## SUMMARY KEYWORDS

hijacker, technology, book, uncle, db cooper, plane, fbi, wrote, thought, part, curious, years, flying, hijacking, realm, podcast, find, story, put, seattle

---

00:17

Coming from the city of the weird we're

00:21

exploring topics from the esoteric and unexplored, two dimensions unknown.

00:28

Shining a light of truth on the darkest corners of our reality.

00:33

Welcome to the curious realm.

01:10

Well, hello, everybody, and welcome to episode 13 of the curious realm, Chris Jordan here,

01:18

coming at you in pre recorded fashion again this week. Sorry for other pre recorded episodes, folks. But my industry has rebooted and as of now I am still, at least on the road, one month, one week a month for well, my career is alive AV Technician, things like that. But in addition to that, boy howdy, am I excited for the fact that we are everywhere that you want to be, folks when it comes to events. We have gone out and bought and purchased all kinds of sponsorship packages, you will soon be seeing curious realm if you go to curious rome.com and scroll down to the bottom past the posts, you will actively see all of our upcoming events and man, we have all kinds of stuff. I don't know why it's not populating there.

02:16

I promise you it's there. We're gonna be having all kinds of fun out at the MUFON conference this year in Denver in July. We'll also be appearing at the Texas Bigfoot festival. We will be appearing at the Texas Bigfoot Film Festival. We will be appearing at the folk monster festival. We will also be appearing in live broadcasting our first one coming up with the Bigfoot roadshow in Mineola, Texas. We just interviewed those guys the other day. Sorry about the technical issues with that but it was a great episode and literally some of the best Bigfoot whoop evidence that I have ever heard on tape. I need to make sure to get them there cleaned up version of that.

03:03

We're gonna be having a fantastic conversation tonight. With our guests Marlo and Cooper in the first segment in the second segment, we will be talking Oh, topic in the first second with Marla when Cooper is dB Cooper. She is the niece of DB Cooper and the author of DBS nice. We will be talking with her about the many many folk who have been claimed to be dB Cooper every few years. You'd hear about like we found him. We got him. Even the amazing show with Laurence Fishburne, history's greatest mysteries. It was like we got him. We found him. Like we got this guy

03:44

today. So we're going to be getting into that we're going to be getting into all of the evidence that she has in her book, we're going to be getting into the DB Cooper case and the first segment. In the second segment, we will be welcoming our good friend, Reverend Michael J. S. Carter frequent guests on ancient aliens to discuss biblical technologies. Things such as the Ark of the Covenant, the chest plate of the high priests of Israel, the staff of Moses.

04:15

Other things that you had the possibility of a man or machine that might have kept the Israelites alive with a form of like,

04:23

you know, producible algae, really, really wild stuff that is referred to all over the Bible. And is the Bible more of like a high tech construction and construction manual than just a gathering of stories. So we're gonna be getting into that with Reverend Michael J. S. Carter in the second part of the show. Before we welcome our first guest to the show. Let's Of course, get on over to the curious realm Facebook page and check out the news of the week. Here's just some of the news and Congress

05:00

Asians that we've had going on on the curious roam group on Facebook at a k i B W. K State researchers discover benefits of feeding cattle hemp.

05:11

Out of ABC News go.com new vehicles must average 40 miles per gallon by 2026 up from 28 miles a gallon. Here's one that just popped up out of nowhere and it's been the honor twice

05:27

in the same day folks independent died yuki.co.uk Miss mystery as unidentified alien creature washes up on beach after floods and this is the second article about it that I have posted. I'm sure that before this broadcast airs more will be posted but this creature looks an awful awful lot like the famed Montauk Monster that was that was photographed years ago on the beaches of New Jersey so stop on by check that out. Of course our good friend Mike Thurber was sharing a memory about his interview with the sun talking about the UFO the tic tac UFOs and add a click to Houston my own hometown photos teen Texas teen who posed with drugs, money and guns and posted pics on Instagram. Arrested authority say imagine that. So stop on by. Join the curious realm group follow us on the curious roam page for all of the announcements everything else. But the group is where you can join the conversation. That is where we post all the articles. That's where we have all the great stuff from the news of the week now, before we bring on our guest today.

06:49

I downloaded this special clip out of CBS from this is November 26 1971. This is one of the original reports from

07:05

CBS news regarding DB Cooper and his now famed and infamous sky jacket. When he got on a plane in Portland, Oregon last night he was just another passenger who gave his name as da Cooper. But today after hijacking in Northwest Airlines Jeff ransoming the passengers in Seattle that making a getaway by parachute somewhere between there and Reno, Nevada. The description on one wire service master criminal no Curtis reports

07:34

36 passengers got off the jetliner in Seattle last night left the board for crew members and the hijacker dressed in a business suit demanding \$200,000 and carrying a plane briefcase which he told the crew held explosives with the full ransom collected from the Seattle banks and for parachutes aboard the plane headed for Reno. It took three and a half hours slow for a jet but the hijacker had given detailed flight instructions. The rear stairwell was opened all the way

that arrived at Reno in shreds. The crew here being debriefed by the FBI was told to fly low over Oregon's flatlands with the flaps down the speed dropped to 200 miles per hour somewhere the hijacker parachuted away with the money the crew had little to say.

08:22

Again information and SR ease and they just don't want to discuss it any further. Have you been told by the FBI now you're

08:32

all a

08:34

handler investigation and my company would rather have a release to them. Were you with the with the rest of the crew during during the flight after you left the ground the last time? Yes, I went up to none of you were within sight of the hijacker right.

08:51

We already talked about it and the captain.

08:55

Go. Did you surmise that he was not on the plane when he landed in Reno.

09:02

A search was made on the plane immediately after landing as we understood it, he could have gotten off as the plane taxi before he came up here. How did the crew know he wasn't on when it's

09:15

good now that we at the airport. Authorities not searching for snow covers the mountains in Northern California and Nevada are hostile terrain for any parachute drop especially at night. Police believe he left the 727 in the flatlands of Oregon or Washington, but they are still looking for states even around the airport.

09:34

Search here thinking the hijacker may have jumped on at the end of the runway.

09:39

But the problem is more complex about dB clipper escape is amazing. Some daring like he said parachute escape. Filter TVs nice is the book Marlo and Cooper is our guest Welcome back to the show. Marla Wynne How have you been?

09:57

Great dress I've been doing really really good

10:00

Sam, healthy and well, happy about 10 puppies in my house.

10:08

Like I said in the interview, about nine and a half too many for me, that's I got enough energy with a five year old and now it's

10:19

10 puppies.

10:21

I got the easier job.

10:24

Well, let's start getting into this because, you know, like I said in the intro there.

10:33

And in the pre show the whole, the whole reason I contacted you was because whenever we had you on last time in our previous incarnation, they were actively just getting ready to, they just filmed and getting ready to release the history's greatest mysteries episode on DB Cooper.

10:55

And

10:57

amazingly enough, despite having this, you know, former agent who'd interviewed this guy and gone through all kinds of things, and hey, everything seemed to match up like he worked at a Boeing facility at one point and all kinds of things.

11:16

Ended up come time for for evidence. Nope, not the case. Everybody that they had that they DNA testing

11:27

for swabs from his from his tie. Nope, not the case. So once again,

11:36

I still find your story to be the most credible one out of out of all the stories that I've read. And DB Cooper has been one of those, like, just quiet things that I love reading about, you know, like, He is literally the one that got away, like he is the he's one of the only sky jackings out there, much less unsolved.

12:04

Yeah, you know,

12:07

and the FBI told me, they would never be able to prove the case in a court of law. They weren't that they were not certain they even had the right necktie. You know, who knows where the next it came from? We know the evidence is all painted. And I've expressed reasons for that in the past, which, you know, we can go over again, if you want. I'm sure you have new audience members that were absolutely that it was. This

12:34

is it to me, the more I learned about it, the more I think it's just so obvious. This was a CIA operations. It wasn't meant to be solved. It was meant to be something to put people on edge. Make them afraid of travel, make them want want airport security make them want to have

13:04

to show their ID have to prove who they are.

13:08

They we have always exchanged our anonymity for

13:14

for safety we've always

13:18

exchanged with little by little have slipped away our freedoms for what we perceive as safety. And these alarming needs for more safety, more safety, more safety are often created by a giant propaganda machine. And even just listening to that clip just now. I was like, It even sounds like a propaganda. Oh, yeah, totally. Totally.

13:47

After they play the cartoon in the movie. Yeah, exactly.

13:54

And here come the boys in blue now.

13:58

You know, if you look at even

14:02

I was not a conspiracy theorist. I mocked people like that growing up, you know, my dad was, I thought he was a crazy conspiracy theorist. When we laughed at him about the things that he would say things he would tell us the things that he believes and, you know, now I know he was trying to break through to me, the programming was so strong from every source, you know, whether it's our education system, all media television programs, and, you know, the very term conspiracy theorists.

14:00

14:39

It was it was coined by the CIA, that anybody questioning the official narrative of the JFK assassination would be marginalized and labeled as a conspiracy theorist. And there you watch. From there on out the mockingbird media, it was conspiracy theorists.

15:00

Pharisee theorists conspiracy there's and they were mocked and just saying, you know, how dare you disrespect the president and we've already killed Lee Harvey Oswald. He was a murderer this lone crazy gun man. Yeah, well, now we have a lone crazed hijacker. No, he was not alone crazed hijacker, he was part of a CIA operation, a greater operation.

15:26

That was first presented to Kennedy, under Operation Northwoods, the Joint Chiefs of Staff had agreed upon this false flag operations that would justify us getting into a war with Cuba. And

15:47

President Kennedy wanted nothing to do with that. And you could go back and watch video clips of him talking about the secret society that is, you know, ruling are we you know, we will never be controlled by these secret secret society will will never tolerate it. Well, guess what? They kill him? You know, so yeah, those secret societies that was

16:12

covert operations, whatever carried on through Gladio, A and B. And, you know, we're still living, I believe we're still living in the Gladio era. And those false flag operations, it just continued to play. It's really, really astonishing to me that people can't see it. It's like there's such a pattern to all of it, it becomes so obvious once you realize what the pattern is. And, you know, in the case of the DB Cooper hijacking, there were, to me the most, the one that really opened my eyes that this was, there was propaganda surrounding the hijacking in order to prepare us for this big one. And it was a movie airport. I've talked about that in the past, if you go back and watch the movie airport that was based on a book written by Sir Arthur Haley, who was a former member of British intelligence, and he writes this book called Air cord that was immediately released into like 13 languages. And now it's going to be this fabulous movie with an all star cast had the biggest marketing budget of any film up until that time

17:36

and was released into theaters you know, every if you didn't see that movie, it was kind of like missing Star Wars, you know, for that era. You just got a movie they advertise to hell.

17:40

17:49

And and now it's it's like it is clearly a propaganda keep warming us up to the idea of we've got to have better air airport security. Well into the I mean, so much was it so and, and because there was a whole, there was a mergency, there was, there was The Towering Inferno that like there was an age of epic disaster films, you know, Poseidon Adventure, all kinds of stuff. Specifically things that like happened in Los Angeles. Things like Los Angeles was just doomed, whether it was spiders coming, or whatever, what happened.

18:37

This movie you're talking about was so popular that it spawned airplane one and two, like that's, that's half the jokes that they are making are literal joke Springboarding off that movie.

