show before I brought it up to you earlier even those horrible pizza gate emails that led to the death of some people at a at a pizza place that Yeah, didn't have a torture chamber.

40:00

Were in the back. All that, imagine that, but they never did deny

40:06

the rest of what was in those.

40:10

They didn't deny Him. They were really upset with how the emails were obtained, but they never denied the contents. You know? And once again, these folks are upset with like, hey, well, like, what are you doing? You can't talk about the Tuesday night party on Wednesday at the watercooler.

40:28

It's so funny because like we were talking about before this show that's so self incriminating, like,

40:34

it's just funny to me, because it's like, okay, like, here he is trying to raise awareness. It's like, wait a minute, you know, somebody who does that? Hey, what do you mean talking about the coke?

40:47

Yeah,

40:48

he's a deep water man. You know, it's a hot water rub. It's like, well, you, you're wanting us to believe you.

40:57

Yeah, like it's, it's frightening to see it almost in plain sight now. And you know, I have been wanting for the longest time Nathaniel to do an episode on Adrenochrome harvesting,

41:13

things like that. There is a whole deep dark rabbit hole of things that involve these emails that we're talking about involves stuff like the laying on of hands involved things like the cremation of care, that go down that rabbit hole and go down rabbit holes, like what we're talking about right now where it's, is this being done as a means by which to feed the spirits?

41:44

Yeah, the parasites, the parasitic entities? You know, it's

41:50

it's very interesting that you mentioned that, you know, I can't help but think of Epstein. And I don't know, we don't even know if we can mention his name on

41:58

it all day long. Okay, the one of the biggest things about Epstein was once they got into his island and into his mansion, he had like a ritualistic setup there. Yeah. What one person said that he actually had a, really a life size was almost like a miniature room size of the temple.

42:25

And that's they said, that's where he was performing his rituals, which, you know, a lot of this stuff was Qabalistic, in terms of like, you know, the rituals that he had performed, and his knowledge about it all. And it really does come down to exploitation. And it's like, I see, you know, it's not just the sexual aspect of it, it's the ritualistic aspect of it. And, you know, and I hate to go this direction, but it's already there, you know, when you get into the protocols of crawling, and how he was in the sex magic, and I say protocols, because again, of the invisible college or using these, these same techniques to reach these entities. And they're, they're actually, like, Jack Parsons was even mentioned, guys, Jack Parsons was the pedagogue. He was a student of all Aleister Crowley. Yeah.

43:16

You know, it's sad that we have to have that conversation. But you cannot validate the man without validating his methods. Yes. And his methods are deeply disturbing. It wasn't just, you know, just, you know, a couple of words and a couple of mantras No, the he was into chaos, magic, sex magic. Yeah.

43:39

A lot of that stuff. And I hate to say it, but you know, if that's what it takes to communicate with these entities, I don't want to do it. Again, same, same, you know, and granted, like you go, you go through my tablet, hey, I got tons and tons and tons of PDFs of you know, the, the Grimoire of Arielle and the, you know, all of the all of the ritualistic magic of Solomon, things like that. I've read all of that. I'm not gonna go out to a crossroads with a poet.

44:16

Right, you know, like,

44:19

I'm just not going to do that because the intent of that,

44:24

you know, kind of like, playing with a Ouija board.

44:29

harmless. Yes, a toy that says Milton Bradley in the corner.

44:35

However, the intent of that

44:40

is what you have to be careful of.

44:45

We talk about it on the show all the time. The fact that you go back and you read Kabbalistic teaching we are connected. Our words are connected with creation.

44:57

Us being one of the only creatures breathed life in

45:00

into by the Creator, we had the power to create above most other creatures.

45:08

You know, a raccoon cannot just go out and like build the car out of a bunch of scraps, it would be really hard, right? We have the means by which to create things. And whether you'd bet means in a spell or manifestation, or bringing, bringing it about in the world, or breathing life into a clay statue

45:33

that then requires a life to live, or a task by which to live, you know, in something to keep feeding itself.

45:43

That is fully what we're talking about here are spirits that have been created,

45:49

correct and put into motion. And I guess the really disturbing thing to think about Nathaniel is that we aren't necessarily just dealing with, like, old gen here, you know, we aren't just dealing with the same jinn and spirits and elementals that Solomon

46:11

had control over.

46:14

Right, which were aiming demons, all kinds of things. These are things that have been specifically created.

46:23

Right, right. They have all Yeah, the Hebrew they were called unclean spirits, spirits brew, wants to breathe life, into the nostrils, that's a creation there there, but a Genesis when life is at the nostrils of atoms, so again, you're right. It's a specific kind of entity. And it's, it's mutated as we speak. You know, it's, it's very troubling to me, because I often deal with case studies of women, or even marriage marriages that, you know, they're dealing with these Moltres. And, you know, the, the wife will say, you know, the entities, you know, he'll appear to me at nighttime, you know, I've had, like sleeping between the husband and wife at night.

47:07

You know, I was I was doing a show where a lady had a contact, or the host said the other night, she said, you know, she had heard I was going to be honest, she does my research with these monitors. She said the other night, she said she felt she was

47:21

having relations with her husband. And she said, and then she said, My husband got off the bed, she said, looked at me in a real really weird way. And then she said it, then I that's when I started noticing that there were certain facial features that didn't belong to my husband. She said an instantly she said, He grinned, and then turn into a smoky apparition and walk down the hallway. She said, that's when I looked over and notice that my husband had been next to me in bed asleep the whole time.

47:56

So, wow, this is a very real phenomenon.

48:01

And, you know, there are very severe implications for us, when we start realizing the ways that they're bypassing all of our instinctual senses here. You know, it's literally not just inducing us to sleep states. It's making us believe that we're doing one thing with one person and then right in reality, you know, we're not it's something completely different. And it's troubling, because if these are the entities people are trying to get in contact with for the sake of technology. No, you're not going to you're not going to put a handcuff Tiger. Yeah. Oh, well, you know, it's interesting, I'm, you can probably tell from the shelf behind me, folks, I'm a bit of a comic book nerd. And one of the one of the characters that I love is spawn by Todd McFarlane. And the whole mythology behind spawn is that he was a government assassin who brought many souls to the afterlife. And when his time came, he was given the choice to stay or leave, he could go back and see his wife again. But he would have to lead Hell's army. Now, he came to realize that he made a really bad deal. But the the trick is, along the lines, and this was the twist in the story of spawn

49:24

was that it wasn't actively him that they were after. It was offspring. And now Simmons, his former self didn't have offspring, but spawn being the Hellspawn could. So he actively took the body and took on the form of his friend who his wife is now married to had sex with him and impregnated her

49:51

and now gave birth to what would be the Antichrist and the end of it all.

49:58

Because of his war

50:00

I didn't I guess

50:02

that's the issue that we come down to when you when you when you read a lot of biblical accounts, especially of angels, things like that.

50:11

They were always unrecognized, but human.

50:16

You know, they came in human form. And it wasn't until the message came, Hey,

50:24

Rebecca, you're gonna you're gonna have a child,

50:28

hey, Mary, you're gonna you're gonna be with child, but I don't know, man, I know. But you're gonna have a child.

50:37

They, it's a little bit different at that point. Because they, they aren't necessarily embodying something.

