00:17

Coming from the city of the weird exploring topics from the esoteric and unexplored, two dimensions are known. Shining a light of truth on the darkest corners of our reality. Welcome to the curious realms

00:55

Hello, everybody, Chris

00:56

Jordan here coming at you live,

01:00

very sore in the mouthfeel region from surgery. But here live this week I thought it was very important to be here live mainly because next week we will be next weekend is the official monsters and legends event in Sao bolo, Texas where we are, of course a sponsor, we like sponsoring all of the Para events that happen in Texas so that they keep happening in Texas. If you want them to happen, folks, you got to support you got to get out there, you got to attend them. And if you're capable when a business owner things like that you support so curious round goes out. We support these things, we help sponsor them. We love having them on. We love the opportunity of going out. And being hit deep in these little nooks and crannies of subculture, especially in the paranormal field that is so interesting hearing people's stories one on one, it's one thing to hear them over the show, to read them in books, to hear other people's accounts, and messages that they send us on the website. It's a whole nother thing to meet people face to face, and see how it affected them and affected them. So we will be talking about hauntings monsters legends in Texas and the upcoming festival with Barry and Brad Klinger in a little while here in just a minute or two. After that, after commercial break. In our second segment, we will be having a very interesting not really even discussion, much more listening session from a friend Joshua Shapiro of Crystal Skull explorers who has some channeled information from the future for us. So we will be talking with him about his future self orgeous and some of the messages that are just has imparted unto him some really

interesting and important information for some of you out there so make sure to stay tuned for that. Let's head on over real quick speaking of social media, let's hit up the social medias for this week's news coming out of Wow. Sorry about that folks coming out of Bristol Post people who get too close to UFOs have suffered from serious health health shoes. Excuse me. serious health issues from Bristol post.uk Out of the guardian. starting new evidence reveals the gladiators fought in Roman Britain. That was, of course something that was talked about for years but not proven until just now. That of CBS News 35 people detained after a coordinated attack at Atlanta's quote cop city police training site and out of yahoo dot news twisted Russian evacuate. execution video shows heroes last words Glory to the Ukraine. That is just some of the news that's fit to print out there folks on our social media group. Stop on by Facebook join our group that is where we have discussions where we post articles. Over 1000 people they're having fun every week, carrying on conversations while you're there, of course, make sure to stop by curious rome.com That is our website. That's where you can find all of the episodes that's where you can find our newly constructed store where you can actively find the book Chasing Ghosts Texas style. That is the book by our guest So, Brad and Barry guys, how are you doing today? Welcome to the show.

05:07

Thanks for having me.

05:08

Absolutely. I was very excited to find out that we had our very own paranormal convention. Well, I guess really much more monsters and legends convention going on right here in Texas. How long have you guys been putting on events because if you hop over to your website y'all have a few that are listed on there

05:37

yeah, we've been doing events for probably a good 15 years now. Even you know we had a we had a television show on Discovery Channel called Ghost lab back in 2009 Doubt doubt 11 timeframe but even before that, when we're you know, we had our group or everyday paranormal and ants in the San Antonio area, we were doing investigations we were doing events that you know, the the different different festivals and locations we were putting on private investigation events and stuff like that. So it's really nothing new to us. We you know, ever since the show, you know, kind of gone larger we travel literally all around the world. We've gone as far as Australia to do different events. But you know, we're San Antonio, homegrown, we're from right here in the shirt, similar University City area. And, you know, we wanted to bring, we wanted to bring some of that back now about what was about 10 years ago, Barry, we had a panel convinced that we did downtown San Antonio, that was quite successful. But we thought, you know, we've had experience with with cryptids and the monsters and Legends is more like the cryptid the chupacabras cabras that kind of stories and legends that you hear all the time. But the paranormal even if it's ghost, it touches very close to that those areas as well and a lot of people that we've crossed paths with over the years you know, they go out and they research they write books about this stuff and they're never like hey, let's let's do something because nothing like this has been in this area before

07:14

well and absolutely and it's hugely necessary community wise. I myself am very good friends with Craig wall heater who I know is supposed to be coming out I sponsor his shows and you know, it's it's fantastic that they're they're those well founded ones on that side of Texas, but Texas is massive. So in coming from Houston, myself, it's one of those like, we we didn't really have one either. As far as like a paranormal convention, anything like that. Plenty of investor to give groups out there, but nobody's really put forth to make one happen. So the fact that you guys are actively doing that, I think is fantastic, and kudos to you. It really is a way to further the connection amongst people in the communities. And it's really interesting how, yes, the communities of paranormal and cryptid have really started crossing pads in the last few years, how many cryptid sightings are surrounded by paranormal experience. And how many paranormal experiences include cryptids. So it's,

08:30

like Brad said, we've had our experiences over the years. And this is something different, you know, we've done tons of like paranormal ghost type events, we thought, let's do this monstrous thing. And it seems like South Tempe, like past a certain line like Jefferson, Dallas, upper northeast Texas, and BUDEAU south, it seems like the monsters and legends, the I guess the idea about kind of dissipates a little bit. But as if you're doing research and doing this event, a lot of stuff that happens in South Texas, that people just don't know about. So we want to have this event. Because when we announced it, we get lots of emails. I'm so glad you're putting on one down here. And yeah, it kind of given us a name out here. So that's hopefully fingers crossed. It turns out to be a great event and next year to come we'll do an annual thing. So

09:27

I would certainly think so. Now, let's let's kind of chat about you guys because of course as as Brad said a minute ago, you guys did have a very, very successful show on Discovery Channel for a while. Ghost lab and it was really one of the one of the seminal shows that brought paranormal to the forefront on on a lot of channels. Now, it now your heart or press to have a cable channel that doesn't have some sort of para or cryptid based show somewhere in the mix and it's it's really interesting to see that like travel channel has them now. They're all over but when you guys were doing ghost lab that was not necessarily the case. What was it that got you guys into the paranormal to begin with? Because it's, it's not necessarily a family thing with you all right?

10:35

No, no, it's not. Yeah. So just this could be a very, very long story or a very short one. I'll give you the very I'll give you the Reader's Digest version. Okay. You know, Barry and I, we've always we've always liked ghosts and things like that, of course, years ago, there wasn't go shows there wasn't there was a lot written about it. There definitely wasn't paranormal teams and stuff you you got your your ghost Phil on different segments of TV shows, like Unsolved

Mysteries, or you know, things like that. But, you know, we've always had experience, we really never talked about it as kids, we kind of had our own. We found out later that we had this common interest. But in the summer of 1990, I was on a vacation with my parents on the youngest kid. And I was it was my summer before my senior year in high school. So we do the last hurrah as a family around the country. And one of the stops was Gettysburg. And it was a driving trip. And it was broad. They were there for a few days doing all the different, you know, the stuff about field tours and whatnot. On the way out of town on the third day is broad daylight, and I see this group of Union soldiers just kind of cruising across the field. And I think they're doing reenactments. So I jump out with the VHS camera that I had at the time and, and ran into the field and started videotaping. Well, as I was painting across with them and praying, they disappeared, they disappeared, and they were there were nowhere in sight. There's no way they could have got out of my sight. It was broad daylight and bright blue skies. I looked at the tape, I saw I captured it. And then right there, that was my moment of truth that was like, I know this stuff exists. And it there's got to be some sort of scientific reasoning as to why not to not to disprove it, but more or less to prove it. And literally on that same trip, I drove all the way to one of our stops was Homestead, Florida, where Barry was stationed in the Navy at the time. So when I got down there, I actually showed him this video that I captured. I didn't show my parents. I mean, it was just one of those, those weird things. And, you know, at that point, he saw it and, and he for 20 years, probably until we actually got the show go. So he was he was the only one to ever see that videotape. Of course, until the Discovery Channels ask the question that you just asked, How did you get started in the paranormal? Well, that was it for me.