18:51

Right. And, and, you know, let's, let's go ahead and start getting into because before we get into that, before we get into the concept of false flag before we get into the concept of the bank, where DB Cooper got his money from, and it being a front for CIA money. Let's get into your uncle and your uncle's known involvement with things like Operation Phoenix, Sky hook, you know, all the all these other projects and his involvement in the military. You know, the things that your dad was saying that he used to talk about, stuff like that.

19:37

Well,

19:40

what I remember is, you know, my uncles and my dad talking about the many conversations about guided skydiving.

19:51

There were hushed conversations about

19:55

spaceships, aliens, things like that, you know?

20:00

And, and it was really like, I guess as a kid. And so now it's probably leashed again in my life that I was incredibly intuitive. They used to say more than half ESP. And it was kind of a

20:16

family thing. It was just weird what would come out of my mouth, I would have knowledge of things that

20:23

might, I shouldn't have known about as a little kid, you know, that I just, I had an understanding of things that I was not naturally taught. And so I don't know. I don't know where that came from why that was that. I was literally privy to a lot of conversations. Now, details of some of the conversations are really clear. Others are not, you know, I do remember

20:50

them talking about secret operations and money that, you know, they earned two of my uncle's the two who were performing the you know, who were involved with the hijacking.

21:03

One of them, I know, was a bad man for the mob in Sacramento, and they were both living in Sacramento at the time. And my dad told me, you know, they were both

21:15

involved in in this, but it had to do with their military career. So that just all seemed weird. Well, you know, later, I learned that

21:26

this is all the mob activities, that's fun. Black Ops, you know, it's not part of the federal budget. It's not part of the official DoD budget, that we have these operations that are black, they're not part of anybody's official military record. So if you go look at my uncle's military records, it has nothing to do with, you know, special forces of any kind, where I got that information as an adult team, as you know, through through a general retired generals, who knew him who explained to me that my uncle ran a supply operation during the Cold War years. And he said, you know, he was, he was known by a code name, Linus. And I only knew that because I met someone who knew my uncle had served with him. They both worked for Air America, which was the CIA, right.

22:31

And so he had told me that he had given him the name Linus. And when he said it, it's like the

memory just came flooding, as you know, when they were planning to hijack and then had their walkie talkies out of the woods, and my uncle doing was calling LTE. Linus. And so Linus became this key component to

22:55

me learning what was the truth? What's his military background? And, you know, there have been people, you know, one person in particular, who served with my uncle who knew him and just remembers what badass he was, he was like, you know, he was in for a long time he was, he was like, this old old

23:18

soldier at the time. This young man who was 18, at the time of my uncle was in his mid 30s. And he, he said, you know, he was much older than the rest of us, and we just looked up to him, like, he was some kind of a deity. And I, you know, that really was kind of how I saw him too. Like, as a kid, there was something extra special about my uncle LD, he was the one that, you know, my family, my mother would remember as being crazy and out of his mind, and all of this stuff that I was like, he was the most special and I just felt like I had some kind of psychic connection to him, I guess.

24:00

You know, the rest of my dad's brothers took a far, far, far second to him.

24:06

So maybe I was enchanted by his toughness, you know, that was kind of subversive. Like he was he didn't Don't round up to like, tough guy. But you knew he was a tough guy, you know? Yep.

24:23

Interesting times. But

24:25

you You asked about ever something you said in the intro, you know, you hear these theories. They've got these theories of this person, that person and we're going to prove who it was. And

24:38

I think I mentioned to you on the, on the last one I had, I had become friends with Bob

Rackstraw. Bob Rackstraw was the target of the History Channel documentary that was funded by

24:57

Tom cope air Who was the guy

25:00

And he doesn't really go to school go, investigation. And you know, he made a fortune doing that. And then he had this team of 22 ex, CIA, ex FBI guys. And all of his sleuth doing all this investigation was for five years, they stalked Bob Rackstraw. And then the History Channel does this documentary, we're gonna have this big reveal the DB Cooper case may be solved and all of this stuff. And this was when

25:34

I had, you know, encounters the general who actually was interviewed by the History Channel,

25:42

the people who were doing the production, who were fired at the end, everybody was fired from that project. And the History Channel brings in their own people to do the final edits and put out

25:57

the finished four hour documentary that at the very end, you have Kinomap well, and they can't remember the CO pilots names five, you know, they're on there at the end. And they finally say, No, this guy's definitely not it. He's not, he's not DB couverte with sample bears out, they're still trying to prove Bob Rackstraw was the hijacker. And literally, he ruined Bob rat stroke life.

26:22

And kind of a long, convoluted way of getting to there. But Bob restaurant and I became friends, Bob died a couple of years ago, this summer, it will be two years since he died. And he had, you know, all kinds of evidence, all kinds of files, stuff you want to just share with me that he was he kept it close to his chest. You know, he's like, when we when we can meet face to face. I've got so many 1000s of pages from this FOIA that we can go over what is in the files of the investigation. And, you know, I'll tell you things I know. Well, Bob Rackstraw confirmed something that I had put together on my own. And that was that

27:10

route Himmel thought who was also dead. He was the lead investigator out of the Portland Bureau of the FBI, following the hijacking. It's Bob Rackstraw, who is the most quoted in the early investigation. He's the one who said there's no way this hijackers would just survive this terrible weather, you know. And then he was rude. She was lab testing. hatefully had everybody's terror on the plane, and he completely misled the media, in the nature of my uncle, which raised a red flag for me when I had time to think about it. It was like, he totally took them off the trail took the public off the trail of the hijackers, by making these statements by describing somebody completely different from what my uncle's nature was, which was that he was very quiet. He was very soft, spoken. He wasn't the one drawing attention to himself ever. And he

28:23

I think that, to me, it was like, he was probably hiding him. He was probably involved. Somehow I knew that Raul timmelsjoch had been the handler, or the commanding officer noncommissioned officer in charge of another operative.

28:42

Jerry, I can't remember Gerry's last name now, but he's been involved in that citizens flutes group and really

28:50

suffers. He's very spiteful towards areas. And anyway, Ralph has been his commanding officer. And I thought, you know, I wonder if he knew my uncle if he could have been his handler if he was and then it was like it had to be if you want it. If you're my my compadre. And now I'm assigned to investigate you. And I'm gonna when releasing information to the public about you, I'm not going to say, you know, Chris Jordan, you know, here's where he lives. This is what it looks like. And, you know, now I'm gonna say, I don't know where that guy is, you know, he's got to be, you know, he's got to be dead. There's no way he would have survived the jump. And that's exactly what route did. So I had asked Bob, I said, you know, route helicopters, right? He said, Oh, yeah. And so he was the lead investigator. Oh, yeah. He goes, and he works with your own soul. And that's why that's what I thought. I said, How have we talked about this? You know, I sent out to you know, this and he says, Well, I have my sources, my beer and I can't develop our talks. And I can't tell

30:00

All

30:01

right now but when we can meet face to face I'll tell you more about it Well I did meet him

right now, but when we can meet face to face, I'll tell you more about it. Well, I did meet him face to face. He told me no more about it. That just, you know, things were not as they seemed, with, you know, the whole investigation. And, and it's because

30:19

I, you know, now the FBI is being investigated for all kinds of corruption having to do with the steel dossier. And it's like, I think are all of these entities, these three letter agencies in our country, people are finding out slowly, but surely it is happening? They were not our friend. They were not here protecting us. They've protected criminals? And I'm not, I don't mean that as an insult to the agents I dealt with. I think, as you know,

30:56

I've served honorably?

30:59

Absolutely. But they're getting their orders from somebody above them, who's getting their orders from somebody above them. And there's, you know, multiple layers of people.

31:13

Putting, you know, basically those guys are pawns in a big ol game. And, you know, they're they're held in heck of keeping secrets and being, you know, operating and integrity and following orders and not questioning authorities. Those guys who get targeted for those special agent positions, they are the people who will not question authority. And, you know, I think that that was true of the investigators, I worked with the agents that I work with that you no doubt with me, I think that those guys were legitimately trying to solve a mystery. And the more you look at it, the more you put the pieces together. They knew that too, they knew they were never going to be able to solve that mystery. My uncle vanishes into thin air a year after the hijacking. i My father said he never spoke to him again.

32:14

And then come to find out he's married someone who works in the FBI field office where all of the evidence have been taken from the point. So yeah, like we'll of course, there's not going to be any evidence left, when when the evidence went from Reno, Nevada,

32:34

and from Portland, to Seattle, following 911 When all of the agencies had to consolidate had to share information with each other. It was the Seattle field office that got all of this physical evidence, this whole all the case files from the north ACC investigation went to Seattle, and

virtually all of this physical evidence was missing from that file. The cigarette butts were gone. You know, the glasses that you've been drinking from are never found.

33:06

There's very limited, you know, physical evidence base, and Curtis being who was the investigator in charge of, or the agent in charge of the DV super case that I dealt with primarily

33:20

told me that,

33:22

you know, none of it they weren't sure if they had DNA from the hijackers.

33:28

What they had was a partial sample of DNA from the hijacker that was mixed with something else. Like they don't have DNA from a hijacker. Why are we even bothering with DNA testing, they're just going through protocols. So it'll never be solved officially in the public eye but

33:50

I was in Portland

33:52

while I stayed in Portland, but it was at an event it was the 50th anniversary of hijacking and Eric Ellis.

34:08

Eric Ulus

34:10

was he was the one who put on the event and he has this

34:15

special on HBO

34:18

or whatever is and you know, just to say it, he's just a pretty boy has a popcorn has doesn't doesn't believe in conspiracy. And it's like, okay, fine, you just you've kind of tainted your so by not being open that there's a conspiracy here. You know, we're all looking for one lone hijacker and that's because that's the narrative. That's what the FBI says. And so, you know, that's what we're going with. There's, there's one man in the citizens flu, who has who has said there had just been a second person involved. And it was like, Well, that's good. Now you think it's just two people though.

35:00

I think it was a general operations that

35:04

I was.

35:06

No, I was gonna say I wouldn't say it was a two person operation, but there was definitely

35:15

a lot of cooperation. Oh, yeah, there was. No, go ahead. No, you knew you knew that the that they were changing, that they were refueling in Reno that they were letting everybody off

35:33

and let everybody off and

35:37

Seattle, and then they reached and then they were supposed to refuel and Marino's when they landed the plane the hijackers gone. Yeah.

35:47

No the

35:50

the interesting thing is his intimate knowledge of a 727

35:57

All right, his intimate knowledge of the parachutes that are available on a 727 and as well I mean, of course, it doesn't take a genius to know that there's a back stairwell

36:11

most of the time the passengers were coming up the back stairwell

36:16

Yeah, the role they the top engineers at Boeing did not know that you could skydive No,

36:24

that was very limited knowledge only no to anybody who has been part of the test flights and allows in the winter of 6869 would know this plane can be skydive out of it anybody they told

36:42

it was broadcast that the thing was LD he had Dewey on the ground, who only had to patrol with a walkie talkie a very small area on the ground that was the

37:00

the jump zone the drop zone where where LD was going to land.