50:47

They are appearing in a form. And that's the form that they have. But it's not like they are purposefully embodying and deceiving the way that these entities are doing.

51:00

Right? Correct. And a lot of times, this is very interesting, too. It's, you know, it's not just that these entities are changing their their appearances in a cosmetic way. You know,

51:15

like I said, it's not that they're just changing their appearances to husbands. We've had cases of abduction, where they have changed themselves at the Jesus.

51:24

And

 51:25

very troubling, guys, you know, like, what kind of an alien knows about Jesus? What, you know, why would you want to appear as Jesus? What's really going on here? And I can't stress enough with everybody listening. You know that the danger here with CD five is you don't know what you're contacting? What you know.

 51:44

Yeah, yeah. And, you know, we I discussed that regularly. Whenever we have mediums on whenever we have people because believe me, I want to have Steven Greer on and talk about the CE five protocols. I think it's really amazing. Some of some of the results that they are getting. But yeah.

 52:07

Man, much like, hey, Army military, are you approaching this thing? Right? Hey, average people who are gathering together? Are you all certain that you are being deceived?

 52:20

Correct. Oh, and you know, hey, who's to say what deception is? Who's to say, what is? or isn't? This is all kind of unknown territory for all of us. But

 52:33

yeah, you have to be careful. And you have to be willing to accept that.

 52:39

Maybe the tinkering that you're doing

 52:43

are better Bell. I mean, it's all bells that can't be unring.

 52:47

You know,

52:50

even myself with the RF fields I was playing with and things like that here on my studio. Like,

52:57

it's bells that can't be unrung. I don't know. I don't know what Plasma fields I differentiated in another universe. Beats me.

53:06

But I did it.

53:09

You know?

53:10

And, and what does it take right now, Nathaniel, for people to recognize this for people to be able to see this in the world around him? I guess that's really the the big burning question on my mind. And probably most of the audience right now is hell, like, so these motors are out there? And can we get rid of them?

53:37

Longer Bye, just going like, Nope, sorry, Moltar you don't exist?

53:43

How do we how do we handle this situation? And how do we move forward? Now that we have the knowledge that these things are there and what they are?

53:53

Well, I say this

53:58

as much religious literature, we have the talks about them.

54:05

Very little works against them. I mean, like, you know, we have cases where people have been abducted by these entities. And they're in the middle of saying the Lord's Prayer, their eyes rolled back in their head.

54:21

So concerning to me, because, you know, I grew up in evangelical Christians, um, and I always was taught, you know, Hey, guys, these guys obey certain laws and certain commandments. And I want to believe that's true. And I've had we've had evidence of you know, if you say the name of Jesus, or if you you know, call out a religious figure, they disappear. But a lot of these entities fall into the classification sinister. I saw this in a story gave them which were they were pagan demons. Yeah. And the reason he called them pagan demons is because one day he was on a dirt path, a dirt road, and he met one of these entities, one of these entities just walked out of the woods.

55:00

thought of the path that he was on. And Sinestro. He was a Franciscan priest and he did everything he knew to do.

55:08

And the entity looked at him and said, that may work for other entities, he said, but it doesn't work on me. And so, you know, we have to, again, we can't, we will never know what they're afraid of until we understand what they have faith in.

55:23

And right now, they're bypassing a lot of stuff, guys. I mean, like, you know, would you get into abduct II accounts, we're talking about people that set up video cameras, and chain and handcuffed themselves to the bed. Yeah. And then they remember being abducted, they go back to the film, and they see themselves out of nowhere on handcuffed themselves, and then go and take the camera out. Yeah, you know, so so we don't know how much power they have over us over the common man and common woman, we do know for sure that throughout history, they have been manipulated reality, they've manufactured our consent.

56:02

And they've publicly engineered us.

56:06

So it's. it's troubling the applications here. I love the way that you say manufactured our

So it's, it's treating the applications here, it's the way that you say manufactured our consent.

 56:16

Because that is such an easy thing to do.

 56:19

It is such an easier because

 56:24

by all rules, celestial Lee temptation is allowed.

 56:31

Men at that point it is it is up to your weak or strong flesh to resist or give in, you know.

 56:39

And I mean, as is obvious in the book of Job,

 56:45

where the devil literally just pops up and heavenly court and is like, oh, Joe Manny,

 56:51

let's have some fun.

 56:53

What,

 56:54

what you got to do what you got riding on it, you know. So, so obviously, it's the fact of these two things are not at such a battle that they don't realize their mutual need, they don't realize they don't not realize

 57:14
their mutual existence.

 57:17
You know, and the need of mutual existence and the fact that one will always have the other.

 57:24
However, once again, these things operate, like you just said, with the case of podracar, Padre sinistra. It's, it's, it's, they operate on a different level. Because they, because they have been created.

 57:43
And because of because they have been created. They don't they don't necessarily have that, that grace, so to speak. The angel and the demon have great, free will forever and always they do not have salvific grace, as humanity does, were sure we have free will. But we always have the option be to go back.

 58:10
And just say enough, and to wipe it clean, there's there's always that

 58:15
seed of, of grace that's there, that can be going back to and much much like

 58:24
an angel or a demon doesn't have that but has free will. This has neither.

 58:33
Yeah, it's tethered to to its own existence. Like I say that these are the suborder the disability of being, being without being a being. So you're everywhere and nowhere at the same time. And it's really interesting, you know, I mean, if we're looking at these entities through the lens of the Akkadian texts,

 - - - -

58:54

these are your real spirits because the Akkadian text says that, you know, the little entity from where we get little lift were entities that they were actually beat human beings and when they died, their souls left their body and they became a species of Lille.

59:13

Yes, it's very interesting. And then then the Jewish mythology, they retranslated that reincorporated in their own mythology. And they said, Okay, we're now we're experiencing an entity that will manifest a went into men in the image of a woman, and then it'll steal seed from them. Yeah. That's very nice to guys. So they, they deal with that this entity was a little spirit, and so they called her Lily,

59:43

or Lilith. Yeah. And so we see that not just in ancient texts, the people demonology but we also see that in the monitor your phone phenomenon,

59:54

you know, because we do have cases where just like Barney Hill, yeah, these entities came

1:00:00

And the image that you know, and they took his seat from? Yeah. So so, you know, I believe that these sucky by these are less of person they're less person than they are program

1:00:14

right. And so if we look at them to the lives of being a program now we can start to see their behavioral pattern

1:00:22

and it just you know, the rabbit hole gets deeper from there. Yeah, yeah. And you know, especially in the concept of Incubus, Succubus, the, the idea of old hag syndrome, and like, I, myself have had a couple of situations where I have woken up and seen dark entities at the end of my bed, with their hands on me, things like that. So I definitely had those experiences in my life that

1:00:56

were visceral enough for me and that I have enough memory off of. And remember, remember

other things that happened? While it was happening that were confirmed? That yeah, you know,

 1:01:11

I, I really believe that they are real. Now. Was that something that I attracted to me? Probably, you know, through things that I was doing in my life the way I was living my life, all that what can we do to a

 1:01:30

identify these entities

 1:01:34

and be, I guess, really not necessarily exorcise them? Because, well, you know,

 1:01:43

can we exercise them? Can we get rid of them or obliterate them? And if not, what can we do to help prevent them and keep them away from us? Because like, I know, I am somebody, I have a very, very good friend who's a listener that he's got what I call an his own Ent. I have ENT, short for entity follows me around. And my wife's been there were literally I'm like, Where the heck is this thing? She's like, What are you talking? Like? I literally just had it in my hand. I set it down right here.