13:01

Looking back on it now Brad, why do you why do you think that? It was just for Barry's eyes? You know?

13:11

Well, first of all, is to believe his team. Real? Okay? It's almost unbelievable. When you watch the videotape, it is real. It's like, it looks like real people It looks so to the light to the everyday person. It would be like less, it's a bunch of guys. Well, it's the story that goes along with it that they've disappeared on videotape. They they were not real they were ghosts and so I don't avoid the scrutiny or really you didn't give a crap because you care about what people thought we just kept to ourselves. We weren't we weren't out to like, brag about it or prove it or whatever. It was like our own personal evidence of the kernel. You also have to keep in mind to this was this was 1990 there was no Internet, there was no YouTube, there was no you know, anything like that. So even if I wanted to, I would have to carry a VCR around with me. Oh, absolutely. To show people anything. So that kind of had a you know, plus, you know, our mom is very, you know, we grew up in the church of Christ. You know, every Sunday morning, Sunday night Wednesday night, she's very you know, we don't want to upset her by you know, saying hey, look at these ghosts. And you know, our dad, our dad was our dad, you know, he was our coach, you know, through all the sporting events and we didn't know how to read I mean, they were talking about ghosts or anything so it's not like we're gonna you know, confide in them. Yeah, very was the closest sibling and it's just like, Hey, check this out. Now you go forward a little bit. You know, the when we performed everyday paranormal I had gone to San Francisco, and then a basically a nighttime private tour of Alcatraz and I got sued in one of the

cells. I took a recorder with me because that's what people were doing at the time. That's when all the ghost shows started coming out. I got voices. And I showed Barry and he was like, this is either too easy or too cold. So we have to form this group everyday paranormal. Let's go out. And let's investigate this stuff. And I would I kept kidding. Now when I say overnight is literally overnight, where we were, it was like a full time job investigating homes and businesses and wow, you know, wow, we were on news reports and radio shows, and it was just a lot. No, but

 15:28

very, what was it like for you, because once again, this was just kind of threatened. I look at it kind of the same way. My brother and I, the reason I asked before we started about your ages and how close y'all were is because my older brother, who y'all will meet at the upcoming show. We're right at the same age gap. And we are Yeah, like, best of friends, we can sit in a room and have a conversation with eyes. You know, like, we don't have to say words, and we will be busting out laughing knowing exactly what we're both talking about. And he would be exactly the first person that I would take something to. So for you, Barry being being the brother, what was it like for you to, I guess have this piece of data kind of thrust upon you and am brought to you in this moment of very deep trust by your brother

 16:32

going back, you know, when Brett says I was in the ghost, I was interested in it. I wasn't like, you know, going on a lot of ghost tours or watching the ghost shows I was watching ghost shows at all. And so when Brad, actually when he brought those ZDP back from Alcatraz, we're at a birthday party. And he let me listen to him. I was like, how how's that? How's that? being recorded? It was It wasn't like it was it was really cool. Yeah, me wrong. very spooky. So my mind quickly went to how's that happening? Like, how does that work? And that's what kind of started turning the wheels on myself was holy cow, you know, this this stuff is, is bizarre, and it's got some natural science behind it. And so that kind of that was my, probably that was the time that kind of thrust me and to Brad was probably into a little more before me. He was actually going to the tours, he was doing EDPs he watched the shows. It was all new to me once he played with those EVPs I was hooked. And so we're like, hey, we can go out and find the stuff ourselves. But I was all in so we were friends and co workers and family and we all got together and important everyday parent Oh, well, that's how it started for me. But, you know, Brad and I, you know, Brad's gonna be four years younger. So growing up, I was always just, you know, just that far away. But I was gonna go out and went out on dates when he was, you know, still at home. And doing a lot of things. He wasn't with me. So this allowed us to be together and do the ghosts thing. And since 2007, when we formed the everyday paranormal, we've been at it every premise every day. The difference between a 16 year old and 12 year old is huge. But a 50 year old and a 46 year old not so much. That is that narrow as you get. Don't go no, go go catch me. I'm a 54 You're about me. 50. Yeah.

 18:36

It's like Indiana Jones says it's not the age. It's the mileage. Yeah. And, you know, years and years of doing this and being out like you said, once, once you got into this and got hip deep in, it went beyond the point of hobby for you guys. It became a point of professional effort. As far

as investigations going out and actively visiting locations. Yeah.

19:14

Yeah, I mean, it it was. It was like not we weren't never expected. We were never expected to be on TV of anything like that. But we wanted to build a group that was professional, and like this within our own group make us like, no, like we're kind of known in the local area is doing it the right way. Or are you being ultra professional, but like, the culty thing just kind of fell in our laps. Because of us being professional, I think and having that nice website and a lot of the evidence we put out there and kind of that presence was kind of what got us the TV shows a little bit of luck behind it. But you know, starting everything paranormal was never ever thought we'd be on TV or never been striving really to be and the only thing that the team So what TV did for us was really what just allowed us a larger budget to do the things that we couldn't have done on our own. You know, like just the equipment and the places that we can go and the travel. And yeah, there was there was a point for two years and Barry and I were literally professional paranormal investigators professional meaning, you know, we got to pay for it. That's what we did for a living for a couple of years. And you know, that's you. We were one of the four original ghosts shows out there. Different channels and cable channels, you had ghost hunters on Sci Fi. You had Ghost Adventures on lawn travel, you had paranormal stayed on a&e, and you had us on Discovery. And those are the four shows that kind of were the big main, the main ones the original and and we wouldn't trade it for the world. It was it was tough. Let me tell you it was it was it was a you know, the say it was a job it was it was grueling. And we wouldn't trade it for the world. Because of all the experience that we got. It allows us to do the things that we need to do for regular jobs. And but we still, you know, our regular jobs are 4050 hours a week. This is probably 5060 hours a week with the paranormal stuff. Yeah, yeah. That's not even an exaggeration.

21:16

I can, I can feel that. Because I'm, I'm very much the same way with my endeavors and with helping targeted individuals, things like that. It is it is not a part time thing. And it's not it's not a hobby. It is a passion. And it's even one of those that it comes to the point where profit does not matter. Because of the passion.

21:49

For the profit we made, we added it a long time ago. Yeah, right.

21:52

Exactly. Exactly. There you go, folks. Sorry about that. My my ring light just went out. Creepy. So let's, let's start getting into some of the investigations that you guys have actively done here. Here in Texas, specifically, they're in San Antonio, probably one of the more haunted cities in America. So

22:22

I'll be dialing every hotel downtown and bars. We've done liners we've done. arenas. We've done TV stations, we've done houses have aircraft carriers. We've done it all in Texas, so yeah. Now Yeah, yeah. Boucher submarine added that to the list just a couple of months ago.

22:50

Oh, wow. Yeah. To go do Battleship Texas.

22:56

Cruisers has Stewart. Okay. He will park and guy was. Yep. The USS theory users Kabbalah. All right, Sumerian. In World War Two class destroyer.