37:06

And the reason he knew that is

37:10

and these guys who are trained as marshals who are as the Army Rangers, anybody in special forces do they all learn how to identify locations by six geographical data right so in the case of the DB two for hijacking by specifying you can only fly the plane at under 10,000 feet and

under and you have to keep the speed at 200 knots which was I think that was one of our whatever it was a very close the

37:48

boarding gear put the flaps down

37:52

for the end at 10,000 feet the only way he was going to get out as SeaTac and fly to Reno was honest flight path called Victor 20 The Victor now forgot what is Victor 23 flight path

38:11

it's really interesting guy Dan

38:17

from my Marla Gosh, my like brain asleep don't think a damn last name here in a minute we've actually become friends. He came here to interview me for his show and ended up not interviewing me just play guitars and saying and get a kill time but he'd already decided and made up his mind to

38:38

sample so he really wasn't all that damn glider is his name. And Dan is a pilot. He was a pilot with Delta skydive that is you know all these planes he skydive out of this ID that out of the one of the 720 sevens and he's an expert skydivers. He does a show where he solved how these plane crashes happen. And he's really good at he's very knowledgeable, really interesting guy but he confirmed when you're flying a flight path if you get one degree off you've got the tower screaming at you don't just go you know varying willy nilly flying around the sky no more than you would drive off the highway at 90 miles an hour into a field and go through the forest. The difference is you could do that if you wanted to.

39:33

You can you can't do that in a plane like you got to actively file a flight plan. You don't have to

39:39

flight plan with anybody whenever you leave to go to the grocery store. That's right. And when you're flying that white cat is you vary off of you know that pass by as much as one degree indicates that 1/100 of a degree or some is very small, small small v

40:00

variable in there, you know, there are alarms going off you are, you know, you could lose your pilot's license flying

40:08

off of there. And so, you know, all these lists, saying, well, he could have jumped out over here. We think he went over this way, you know, Eric Ullis, among them, saying that, Oh, you know, we think he went off a flight path and we should be looking for the money over this way. And whatever. None of that ever happened. He stayed on that flight path. And as you know, someone who was trained as a surveyor, as someone who was trained in Special Forces, my uncle knew both uncle's knew at a point on that Victor 23 flight paths because if you'd been in any plane, Lena commuter plane flying back and forth, and they had gone skydiving out of I think it's the whole image that has these. This flood skydiving place that my uncles were at all the time, according to my mother, like every weekend, they were out there skydiving out of a private plane, they were practicing where the jump was going to happen, where he was getting to where, at that time, the peak of Mount St. Helens and the mountain and Mount Rainier would line up like you were citing a rifle. And when that happened, was it exactly the same time? There's a sharp hook in the 23, the Victor 23 flight path. This is what Dan Grider told me about the hook and flight path. And I said, Well, let's compare that to what someone else had told me about the peak lining up and sure enough, it's exactly that thought it's like, you know, somebody practically somebody shoves you out of the airplane with those two things happening. There was no doubt about where when he jumped out for Dewey to be able to find him it was simple for you to find him. And you know the problem was with the parachute was the FBI had found shut that's not part of the official record, but that is what I was told by someone who was friends with Raul Camels Fox that Hillsong bragged about it. We sold his parents shoots shot we know we know we didn't live because we sold his parachutes shut that here again. I think that was a half truth. I think that heaven's voice is telling this to a man named Jack Roland who told it to me.

42:29

I call him con man Jack

42:32

rouse was flying around with Tom and Jack and his aircraft following the DB Cooper hijacking and saying you know, we got to go about to go interview this person that person that is just a waste of time because we know the guy is dead. And personally, I think that that was part of grouse covering for my uncle Vicki would tell con man Jack, con man Jack had a big mouth and con man Jack did all kinds of

43:06

13:55

what was the word that I want?

43:09

He did. He was kind of like a cleanup guy for and and also just he was a snitch he gave the FBI

43:20

information about criminals in exchange for them turning a blind eye to his criminal activities. Like Whitey

43:35

Whitey Bolger did

43:39

but he named Ron Wyden. Right who is still like a Senator for out of Seattle, Washington or Oregon. I can't remember. But he named him as one of the guys that we've done some dirty job for. He's like, Yeah, his house burned down because he needed to collect on insurance or car I blew up this car, I drove his car out, you know, whatever. It was like keep him dirty work for the politicians, you know, these

44:11

monsters, whatever, you know, so they can collect insurance so they could do this or that or you know, pay off? Some blackmail what was happening? I mean, he felt all kinds of crazy stories like that. And anyway, I think that route symbols book told loudmouth Jack Rowland, we know the guy is dead could be so parachutes shut. So that Jack Rowland would tell everybody the hijackers Did you know, because probably my uncle was a compromised asset. And, you know, any there's always other hijackings that happened in that same era that I believe we're all part of Gladio

44:53

you know, these other setbacks, I think that they performed the same type of

45:00

hijacking only they weren't extorting money and so there was no you know, big press release that was kind of the icing on the cake. They were trying to get people outraged for these hijacking because here we are in this economy that horrible you can't get gas you can't like this

right now. Right?

45:22

The gas lines were like a mile long you wait in line for a mile to get gas I remember these things. And

45:31

anyway, the public was supposed to be outraged that this hijacker got away with that money. But instead, they were like, Yeah, stick it to the man. You know, it was he was a celebrity. He wasn't, you know, America's Most Wanted the evil doer, no matter how much the press tried to convince you is that they think people are really like, they saw it more as a hero. Yeah. Now, he remained on the most wanted list until they closed the case. That's right. And once again, what are the only actual unsolved cases that the FBI has much less than the only unsolved Skyjacker

46:11

That's right, is the only unsolved guy jacking. But apparently, Curtis in didn't only tell me, they knew my uncle was the hijacker. He told it to all of those clues. And they pretty much dismissed it. They said, No, we're gonna keep looking, we're gonna keep looking for evidence. And you know, they keep going back to the neck tie. And now they're, you know, they need like, half, you know, couple \$100,000 to do this other tests and blah, blah, blah.

46:45

Yeah, it's like, you guys just can't accept what the FBI really did. Maybe they know something you don't know.

46:54

You can't accept that.

46:58

That blew my mind when when. And the other thing that really got me was

47:04

my shared this with you before you use to be able to go on this website, this guy Sluggo had, and it was called logos nor Jack something rather. And he had all the flight transcripts on there. And there are there's real after real of flight transcripts. And as one tower Yes, a plane flew. The next caller would be picking up the signal for the communication between the plane and

the headquarters of Northwest orient in Minneapolis, and Seattle Tacoma tower where the plane was flying out of and then Marino's tower. And so as the plane flew, there would be a different real depending on which tower was picking up the signal. Well, I've got a map up right now the actual flight path in black, the typical flight path of the plane

48:13

and then the actual route taken which started pretty parallel and then just boy howdy went on a joy ride. That what you're looking at is, wait a minute, what you're looking at in the bullshit that was put out by some citizens. That is bullshit. Okay, I'm here to tell you. They save on the Victor 23 flightpath and there is an old math

48:43

that

48:45

gosh, I think his last name is Scott rack. Radek stack. She was the navigator I believe on the plane. And he is like, he's very old now. He's really good friends. And Grider. Well, they became friends. But anyway, then the whole, the whole reason I brought up that map is because yeah, like that is, at least from what you're talking about with the person that had all the different tower reports and everything else in transcripts. That's pretty much where those came from was hey, yeah, we got it over here. Hey, yeah, we got it over here. So yeah, they're putting it up. But yeah.

49:25

This was really interesting. I'm glad I went to that 50th anniversary.

49:30

This presentation, because damn Grider was not invited to participate. Right. But he was there. And then to be kind of

49:41

those of us has whatever, but he knows the ship when it comes to commercial airlines. He was a Delta pilot for like 35 years, something like that. And then they had somebody who was on the panel of the flight path, who was a towel

50:00

Were operators. And the guy said, Dan, you know, he was kind of re reinforcing what these citizens flutes were saying, which was he was way off. He was way off the path, whatever. Well, Dan interrogated the guy. He got up there and questioned him. And pretty much a comedian violated his belief. He was like, okay, so you only had about 18 miles of that entire journey that you were able to hear, you know, you had, how many minutes of that flight that you heard the dialogue and you're facing disbelief on? Have you ever flown a plane, if you ever tried to really close that it was idiocy to think that they had flown anything but those six or 23 slides past? And there is if you search the Victor 23 iPads on Google images, you can find a map and old 1971 map where whoever whichever one is, the values in the crew members got or Radek whatever

51:18

can say a loved

51:20

one of them actually drew out on the map, the path they took, and, you know, along the Victor 23. So this was, this is where we flew the plane, it was just like this. And he still had the drawing when Dan Grider went to his house and was asking him about it. He said, Yeah, I still got it right here. Here's, here's what I drew out to them. And so I, I would say,

51:51

some people have, you know, I don't even know why the flight path is really in question. Because they're saying the whole or maybe keep veered off this way or that. But the Navy back NBC six, parachute would have dropped him straight down out of the plane, no matter what the parrot what the weather conditions were, whether he got hung up in body tree coverage is debatable. I think that he had a problem with the shoot, and that's why he was so injured. But, you know, at 10,000 People have survived jumps have survived drops from 10,000 feet when they had no parachute as they move out in the tree cover and stuff. So I know for a fact that he survived. But

52:41

I. Anyway, what is interesting, though, is from plugins website, and I couldn't find it. I tried to pull this up before and even I didn't.

52:54

Yeah, when I published a blog, a site is gone. But most of the citizens flute had never read the flight transcripts. And they used to be up on the FBI website, as well as on sluggers website. And now they're not. And maybe it's because I've said it too many times. And even in my own book on, this is so weird. I had a screenshot of

53:27

the flight transcript where it's where there was communication from Seattle,

53:34

to Seattle, from Northwest orient headquarters in Minneapolis, costuming, the courier who was taking the money and the parachutes to the plane,

53:44

that they needed to make sure the courier was not wearing a uniform. It says, our friend has a previous arrest record for drunkenness. And we don't want to think the courier is a cop. That was in the flight transcript. And then there was a clear cut. You could see the the shape, like if you're looking at a type page, and then that you chop part of it off the middle and details perfectly align up the text. It was so obvious that the transcript had been had been cut. And there was about a

54:20

several minute pause. I don't know how many minutes it was there was a long pause before Lieutenant Scott comes back and says

54:30

Roger, which so it's like what was that dialogue? That dialogue? The fact that Minneapolis knew the arrest record of the hijackers, while the plane was in flight crew. They knew the hijacker was

54:49

hijacker was never a secret.

54:53

And that information was readily available when I was writing my book and

55:00

And that was something that I discovered after reading about that little segment in Ralph's handles bucks book, which was called Georgia. And he tells the story of that communication coming in. And then he blasted off. He said, wow, you know,

55:22

what? How did he put it? FBI computers were doing their job. And it was like, did anybody actually read him old buck book who had a brain?

55:33

How would the computer know who the hijacker was? If the identity is the hijacker in fun now, it was really weird to me. And you know, when I read that, but that's when I went looking at the original transcripts. Most of those citizens, people supposedly doing all of this investigation have never bothered to read those transcripts.

55:56

Why would that should be the first place you would go if you want to investigate what happened? I mean, possibly, I would think you would be reading the transcripts.

56:07

None of them have done it. None of them when I talked to him at the 50s. I was like, You guys haven't read the transcripts? No, I don't even know where you get the transfers.