 1:02:20

And then we both turn around. And there it is.

 1:02:25

And yeah, it's just one of those things that it's just they're bugging you. It's they're doing it to you just to prod you and make you think you're crazy. And to annoy your day. That's an ant. Like you said, an amp, things like that. And yes, certain people have them that are just kind of attached to them. But what can you do to spot these things? What can you do to help mitigate that, Nathaniel?

 1:02:52

I look for a specific person. Let's say somebody came to me off the streets and he listened. I'm dealing with a, b and c, I always look at

 1:03:03

the person themselves. What is your dream states? Like? Like? Have you been experiencing nightmares? Is there a heaviness about you? Do you feel watched? You know, have you done any Have you had a breakup recently? Have you had a divorce recently has there it's a woman these enemies for some reason or another? They like to play women who have had trauma in their past?

 1:03:25

You know, I had a family friend, actually, yeah, friends of my family that came to me one time, and they came to me because their daughter was experiencing one of these entities. And I go into transit.

 1:03:38

And I said, Okay, I went to a trance, and I said, I see a man to my left. Is name is Dan, he smokes, he has a mustache. And I said, I know for sure I said, This man has

 1:03:49

sexually assaulted a woman. I said, Who Lizzie and the mother, she said, That's my ex husband. He's dead now. I said, Okay. I said, No, this is not the entity. I said, but Dan is telling me this is crazy. I don't I don't know how it happens. But he did.

 1:04:07

But he said, you know, he said that this entity attached itself to my daughter

 1:04:13

because she was attacked by another man and she's been dealing with this trauma and it's been using that unresolved way to gain access to her.

 1:04:27

And so I went into a trance and I and I told this this lady and her husband I said there's going to be coming there's gonna come a day where you're gonna sit down I I laid out their their living room for them. I said, Okay, there's a fireplace in the middle. There's a chair here. There's a there's a couch there. So you need to sit her down and tell her what you know. Tell her Hey, listen, if something happened to you, it showed up work for work that happened. She broke

down crying to them and said yes, that 100% I haven't told anybody about it. I figured you know what, wait and see what happens with me emotionally she's like, but a lot of this stuff to me. Why?

 1:05:00

As we expose that connection, that entity had, that entity never returned again. So a lot of again, with a specifically with women, a lot of these entities will will attack women who have had trauma in the past, or the present. Yeah, yeah, absolutely. Hey, you know, it really is just the fact of

 1:05:24

healing from that as hard. Healing from that spiritually is hard. And whether you're a man or a woman, and

 1:05:33

a lot of that leads down paths of addiction, which psychologically and spiritually and psychically weaken the person even more.

 1:05:47

You know, it's really a self deprecating self, self realizing cycle. That's really, really sad and scary that yes, yes, these things

 1:05:59

definitely want to attach themselves to because I mean, it's

 1:06:06

no different than the way once you hit a certain point of alcoholism.

 1:06:13

You Your body will start rejecting solid food.

 1:06:18

Because your body and your liver are like, Well, man, why do you want us to do all this work? And like convert all that complex sugar into alcohol to burn to fuel you? Like, you're just giving

us fuel? We aren't going to do that.

 1:06:34

You know, and very much, it's easy to fall into that with these entities. It's, it's easy to fall into that same trap where

 1:06:47

because it's easier.

 1:06:51

They tend to attach your cell phone, they tend to attach themselves onto you. Correct? Correct. And a lot of times, like okay, in the 16th century, we had

 1:07:03

individuals that were being attacked in their sleep. Like I said, I've been waking up and realizing that they had physical manifestations of what occurred to them and that dream and yet while they Okay, so So first to begin as they're being attacked, Genet and mutated into them be possessed by their attackers. Sounds like UFO abduction. And not just that, but these individuals who were being invaded by an I say alien, not as an extra pressure, but these individuals who are being invaded by an alien consciousness they begin to have shared memories

 1:07:41

like the entities that had possessed them was like, literally projecting memories into these individuals minds to where they didn't know what to believe. Right? Yeah, what really happened to me did that actually happen to me or am I miss remembering it? And you know, a lot of this is trauma based I you know, I did electrolytes in knowledge and in that I talked about how there was one abductee she sought out Dr. Colic Turner's book take, and she said that she was just sitting in our living room sleeping one afternoon, and these translucent entities walked into her living room, and like, put her in a trend and sexually assaulted her. Wow. No, no, you know, a lot of shows what, let me talk about that, because a lot of them, you know, especially people in the field, they'll try to silence these negative accounts. And they'll gaslight you, I'm gonna give them a little rant here with the experimenter Yeah, apple box it

 1:08:42

man put lipstick on the pig. And you know, let's hope that's totally ignore it long enough. And well enough, these people will eventually go away. And yet we have to talk about it and be honest about it. Because again, these entities will cause trauma and lives it's no secret that

that young woman whose family called me because even though you know she was existing had a had a job at a family. The trauma that she had experienced was working on her body now you know, it's we have abductees are experiencing the same thing. And I do believe it's just you know, it's all connected to these entities. And I think that the more we talk about it, the more comfortable these people will be with telling their stories. Well, Oh, well that's just a you know, we talk about things all the time like, abductees. We talk about it with Terry Lovelace who used to be a former

 1:09:42

assistant state attorney general, you know, stuff like that. He didn't come out with his abduction experience two years after he retired.

 1:09:54

Because, imagine, imagine, you know, you see

 1:10:00

But like Mike Heston Rogers who Yeah, he wouldn't even the guy who was Travis Walton and taken away, but just being a part of that experience has all but ruined his life.

 1:10:14

You know, so it's hard to want to come forward and a much like any any sexual or abuse experience, it's hard to want to come forward. And it's hard to want to say that this thing happened to you, but without it coming forward. Do we know what's happening? And do we start researching it? Do we start looking into it? Do we start taking numbers? You know, it's much like the whole conundrum legally of male sexual abuse. And how many men are abused sexually? We don't really know the numbers because most men don't go report it.

 1:10:56

Correct? Correct. Yeah, they're often told, Hey, you're a man, you gotta get over it. Yeah, you know, and and it's very much the same way with people that are abductees. People that have experienced things like this, like, hey, even even myself, as someone entering the seminary man, like when I told people that I had experiences of ecstatic prayer,

 1:11:21

things like that, like,

 1:11:25

1:11:25

their reaction was a bit different than I would think it would have been for somebody in the seminary.

1:11:31

Let's just say

1:11:36

leave it as, you know, like, I could say it in a judgmental way. But at the same time, that's, that's no different than me coming out of the seminary and seeing the average person as somebody being led by a nose ring. You know, like, that's not the right mentality to have either just because they haven't had that awakening experience in their life.

1:12:02

So what do we do to educate people without discounting?

1:12:10

Their want to not believe Nathaniel, what do we do to advocate for this? What do we do to get out in front of this situation? And whether you know, whether you put the label of molter on it or not?