23:09

And what was that experience like for you guys?

23:15

Going going into it. I mean, we've been we've done the USS Lexington, probably nine or 10 times we've done that a lot. So we had some sort of something to gauge on but I think it was the submarine there is crazy active. I've never it was asked all the time. Every time he went down in sub, and it's not like a Southern about is this is World War Two. He can barely fit 10 people in that thing. It's yeah, shuffling sideways to get through the through the aisles and, and whatnot. All the original equipment is there. But we're here I mean, chips whistles and rats daughter saw actual apparition and just craziness. And it was just like, within a couple of hours of being there. But yeah, we're, we're definitely going back and you can actually stay on the ship. They allow you to sleep there that night. And so you know, that's gonna be an annual event that we do. Probably every February is good on the Galaxy and do those two ships.

24:15

Wow. Wow. Yeah. And now when it comes to hauntings when it comes to spirits and gathering evidence and using equipment on site, what are some of the protocols that you guys put into place to make sure that photographs that are taken aren't just stray? To make sure that you know EVPs aren't somebody's voice down the hallway, that kind of stuff? I know there's tons of tons of folks out there wanting to go out and do their parent their own paranormal investigations, even skywatching stuff like that, but what what are some of the techniques So you guys start off with whenever you get into a

25:03

property. First of all we may just like it especially with audio sessions we make sure that the

property. First of all, we may just like it, especially with audio sessions, we make sure that the immediate area is as quiet as possible. If there's multiple people in there, everybody has to find a spot, everybody sits down, there's multiple recorders going. So you can, you know, if there's noise, if a voice is heard, or something like that, you can go to other recorders to see if it was also captured a little bit closer, that way, you can maybe ascertain that someone else made a noise. Plus just we were very experienced in audio analysis and looking at frequencies and knowing that, that these frequencies that come across as voices that you cannot hear with your ear, come across as a low frequency, and it plots that on the map. So, you know, you can you can hear a sound, and an EVP that sound the same to the ear. But the EVP is a frequency that's at a level that's lower the threshold of human hearing. So you know, that shouldn't be there. So there's a science to it, as well, as opposed to just listening something and hearing someone say hello, and then going, Oh, I wonder if someone said that somewhere else, there's, there's a lot more that goes into it than that, you know, photographs and any kind of video, there's, there's always, there's multiple videos, there's multiple points, there's, you know, video and photographs is mainly just for documentation, as opposed to trying to find a ghost. It's to ascertain where everybody's at, you know, a video, you have a whole system video in there and you're running audio, you can figure out well, this audio recorder, pick it up. And look, there's nobody within, you know, 500 yards of this at that time. So those are the kinds of things we've done investigations, like you're in our hometown church, we got a we got a serious, serious Chateau apparition that appeared and walk out and Barry and I went back down to the house the next day, and we ran it through the wringer just to make sure that, you know, this wasn't something else. So there's, there's a, there's a due diligence that you have to do to be able to, you know, call something a paranormal or odd or without explanation. Let's just put it that way. Yeah, yeah.

27:15

And, you know, that is that is something that I am a believer, I have had my paranormal experiences, I have had my UAP experiences. I need no other evidence other than my experience, and I am always prone to believe the experimenter until proven otherwise. But it's interesting to hear you even even after having a show all that kind of stuff. Saying that you aren't looking for photographic evidence. Whenever, like, whenever you're taking pictures on site, it's more like, hey, take a take a picture of the before and after of that thermometer reading real quick, you know, to verify things like that not actively looking for apparitions in the photos, per se.

28:12

If we do find something in a photo, or it literally has to be like a dude standing there that we know was not there. It's not like Yeah, look, it's a it's a faded, you know, some men walk of light or something or a myth. And we don't hang our hats on those as all it is literally got to be standing there. Yeah.

28:33

Well, well, because I'm an audio video engineer. That's that's what I do for a living. I've spent and I unfortunately, break a lot of hearts in social media groups. When it comes to video anomalies, photo anomalies, things like that. Tricks of light. And yeah. Fortunately, most of

them can be explained. So like you're saying, to go out looking for fully explainable phenomenon doesn't really necessarily make sense. And is kind of a waste of effort. Can Gearheart

29:15

and all honestly, no, honestly, we have one photo. We only have one photo, when you say very that we we would say is yeah, that is something that many

29:28

10s of 1000s. Yeah, yeah. Probably to one for Bernie libraries. It was pretty cool.

29:36

I would say too, but yeah, yeah. out of 10s of 1000s. We would say yeah, that's not right.

29:42

And that's just it. You can get heart who will be of course, speaking at the upcoming monsters and Legends was on the show not too long ago. And we were we were actively talking about you know, As evidence for cryptids, Bigfoot, things like that, and he was of the same opinion as you guys, when it comes to photographic or video evidence, like it's not going to cut it. We need we need something more tangible than that. And even even interestingly enough when it comes to UFO UAPs a lot of people get very upset with like MUFON because they won't accept a ring video you know, like, here's, here's a video from my ring camera. And they will straight up ask people did you see the object? No, no, no, but I have it on my ring camera. Sorry, that's not a sighting. And, and they will literally not accept the footage because No, you didn't have eyes on it. Which is, which is what we are categorizing is, is sightings. So you could catch all kinds of anomalies with a rain camera at night with a with a night vision mode on it, you know? So if you haven't gotten around every single one, all kinds of strange lights and everything else like all somebody has to do is China remote control through a window and you'll get a strange look and apparition thing on the building across the way, you know, just from the refraction of the infrared. So yeah, you can you can get all kinds of strange things and good on you guys for actively going through the effort to exclude that to begin with. I think a lot of people get very caught up with putting a lot of effort into looking at things like that when it's like how are we going to get even once you have that? How are you going to quantify that now. Whereas when you're talking like you are very about audio, things like that EVP where it's like look, we can put this into a spectrometer and and we can actively see the bandwidth of audio. It's pretty amazing what you can do with just regular consumer software now off the shelf when it comes to audio processing, audio cleaning, and especially audio frequency detection.

32:38

It's pretty remarkable.

 32:44

But when you guys are out on property and investigating how often have y'all had physical experiences while you are there? Is it typically the case that you will hear voices or do you hear voices when you listen to recordings later?

 33:09

Most you know we've had what we call VPS Voice Phenomenon ready to use we get a calculator on an audio recorder Lucy apparitions we've been pushed we've been seeing object manipulation via their eyes as well as video. We've pretty much seen and heard pretty much everything there is a scene here. But like you said before, it's it's kind of our personal we're not getting the stuff to really make a name for ourselves. We're getting this because it's ongoing research. And we're comparing it and it's not just because we're hearing correlations of evidence we have to have not just an EDP, what was the NF doing what was the humidity during what was the barometric pressure at the time? What was the moon phase? What was the all these other factors what was going on? And a lot of times we have changes in barometric pressure changes in temperature changes in the you know, at the same second that we catch an EDP or we get a video or we heard a noise or whatever the case is. That's what we're after is actually quantifying millions of points of data over time to almost predict the paranormal, which we've been we've gotten to that point yet, but we're getting close because we have literally gone before and instead of finding the EDP will go in our enough data loggers that capture enough like every two seconds over say a 10 hour period and finally anomaly on the EMF and we'll go to the timestamp because they're all synced by time. We'll go to the recorder on that timestamp and sometimes more than more than others won't actually catch an EDP going the opposite way of defining the enough anomaly so and things. And that's that's one of the problems with the paranormal community. This is we're so, so stagnant. We're so set in our ways of. So I turn the recorder on and I say a couple questions. And then I listen to Okay, let's go the next one. That's it that stays recorded forever. We're not even at halftime, people don't even go back and listen to it, they'll go home, and that'll be on the recorder forever. They'll just delete it, because they didn't get the they didn't get the thrill in the moment. So, you know, like I said, The thrill is gone. Well, that point, they,