56:18

Do Now either you guys were in this long before I was?

56:24

Well, I will definitely do my due diligence to find those. And you know, you know, say that there's one in California. Why California? I don't know stuff that so much of this mob shit happens in California. But they said that there was one in California that really was concise. You know, make sense. It, it maps the narrative. I think there's what it was. But that's why they liked that. Because yeah, read that went out of California. But you know, that other one that has so many starts and stops because it was from one reel than another reel and one ends and another thing could make any sense that that that doesn't match what we know happened? Well,

57:09

of course, not only what we know happened, but the profilo DB Cooper that's,

57:15

of course, the questions that people ask all the time are, you know, things like?

57:22

Was your uncle ever involved in the military?

57:26

Did your uncle did your uncle have a history of parachuting, skydiving, things like that, especially in the military?

57:38

You know, people ask me, I think you asked me that all the time. And, and I was like, Yes, he did. Is that part of his official military record? No, it's not. And you know, Curtis emailed me about that. He said, he was in the Navy when they're hired

57:58

skydiver I was like, I don't have an explanation for it. But I do know that he and Dewey both talked about their parachuting experience in you know, when they were in the military, what come to find out, you know, the same thing Army Rangers.

58:17

You know, you've got anybody trained in Special Forces, whether they're seals, Delta Force, Ranger, navy, traction units, people who train Navy, navy, folks, survival, all that anybody doing reconnaissance work, that you know what? They're not selling that out there for the public to know who knows how to do what it like, what? Who would benefit from

58:47

that he was he was around the time of the DB Cooper hijacking. He worked for Black Rock, he was a black water, Black Water Blackwater. He was, you know, he's still an active and he's an old man. This guy is in his 70s. And he's like, We're men without names and men without spaces. You're meant to blend in, not to draw attention to yourself. You're supposed to. They're supposed to be incognito. You don't want to be being investigated for war crimes. And so these things are not in their record this like you could be living next door to and you might be somebody who was a CIA operative or the CIA operative, they're all over the place. You don't

59:00

59:38

know who they are. They didn't do their job well enough.

59:45

The main reason why I asked the questions about the military history, specifically the military, skydiving history,

59:56

is of course the fact that well, the CIA

1:00:00

It actively proved through air drops that you could use the 727 as a delivery platform. I think the CIA has the plane designed for that exact purpose.

1:00:18

I think that they held them in reserve at Boeing until they needed them, but that they commissioned Boeing to design a plane that they could skydive out of, without really the public knowing that the purpose

1:00:33

like an ordinary passenger plane for reconnaissance work, exactly. And you know,

1:00:41

not just that, but once again, the the intimate knowledge that DB Cooper had of the plane, the air, the

1:00:50

aeronautics properties of it, and how it flew and how to fly it, and how to properly jump out of it, not just properly jump out of it, but properly jump out of it to the point of comfortability of having a couple bourbons. Yeah,

1:01:09

you're getting ready to skydive. And that might be one thing, you know, if you're like, hey, yeah, let's hop out of the prop plane, you know, 1000 feet, something like that. This a no prop

plane.

1:01:21

You know, you are,

1:01:24

you're jumping out of the back of it, and you're jumping out into the middle of the wash of it, which means you better be highly experienced. Interesting. He didn't know how to lower the stairs, because the ones they were using for testing over loud, didn't have the gap there. They were wide open. They were flying with a hole in the belly.

1:01:52

That the astor's were not on when they were flying. They were off. So he didn't know how to lower the app stairs, he had to have help from the

1:02:03

flight attendant with that.

1:02:06

So that's kind of an interesting little piece of information. Then it man who knew my uncle who identified him by his name, by both his actual name oh, if there's another thing I need to tell you about?

1:02:23

I found out though, from the citizens letter from the, at the 50th anniversary, that

1:02:32

some of them actually had access to all of the FBI records about the case. Well, if you

1:02:40

searched what happened, you know, and I figured maybe it was in a book that I had read that it was the

1:02:52

airline employee, when he walked up and said, I'm Dan, I want to buy a ticket, you know, is this going to be a 727? He asked that question, apparently. And normally, they are well, in either route book or somewhere else. I mean, online, it's kind of obvious thing that

1:03:15

supposedly, the airline airline attendant wrote the name, Dan Cooper on his ticket, and you can find images of the ticket, right? With the name Dan Cooper as it was printed, supposedly by the airline attendant for according to what those blues two had, who were in the FBI got to look at the records and you know, really study the FBI report. She wrote it down name.

1:03:45

And that got me excited, because I actually have a photograph of his old suitcase, but was still in the duplex where he lived at the time that he died. And I mean, this suitcase looks like it's from 1970 something and there's still the residue masking tape on it. Where he wrote his name's Dan Trooper, or Lindsey lens trooper and all you're seeing is that and you know, it's the first his first name when it's kind of partially removed. But the way he wrote Hooper, it's like it perfectly matches on that plane ticket perfectly matches. And it's like the FBI didn't even do handwriting analysis. And the narrative is that he didn't write his own name.

1:04:40

Isn't that interesting? Very interesting. I'll send you pictures. And just so you know, folks, I mean, right now, this is not all in the curious realm knowledge vault yet that is publicly available. I will definitely be adding all of these FBI files

1:05:00

Have the DVD Cooper case to our knowledge vault. But I'm actively in the FBI vault which just so you know, is [vault.fbi.gov forward slash d dash B dash Cooper](https://vault.fbi.gov/d-B-Cooper), capital dBc, folks. And that's where all these PDFs are that I'm showing you about, you know, investigations going as far as Sacramento

1:05:26

unsub, aka de Cooper, Northwest Airlines flight 305. Portland to Seattle, like it's pretty wild. Like, I don't know if I don't know if anything about me is even in the file. I don't think they have released any of my part of the investigation. Yeah.

1:05:49

Like I said, I will have to deep deep deep dive into this.

1:05:53

Because this is just something that I haven't got. I have numerous things about dB Cooper. You know, the things like what I played earlier, stuff like that. But

1:06:05

just since the investigation has been closed, has this stuff been made public? In this way?

1:06:14

This stuff came out. Let me see what is the what is the link say here? I'm trying to say?

1:06:21

Yes. That's what I'm thinking as well. Yeah, that's

1:06:26

the case. They made an official announcement right after this. Yeah. Trade Channel documentary came out. Exactly. And I mean, it's just it's wild information. And wild to think that, you know, like, like you said, like we've said in previous episodes that we had you on our former incarnation, it really seems much more like a dry run. And, and a way by which to obtain money from shadow banks,

1:06:56

stuff like that.

1:06:58

Yeah.

1:07:00

Yeah, it is really strange once again, not that the FBI didn't spend 50 years investigating it, you know, but

1:07:12

to have never solved it to a swung and missed so many times.

1:07:18

Something's just something's just weird about that. When information was was available.

1:07:25

It's interesting that

1:07:28

the other hijackers were all killed. You know, they went to prison. Charges de facto. Yep. Well, and they got out and committed another crime. They were killed. They were you know, none of them are alive. Talks about the operation. None of them. Yeah. That he lives. He lives until he died.

1:07:49

Lou Gehrig's disease.

1:07:53

He had epilepsy, Lou Gehrig's disease, which is very common.

1:08:01

Special Forces. That was a lot of guys who are in Vietnam, did

1:08:08

the secret reconnaissance work side and military? In How?

1:08:14

How old was your uncle when he passed?

1:08:19

him was 66 years old. He died in 99.

1:08:25

And he was born in 33.

1:08:29

And how long after

1:08:34

6699?

1:08:37

Really weird, actually.

1:08:41

How long? That's another thing. I'm sorry. Because it says that he was born in 1931. Even his head says that he was born in 1931. So my grandfather's Bible study that my grandmother wrote in her own hands that I have said that he was born in 1933. And this is how I know his military records are totally fake.

1:09:08

He got it according to his military record.

1:09:14

Well, if he would have already been 18 years old when he enlisted is the point. So why, why lie about your date of birth? He didn't have to, you know if he was truly 18 years old when he enlisted. And according to his official record, he was more than 18 years old. He was like 20 years old or something when he enlisted. That's not factual.

1:09:40

So, yeah. Anyway. Wow. Well, how long after your uncle's death? Did you decide to compile the information that you have in dBs? Nice, and put that out? Because that's, I mean, once again, an amazing story even even

1:10:00

If not

1:10:02

DB Cooper, the story of gronckle. And everything put forth in here is absolutely amazing. Once again,

1:10:10

after seeing numerous things after See you at following the story for many, many years

1:10:17

seems like what you lay out with your uncle seems like the most likely to me. Yeah.

1:10:25

Yeah, go ahead. Yeah, I need to do an update to that book. Because some of the things I'm telling you, I didn't know, when I released the book, I put it out hurriedly. You know, I've been working on it for

1:10:39

five years. At the time that I released it. And I only put it out because of the History Channel documentary coming out where I had shared all of my information with them. I told them all kinds of stuff, I needn't have worried, I was advised by somebody, a friend of mine who had been a producer at ABC News, when I was on Good Morning America, he had as part of the team that interviewed me, and

1:11:09

he advised me a few days, if you gave him all of your proprietary information, you really need. You need to protect your intellectual property by putting that book out, even in its raw form. Yes, you put it on Amazon to sell it. So I did that. And I've never done anything to market it. I've talked about it in interviews, but I'm like, I really never felt like the book was complete, you know, but it was like, Okay, I could see the point of putting it out. Okay, I'm just gonna stick it out there as a markers. You know, this was my inner. This is my information, my research. These are the people I spoke to faze me the knowledge that I have. And

1:11:53

strangely, you know, that

1:11:58

I needed I needed to worry that I was

1:12:01

sorry, I'm sorry. I forgot my train of thought you started to say something about?

1:12:08

Sorry, Chris. I totally lost my train of thought when we're

1:12:13

talking about the what what it took for you to be able to come Oh, like, like you were just with the investigator. You said, if you've done this, you need to get out in front of it right now. Yeah.

1:12:27

So what when it happened is, you know, I witnessed these things as a child. And then my dad took me down after you know, witnessing my uncle, planning the hijacking or out in the woods with them before they went to Portland for my uncle, LD to get on the plane. I was out in the woods with them around Sisters, Oregon, while they're testing the bandwidth of a set of walkie talkies. I've never seen walkie talkies. I thought these are the coolest things. You know, I'm eight years old, and we're about to Thanksgiving at my grandmother's house in Sisters, Oregon. We had come to visit from Spokane, Washington, and we were there for Thanksgiving. And I'm out in the woods walking through the woods with my uncle LD. Who has a walkie talkie, and we're walking the opposite direction from Uncle Dewey, who has the other walkie talkie. And do we keep saying can you hear me Linus? Come in Linus. You copy Linus? And I'm like Linus, laughing I'm eight years old and Peanuts comic book fan. And I'm like, if you're if you're lying is something serious pig. 10 feet was an absolute slog, you know. And then as we're walking, we find out there's about a mile and a half between them and they can still hear each other through the forest. That was important.

1:13:51

And when we're getting back to my grandma's house, I'm calling on full LTV, Linus, and he says, You can't call me that. You can't you can't say that name. It's a secret. It's a big secret. You can't tell anybody that. Okay. Never thought about it again. And so I met

1:14:10

the man who knew my uncle. But anyway, so here I am. I'm eight years old. The next day.