1:12:26

How do you make people aware of it? Before we let you go?

1:12:31

Well, I look for advocacy, I want to be an advocate for

1:12:36

experiences that are not not getting their stories told and really, who have no representation. You know, when I first started talking about the behavioral pattern of the bolter is and how, you know, it wasn't just that they were attracted to the women that they were trying to replicate through their wounds. I started having women reach out to me, email me, you know, message me on social media saying, hey, you know, you won't believe this. And I never told anybody, you know, but this is not just one woman, I'm talking to at least a dozen where these these women say, you know, I was being abducted and, and being accosted by these entities. And so I got a hysterectomy. And once I got the hysterectomy, wow, you know, literally to the point,

dude, I'm telling you, I'm telling you. So what happened was they never told their story and get passionate. Christopher man I'm telling so they never told they did they never told the story because they believe that, you know, people are gonna freak out. They're not gonna believe me, I'm gonna sound crazy. But once I pulled that behavioral pattern out of history and said, Hey, listen, this is what I'm noticing. All of a sudden, they come out of the woodwork. I had one woman who said that she's been abducted her whole life, and that she had a hysterectomy. And then one night, the same entities tried to abduct her, they were hovering over her. And she said they were running tests on her body. And when they realized that they that she no longer had the ability to procreate with them.

 1:13:55

They, they verbally abused her,

 1:14:00

made fun of her body, and then they just left her completely alone. So that's why I'm raising awareness researchers. It's not just beauty here thereafter, right?

 1:14:10

They're looking to self replicate through these weapons.

 1:14:14

Wow. Yeah. And I mean, we need to do a whole episode on that. A whole episode on the hybridization.

 1:14:21

What is possibly going on? The once again, the rabbit hole goes far and deep when you get into these things, and this is just the surface of the topic of Moltres their connection to

 1:14:38

aliens their their connection to the abduction phenomena, even though they are not aliens.

 1:14:47

Man, it's a it's just so mind numbing. Nathaniel Toya to sit back and think about it. And I'm so glad that there are people like you who are not only advocates

1:15:00

In this and getting this out there and getting this information out there.

1:15:05

But reports from people without judgment.

1:15:10

Right, right. Where can people go to get a hold of you? Where can they go? To find your work? Where can they go to give you a report? And help further this research in case so you just have a website, but then I thought, man, well, I have a website when I'm all over social media. And I'm on social media more than I was on my website. So you can find me on Facebook, Instagram, and YouTube, all under the name on this Daniel Gillis, sort of Daniel J. Gillis. I'm trying to build my YouTube channel.

1:15:47

You know, I don't have a podcast like you do. But what I do periodically, try to do it once a week, I'll get on my YouTube channel. I'll update some people on my research and for about maybe 2030 minutes. That's how you reach me the college that you did was great.

1:16:03

Oh, you saw that? Sweet. Yeah.

1:16:07

And that was just a cursory touch of it. You know, there's a lot more to get into. And perhaps that's another show. But I've really enjoyed myself once again, brother, and thank you so much for having me on. Hey, absolutely. You can go find all of those videos, folks, you can go to curious rome.com forward slash VIDEOS. We have Nathaniel's channel embedded there. We are always here to help incorporate our guests stuff and make things easy to find for folks. And help support our guests. So stop on by check that stuff out. Everybody, Nathaniel, thanks again. As always, for coming and sharing your wealth of knowledge. On the

1:16:50

demonology on the topic tonight of Moltres your work is so entirely important. Please do keep it up. Thank you.

1:16:59

I'll do my best brother. You guys have a good night. Absolutely. Man. Thank you so much. We're gonna go ahead and let you go. And while we let Nathaniel go, folks, once again, so sorry for the technical issues at the beginning of the episodes, the hiccups in the feed, all that kind of stuff. Very, very sorry about my my voice. I really don't know what's happening. I woke up the other day and was just stricken man, as you will hear in our upcoming pre recorded episode segment with the Southeast Texas Bigfoot folks. I was that way a few days ago. This has been like three days ongoing, so we'll see what's up. But man, I cannot wait to go to Mineola Texas. And check out these guys. See what they're all about. See their amazing conference. We're gonna have folks like Nick Redfern out there allow Blackburn, Daniel Allen Jones, her good friend will be out there. Stay tuned through this commercial break, folks. And we will be talking with Southeast Texas Bigfoot

1:18:08

about the Southeast Texas Bigfoot roadshow right after this.

1:18:53

With the rise in attention to the health benefits of cannabis and cannabinoids including CBD, drew him science has become one of the premier providers of full spectrum CBD and CBD related products using a proprietary spideroak process. Through him science extracts maximum benefit from the whole plant buds, leaves, stems, seeds, even roots. Every part of the plant is used and then reused to formulate a rich Complex Profile of CBD, CBD derivatives and terpenes guaranteed to provide the relief and benefits you need daily. Visit true hem science.com to experience the best CBD oils, edibles and topicals on the market today and use code curious seven to save 7% off your entire purchase of \$50 or more and get to 25 milligram CBD cookies or brownies free. That website again is drew him science.com and the code is curious seven

1:20:30

Have you considered starting a podcast? Looking for a way to make your business a voice of authority in an industry? The podcast Cadet is the solution for you. Whether starting a podcast for yourself your brand, business school, church, or just plain fun. Podcast Cadet is here to help you navigate the waters of the podcast industry, specializing in one on one consultation and training with industry professionals in fields ranging from podcast technology and editing, to distribution, monetization and even social media strategies. Podcasts Cadet tailors their services to the specific needs of you and your podcast. Do you already have a podcast and trying to find ways to engage and grow your audience? Sign up for your podcast Cadet audit today, and let us help you explore new and exciting ways to leverage your content and elevate your podcast brand a whole new level. From consultation and workshops to affordable podcast production and maintenance packages podcast Cadette is your one stop shop for everything podcast related on the internet. Visit podcast cadet.com today to sign up for your consultation or training and use code curious 20 to save 20% off your entire purchase. That website again is podcast cadet.com.

1:22:24

The curious realm Podcast is your source for the latest and greatest news and events in the world of the paranormal, esoteric and forbidden knowledge. And there's no better way to spark the conversation than with items from the curious realms store. Choose from fan favorites like hoodies, mouse pads, coffee mugs and more. Buy books and items from your favorite curious realm guests. Get your hands on the latest gear for paranormal investigations and experiments we discuss on the show open your web browser and stop by the curious realm store at curious realm.com forward slash store to buy the latest curious realm where and out of this world gifts for yourself or your family or a mind that you want to open.

1:23:13

That website again, is curious realm.com forward slash store.

1:23:22

And welcome back. Everybody. Thank you so much to all of our sponsors, especially our new sponsor, web works wireless. Those guys are still working on their website, but they are coming up with some great solutions like what we have been using Mobley for our live stream web feeds. And speaking of live stream web feeds. We have been very, very proud this year, in our inaugural year as curious realm to become sponsor of numerous shows, including the upcoming MUFON symposium.

1:23:57

Folk monster festival and our guests this evening are actively the founders of Southeast Texas Bigfoot. There's a fantastic Facebook page and community dedicated to that as well as the Southeast Texas Bigfoot roadshow coming to Mineola, Texas, April 29. Welcome to the show, Russell and Michelle Miller. How are you guys doing this evening?