 35:35

you know, that is something that we bring up on their show regularly, Brad is is the idea. And, you know, once again, one of the reasons I love you guys show was it was not pure sensationalism, most of them that are out there now are about as sensationalistic as you can get. And it's one of those, it's pretty rare when you're out in the field that you actively stop and look at footage or anything like that, like that is a that is a post process where you take a day or so afterward to ingest everything into a computer and go through and fine tooth comb things. It's very rarely something that is done in that energised, adrenalized situation, you know, because yeah, that's, that's how you wind up with false positives. At that point, you you are more looking to confirm your belief than you are to disprove what you may have gotten. You know, and yeah, we should be, we should be willing to challenge what we get, like you said, except the fact that if we caught something every single time, it would not be paranormal, it would be normal.

 37:01

Right. You know, like, and you think about some of the anomalies that happen, like the Natural Science of Things, things we just cannot explain. Explain. It is normal. It's normal to the environment, it may not be normal to us, but it is normal. It's not paranormal. Well, that goes the the, you know, not every not everything is paranormal is a spirit of a dead person. I mean, it's literally recordings and things in the environment that happened naturally. Or, you know, if you could even go into, you know, parallel universes and quantum mechanics, and, you know, that that whole thing, and now how those work, you know, based on Einstein's theories, and I mean, yeah, there's so many reasons why these things could happen. That it's just not Oh, yeah, that's the spirit of a dead grandma. That's talking to me that it goes way beyond that.

 37:57

Yeah. Yeah. Yeah. Precisely. And it's it's interesting that you say that, because that is something that we discuss on this show regularly. Brad, is the idea that these these topics that were once really fringe in the world have really come around to a point of science, almost, when when you start talking about paranormal, EEG, ESP UAPs, UFOs cryptids. It's, it's fascinating to see the fact that science as we know, it now is accepting the fact that there are strange things that are there, there are strange forces at work. And that, yes, the possibility of something being left behind something being imprinted. Whether it be a residual energy, what have you is fully possible, like right now. I don't know if you guys are aware of it. But the Bigelow Institute actively has a million dollars worth of grants out there. For anybody that can prove Contact with The Other Side. For for anybody that can viably prove that they have contracts, with spirits on the other side,

 39:38

there's that that's a safe bet, because that'll never be proven. Because if you can always introduce one ounce of skepticism into anything is anything that's even scientifically proven. You can offer an ounce of skepticism and and that's not 100% proof, you know that that's not the case. You know, the grass is green, the sky is blue. Well, no, it's not not 100% of the time, but you can you can offer up other so that's a safer bet that that I think that is more for I don't know what exactly as for but they know that they're never gonna give up that million dollars.

 40:21

Well it's it's more the fact cuz they gave away they gave away a million dollars in grant money I know Jeffrey Mishlove was was the winner of a huge essay contests that they had last year about the existence of energy beyond the life here. And he gave some some great, great evidence and was actively the winner. I want to say he won, like, as first place. I think it was half a million dollars. Something like that.

 41:00

Theory, this theory not proof, though, I think when they use the word prove that's when it goes into a whole other category.

 41:06

Well, and yeah, yeah. And, you know, when when you're talking Sunday that, of course, that's the thing is the quantifiable the the tangible. And, and when it comes to the science, that's kind of like what what Ken Gerhart said, to where the rubber meets the road, that's where we're going to find out like it's, it's going to be it's not going to be a photograph that leads us to it, it's going to be DNA. That leads us to it, it's not going to be a photograph that leads us to the spiritual in the spectral, it will more than likely be a huge discovery in either energy or dimensional science, I think.

 41:54

Yeah. Because unfortunately, with today's technology, you have you have every meeting to recreate, replicate, falsify, yeah. You know, just with social media and, and propaganda and you know, the tiniest dissemination of messages. And it is, it is so convoluted, I think now, that that that's, that's a detriment to science, because it's never gonna just, you know, like, by COVID, recently, there was all the fours and all the against everybody had valid points, but you know, it, there's misinformation, and that's what the paranormal and that's, that's why I'm afraid that it's become so convoluted in that with the technology of today that I think it's, it's gotten to a point where you can't now 50 years ago, when you didn't have certain things and you have if you have these thoughts, and you can quantify it Sure, it'd be a little bit more believable. Yeah. But maybe that's just my pessimism.

 43:03

Well, I you know, and but the thing is, you have to have a healthy amount of pessimism, you know, once again, I am, I am a believers believer, man. But I also know that because of my deep founded belief in these things, that means that my realm of proof and evidence has to be greater than the average bear. You know. And once again, it can't just be a photograph, we've we've got to have much more data than that. To go into it. And when you're talking about is, it's interesting now to see, even even from when you guys started with Ghost lab, shortly before that, the realm of technology that is now available to the average person, just off an Amazon list is pretty remarkable. Like you can, like, I've got, I've got lab grade Geiger counters, man, you know, they were at one point really hard to find they they aren't anymore, you know? So if somebody is out there looking for I guess that, that arsenal of paranormal equipment, what are what are the things that you recommend that a beginner start out with? If they're looking to kind of get into the paranormal experimentation world.

 44:33

You got to have a good audio recorder. And that's probably the first thing you need to have something that you can actually download on your computer. The second thing and it's funny that this is probably our first thing actually about speaking, or data loggers. And it's so funny

that we use those and go slab. Nobody uses those and we thought we still think that's probably the most important piece of equipment you can have because you're analyzing the environment, you're gathering data constantly. Yeah, not You're not. You're not like poking an EMF detector around the oven in the microwave. Oh, no, it's not here. It's like, good data loggers are now I can map it, then I could actually show through software that we've developed, I could show the path of a ghost, I could show anomalies come and come and leave rooms, I can, I can tell you when the AC kicked on, I can tell you when the span is infrasound was happening, I can do a lot of things I can tell you. And I'm not even in the room. But I'm I'm relying on my data loggers to give me a picture of the environment when I cannot physically be there to test the environment. And nobody. I say nobody. There are a few people that we know, you know, just because the company we keep that most groups do not use data loggers. I just I think that's a that's a necessity to habits. Because it goes to what's what's the motivation? Is the motivation is having fun on a Friday night? Or is the motivation to actually sit down and do work afterwards? That's probably not the right. Yeah, no, sir. Just after Friday, I get tired of thrill a spooky place. We've heard a sound and we all got scared. And

46:17

yeah, we've all heard stories out there afterwards. And, you know, it's really interesting. No, no, no, not at all. But I would, if anything, because I've done my fair share of paranormal investigation and been involved with groups, things like that, in the past, I would consider it probably the closest to podcasting out of out of all of the fields would be paranormal, because everybody thinks they can give their Hackaday hat in the ring, you know. And the fact is, yeah, there's a lot of work that goes into that. There's, there's a lot of work. Even if you were to go out, most people don't really realize the metric amount of data. That happens once you've recorded video. Now you've got like, Okay, we recorded four hours of video, great. Now you have to watch four hours of video not once, but twice, so that you can fine tooth comb it. And at that point, now you have four hours of audio to listen to as well. So it really does metrically add up outside of just the evening of experience. And like you said, that's that's really where a lot of people kind of get lost is that they realize like, oh, wow, wait a minute, if you actually want to do this, it's a lot of work. And there is a lot of work on the back end and much more work on the back end than there is going and visiting and gathering data for a night.