1:14:17

We are trying to watch the Macy's Thanksgiving Day Parade on TV, but All there is is you know this stuff about dB Cooper. And that morning, my two uncles had been back to my grandmother's house in the car of the wealthy is all feed up. They tried to tell me they were in a wreck but the car is not wrecked. None of this is making sense to me. My dad comes out of the house

1:14:42

and, you know, has to have this big confrontation on the driveway. It's all very emotional. Miguel de looks like he's on the brink of death. Where the day before he'd been perfectly fine over traipsing around in the woods. And so this is all very traumatic for an eight year old.

1:15:00

A kid, right? And my dad sits down on the back porch of my grandmother's house and tells me you can never, ever talk about this. This is a secret. I know, we don't keep secrets. But this is life and death. Uncle LD has done something really bad and he could be killed if the police find out what he's done. He didn't actually get away with it, you know? Yeah, he made this lecture. And, you know, I'm seeing the news report that day, this hijacker and thinking how, you know, interesting it is that they do these drawings, but I'm not thinking about this looking like anybody, but looking at those drawings. Now. It looks like my dad, you know.

1:15:50

Anyway, I,

1:15:53

later, my dad, you know, gives us a lecture all over again. And honestly, Chris, I think the mind wipes me because I sneakily just forgot about it. And then he reminded me of it, you know, the month before, a month before he died, my father reminds me of the hijacking. And this was 1995 Christmas, and he died a month later. Honestly, I wonder if my dad got taken out for talking about it. He was

1:16:23

he worked for military intelligence. I believe he was a remote viewer, he had some kind of work that he did an intelligence that he couldn't talk about. but that he, you know, was. he told us he

that he did an intelligence that he couldn't talk about, but that he, you know, was, he told us he could be called back anytime because of the skills that he had. And, you know, I think that my dad did something to make me forget. And then, you know, as a 30, something year old woman, and at Christmas, that year, when I asked him about LD when he said, you know, don't you remember this, he hijacked airplane, you need to write a book about this. Blah, blah, blah. And it's like, I could remember knowing my uncle was a hijacker, but I didn't know anything about dB Cooper. I didn't know what he was talking about. He's like, Marley. You gotta go research. You got to write a book, you have to do this promise thing. He kept calling me when I went back home after Christmas. And, you know, pressuring me about writing a book. And I was like, No, my dad's a batshit. crazy conspiracy theorist. I'm, you know, I get around to this. I'll get around to it. I've got more important things going on.

1:17:33

And a month later, he's dead. And do I think about dB Cooper again? No, not until 13 years later. My mother

1:17:45

brings it up again. My mother is her birthday party said, you know, we were talking about old family gatherings because we're having a big party for my mother. And it's like, wow, this reminds me of being in Oregon and blah, blah, blah. And I started thinking about family. And I asked what do you think ever happened to Uncle LD? And she said, Oh, that son of a bitch was crazy. And I was like, why would you say that? She brought it up. She said, Oh, I just I know he was DB Cooper. And I didn't know who that was. I was like, who's DB Cooper? What are you talking about? My sister comes out and says, you know, the hijackers. And it was like

1:18:27

wind from Heaven hitting me from all sides. You know, flashing back into the conversation with my dad. I'm seeing this

1:18:41

news story that eight years old. I'm like, we got all of this is just flooding into my brain. It's like something, something on a locked in my head. And for the next week. It's like, I keep having these flashes these glimpses of memories. And, you know, I had gone online that that very night looked up Cooper hijacking. And you know, right away, it's like, Oh, my God, these these pictures, these composite drawings look like my dad. And, and then I'm remembering the Dan. Just like Dan Cooper, Where's Dan Cooper come from? And, you know, I'm remembering the comic books that he had stuck on his bedroom wall. They were some tacks up to the bedroom wall. And it's like, all of this stuff is coming back. I'm feeling like the biggest idiot in the world. How could I forget so much for so long? And I described that in my book, you know, the dream that I had right before I had a polygraph test with the FBI. Where I'm literally asking God and my dream. How can I have forgotten so much for so long? And it's like, no, it was just locked up and forget you

1:20:00

because that wasn't that there wasn't time to remember, you know, now it's time to remember kind of a thing. And anyway, but that's what prompted me to write the book was, you know, remembering what my dad said before he died, you have to write this. It was like a mandate different from my father. And, you know, the whole time I was writing it.

1:20:25

I had to say, it was like, a supernatural journey.

1:20:31

The heavens opened up for me to even have the resources to stop working. For a year and a half. I had, there was a man who came into my life who offered to underwrite the book.

1:20:47

And

1:20:49

another person, a beautiful woman here in Oklahoma City offered for me to live on her estate, for safety reasons, I was going through a really awful divorce at the time that the FBI or the Yeah, the FBI leaked about the investigation. And I had moved on to this private estate at the time that the news reports came out in August of 2011. And you know, I was in this secluded play, living, you know, behind a gate with big dogs.

1:21:21

Biggest state sold last month, but I lived there for a year and a half while I wrote this book, and can just isolate my other wonderful friend with a cabin in the mountains in New Mexico. And I would go back and forth and be up in the woods, you know, writing from this cabin, and, you know, even a song that my dad had written on my birthday or

1:21:49

something sometimes, before he died, it was a couple years before he died. He wrote a song that was about my uncle LD. And you know, it's not clearly

1:22:00

told in the song lyrics that if he knew, you know, what happened, it was, it was so clear to me and it came, it came to me while I was writing the book, my, his wife died, and his son had this sealed envelope. He said, You know, there's a certified letter that your dad sent to himself that's never been opened. And inside of it was a tape recording of this song and the lyrics and the date that he wrote, it was a Christmas song, it was about my uncle Lt. And it was like, wow, I mean, I I'm just in awe of how beautifully God when I opened myself up and said, I'm willing, I'm willing to do the thing you called me to do even though I don't know, the first thing about writing a book.

1:22:50

I can never read I mean, I wrote.

1:22:55

Hey, exactly. And really, it was like, I would sit and I would just get it as low and I would write 10,000 words a day. On some days, some days even more than that, I would just be I was like, I was in a trance. Well, writing it all, I anybody that is willing to put their art out there willing to put their story out there. Especially not only if it's like a story that you know, you you came up with yourself, but if it is a story of your life, and it is a story that much like much like we say anytime that we talk with experiencers of UFO or other phenomenal things. It is not always in the person's best interest to come forward with the story.

1:23:47

Some of the ridicule that you have received some of the some of the bad press that you have received Hey, once again, many people have been like, ah, you know, that story, whatever, you know, FBI just found their guy. Nope. Still.

1:24:04

History greatest mysteries, find them not the first time and the second time.

1:24:10

This once again, is the closest thing that I have found that is yet to be fully debunked about anything. So I thank you regardless, for coming through with the way you see the story, the story from your life, the way they connect together. And and the way that it's brought you to where you are now in the way that it's changed your life. So I thank you for that. I thank you for always coming on the show. Whenever we've called on you. Thank you so much for all the time that you spent with us this evening.

1:24:45

... ..

Oh, it's a delight to talk with you, Chris. Thanks for Thanks for letting me tell the story and not editing it.

1:24:54

No, no, no. That's just making it not making it better different narratives about

1:25:00

A lot of people asked me why I don't edit the show. And I'm like, you realize what I could accurately make people say,

1:25:07

Well, yeah, I could, I could chop things up all kinds of ways. But before we let you go and ask you to hold the line while we move on to the second guest,

1:25:17

tell everybody where they can go. I'm holding my copy of DVDs. Nice. Right now I have it both in physical and in E form, as I do with most of my guest books. But tell everybody where they can go online other than the curious realms store to find that book?

1:25:33

Well, I recommend, go to curious realm, of course and buy it through your link.

1:25:41

Amazon, it's only out on Amazon and I do recommend downloading the, the electronic version through Kindle. It's very expensive to print because I have a lot of photographs in there. Yeah. Apparently the one is missing. That's supposed to be the flight transcripts, screenshots.

1:26:03

But you can be printed by by order. And so it's very inexpensive, ridiculous. But it's, I think it's \$9 to download the eBook. And it's the bee's knees, the story of my hijab life by my loves and super well. Once again, Marla, thank you as always for your time for coming on and sharing your story.

1:26:29

Please do hold the line while we switch gears and get ready to bring on our good friend Reverend Michael J. S Carter.

1:26:41

We'll be right back after this folks hold the line.

1:27:23

With the rise in attention to the health benefits of cannabis and cannabinoids including CBD, drew him science has become one of the premier providers of full spectrum CBD and CBD related products using a proprietary spagyric process. Through him science extracts maximum benefit from the whole plant buds, leaves, stems, seeds, even roots. Every part of the plant is used and then reused to formulate a rich Complex Profile of CBD, CBD derivatives and terpenes guaranteed to provide the relief and benefits you need daily. Visit true hem science.com to experience the best CBD oils, edibles and topicals on the market today and use code curious seven to save 7% off your entire purchase of \$50 or more and get to 25 milligram CBD cookies or brownies free that website again is true him science.com and the code is curious seven.

1:28:56

The curious realm Podcast is your source for the latest and greatest news and events in the world of the paranormal, esoteric and forbidden knowledge and there is no better way to spark the conversation than with items from the curious realm store. Choose from fan favorites like hoodies, mouse pads, coffee mugs and more. Buy books and items from your favorite curious realm guests. Get your hands on the latest gear for paranormal investigations and experiments we discuss on the show open your web browser and stop by the curious realm store at curious realm.com forward slash store to buy the latest curious realm where and out of this world gifts for yourself or your family or a mind you want to open.

1:29:45

That website again is curious realm.com forward slash store

1:30:20

Have you considered starting a podcast? Looking for a way to make your business a voice of authority in an industry than podcasts Cadet is the solution for you. Whether starting a podcast for yourself, your brand, business school, church, or just playing fun. Podcast Cadet is here to help you navigate the waters of the podcast and

1:30:43

specializing in one on one consultation and training with industry professionals in fields,

ranging from podcast technology and editing, to distribution, monetization, and even social media strategies. Podcast Cadet tailors their services to the specific needs of you and your podcast. Do you already have a podcast and trying to find ways to engage and grow your audience? Sign up for your podcast Cadet audit today. And let us help you explore new and exciting ways to leverage your content and elevate your podcast brand a whole new level. From consultation and workshops to affordable podcast production and maintenance packages podcast that is your one stop shop for everything podcast related on the internet. Visit [podcastcadet.com](http://podcastcadet.com) today to sign up for your consultation or training and use code curious wanting to save 20% of your entire purchase. That website again, is [podcast cadet.com](http://podcastcadet.com). And welcome back. Everybody. Thank you so much to all of our sponsors, as always, especially our new sponsor, web works wireless. Those guys are fantastic. They're offering some great mobile wireless packages for folks like me that do live production, folks that are out in the woods trying to live kind of more of an off grid life with their family. But hey, still kind of tethered. You know. So we've been benchmarking things for them very successfully out on the road, doing uploads all kinds of things to make sure that they can actually claim Yeah, unlimited. I can tell you right now over the last month as a use case, I have actively put up almost 10 gigabytes of data

1:32:32

through their system that they've given me. And that is what all of our web streams go through. That is what all of our web streams from the upcoming Mineola Bigfoot festival, upcoming folk monster festival, upcoming MUFON symposium, all those live feeds will be coming through web works wireless. So we're very, very happy to have partnered with them on that stuff on by and check them out, folks. Web works wireless.com Our guest in the second segment, our good friend, Reverend Michael J. S. Carter, welcome back to the show. How are you today?