1:24:27

Doing real good. Well, I appreciate you you're having his own. Oh man. I have been excited to have you guys on number one I love to talking about cryptozoology. I don't think there's a lot of researchers out there. There's a lot of people that research things like UFOs, paranormal things like that. But when you talk about cryptozoology, you are talking about a very specific niche mindset and a very specific group of people.

1:25:00

people that are willing to accept

1:25:04

something that is well beyond the norm.

1:25:07

And people that are willing to say that, yes, we should explore these topics more these topics that you know, Native American cultures have spoken about for generations, and just accept his reality that we kind of go. Well, you're silly.

1:25:26

So kudos to you guys for starting the Southeast Texas. Bigfoot group. Everything else tell us about? What brought you to the study of cryptozoology? What was it the first cut you interested in Bigfoot? Both Russel and Michelle? Let's hear that from both you guys. Before we get into how you started the conference and everything else.

1:25:53

All righty, yes, about 1213 years ago.

1:25:58

We used to be we started out as we believe paranormal. And we used to do ghost hunting and go into different areas and putting out recorders and asking for EVP sessions. And

1:26:15

we did that a few times. And some friends of ours told us about an old cemetery from the 1800s. Over in the little town of Saratoga, Texas. So we went down this road. And we was doing our EVP session down there, probably about two o'clock in the morning on a Sunday night, and didn't get anything. But the funny thing was, as we was driving in my wife and my son, there was four of us in the truck, heard a whistle outside the window, we really didn't pay too much mind to it. My God out there, done our little EVP session. And on the way out, we stopped again, and we just sit there and with the truck off, and no moon out is dark. And

1:27:07

we just sat there and was listening to the woods. And I was like, pretty much everybody else. I thought we was rather we thought it was the big Eclipse was up in the Pacific Northwest Area. Sure, not around here. And we were sitting there for about 10 minutes. And all of a sudden, we heard a real loud, Liam break. And then we heard loud footsteps coming through the forest. And I mean, you can hear it Trump and down bushes and snapping branches. And it's really, really scared us. We didn't know what it was. So we started to truck up, we took off. And

1:27:49

there was a couple other little paranormal outfits out there. And I mentioned something to them on Facebook about it. And they said, Oh, you must have heard old mossy back.

1:28:01

And I said what is that? He said, That's what they call the big slick creature out there in Saratoga. So I was a little

1:28:10

interested in that we looked at up and that basically started our whole trip down this, this

1:28:19

last what we're living now, it was

1:28:22

here all this time, we thought it was you know, several 1000 miles away and come to find out they're right here in our own backyards.

1:28:31

And the more we dug into it, the more we found other location. Yeah, other locations that was easy for us to travel to. So we just started doing Bigfoot research and trying to see what this is.

1:28:49

We personally, we believe it's a flesh and blood animal. And there's other people who have different beliefs. And that's fine. Everybody can believe what they want. And we don't hold that against anybody.

1:29:03

But that's basically what how we got started in and

1:29:08

we just took it back line and sinks and went and got some big light bars for the vehicles and

we just took it hook line and sinker and went and got some big light bars for the vehicles and some dash cam so we could possibly catch it crossing the road. And we've been just actively doing that for about the last 13 years now. Wow. Wow. And you know,

 1:29:26

like I said in the show, intro and the show promo the paranormal, the the way that paranormal groups work and the cooperation and the cross compatibility between people and the use of different skill sets. It is really amazing.

 1:29:45

The kind of team that you can actively assemble to go out and research things like this now, you actively sent us a couple of audio clips and now granted I have I've listened to shows like coast to coast

 1:30:00

For years, I've listened to numerous podcasts for years.

 1:30:05

There is one of these clips that use think specifically that is probably one of the better whoop clips that I have heard. And that is the clip that you sent from the Sam Houston State Park. Now, what what allow you may not be familiar with about Texas, is that as opposed to many states, Texas, other than like frozen tundra has literally just about every landmass known demand. We have mountains, we have marshes, we have swamps, we have forests, we like plains valleys, like everything.

 1:30:46

East Texas, in specific is known as the quote, Big Thicket. just insanely huge, large, thick pine forest. Specifically up around the Sam Houston State National Park, I spend quite a bit of time as a kid up around that area in the Livingston area. And I'm gonna go ahead and play this clip, which I actually took, I'll make sure and give you guys a copy of this because I actually went through and well Manado engineers, so I nerded it up and cleaned it up.

 1:31:17

But Let's appreciate that. Let's let's take a listen to this because I think it is really, really exciting and some fantastic whoop evidence that you guys caught on tape here.

 1:32:20

Never before

1:32:30

the most intriguing pieces of audio that I have heard in years when it comes to Bigfoot sightings when it comes to anything like that. Let's get into your experience of recording that because as you asked in the during the recording rustle early on, is that a dog? And like you said, Michelle, I've been recording for years out here. I've never heard anything.

1:32:57

Yeah, I've spent years out in that area and never really heard anything like that. Let's get into that evening and what led up to that recording.

1:33:10

Okay, I was working night shift. And I was working six days a week. And so the

1:33:18

on Sunday night, I didn't want to mess up my sleep schedule. So we would just hang out and watch movies do something just like it was a regular night of work. And we decided to go out to the same Houston. And we went out there and there's a little area, there's an old bridge, and you can park up on the bridge. And we sat there and I got the recorder out. And we set it up on the roof. And we just sit there with the wind is down in pitch black. It's probably about one o'clock in the morning on a Sunday. And we wouldn't hear anything and all of a sudden that were you hear where it started. That's exactly what it sounded like that quick. And it went on for about a minute and a half. And then it was silent.

1:34:03

But there's some of that scraping around noise I'm reaching on the roof trying to get the recorder off. Yeah, cuz I'm ready to go. Yeah.

1:34:12

You know, crazy. Even even before I cleaned it up, my wife has an editing station for her podcast right behind me. And she was behind me doing some work. And I had I had literally just downloaded it and prepping it for today.

1:34:29

And she was like, "Wow, what's that?"

AND SHE WAS LIKE, WOW, WHAT'S THAT?

1:34:34

That sounds really wild.

1:34:36

And she's she's not really familiar with these things. She doesn't watch a whole bunch of Bigfoot specials like I do. You know?

1:34:45

I'm lucky she watches some curse of Oak Island with me. So for her to be intrigued to begin with, was was amazing, much less for her to hear it and be like wow

1:35:00

What's that? So for me to take the opportunity to be able to clean that up and make it a little bit more audible and clear was fantastic. And once again, I'll just play it softly in the background.

1:35:14

Because it's just, I think it's

1:35:17

a third or the fourth one. It gets really loud. Yeah.

1:35:28

Fascinating

1:35:43

it's just such an intense sound. And like you said, there is one that was right there that just goes off the charts with it. And it's like, wow, wow, you sure heard it in person was echoing through the woods like you can't believe? Yeah, it was awesome. Yeah. And I'll bet chilling at the same time whether you're in a vehicle or not.

1:36:07

Yes, exactly. No, we, if you Googled Sam Houston National Forest, and Bigfoot sightings there Saudis that go back 40 years? Oh, yeah. Absolutely. And

1:36:22

a lot of times, we've went out there and got nothing. And then other times we go out there, and something like that will happen.