47:59

It's all how you have you know, it's all how you portray yourself. If you if you want to have have a group to go out and have fun and experience things, that's fine, go knock yourself out. But don't sit there and hide behind. You know, we're here to our group is doing this and this and we're here to help people and we're here. You know, it's like, no, you're not psychiatrist, you're not psychologists. You can't help people in those respects. It's a very dangerous thing to cross when you try to start diagnosing things of that nature without a medical degree. You know, in you see it too much where they sit on the science and they say we're scientific, we're this and that. But when you ask them, Well, what are you doing scientifically? They say, Well, I'm listening. I'm taking audio recordings. I'm taking video. Oh, that's not science. It's something my you know, my 14 year old son can do?

48:50

Anybody with a trail camera.

 48:52

Cell phone. Yeah. So, you know, what are you doing to move it forward? What are you doing? And it's like, and when if you tell me, I'm gathering data from multiple sources, and over time, and and building data models on it, then I can say then yes, you're doing you're doing some good work. But other than that, you're just out for a good time. And there's nothing wrong with that. You have a you have an interest. You have an issue. You study up on ghosts, you read books, you read theory, fine, but unless you're putting that into practice, you are not a scientific criminal investigator. I'm sorry. That's the probably piss a lot of people are no but saying that. God's honest truth. Well, and

 49:33

I am I am happy that you say that, quite honestly. Because it's one of those that there is a distinct difference in a, you know, prime example would be when I went to when I went to the MUFON convention. This last year, I heard a couple people leaving the book section like oh, this is an alien con. It's like no, it's not a pop culture convention like right Now there are people taking a nine hour class on how to be a field investigator and how to gather data. You know, like it's an actual scientific convention talking about evidence gathering and cases throughout the year things like that. It's it's not a pop culture con necessarily.

 50:19

Yes. Don't move on people I know are the most boring people I've ever met in my life.

 50:24

Because because it's about the science.

 50:26

It's analytical. Yeah, it's very analytical.

 50:29

Yeah, yeah, precisely. And you know, once again, you can you can ruffle a lot of feathers and a lot of communities like that You sure can because unfortunately, not everybody is about the science a lot.

 50:46

But you put your money where your mouth is. That's That's the moral of the story.

50:49

What has probably because one of the things we talk about regularly on this show is the other side of the coin the flip side of the equation, the fact that everybody thinks that they want to have a paranormal experience. I don't know I've got a lot of books on the shelves from people that have most of them did not enjoy it when it happened to them you know, what, what has been probably the most frightening experience that you got? Let's hear from very first and then Brad individually here. What has been the most frightening case that you guys have encountered? While you've been out in the field? Very Go ahead. Well, my my story is gonna be the same as Brad story. Okay.

51:50

We investigated a ghost town that she's down in South Texas near current city called Helena, Texas. And this was years ago part two years ago. Myself Brad or friend Johnny Houser from the axe axe house. He came to Texas we went down to we're gonna get on a film like a little documentary type thing. And so we went there and there's a there's an old ghost towns and old courthouse and a farm sharecroppers cabin and old jail and across the street from the slow areas of the founders mentioned, we found talent. And then the last thing was Rockman. We went over to the Roman ranch, and then it's straight out of Alfred Hitchcock movie, it's this house is like, the epitome of the definition of a haunted house is what it would look like that old wood and the steeples and round windows and the inside was you know, old baby dolls and just old furniture and pictures on the wall people we didn't know and it was like the Haunted Mansion and Disneyworld pretty much. Why were there we heard now, cut it out. We call it an audio as well. But we heard with our own ears, this voice come out of the thick darkness. It was like this mumbly like rural rule. We could not understand but it was very guttural mean and nasty almost sound like an animal. And we're like, what was that? It startled us like what was that? And so we check for animals we check for vagrants we check for everything we could possibly think of nobody's there we're the middle of nowhere. And so we leave and it's about an hour and a half away I come home and I my truck, driver rattlers on the same street I mean, I dropped him off came around the block pulled into my driveway I put my truck in park turn the keys and pull the key out and pull the key out in my truck. You heard that same voice rule just mumbling the rule loud voice in the cab of my truck and man we're bailing out of the truck what is going on? Wow, what is that is like whatever it was and just rode two hours on my truck well Brad also has some experience in his house at night as well we didn't know this we he didn't know what happened to us I don't have them. We next morning we go back down and we can add some more filming to do we also left our equipment there. We had to go back and get it and we got there we put our laptops on the truck the bed of the truck and we're listening to the EPS and sure enough, we caught whatever that voice was we caught what it said. And it wasn't the mumbling guttural voice it actually said I'm going to kill you before I leave. Whoa is what the voice says. Me clear his day. I'm gonna kill you before I leave. So i Whoa no nowhere This house was out in the middle of nowhere. Nowhere near. I mean, probably 80 miles or so it's probably like 50 miles to the nearest semblance of a town. You know, just oil fields and cow pastures and whatever else. And they have a voice at two in the morning. Just manifest three feet in front of your face. Darkness. Oh, is you know, that'll give you nightmares alone? Much less the damn thing falling.

55:31

Yeah, yeah. And you were there. Were there any experiences beyond that? Yeah, with with that entity, or was Was that pretty much

55:43

the same entity. But we're I was upstairs I heard heard it again. Not just me. But I heard it actually felt the breath on my ear. And it said, told me to F and leave. So we can get out of here. Wow. And that was like right money. I spun around. I thought Brad messaged me. And he was nowhere he was a totally different bedroom. So whatever was in there, didn't like us to be there now to each other the rest of the story breath? Well, we will say this, we will say that there's others other families that kind of live, they live near there. And they're the ones who turned us on to the place to allow us to come down there. They have said that in that mansion, they feel like they're being watched, they don't feel welcome something you know, gripes and cussing them out. So this isn't the first time that said there's actual claim to that. But you know, you your claims all the time you expect to experience it? No. So that's one of those Be careful what you ask for. You just might get it. Yeah. durations?

56:50

Yeah, yeah, precisely. And once again, much like the images that y'all have. One in a 10,000 experience. You know, this is this is not something that y'all have had at every location you've been to how have How have your experiences out in the field changed you because because once again, this isn't, it's it's not like this was something that your family is into, it's not like something, you know, like, I know, my kid will probably definitely be like eight, nine years old, talking about aliens, because that's what Dad's into, you know? So it's not like you guys, once again, were brought up hip deep and paranormal or things like that, how have these experiences changed you over the years? And do you view them differently than you used to?