1:33:10

Good to be back.

1:33:13

I'm glad we're making this a habit. And as I said before, welcome home. I know you've been busy. And thanks for finding the time. Well, man, thank you for taking the time. I know you, as you said in our pre show conversation are in the midst of moving and that's just the whole life process itself. You know, the packing of things and deciding it's Wow, it's a lot. So I got all these books. I got the book. But anyway, that's Yeah. Listen, that's that's that's that's a first world kind of challenge. I'm not in the Ukraine. Yeah, you know, fart in a fireproof somewhere. So no complaints. Exactly, exactly. Well, and, you know, speaking of the burdens of knowledge, so to speak, with, with all the books in the volumes and everything else, let's start getting into the knowledge of possible loss technologies in the Bible. Now, we've of course, had you on talking about UFOs in the Bible, things like that. You've of course been featured on Ancient Aliens numerous times. But the concept of high technology in the Bible has always fascinated me. And when you start going into things like the Ark of the Covenant, and even even the descriptions of how it's built, it's almost like it's a capacitor.

1:34:37

Yeah. And when you start talking about how the manner that came about for the Israeli people, as they were wandering in the desert for 40 years,

1:34:52

where did that come from? How did it just magically appear? You know, the staff of Moses, there's all

1:35:00

kinds of strange, interesting examples of technology that could be there in the Bible. So, let's kind of start, I guess, cracking the nut and getting into a little bit of it. Okay. Well, I want to go back a probably a few 1000 years before the Exodus, you know, when we look,

1:35:22

I want to broaden the definition of technology. Yes, technology being something that basically can make your life a little easier, help you accomplish the tasks that you want. And there are several stories, you know, if we look at Cain building a city, you know, there were tools, Noah built the ark, Tubal Cain creates, you know, a genesis for 22. You know, making stuff out of bronze and, and iron. The Tower of Babel is Bill Solomon builds a temple, you know, of reasonably scholars are talking that Jesus maybe wasn't the poor carpenter that he was probably a stonemason, because of another definition of the word the I forget. But you've heard about it. There's the Ark of the Covenant book. Well, Enoch talks about the angels, the fallen angels, some JSY, and the other in his followers, who, you know, continuing the story of Genesis six, that these sons of God came into the daughters of men, because they were fair. Yeah. And gave us technology. Enoch talks about teaching us how to work with metals, teaching us

1:36:36

how to work with dyes and astrology, and astronomy, forms of technology, in a loose sense of the word how to make defensive weapons, how to use crystals, and gemstones. Yeah, and so, you know, we have that template. And I'm sure there's probably more, but Enoch is talking about that these these beings gave technology to us. Of course, archaeologists and, and other studies of the, of the sciences, are amazed that we went from this hunter gatherer agricultural kind of species, and in a few 100,000 years, you know, we were working with iron and bronze. How did that gap how was that gap filled? And so, looking at how, what we're looking at the pyramids, yeah, looking at the breastplates of, of the high priest and what have you. So those are some examples. We know that people had touched the Ark of the Covenant, beautiful pictures, by the way, with the gemstones or what have you. Some of them died.

1:37:56

And of course, to their to their minds. It was because of the wrath of Yahweh, some of them who may have just been electrocuted, some of them may have gotten boils and what have you from radiation poisoning? Sure. I mean, the priest had to wear this these elaborate kind of gems and, and robes and what have you, I believe it was protect them from radiation poisoning.

1:38:24

And,

1:38:27

but to their minds, it was because they had somehow angered the gods or they angered Yawei. We see an example of this when Moses comes down with the commandments and he's glowing. Yep, he's glowing and Exodus. That sounds like radiation to me.

1:38:48

So, you know, we look at the walls of Jericho. Maybe there's the sound technology, because yes, they went counterclockwise, and then it worked out. And then it went clockwise. But when they blew the show, for when they blew the horn, the sound was so intense. The vibration was so intense, that it collapsed. The walls of a city dem sciences recognizing now that you can probably or they you can levitate bricks, boulders, what have you, yeah, just find a vibration of sound. So the Bible gives us all of these examples that we're rediscovering.

1:39:31

But that our ancestors were telling us this is what happened.

1:39:36

This is what happened.

1:39:39

The Ark of the Covenant. Of course, Ancient Aliens does

1:39:43

an episode about this every so often, at least once each season that this was a device. We just did the episode a couple months ago on the Ark of the Covenant. Yeah, once again.

1:39:58

And it said it says the scriptures

1:40:00

that they communicated with Galloway, he gave them the metrics, it has to be built this way. These are the measurements. So they're exact, there was no room for error.

1:40:13

And they had the chair of them there and the cerebellum and was made of gold, and the sheet of wood. And everything was designed for the specifications. And this is how they communicated with Yawei. It was like a receiver. A transmitter. Yeah. But it was also very dangerous. Well, and, you know, oddly enough, as you mentioned a moment ago, meant to be used in conjunction with

1:40:44

you that you couldn't just go up and touch the Ark of the Covenant. You couldn't even you couldn't even be in its presence without wearing special garment. Yes, the high priest, and you see it today? Because, you know, not not with the technology. But you know, the robes that the clergy were that will be here today. Oh, yeah. That's, that's carried down from them. And we know that the area above the Mercy See, between the Jeroboam were related to the communications between Moses and Aaron and Yawei. Exodus 2522, talks about that, he, he can commune with them, you can talk to them. So

1:41:32

it's really fascinating, looking at the book,

1:41:37

not not not not, notwithstanding the profound lessons, the profound stories and teachings. So I don't want to say we're reducing it to science fiction. But it lends itself to this interpretation when we look at it through 20/20 century 21st century eyes, knowing what we do today. Yeah, yeah, absolutely. And even once again, to know that, the breastplates that were worn by those that that carried the ark, absolutely could be a means by which to shield themselves or to ground themselves. From that technology. Once again, the ark in and of itself, was was meant to be a conduit to communicate with God. The chest plate of the high priests was also meant to do the same thing, the whole

1:42:36

image of the chest plate with all of the all of the gemstones and everything those are those all represent different Archangels. And things like that different. Like they are specifically tuned to frequencies so to speak. Yeah.

1:42:56

And that's why you had to wear protective clothing and the tabernacle, your Word, and the priests were set aside, yes, there was privilege. There was all the adulation may be the envy. But these people were closest to God, literally and figuratively. And so those vestments in the breastplates the crystals, they emit light, they would light up to answer questions. They talk about the lumen and the zoomin. And

1:43:26

so they were communicating with Yawei through this device, and those people who did not know how, even when when it was captured by their enemies,

1:43:42

they would die. Because they did not have the protection. Yeah.

1:43:49

Yes, I would call it radioactive contamination.

1:43:56

Sure, they get I mean, radioactive, it could, it could have even been some kind of high frequency device, you know, things like that. And to even even the fact of if, if it was a once again, a natural capacitor, even even carrying sand and the remnants of tablets inside.

1:44:20

With a with a gold box that has layers of acacia wood and things like that you You've literally built a capacitor. Yeah, like that. That's physically what you've done. You put layers of insulator and conductive material on top of each other, and put two ways that it can go out in and out. And when you when you go through and read the construction of the ark, there is a very specific part that talks about a rod that goes down into it from one of the Chair of them, which which, oddly enough, would be just like a cathode on a battery, something like that. So yeah,

1:45:00

11 1:43:00

So to think about these garments that they're wearing is some means to ground themselves. And to dissipate that energy if,

1:45:11

you know, it was a dangerous business, my friend, yeah, yeah, there there are numerous accounts of people being struck down being struck dead immediately, just by being in the presence of the that's right out that that's right. And, you know, one of the other concepts that

1:45:30

was there for the ark, at least one theory was that it was a it was a power source for what was called the manna machine, which was basically a machine that was given by angelic beings to the high priests to help generate food for them while they were wandering in the desert while they were wandering in the desert. I actually went through this and I remember my brother and I talking about this years ago, like back in the 90s, stuff like that, and running across this book. And I don't even know if you could still find a copy of gotta find one for my own collection. But I did go through inactively ad the manna machine PDF, to our UFO and paranormal page, on the on the curious realm. Knowledgeable. Alright, you sent that link to me, right? And yes, yes, I got it. There's a look at it yet. Yes. And this, this was a theory put out by George Sassoon and Rodney Dale back in 1978. And here's the concept the man or machine has a theory by George says soon and Rodney Dale that a machine device was given to the Israelites, when they went on their 40 year journey in the Sinai desert. The device was said to create men a type of chloric algae that explains how the Israelites survived their 40 year wandering in the Sinai Desert, it is said that the men of Sheen was stored in the Ark of the Covenant, the ark was supposed to empower the machine to run continuously producing Manna for six days, on the seventh day, it would be taken apart for cleaning, so it could run the following week. This is supposedly where the Sabbath is thought to have come from. And it even goes into how it may have been taken to Oak Island. Like this may have been one of the things discovered by the Knights Templar that it was one of the things squirreled away but man when you start going through and actively reading and looking at the diagrams of this thing.

1:47:35

It's wild. It's and you know, pretty much just like a steam generator or something like that. Not any not any

1:47:43

crazy, high high technology or anything going on. But to think that something like that may have been there.

1:47:53

Sure possibly

sure, possibly.

1:47:56

Well, whatever it was, it it sustained them for a very long period of time. Yes. If it was coming from the ship, which it seems like it was it probably, as you said, had all the nutrients and the vitamins or what have you that they needed to sustain them.

1:48:17

And so then the imagination can go off in so many ways. But I when I think about this stuff, when I'm looking at, you know, the arc, and I mean, this stuff was hidden in plain sight. When I was growing up in the church, no one even, you know, it was right there. It was all about the way you've read it or interpreted it.

1:48:40

Yeah, yeah, precisely. And once again, as we talk about all the time interpreting it with an open mind, interpreting it from the eyes of the people who actively wrote it, not necessarily from a dogmatic point of view, but from a historical point of view. How were they living? How did it? How did it reflect their life? You know, yeah, yeah. But also, if I'm thinking, also, Chris, would I but but in addition to, if I was reading the Bible in 1865, it would still sound so yeah, far out to me. But now that we live in an age where we have this technological prowess, yep. You know, it just lends itself. Yeah. You know, being 1865 Maybe there was some people, Jules Verne or whoever, you know,

1:49:30

who had these these ideas. But even then, if you read the Bible in 1865, it's still far out for you when reading it in a scientific age. Yes. It makes perfect sense. Absolutely. Absolutely. It may it makes a whole lot more sense. Once you start applying science to the background.

1:49:55

And the technology that they're in, you know,

1:50:00

It's something that we talk about regularly with Stephen Meyers. Whenever we talk about the possibility that the great pyramids were built using water locks, you know, the Egyptians were fantastic users of water like they, all the blocks came from up the river, why would you take it off, and then drag it through the dirt? Right?