1:36:32

Now, how often do you guys capture something like that? Like, you know, like, one trip out a 21 trip at a 50? What are the odds that you would say,

1:36:45

that you guys normally experience on that end?

1:36:49

Something about like one out of 10 or so. But sometimes all we get is coyotes. Yeah. So we'll get out there. And we'll do a little bit of what the TV show does. And we'll give a howl and we'll do a wood knock. And just sit and listen. And

1:37:06

and listen for the for response. Sometimes it happens sometimes it's just not but a bunch of coyotes. And, or like last weekend, we went camping last weekend and

1:37:20

me and my girlfriend's we just kind of were out there doing our own thing. And then we put a recorder and just left the recorder all night long. And Russell has analyzed that recording. And there's a how it's a plain as day house, but it's far away. It's not real close up. So it's about an hour after they left. So I mean, it's it's hit and miss time you go out in the woods, or even if you just are taking, you know, just a hike through the woods, it's just hit and miss. And we were very fortunate to have gotten those. Well, and you know that that brings to mind a

1:38:01

How often are you doing things? And when you are what are your methods? What's it what's the methodology is that the fact that you know, you go out set up a few trail cams, maybe

maybe a few sound activated recorders, things like that. Leave them for a few days and come back collect them. How are you guys going about doing this? Exactly what you said, we go out there and leave the recorders out. And to be truthful. A lot of the places we go is a public area. Oh yeah. So you have to camouflage or had your recorders so that somebody's just not hiking along and grabs it. Yeah, we have lost some things. Oh, I'll bet I'll bet and

 1:38:47

the in the game cameras are the same way. I mean, you gotta really camo with not only so the animal won't see it but so people don't see it and

 1:38:57

then again there are times when we go we just sit we will we'll just pick a spot we'll put a you know, before we even roll upon the location we have our recorder going and the time the date

 1:39:13

Yeah, location, general information, no Moon Moon, rainy Saudi whatever. And we just will put the recorder out on top of the car and we'll just sit at times and

 1:39:28

see what happens that way. It takes a little while for your eyes to adjust. But we used to have the night vision monocular like a single binocular and it's good for seeing things moving and stuff in the middle of the pitch black dark. Yeah. But then we went ahead and

 1:39:52

bought a FLIR Scout who it is a thermal imager and they you talked about really nice thick yeah

 1:40:00

Ah, oh yeah, you can, you can see stuff

 1:40:04

away, you can video with it. You can take pictures with it. And this thing I can go up and put my hand on a tree for like five seconds and then move my hand. And you can see my handprint still on the tree after I walk away. Yeah, yeah. So it's all off the thermal. It's really nice. And, you know, especially bringing technology that like that to the table being able to leverage that is, and you know, that that was at one point stuff that would have been in the realm of like,

1:40:34

high end, scientific kits, things like that. The common availability of that stuff now is so amazing. Yes, and the quality of it is so as someone who is an audio video engineer, the quality of products, and the footage that you can get is amazing. Now, granted, there are detractors even amongst our audience, guys who who are like Bigfoot by you know, I don't ever every time you see one of those pictures that things that things blurry is can be, you know, yeah. It's someone who runs video cameras for a living I challenge you to just be walking down the trail here, see something, get on shot, zoom in and get it perfectly still, when you're adrenalized and going, what the heck was that?

1:41:27

I challenge you and I'm a professional. Yeah, that's what I do. And you go like, Alright, oh, the guys in football. Do it like, yeah, they have a million dollar camera that is built to do it specifically. Yeah, to do and they're waiting there knowing something's gonna happen. So well. Well, yeah, yeah. They're anticipating to begin with, but regardless, they have a camera that stabilizes and does not lose focus no matter where they point. Yeah.

1:41:56

So that's the reason we go with the dash cams. Because if you've ever been driving down the road and seeing a deer or rabbit or a coyote, something run across the road, it's pulling happened. Within two seconds. It's across the road and gone. Yeah, but if you got that dashcam run and you got it. Yeah. And that's where a whole lot of sightings have been recorded is crossing roads. Now. Have you had the opportunity yet to capture anything on your FLIR dash cam, anything like that?

1:42:27

I guess it was Polly back in 2014. We was at Caddo Lake State Park. Oh, gotta love that place. Caddo Lake is the only natural lake in the entire state of Texas. Yep. Everything else is manmade. And you go up there and you're expecting a dinosaur walk out. Yeah, it is. So prehistoric looking. We're driving around the back up there. We went camping for a week up here in 2014. And was driving around. And like I said, we got the big light bar up on the truck. And we're coming down this dead end road. And when there's something about a quarter of a mile away, there's a big green sign that shows the next road coming up. Informational sign, and that big light makes it pop real bright green. Well, we see something walk in front of that sign, about halfway up the sign. And I told her I said must be some hunters out here. And when we got up to the sign, we noticed it's pretty high up off the ground. So we said well, I went ahead and shut the recorder off because I didn't want to actually try to chance of recording over it. Sure. We went on back to the tent, or the cabin got up the next day and drove out there. The bottom of the sign is eight foot six off the ground. Wow. And we seen a head and shoulders above that, wow. Right there where it was walking, there was a farmhouse across the street. And it crossed the road in front of the sand. And there's a big big, like a game trail. But a very big game trail. You could almost drive a truck down through out into the woods. It was banned.

It was real big. And but like I say it was about a quarter of a mile away. And it was only 100ollar dashcam. So you can see a little bit of movement. But you can't get you know anything out of it. Yeah, yeah. Nothing, nothing of any true definition. In that way. Yeah. No,

 1:44:27

to have someone else analyze it. And they also said that they could see movement in front of the sign. Oh, you can't really tell what it is. Yeah. Now, Michelle, question for you real quick. And this is an honest question from

 1:44:45

a husband to a wife here.

 1:44:48

Was it him? Are you the drag the other along amongst this? And

 1:44:56

actually, I think we came to the conclusion that we wanted to do it too.

 1:45:00

Yeah, I mean, ya know, like he said, we used to go ghost hunting, we were really heavy into ghost hunting, and we got to go every chance we could. And he would kind of be the researcher, he would say, why don't we go try here and I'm like, let's go. Let's get that vehicle packed and gone. And it was just crazy that that happened. And actually, it's called the lance Rozier unit. And it's in the big ticket. And if anybody knows anything about it, there's a cemetery at the very dead end of this thicket, and we were just out there just doing our thing. And that's what got us started in two big flooding. So yeah, hey, I'm ready to go. And he's ready to go. All we got to say is, hey, let's go and we grabbed our big foot box is what we call it, and we're going yeah, man, that's what it's about. I personally have a have a go kit with you know, I mean, everything down to Geiger counter.

 1:46:06

Like, yeah, it's geeked out and ready to rock.

 1:46:11

You never know. So yeah, it's it is there. It's ready. That's how nerdy I am.

1:46:18

I always love especially whenever there's couples, finding out how that got started amongst the two of you, because it it's interesting. Whenever you have a couple involved with this, or a couple involved with business that way, sometimes it does not work, like probably about 70% of the time. But man, the 30% that it does. It's normally just such a beautiful relationship to see happen. And to see you guys out there not only doing this and starting up the you know, Southeast Texas Bigfoot page, but also starting up the Southeast Texas Bigfoot conference. Now, the Southeast Texas Bigfoot roadshow.