58:00

Me personally, as the essay is desensitizing me a lot to this, this kind of stuff. You know, before he would tell a story like that to someone who's never had experience, they say, I don't know how you even you know, don't have PTSD or anything like that. But you're talking we've done so much in this we've experienced so much. And you know, to the point of things being predictable, like Barry was talking about earlier, that shoot I can go I can probably go fall asleep on an abandoned autopsy table, you know, I could probably, you know, we've, you know, it gets real late and we're going to like an abandoned hospital in the darkest Dankest corner, you know, I might doze off and fall asleep, you know, just because, you know, you kind of get comfortable in those environments. Now, whether that's a good thing or not, I'm not sure but we do know that when your guards down is when a lot of stuff happens. So it's actually probably a good thing that we are comfortable in these places where you're just not completely tense and we just feel that you're gonna miss up and that's me personally, I would just say I'm probably desensitized to a lot

59:03

Yeah. And what about you Brett?

59:11

Just like us like my mom sorry

59:16

sorry Barry, what about you?

59:18

I would say the same thing and pretty much I mean we we just been around so long it's just become it's so exciting don't get me wrong. I'm gonna be doing this lab really goes live and we were filming every day. We're on the road for eight weeks at a time. So every third day read the location where it got to where it was like oh my god, I don't want to do this no more. They got to do the job. And I think what happened when we left ghosts I went away. Patrick a catch a break. And as the breakout longer longer longer. When we did go investigate something happened. The excitement came back. That's Though I think nowadays, if you don't have the pressure of making the show and producing evidence for the mass audiences out there that want to hear and see ghosts, yeah, it's more. I think it's made me more. I'll take things for granted, I guess anymore. It's like when things happen. It is more exciting now, because that's not a job to me anymore. It's got to do because I love it. I did it because I loved it back then. But when you're on a TV schedule, you're at the mercy of that, that work, you have to do what they tell you to do. And you got to go where they tell you to go and when to do it. And what, yeah, you are grueling. You know, I got I don't want to do something,

1:00:40

you are part of a product that is being delivered. Absolutely.

1:00:44

Right. Exactly. Yeah.

1:00:48

And yeah, it can be it can be hard. It can be especially hard if you're somebody that didn't want to compromise their science and have it like you said, the last thing you want to do is be manufacturing evidence for a show, you know, yeah, because beyond show you you still want

to carry on your career as an investigator, you still want to be able to help people out and and look into these things.

 1:01:19

Yeah, we noticed that the experience is actually probably started increasing again, we had a lot of experience with the beginning. As we did go slab it seemed to get less and less like very similar than when we kind of got into it. Just a real quick story. We're in Gettysburg, this is years later from that first story, where we're standing on a street corner, probably got two or three in the morning, foggy outside. And between Barry and I, all of a sudden, there's this this man, this, this apparition standing long black coat, kind of like a cat like a duster, a cowboy hat, very tall between Barry and I like if we could reach out and touch. And we weren't, we didn't freak out. We did nothing. We let it we let it sit there for a little bit. And we kind of observed it not we say a little bit, you know, several seconds. Then I said very very Did you see that? And he was like just recalling. Yeah, I said the black coat and the hat. He's like, Yeah, who would you just like that nonchalantly. And we weren't like what, you know, if we were able to let something manifest and kind of soak it in. And that's just because we've been around it so long. I don't think we would have had that experience if we were, you know, see something in jump like a couple of you know, scared teenagers.

 1:02:43

Yeah. Yeah, precisely. And, you know, a lot of that, like you said a while ago does does come with experience and getting used to, I guess, living in that adrenalized state, you know, the note no different than somebody going out on a rock and roll stage. You get used to the butterflies and they become your friend. You know, and you kind of use that how? How much do you think some places are, I guess more? A magnet for that than for true paranormal? Is it the case that some places are perhaps manifested because of people's belief in the place? Or, or have you found most most haunted locations you've gone to to be truly spirit and inhabited?

 1:03:47

Well, I mean, I'll speak for just a second. We talked about Gettysburg a lot. So we've been in him and several, several different civil war battlefields. The Civil War was a very harsh war, it was very deadly and bloody. And so and just the lot of trauma, a lot of trauma that's not in a lot of wars. We're in the Civil War. And we have found that a lot we can we can walk out of Civil War battlefield, from Gettysburg down into Virginia, that we've been to, and we get stuff pretty regularly, like pretty rapidly and it's because, you know, our theory is, you know, environments are basically stained with energy. And the more energy that happens in a, in a condensed period of time, it it just it soaks into the environment that much faster and will last longer. And that's so so battlefields are light we have found that you know, that we'll get a lot of stuff off of battlefields. But we also theorize about this kind of stuff, and we've got that I can't, you know, we say that we got one picture out of 10,000, we probably got seven or eight EVPs in one visit. Wow. And an apparition that walked out in front of us. I mean, it's, it's just under that those places are unbelievable. And Gettysburg. You've never been there. Just go and just go sit on the street corner at midnight, one o'clock in the morning. It's something else that

1:05:25

and I've been to numerous places from antiquity. And it's interesting going to them because there is there is an energy about them. Period. And especially whenever you talk about things like Antietam, Gettysburg, that kind of stuff. Those were those were strange McCobb scenes going on because like, there were literally people picnic and like, watching the battle go on.

1:06:00

It was a hell on earth. It was a hell on earth. And it was a spectator sport. Yeah.

1:06:04

Like, it's just a strange mix. And yeah, I could see how that energy would would stick around. Because because of how visceral it is. Then I want to thank you guys for your time this evening. For your candid answers to some of the questions that I've had. Let everybody know before we go, number one, how can they get a hold of you guys? If if they have a property that needs to be investigated? If they have a location that they know of that needs to be looked at evidence gathered things like that? And also, where can they go to get tickets for the upcoming event?

1:06:57

Well, the answer to that is one place they go to everyday paranormal.com You can also go to our Facebook everyday paranormal events where you can actually private message us as far as the easiest way to get a hold of us as PDFs DMS on that on the Facebook, we answer them pretty regularly. But to buy tickets you can go to everyday paranormal comm click on monsters and legends and from there you can buy our \$20 day pass which is where the speakers as well as the vendor area. And there's also a \$59 VIP experience which the night before we're gonna go out a little mini ranch nearby and have good Texas barbecue, some music and some drink some beer and under the stars and get this talk with Ken Gearheart and loud Blackburn and David Weatherly, and Nikki Folsom. And some of the others that are there as well he can pick their brain one on one, then instead of waiting to you know, listen to the speech and get that one on one time. But that you go there in proportion of the proceeds go to charity. So \$5 of every 20 An article we sell goes to our local high school project congratulations fantastic, as well as the we have an a car show classic car show as well. All the proceeds from that is going to go to the guardians of the children's charity. So this is really a community event. We have 2323 25 vendors, we have food trucks, we have classic cars we have we have a beer and wine will be there. We have really good food, really good speakers. This is gonna be really cool experience. So hopefully the rain holds off. And it's a great day and we'll have a great day you're gonna be there. We'll have you set up under the under the porch. Podcast and it's gonna be super great. It'll be a good time.

1:08:43

Absolutely. Once again, I want to thank you for your time tonight. I know you guys are slammed with preparation on stuff. I know how crazy it gets the week or so before a show but I wanted to

have y'all on to help promote the show. Talk about it a little bit. And I am I am greatly looking forward to it. It's gonna be super fun. I can't wait. Make sure also folks to stop on by their website as well as not only everyday paranormal.com But the investigators 411 dot com that is where you can contact Brad and Barry if you have properties that need to be looked at or if you think that there is something there in your local area. Guys once again, thank you so much for your time. We will see you at the upcoming monsters and legends festival so we'll we'll see you in a week.

1:09:44

Take care appreciate it.