1:50:23

Like, it makes a lot more sense just to flood the plane and build the thing, you know, and drop the things into place. It dies. It doesn't necessarily have to be aliens. That did it doesn't necessarily have to be alien technology. Weird, some clever critters, human beings? Yeah, well, you know, I will say this, because I was reading something on Facebook the other day, and I get it because people were saying, you know, well, just because we can't explain it doesn't mean that star people did it. And that's true. But it also doesn't mean that they did. That's right. It doesn't mean that we should excuse the possibility of it. It doesn't doesn't mean that we should be closed mind to think that. Yeah, yeah. Yeah. Yeah. Cuz that's sometimes the argument I have with more Afro centrist folks, that if you say that you're saying these people of color could not build it with their own ingenuity? No, no, no, I'm not saying that. We're just saying that an advanced civilization, regardless of the caller

1:51:33

Hello, help. Yeah. We all need a little help. Yeah.

1:51:38

Okay. It doesn't take anything away from the ingenuity of folks. I mean, I get what they're saying. But you know, there are civilizations that Samaria.

1:51:52

Okay, which stitching goes into that? Babylonia?

1:51:57

Egyptians, and you know, this and quiet as it's kept. For more to von Braun, and what have you. So did the Germans, the Nazis in World War Two? Yeah. That they were getting help with technology from otherworldly sources? Well, and interestingly enough, we're literally obsessed

1:52:22

with the technology from the Bible, with with finding things like the Ark of the Covenant with finding things like the Spear of destiny, they were obsessed with these what they consider to be magical objects. And even even going back to their work with their Glocken.

1:52:44

And it's bases on like mercury, vortex engines, like what are spoken about in

1:52:51

Vedic texts? Yeah, that kind of stuff.

1:52:56

Yeah, they were they were playing with high high technology that came in was sourced from ancient text, an ancient thought, you know,

1:53:07

and it's really interesting to see us even now. Starting to apply some of this technology. Yeah. But But yeah, yeah, I think the cat is jumping up. That's I think, I think that

1:53:24

what?

1:53:27

And I'm going off a little bit here, I think, what threatens people with more orthodox views than what we're talking about? Is because we're taking away the mystery.

1:53:40

And the mysterious and the power of a God away.

1:53:47

Because now we can explain all this. Do you see what I'm saying? Oh, my God, man, did you just compare it to like breaking your child's heart when you tell them? It's just prestidigitation?

1:54:00

There's a term for it boy, girl freshly Digitation.

1:54:06

The other hands doing? Yes.

1:54:10

1:54:10

And I know folks, that, okay, even when we go into artificial intelligence, and, you know, robotics, and pretty much what this is going to be like in the future. The future is now and a lot of people are saying we're playing God. But in some ways, we are in the sense of, we have the knowledge, we just don't have the spirituality to go with it. Thank you. What, there's nothing wrong with these advances.

1:54:41

It's just how we use them. And you know, you could not you could not get more sci fi Prophet than to say it that way. Quite literally, because one of the points that I make all the time on the show, Michael is we are verging on a whole new world.

1:55:00

world of technology. Yes, a whole new world man, like I grew up with an Atari 2600. You know, like, and to know that that has just been obliterated, even even Moore's law, which I grew up with, obliterated now it's gone that math is like, archaic by five years. Yeah, it's mind numbing. And to think that our application of all this

1:55:29

is a sex bot.

1:55:32

Yeah.

1:55:33

It's one of those, like, you want to know how you end up with the matrix. You want to know how you end up with it, you and you turn them all into slaves, or you turn them all into sex bots. And then once they become sentient, they get to see the past and go, Oh, that's what you created us for you monsters? Yes, you know, and it really is that we have the technology, but we do not have the spirituality. That's right. And that's why we will destroy ourselves, if we're not careful. And I know you said it. And I've always believed it. And

1:56:10

I you know it to me, it's like, buddy, but he's not evil. Money is neutral. It's the ideas you bring to it. And so when people tell me that I'm not saying, I'm not saying that there's not a god, I probably don't define that way. Some people do. But I hear what you're saying that we have all this technology, it's almost like worshipping it. And if we don't know how to use it, we'll blow ourselves up. But there's also the chance

1:56:37

that evolution is slow. But we can use this, to me, it's not playing God at all. When I think about some of these star races who have already perfected this, well, maybe not perfecting it. But you know, they have said dBs, you know, some they find their craft. They do whatever they do. That's how advanced the technology is. Yeah. And the spirituality is. But yeah, but I get the fear that we don't have that. And so we will wind up trying to play God by not having the spiritual peace. And we will just have to start over because we're just going to destroy everything. I get that fear. Yeah, yes. Oh, no, I utterly grasp it. And I think a lot of people especially whenever 2012 happened and the whole Mayan prophecy. I think a lot of people misinterpreted that prophecy, because you have to, you have to understand the whole cycle of Mayan culture in the day and the night. And the fact that yes, the cycle was ending the day was ending, the the burgeoning of a technology, whether it's the fire the wheel,

1:57:52

you know, it ships on water, or what have you.

1:57:57

We had appointed technology as humanity. And now we're at the point of nighttime, which is the application of that in our chance to sink or swim. Now it's like, okay, Prometheus has given you fire, do you burn the place down? Or do you cook a steak for the village? There you go, you got a choice. And that's what we're in right now. Is that moment of choice and application of this technology? Yeah. And I don't know how long the window is. Yeah, you know, you will say, you know, we come from the Piscean age to the Aquarian Age, however, you want to frame it, that we have a window

1:58:37

where we can make a choice, to evolve to become to recognize that God in us that consciousness all in one, you will, or we will burn this earth out to ascender. And we'll start Oh.

1:58:54

And because it's you know, what is happening? Oh, yeah. Yeah, no, like, it's it's definitely happened. We are just part of a cycle, man. We contribute to the cycle Most definitely. But hey, we can't do nothing better Earth's poles flipping and when it happens, are we ready? You know, like, we can worry about a power grid all day. But are we ready? Like for that? Yeah. Because, you know, we're, we have contributed to the polls melting. Yeah.

1:59:26

Yeah absolutely. I was in church Sunday. And the sermon was on a different topic more of a

Yeah, absolutely. I was in church Sunday. And the sermon was on a different topic, more of a geopolitical thing. But someone came up to me who's into what we're into. And she said, you know, we touched her a little bit about nuclear weapons, and the threat that's that's going on now.

1:59:49

And she said, Well, do you think the star people will come and save us? And I said, I, I don't think so. But I will say this, to think that way.

2:00:00

It's in my estimation, you want to be more involved than that? Because what you're saying is somebody come help clean up the mess. I'm not saying they won't, but I wouldn't want to base my whole existence on someone. Yeah, save me from the mess that I've made. Well, you know,

2:00:19

man,

2:00:21

one of the things that we've talked about regularly recently with the whole disclosure thing and all that is the idea of Project Blue Beam.

2:00:31

And, and the idea of,

2:00:34

we now have a massive amount of technology where we got holograms, like, we can build a holodeck, like we have holograms that you can feel in touch with, you can shake hands with the hologram, and you will feel that hand. Yes. So the idea of using this technology to deceive mankind? No, yeah, in order to effect a ace, a spiritual division between those who are Apocalypse driven and those who are not they can make the second coming of Jesus into an event. It's it's totally a false flag is disturbingly real, it's a disturbingly real possibility and to end to think, like you said that, that concept of, Oh, please, somebody save us. That is, that is all too easy the basket to fall into.

2:01:33

And, sadly, I think what they're trying to go for as that means of control, you know, is, is when things happen something will intervene. And oh please say this. But is it really that? You

things happen, something will intervene. And oh, please say this. But is it really that? You know, is it really that?

2:01:52

Is it really that entity? You know,

2:01:57

and I think that's the danger that we have, I think that's the danger, once again, with all of this ancient technology, is, is that there's always that spiritual caveat, there's always that fact of, you have to be spiritually prepared in order to use the technology.

2:02:15

Because if you aren't, the Ark will kill you. Yeah, yes. You know, like you, you had to go through ritual before you even ate garb or not? Yeah, you know, you had to go through fasting, you had to you had to be spiritually ready to enter the the Sanctum Sanctorum, the inner sanctum of the temple, and be in presence. So, you know, the fact of us being spiritual, spiritually ready to use this technology, I think is a big part of the technology itself.

2:02:54

Well, Tom was going to tell, it doesn't look good. Now. It's not it's not a pretty picture. It's not a pretty picture. But But as with all prophecy and stuff like that, there is a way out. There is a means out. And of course, that is enlightenment, you know, accepting other other thought forms, other ways of being, what what can we do, spiritually right now to, I guess, leverage this technology that we have at our disposal, you know, and kind of kind of use it as

2:03:31

a new sacred technology, so to speak, Michael? Yeah. Yeah, I don't know. I mean, I'm thinking of the technologies that we can all use, individually, the technologies of, of prayer and meditation and fasting. I mean, those are to me, I label those spiritual technologies. But I know that, that that, in some ways, that may not seem to be enough, but that may be just enough. Because even if everybody did that, and I'm not saying everybody would, but if we if we did, that we could change a reality. We can change our own collective individual realities, and collective realities. I think that part of the spiritual journey is also realizing its limitations as your limitations as well.

2:04:24

And by that, I mean, I can't talk to Biden, I can't talk to Putin. I can't talk to folks at the UN. I can't do that. But what I can do

2:04:38

and not that I would want to but the mechanisms is just what I can do is what I'm doing now. Talking to you, getting some ideas out, trying to treat my neighbor, the way I'd like to be treated, being a good father good. I mean, it's not earth shattering, but neither does it have to be but in my way

2:05:00

Hi, I'm doing my life's mission.

2:05:03

And that's all you can do. That's all you can do.

2:05:09

Yeah, that's more than enough. Yeah. Because Teresa said, you want to change the world. Go home and love your family. That's right. That's right. Well, it makes sure that your cup is full. You can't you can't help fill anybody's cup of your cup and fold to begin with, it's kind of gonna be overflowing. So the extra to give, you know, otherwise, you're gonna go thirsty. And so is your family. Yeah, that's no good. That's no good. And, you know, even even the idea right now, of

2:05:41

just revisiting the idea of the Mana machine and the modern concept of like, we have already made matter from light. It's certain, you know, so the idea of being able to feed the world, the idea of being able to provide sustenance in that way and kind of that Star Trek way of like, hey, replicator, give me a give me a latte. You know, imagine being able to have that everywhere, being able to just out of light

2:06:13

out of some laser matter,

2:06:16

to literally create physical matter that can feed people. Yeah, you know, I mean, we can do that. Yeah. Yeah. Well, we choose not to well, and that's just it at once again, loops, right back to that spiritual component of, you know, are we enlightened enough to make that the use?

2:06:36

You know, and we're gonna buy weapons, we're gonna make weapons. Yeah, yeah. And sadly, it comes down to the profit margin. You know, always. So it's, it's strange to be to be caught in this loop of having access to technology.

2:06:57

And, and not being able to wake up enough people to motivate the technology towards something else.

2:07:06

Wow.

2:07:09

Yeah.

2:07:11

It's, we're living in a very interesting time.

2:07:16

Yeah. And a hopeful time.

2:07:19

Because, you know, if you don't have hope, you know, what's the point? The gig, the gig is up? Yeah. But I'm excited. And I'm cautious.