1:47:03

Let's get into that real quick, because that's kind of how we met. I was I was looking for events here in my backyard in Texas that I could go be a part of.

1:47:14

And I ran across you guys, because our mutual friend and guest on this show, Daniel Allen Jones, is actively hosting the upcoming conference. And we got to talking about it. Yeah. I was like, oh, yeah, cool. You know, those guys? Well, I'm definitely going to reach out to him.

1:47:32

And I'm so glad that we've met and that you guys have come on. So tell us a little bit about the origins of the conference, how it came to be in historic Mineola, which accurately has one of the most haunted locations in Texas? Yes, yes. That's actually what did it.

1:47:56

Are you the hotel?

1:47:59

No, we're not at that hotel. We're in another one. But there's some friends of ours that are going to be staying there. They I and my technician are staying there.

1:48:09

Okay, cool. It was hard getting a hold of them. Their website was not like, you know, Hey, come on in. Yeah, I contacted them and asked them if they were still renovating. Or if they had rooms to rent. They're like, Oh, we're open. Like, well, yeah, yeah. Okay. Do you have pricing?

1:48:27

Yeah, just recently, they opened up or they opened back up. Yeah.

1:48:32

And she's really nice lady. But yeah, it is a haunted location. So you're gonna have to let us know if you hear anything. In the middle of the night. I'm bringing infrared cameras, all kinds of stuff for both of our rooms. So very good. Yeah. Well, tell us a little bit about the history of the conference. And once again, what's your what brought y'all to bring it to Mineola?

1:48:56

Okay, well, several years ago, once we finally found out about the big fitness stuffs going on around here,

1:49:04

we was on the internet. And I seen on Facebook, I seen where there's another guy by the name of Craig wall heater, which was a guest of yours recently. And he has the Texas Bigfoot conference. Well, we went up there and I'm telling you right now, we were in love everything. There's Bigfoot and we had such a good time. That's, that's what started us camping in Cabo, which was about 20 minutes away. And then we would just go to the conference, and met a lot of nice people. And it is the thing about Bigfoot is

1:49:38

some there's a lot of people who's afraid of being made fun of or teased about it. And when you're in a room with several 100 people, that has the same mindset as you it really is a good feeling. And it's just like we're a big family up there.

1:49:56

We was

1:49:58

talking about we went

1:50:00

A couple other conferences and Foulke. And

1:50:05

the we decided to.

1:50:08

I said, you know, we were talking one night, I said, Why don't we put on a conference? And this was in 2017. Oh, wow. And so 2018 was our first one. And we actually had cliffs and Bobo from finding Bigfoot there.

1:50:25

And we had looked around for some place that could hold maybe four or 500 people. That's all we were expecting to be honest. Yeah. And we ended up. We had 1100 people show up. Wow. Yes. And it was just crazy. And all the vendors sold out everything they had. And it's just, you know, all the food, all the hats, this, you know, everything. But we had a bunch of guys there. We had a real good time. And everybody had everybody

1:50:58

had a good response about it. So we decided we're going to do it again. And the following year, we did it with the there is a antique style paddle boat on Lake Conroe. Yeah, it's called the southern Empress. Yep. And we did the dinner. We rented that for the whole Friday night. Oh, wow. The people, the 120 people got to eat dinner on there, and go around the lake for about four hours. So we had a great time. And then the next day is the conference. And then we had a big lineup and a luau. And everything planned for the third year, but the COVID cancelled it and got us again last year. And so we decided we're going to switch gears a little bit. I mean, we could still be back there. But I had so many people private message me and or us and saying, oh, man, when Can y'all come over here? Well, I had met George Jones. He does the tower paranormal conference. Okay, we met last year and was talking and stuff. And I found out he is the general manager over the theater in Mineola. Select the Select theater. Oh, wow. And so we were just talking and he said, Man, you ought to bring it there to the theater. And we've made Michelle's talk and said, Hey, that sounds like an idea. We can move it around, you know, and yeah, and change venues and stuff. And they just so happened to own the across the street, they own a building over there, they called the annex. Okay, where they keep all their props and stuff, because they do live theater there, too. Yeah. Well, that's where you're going to be set up along with the other vendors and the speakers to cool. And yeah, and

1:52:44

we, like I say, it's gonna, it's gonna be really big. The mayor of Mineola is going to come in Saturday morning and greet everyone. And they're going to close off the street in front of the theater on both ends. So we can have vendors out there selling food and crafts. So we're really excited about it. And this year, we decided, we've got four Bigfoot speakers, a UFO speaker,

which is Daniel Jones, yep. And then the paranormal slash ghost speaker, which is George Jones. So we're gonna just dabble our foot in that and see how that feels. And if we may extend on to that. So

1:53:26

we just like changing things up. We do have something in the in the annex. It's called researchers row. And we take actual boots on the ground researchers, friends of ours, and they're gonna be in there seated at these tables, willing to talk to the public and talk to him about anything.

1:53:46

So besides being able to see the speakers that the majority of them have been on television, or different TV shows, monster quest, everything besides seeing those in here, and those guys, you can actually talk to boots on the ground investigators. Right here in Texas. Yeah, in this area. Yeah. And they usually bring evidence like cast,

1:54:09

pictures, pictures. Some of them play a video on a laptop. Yeah. So they're expeditions or whatever. And they like talking to the public, and they like sharing their experiences. And is this is just another way for people who are interested in Bigfoot to learn about Bigfoot. Yes. And that's what I love. Because I mean, myself.

1:54:36

I'm a comic fan. So and back in the day, I'm not gonna say it wasn't popular to be a comic fan. comic fans were always comic fans who didn't care. Who knew. Yeah, we were comic fans. But there were comic cons. They were not cons that you see today. They were they were not sponsored by the city of Houston. Like Comic Sans is

1:55:00

with like, superstars coming and get a VIP ticket and get pictures with yawns, and Stan Lee, I remember one yes. Where I saw Stanley and got his autograph one. Yeah. And that was a huge convention that happened at like Hofheinz. Pavilion at University of Houston. aside for that, yeah, they were they were typically like at a really small little like Ramada Inn inside of a very small room with like, 50 tables.

1:55:33

Even the one when like, spawn came out, and spawn number one was released to the public. And yeah, comics happened. Like, I think there were maybe 1000 people there for the two days

that it happened, you know, whereas now, if that happened, there would be 10s of 1000s of people over there, too. And several Day event, yeah. So that that's, that's where we're at nowadays, with events with people of common mind. Whenever it comes to things like this, when when people in a community hear about it, they make time to make their way out. And it's really cool that you guys have taken the effort to once again, not just

 1:56:19

because I remember whenever I first got a hold of you guys, there were some people in the Facebook group, they're like, oh, you know why you're taking this thing all the way up there.

 1:56:28

And to put it the way you just put it the fact that you are now making it accessible

 1:56:34

to people that maybe couldn't make it all the way out to Conroe every year. Yeah, yeah. No, that's, that's fantastic.

 1:56:44

I'm not gonna spoil anything yet. But we've already got our set sign on next year. And we've already got a venue, but we're gonna keep that under our hat for now. Okay, and it's gonna be really fun.