1:09:46

All right. Absolutely that man what a couple great guys. I can't wait to go out. Check this thing out. Stop by and check it out folks everyday. paranormal.com forwards Last monsters dash and legends. You can stop by by tickets stop by heck stop by and donate, just to donate to the kids that are going to be helped out by stuff when we get back from our commercial break, we will be joined in this pre recorded segment, as always after commercial by Joshua Shapiro from the Center for the Advancement of humanity, he has some messages for us from his future self orgeous That that had been channeled to him that he contacted me and wanted to discuss. So we will be talking with Joshua Shapiro regarding revelation from arduous right after this folks.

1:11:34

With the rise in attention to the health benefits of cannabis and cannabinoids, including CBD, drew him science has become one of the premier providers of full spectrum CBD and CBD related products using a proprietary spagyric process. Through him science extracts maximum benefit from the whole plant buds, leaves, stems, seeds, even roots, every part of the plant is used and then reuse to formulate a rich Complex Profile of CBD, CBD derivatives and terpenes guaranteed to provide the relief and benefits you need daily. Visit [true him science.com](http://truehimscience.com) to experience the best CBD oils, edibles and topicals on the market today and use code curious seven to save 7% off your entire purchase of \$50 or more and get to 25 milligram CBD cookies or brownies free that website again is [true him science.com](http://truehimscience.com) and the code is curious seven.

Have you considered starting a podcast? Looking for a way to make your business a voice of authority in an industry? The podcast Cadet is the solution for you. Whether starting a podcast for yourself your brand, business school, church, or just plain fun. Podcast Cadet is here to help you navigate the waters of the podcast industry specializing in one on one consultation and training with industry professionals in fields ranging from podcast technology and editing, to distribution monetization and even social media strategy. Podcasts Cadet tailors their services to the specific needs of you and your podcast. Do you already have a podcast and trying to find ways to engage and grow your audience? Sign up for your podcast Cadet audit today. And let us help you explore new and exciting ways to leverage your content and elevate your podcast

brand a whole new level. From consultation workshops to affordable podcast production and maintenance packages podcast that is your one stop shop for everything podcast related on the internet. Visit [podcast cadet.com](http://podcastcadet.com) today to sign up for your consultation or training and use code curious 20 to save 20% off your entire purchase. That website again is podcast cadet.com

 1:15:04

The Curious realm Podcast is your source for the latest and greatest news and events in the world of the paranormal, esoteric and forbidden knowledge. And there is no better way to spark the conversation than with items from the curious realm store. Choose from fan favorites like hoodies, mouse pads, coffee mugs and more. Buy books and items from your favorite curious realm guests. Get your hands on the latest gear for paranormal investigations and experiments we discuss on the show, open your web browser and stop on by the curious realms store at [curious realm.com](http://curiousrealm.com) forward slash store to buy the latest curious realm where and out of this world gifts for yourself or your family or a mind that you want to open. That website again, is [curious realm.com](http://curiousrealm.com) forward slash store.

 1:16:01

Welcome back to my commercial break. Thank you so much to our sponsors, especially our continued sponsor of web works wireless, if you are looking for wireless for your camp remote location. If you're a remote broadcaster like me Stop on by and check them out [web works wireless.com](http://webworks.wireless.com) Is your home for unthrottled. And uncapped. Monthly internet anywhere you have cell phone signal. Our guest in this segment is Joshua Shapiro. Joshua Shapiro is the author of Journey of the Crystal Skull explorers. He is also the author of numerous books that we have up in our store, we have featured Joshua, numerous numerous times on the show talking about crystal skulls, information downloaded from crystal skulls, as well as a messages from the other side from crystal skulls. And here recently, he and I have been in contact and been talking about the Center for the Advancement of humanity, a new project that he has going on, that he was instructed by spirit to help create and help move humanity forward and help answer some of these questions that have kind of befuddled us for a long time. Now I want to prep this this series of conversations because this isn't going to be a one off episode, folks. This is going to be numerous things across numerous months, where we sit down we have these conversations with Joshua, about information that has been channeled to him from the future. And it's it's some remarkable information. It's absolutely interesting and fascinating. I myself have my crystal skull Omma here on the desk with me. I meditate with him regularly. How are you doing, Joshua?

 1:18:11

Well, I'm very excited that we're in 2023. Yeah, so I think that this is going to be a fabulous year. And this has to do with the message that I told you about which we'll be talking about here in this first segment of many segments. We're also getting ready to move to Florida. So I don't know it just I just have this excitement that once we get there. There's a lot of extended soul family, I've already been in touch with a few people. And we're going to be doing some great things. So our life is getting very interesting right now. But before we get started, I want everyone to know who who is watching this. I am so indebted to Chris, because I do not have

the ability to create this kind of video that he does. And I have some important information that Spirit has given me They're driving me crazy. I've already put part of this on my Facebook page. I'm doing like segments on Facebook that are linked to this. And I've been sending out messages, excuse me to our mailing list both for the Center for the Advancement of humanity, which Chris showed you and our crystals go mailing list, because I think major stuff is getting ready to happen this year. And this is kind of what we're going to talk about. Now one other thing I just want to mention before we get started is I'm just a regular person like the rest of you. Maybe I'm an Aries so I'm you know I have that fire and I'm more motivated to go out and find the truth but all my life since I've awakened in my spirituality, which I think started around 1980 I have felt that any important information that comes up, I must share it with other people now, just because I think what We're gonna be talking about is really important, you may not agree with everything, a lot of the things we're going to be speaking about are very controversial. Conspiracy Theory, which a lot of people are realizing conspiracy theory is the truth. And that's why probably, you know, whichever government agency came up with that term, they did it because they knew in the future that many people and whistleblowers and so on, would be talking about the truth of what's really going on. I, the information I'm giving you, I do not have, like a special whistleblower, like some people who are talking on Telegram, ham, this is just stuff that is coming to me, I'm listening to I'm receiving, you know, like response. Telegram is like this, the key place that I'm getting stuff, but when we talk about my special experiences, then you'll better understand it. So that's a long answer to how I'm doing. But I'm very excited about this year. And I think a lot of things are going to heat up and, and I'm praying to the universe and to God and to whoever listens to us that maybe this year, the resources will come if the new financial system comes in, definitely, we will have this. And in the Orlando area, before the end of this year, I hope to have the first physical location for the Center for the Advancement of humanity. And I can't even imagine what it's going to be like, I mean, there's going to be so many amazing people we're going to try to hire and bring in and so many projects we want to do. So. I'm salivating about that. But I have to be patient to target. Aries. Right, you know,

1:21:42

you know, you you were discussing a second ago, the hard conversations that we're going to be having the hard revelations that you have had, and you know, a lot of the conversation that we have Joshua is the the sociology behind why people have been separated over the last few years. I mean, even even politically, mind you the fact of like, Dude, there's there's families that don't have Thanksgiving together anymore, because of how somebody voted. Or because, you know, somebody along the line was like, Well, you know, I think that thing came from a lab. Oh, you're a crazy person. It just came out from the Wall Street Journal. For all of you out there who were like me, like we had content on dudes and beer. You used to Come on dudes and beer before we were ever curious around. We had episodes of cure of dudes and beer that were removed from YouTube that were removed and muted on on Facebook, because we were talking about labs and and leaks. And the possibility of that nope, nope, disinformation. This isn't real. It's not what it is. Despite the Republican panel that happened that like two news agencies attended, where they straight up said that it was like 95%, a lab leaked that was like all intelligence sources that were saying that and the Wall Street Journal just released an article saying lab Lee most likely origin of COVID 19 pandemic, the Energy Department now says, so yeah,

1:22:00

1:23:29

we're definitely in a different time right now. We

1:23:31

are we are and it's it's hard to listen to each other and listen with open minds and open hearts. And once again, there are going to be a lot of topics in these conversations that you and I have Joshua, that will be trigger moments for people that will be triggered topics for people. I am willing to explore the conversation to further humanity. I believe that that I mean, that's what this show was about to begin with, was like, Hey, you want to talk Flat Earth? Let's talk it, you know, but you got to be willing to have the conversation and you got to be willing to hear somebody's side?