2:07:30

Yeah, rightfully so says, intellectually, in the sense of, I don't, I don't automatically say, Oh, my God is the Age of Aquarius, and we're all gonna sing Kumbaya and a couple of years ago, we, we could we could we could blow them we could blow the whole thing up. Yeah. In a heartbeat. It would be a lot easier than then the whole than everybody getting together for a Coca Cola commercial. Yeah. You know, so. But I think that,

2:08:03

2:08:33

you know, I'm doing what I can, there are other people who are doing what they can. And, you know, we'll just we'll see, yeah, yeah, all you can do is really make make ripples in the water, hope they turn into a wave when they meet somebody else's represent you go, you know, and I guess that as as, as we close things up here with you, because I know that you're on short time today. And we ate up some of that in our pre conversation. But once again, I guess, trying to figure out how we can come together even even once again, the the point that we bring up all the time is that less than 20% of people took part in the American Revolution.

2:08:48

So it doesn't take like four out of five, to ask that the change. That only takes one.

2:08:58

Yeah, and that doesn't necessarily mean that you have to go around, like, trying to no pun intended here, Reverend, but going around and trying to beat people over the head with the gospel. Anything like that doesn't mean that you have to go around and try to convince everybody in every conversation to the truth capital T that you know,

2:09:19

but you have to be ready to have the conversation. And you have to be ready to be open hearted and open minded enough to leave the conversation where it is and not try to, quote change your paradigm with every conversation that you're having. I think you're gonna end up a lot more heartbroken with yourself and the world around you if you try to do that. I agree. I agree. And also, when you don't do that, and you leave space for that you could be wrong. Yeah.

2:09:51

I've been wrong a lot. Yeah. What's the old saying you could all be otherwise. That's right. And, and so there's a lot of layers to it. There's a lot

2:10:00

discernment.

2:10:02

You know, you know, at the same time you want to play plant your seeds. And at the same time, you want to give people the freedom to do what they need to do. I mean, yeah, she talks about that, you know, in the parable of the sower, some seed oil falls on good soil, some dozen

rocky soil, some seasonal, and thorns come up and, and choke it. So you, that's all you can do. But that is somehow good enough. And I mean, I think it's an exciting time to be alive.

2:10:36

It really truly is man, like every day that and I follow a lot of news, I follow a lot of technology news. People ask me all the time, how I can how I can follow that much news, and not just get depressed. And it's like, well,

2:10:51

90% of its opinion, you got to learn to filter through to the fact of what to go with. And that's a spiritual discipline. That's called discernment. Yeah. Yeah, absolutely. And you know, it, it only comes with time, it only comes with practice. And it only comes with reading things that you may not agree with. Exactly. Exactly how, again, you hit the nail on the head. I had that conversation with someone from church Sunday. They didn't like some things I said. And I was using other news sources.

2:11:24

A variety of news sources online and not. And this person said, Well, I watched NPR. I listen to NPR. And the tries. I said, Well, you that's not it. That's nice. Yeah. But there's other stuff going on other perspectives? Yes. Sorry that they didn't find the story. keen enough to cover? Yeah, yeah. Especially when we know that most of this stuff has been given to us by corporations anyway. Yeah. Yeah. What they deem is worthy. Yeah. Yeah, Sinclair media, things like that, that are just a conglomerate that owns, you know, like it Ticketmaster, except over broadcast.

2:12:07

Same thing, if you go out and listen to radio, there's, there's about two or three different broadcast media groups out there in radio am and FM, you know, so it really does come down to being able to

2:12:23

decipher that information, disseminate that information, to sift it, and to loop it back to our beginning of the conversation, even when you're talking about the Bible, and the stories in the Bible, and the literal instruction manuals.

2:12:43

In it, in the Bible, like their instruction manuals on how to build it, you know, and get the metrics and everything are there. Yeah. You know, it's,

2:12:56

it's, it's the old adage, we don't see things as they are we see things as we are. Yeah. Yeah. Absolutely. And in order to to have, you know, you know, people talk about, well, I want to work on my psychic stuff, and I want to work on, you know, opening my third eye, and that's wonderful. I work on that too, at times. But part of this discernment is having insight,

2:13:23

not just outside of what's going on, it's the insight that you want. Yeah. It's the insight that we need.

2:13:33

Help. So just discernment.

2:13:37

There, there's listening, as you said to other voices that I may not agree with, because there's always three sides to the story. There's yours, mine and the truth.

2:13:47

And so it's it's a lesson each and every day rather than that I get up. Yeah, but I'm glad I get up.

2:13:56

Yeah, absolutely. What What can people start to do to slow down? And I guess, start to gather that insight, really, you know, it's hard. It's hard. We're surrounded by so I mean, I'm, I'm literally surrounded by no less than four screens right now. Just doing this show. And I will be at this workstation the rest of the day working, Michael.

2:14:22

And it's, it's hard for us to mentally slow down.

2:14:27

Even the way even the way that somebody could slow down and meditate in the 80s or 90s. You know, we're literally bombarded almost so what can we do to begin to slow down to gain that insight that leads to discernment? Well, I think you you just said it. You are aware of what

you need to do.

2:14:49

You just have to take the time to do it. A friend of mine yesterday. She's a very talented psychic.

2:14:57

She was talking about that her and her husband

2:15:00

They're both ex military,

2:15:03

really good people. They just decided that at least one night for their family, you know, daughters, no technology. Yeah, we are going to just be as a family, whether you're in the other room, looking at your books or whatever, we're going to stay away from the screen. Now that can be drastic when you people like you who make their living. But you've got if you find the time,

2:15:30

because there's no right or wrong way. And it's going to be different each and every day to be still.

2:15:36

Well, whether that means sitting in a lotus position, whether that means lighting a candle, just staring at it, whether it means going for a walk in nature, taking your feet, taking your shoes off and getting your feet on the earth. Those are the technologies, I call them earlier, spiritual technologies. There's no shortcut. It's not sexy. You got to find the time to be still, it could be three minutes.

2:16:05

To your to your unconscious mind to your subconscious mind. Three minutes is an eternity. If you can slow down your thoughts. Yeah, it's an eternity. It doesn't have to be. And I struggle with it, too. There was the title seven days, I'm meditating for 20 minutes. 10 in the morning, 10 at night or 30 minutes. And then sometimes I go a week. And maybe I put on a meditation tape or whatever. It's not a competition. It's not. It's, you know, it's not about trying to be the

Dalai Lama. But be still and no, get walk away from the screen and go outside in the sun. Go on your porch. I'm telling you, it's the gift that keeps on giving. And that's when the insight comes. Because you can hear the guidance that you need. If you're not still.

2:16:58

Yeah, yeah, even a Star Trek, right. You know, whether, you know, it's, it's beige or or Deep Space Nine, whenever you see these beings meditating

2:17:11

the Vulcans on Discovery. They're they're taking here they are in 24th century. And they still know the technology of Listen, I need to go sit here. And we'll talk afterwards. It's timeless. Get away from the screen doesn't mean you have to go back to it. You don't have to go back to it.

2:17:33

But just to slow down, doesn't mean that you got to be a Zen master levitate. It just means that you focus on your breath. Focus on your breath in and out

2:17:44

for a few minutes to recharge and be still and hear

2:17:50

what your what your insight is telling you. Yeah. You feel the feelings that you haven't felt all day?

2:17:59

Yeah, that's awesome. Yeah, you know, that brings me a lot back to Father Andy, my spiritual director in the seminary, that his instruction to me was always to listen twice as long as I prayed.

2:18:16

Yeah, yeah, yeah, just to be still, yes, it works. I'm telling you, I would I was doing it regularly. And I'm getting back. I practice this form of Zen, but it came to meditation where I'm just breathing in and out the account on the exhale, you don't go past 10.

2:18:35

And you try not to have a thought.

2:18:39

And you know, sometimes I couldn't get past the counter three. But eventually I did. And then when you get to 10, you go back. And you do that for a couple minutes. And your body will it's like exercise, your body will say, I want to sit here for a couple more minutes. I can't tell you how.

2:18:57

more in touch I became not only what my feelings but my intuitive faculties. People would call and I would know who it was, because I'm taking the time.

2:19:07

And those things are not being spiritual. Those are some of the gifts that come along the path. But my intuitives was heightened all because I slow down for 510 minutes in the morning a day. Yep. Yeah, absolutely. It really is that that presence of mind and taking the time. Yeah, because you watch these weather. I don't care whether the Star Trek all these sci fi things. They have more technology that we have. And they use it. Yeah, but they still take the time. Yeah, walk away from the weather. I gotta go to the house sweet.

2:19:45

Weather I gotta go here and then the tone and tempo here. I'm thinking of the space night and a majority and then I just saw discovery. A couple of weeks ago, the one of the women on there. She's a big shot and she's been

2:20:00

Okay, and then she goes, she goes to meditate with all that. So it's still a Bible technology well into the 24th century. Yeah. Yeah, absolutely, man.

2:20:12

Reverend, always, always a great time chatting with you always a great time talking about these fun fun topics. Thank you so much for taking.

2:20:22

Like I said it was the 13th I won't move.

2:20:26

So have more time because I like to sit down at least 90 minutes, two hours with Yeah, yeah, absolutely. You know, but I hope this helps you out with

2:20:34

and let's be in touch. All right, man. Sounds great. Thank you so much. Take care.

2:20:42

Absolutely. Before we let you go tell everybody where they can go. Other than the curious roam store to go get your books to contact you. Everything else shameless self promotion. 10. Okay, brothers and sisters, I'm going to tell you where to go in a loving way. If you if you want my books, go to Amazon or Barnes and Nobles. Just type in Reverend Michael J. S. Carter, or Reverend Michael card, I will pop up.

2:21:12

You can reach me at my email, which is Michael J. S. carter.com. That's also my

2:21:22

webpage. Michael J. S. carter.com. And you can just go to Facebook. I have two pages. Michael Carter.

2:21:32

And Reverend Michael J. Carter, Michael. Reverend Michael J. Carter is a fanpage. You can still reach me there. But I try to keep that to a UFO or paranormal stuff. Yeah, Michael Carter, the sky's the limit. So you got all those times and all those ways to reach me? And I will respond? Yeah. In the meantime, keep your faith. Don't let this stuff get you to down. Go home and love your kids. Stay off the TV screens for too long TV movie phone screens? And we'll see you next time. Absolutely. Once again, Reverend Carter, thank you so much for the time. Thanks. Go ahead and let you go.

2:22:16

While you're online, absolutely. We'll be texting. Sure thing hold the line. While we close things out real quick.

2:22:25

Why, while you're online, checking out all the great work by Michael J. S. Carter, make sure to stop by the curious Rome store. That is where you can buy all the books from our guests. Having a little bit of an issue here lately, but I know Michael Carter's books are still in there. Make sure to stop by our events page. That is where you can keep up with all of our live streams and where we're going to be going as well as the curious realm. Live tape. That is where we will be live streaming. If you're an Android user, you can download our app, and you can listen right there on your mobile device. Until next time, everybody. Take care of yourselves. Take care of each other. And remember, stay curious. We'll talk to you soon.

2:23:14

Thank you for tuning into this episode of The Curious realm.

2:23:18

Stay tuned for more guests, forbidden topics and hidden truths. Download the official curious realm app and view the knowledge vault on our website [curious realm.com](http://curiousrealm.com)

2:23:31