 1:56:57

Now, we've got you for another few minutes here about another 2030 minutes. But, um, let's, let's start getting into where

 1:57:09

no, earlier you said,

 1:57:12

you Yeah, I also believe that Bigfoot Sasquatch, Windigo,

 1:57:20

whatever you want to call it, these, these things are active, real animals. There are a lot of

people once again, even in the community that I started on Facebook, things like that, that will look at me and go, Chris, you're a crazy person. Yeah, what I propose to people all the time, or what I'm about to pop up is from nasa.gov. This image was taken in 2012. Now granted, yeah, there's been some growth. But it hadn't been a crazy amount.

 1:57:51

Yeah, this is just what the United States looked like, at night, overhead from space in 2012. Now, note, there is about half of the country that does not have city lights. Yeah. Because there's no city. Nobody lives there. It's wilderness still.

 1:58:15

Yes. So when people are like, Oh, well, you know, there's so much like, We've been everywhere. What are you talking about? No, really? Not really? Not so much. So when you talk about places like the Northeast, where we literally have rain forests, where you talk about places like the Big Thicket part of Oklahoma, especially, where there are parts where you can't even see 12 feet in front of your face, much less get through it. But there's wildlife in there. There's, there's deer that live in there. There's there's bears, there's all kinds of stuff.

 1:58:56

Get to me to think I mean, we discovered 1000 new species last year, and there was a pandemic. Yeah, you know,

 1:59:07

to me, it's foolish to think otherwise.

 1:59:10

Well, one thing I was I got people ask me, you know, when I was working, I'm retired now, but when I was working, they'd say, Oh, there's the big foot guy, you know, cuz I got a sticker on the back of a truck. What did you do for a living? I was the safety coordinator for a construction company. Oh, yeah. So so no foolish job. It's not like you know, you were you were like, not that a mechanic is a poolish job or anything but yeah, I mean, yeah, you were somebody that was trusted your signature when on things and buildings was because of you, man.

 1:59:44

I had a real good time.

 1:59:49

 1:59:48
But it's just

 1:59:50
I used to have guys asked me, you know, oh, man, you know, there's the Bigfoot guy. But then after we got in the office around the field, where it's just me and him Yeah,

 2:00:00
Then I say, Man, did you really believe in it? I said, Yeah. Well, man, let me tell you something. I heard something. And then but they're afraid of getting ridiculed. Yeah. By co workers and friends and family. Yep. And one thing I tell people, if you've ever heard a wood knock, I mean, if you're outside and you hear something out in the woods, and it's pop, it sounds like a bat hit the tree.

 2:00:25
Well, there's only two things on the face of the earth that's got an opposable thumb. That's the eighth. And that's us. Yep.

 2:00:34
So there's not a coyote, not a wild pig, not a bear. None of that's got an opposable thumb that can grab a branch and strike a tree with it. Yeah. Well, I don't think there's any gorillas or monkeys out there. And I don't think there's any humans out there in the middle of

 2:00:53
Lord knows how many hundreds of acres. Yeah, and middle of the night. So you tell me what it is.

 2:01:00
And it's just, and I'm, you know, I have never set out to argue with anybody about it. Everybody can believe whatever they want. Oh, yeah, absolutely. I mean, granted, there is the contingent out there that as we said, at the beginning of our conversation, that believes in the paranormal side of Bigfoot

 2:01:22
whether that be portals or interdimensional travel, paranormal or supernatural powers involved?

2:01:33

That I don't know, Beats me.

2:01:38

Is it possibly a biological animal that has been seen for generations by peep and there are populations, small, small populations across the globe? Yes. That is that is a firm belief by me.

2:01:52

I think to not explore it as science is foolhardy. I think much, and I do not blame. And I've been trying to get the folks on for a little while. I know that there is another group out of Southeast Texas, actually, that actively is hunting Bigfoot.

2:02:17

And they're like, hey, if we have to throw a body on a table, we will. Yeah. Yeah. That's, that's what it is. That is the dream that it takes for us to protect this animal. And to prove that it is real, we will do it.

2:02:34

Yeah. And I do not blame that that mentality, your thought process at all as a hunter, like I'm Cajun man, my people, like I have people in my family that grew up trapping. Yeah, you know, and, and to those people.

2:02:54

Hunting is food. It's not like, yeah, you have fun while you're out hunt, but you went out hunting something just for the sake of killing it. Yeah, you know, you're providing for your family. Yeah, yeah, precisely. And, and in much the same way, these people are doing the same thing, if it takes us providing you a corpse, to prove its real, so that you will protect it and protect its environment and protect its food source than that is what we will do. Because it kind of seems like that's what science is saying. Every turn that I see every documentary that I see. Where they bring a scientist or a veterinarian, and they're like, well, we don't really have any, you know, like, corpses or bodies. And it's like, well, you know,

2:03:44

you don't find a lot of wild bear bodies out in the woods. Exactly. You you don't find a lot of intact skeletons. Period. out in the woods. There was a there was a program one time that

covered something like that. And they found a roadkill deer. And they laid it out in the woods, and they tied it down with this heavy wire to keep it from being drugged off. And within a week, it was completely gone. Yeah, they had some cameras set up with the, the

 2:04:18
motion.

 2:04:20
The real you know, it's really it's speeded up. And you can see all the decom the the time lapse, the decomposition, and then the different animals coming and scattering the bones. And pretty soon there's some wire laying there.

 2:04:34
Because everything in that animal is a food or nutrition to another animal or insect.

 2:04:42
And, you know, whenever people say, Well, why haven't they found those skeletons? I don't know, man. Yeah, yeah, I'm not gonna argue that I just know what I believe who well yeah, yeah, and I mean, hey, even even on the body farm, like there's a place called the bar

 2:05:00
A farm or literally they take Tennessee Yeah, yeah. Where they take bodies and do forensic work, things like that. And they have to protect the bodies until they go to inspect them with like wire cages. Yeah, that they put over the top. Otherwise like, yeah, raccoons will come and take eyeballs overnight. Yeah, things like that. And how are you going to study like how that eyeballed the cage over a week? If somebody comes and takes it? Yeah. Exactly. Like, even if there was even the case not too long ago of it was photographed I remember of a of a, it was a wildlife officer who found a deer that was eating a human body.

 2:05:44
Yeah. So I remember like something about that was a even it was our will scavenge meat off of gallons and take it take an arm or something and take it off and go.

 2:05:57
That was something they never really considered until really recently, like the last couple years. It was mind blowing, but like, wow, okay, so this is a behavior that we did not know

about. Yeah.

2:06:13

Well, I've got a real good feeling that the whole Bigfoot phenomena is going to continue to grow. And I just, and all I can say is, I'm 65 now. So I hope and pray I see it. Before I go, that I want to be able to see it being proven as a species, and it's accepted and protected and protected. Yeah.

2:06:44

Because there is actually several

2:06:48

researchers who has passed on in the past, you know, couple of years, and they were in their 70s and 80s. Yep. And they never got to see that. And, but I'm sure wherever they are now, they, they know what the truth is. Well, and you know, a lot of those folks,

2:07:09

not, not Bob Gimlin but his friend

2:07:14

Pete