1:24:08

Exactly. So let me first explain to the audience, what triggered see, what people have to understand is when you're kind of like a creative person, you get inspiration. Like let's take the example when I write a book. So I haven't written a book for a while. The last one I did was on flat Earth. But what happens is, is I get overcome by an energy. Okay? And I'm giving this example because then it's going to lead into the message that I got in January, which is bringing all of this forefront and causing me to share a lot of information. So you get the inspiration, okay, you need to do a book about such and such a subject. Then the next thing that comes to me is I see the table of contents in my mind. So what we have to understand is that everything that exist gets created by the mind first, it already exists in another dimension. And then eventually, it starts coming down into the physical reality. Because for me, the greatest joy in writing a book is once it's done, and it's in the physical reality, and then I can start sharing it, instead of just looking in my mind. It's, it's just, I don't know how to describe it, it's just an elation. It's just amazing just to see, you know, I've been watching this for six months or a year, and now people are able to see it, how they're going to respond. So, in January, and this usually happens to me, I think when I go to sleep, I go to these meetings in other dimensions, because sometimes I wake up in my head is filled with information or an idea, or an inspiration of something I'm supposed to do. So this is what came to me it's like the single line messages. So I want to talk about the message that came. And then I want to give examples of a couple of other ones which are very profound, I receive, which I think are very important right now, too. So the message in January was, we're in 2023. And absolutely this year, the truth has to be revealed to all of humanity. Okay. Now, let me try to explain what does it mean by the truths? So we are all talking about the same thing. So the truth to me is not just the truth of who we are, and the truth about our world in our history, and everything is the truth coming from God's side or creator side. But it's also the truth of what's been going on behind the scenes, that we see all the crazy things going on. Like in the Super Bowl in the Grammys, where they were doing these performances. Come on, these are crazy things they're doing they are there are almost people would say they're kind of satanic rituals or this.

1:26:57

That that is what some do claim. Yeah, it's kind of

1:27:00

like what's happening right now. Yeah, so I think what's happening right now is there is a undeclared war going on, we probably talked about this before, a little bit between the light in the dark. And I remember when I first started getting involved in my spiritual awakening that, you know, things of God and things of the devil, you know, we learned about both types of energy, but we always felt like, you know, God is more prevalent. And the the only way the devil can, can involved in people is, you know, if they're following a dark path, and they're susceptible, but what is being talked about, like on telegram and as I told you, Chris, before we started, I'm not going to get into really high level, deep specifics about what's going on. But this information is available all over the internet, on Telegram, the major problem of finding it outside of telegram is, is that all the social media and the search engines, all they had to do is cut their their search algorithms. So like if you want to find something like I started looking for things. Like back in the 80s and 90s. I can't find them anymore. They've removed those search terms, or they've put them so far. In the back of the search. You'll never find them. Okay, yeah, I'll just use flat Earth as an example. Eric Dubai was one of the first people 2014 came out with a book on this, and we're gonna get into into flat Earth in another episode. I'm just using it as an example. I'm trying to be spontaneous and just go with what comes to me in 2014 when he came out with all

1:28:51

we're losing you a third. Yeah, flat

1:28:54

Earth now. And it's the outside. Are there more? Do you hear me now? Yeah, yeah. Hello, can you hear me? Yes. Okay. So when you go to flat Earth now, and you look it up? What happens is you only get people who talk about like morons or stupid or idiots or whatever. So, your your thing froze there for a bit. Just let me know if you still hear me.

1:29:25

Yeah, yeah, I hear you.

1:29:27

Are you there? Yes, I am. Okay. Yeah, because the PTO is freezing up a bit. So. So this is the same thing. Like if I want to look on UFOs, or I want to look on some other highly controversial subject, you do a search and you're not going to find the good information right at the top. You're going to find the people that are challenging it or whatever to try to convince you. You know that this is not something that's important.

1:29:55

Yeah, and prime example is what I have up on screen right now. Just to Google of flat earth, not something that I typically look up or anything like that. And my typical source that I bring up, I mean, here's space.com, how how to debate a flat earther. But the only thing that pops up with flat earth theory model and facts britannica.com My typical go to whenever I'm bringing up like fact based stuff, things like that. So the only one that starts with a conversation of let's talk about the theory of flat Earth is Britannica. And it is literally at the bottom of the first page of Google searches.

1:30:39

Exactly, yeah. So. So what this means is, if somebody wants to find information on some of these alternative subjects, they can't use the search engines to really find the best sources. Except for telegram now telegram still has infiltration going on, then some of the channels, they use channels there, they say they're fake or whatever. But what I have found is, and this is part of the key of the information I'm going to be sharing is certain channels that I trust, and it's periodically, they bring up some new things. And I go, God, that's right, that makes sense. So, in this series, kind of what I'm going to be doing is what I normally do when I share information, is I'm going to pick the best information that I find, and which resonates strongly like you know, one of my gifts is I feel energy. So if I read a certain thing, or somebody tells me certain things, I'm vibrating. So I know for myself, this is my way of confirming that there's something important that has been presented. Now, as we discussed these different areas, we're going to be talking about a lot of different areas. Because I have, I want to verify that what we're going to be talking about today, what this message is saying, and what the results of what could happen this year, I want to try to verify that this information is correct. So we have to talk about a number of other subjects. And I don't know how far we'll get here, segment one will go as far as we can. But the other thing is that I want to remember before I forget, there are eight free ebooks that I have to offer to the listeners, six of them have personally written and two are from two other sources that I just found recently. One is another author who gave me permission to share it. And then another one where I can't find the source. Unless they tell me not to do it, because I found it for free on Telegram, I'm just going to keep sharing it. And I'll talk about those three books, free ebooks, before we finish, so people know what it is. But those eight free ebooks will pretty much contain all the different information that we're going to be discussing in these segments. So if there's anybody who's like, I'm very excited, I want to know about this right away. You just email me and Chris will have for you. And I'll give out later, but my email addresses and I'm happy to share them. I have been doing that. Since COVID. Started, I've been sharing free ebooks because normally, I go out and I do public presentations, you know, and I talked with people, but I've only done two since 2021. Here in a center that has always opened the door to us to speak. You know, we did Crystal Skull, I spoke about Tartarian. And then we had one opportunity where we've vacationed. My wife Katrina, her family has like a condo. And so when they're not renting it out, the family can go and stay there. So we stayed there and I got to go in casa, Casa Daga. Florida is a spiritual center, which I can't remember the name of it. They had a fair and our friends had a booth there, they let us share their booth with them. So we were there, but the heat overcame us. So we couldn't stay for the whole time. But those are the only two things that I've done. Everything else is like interviews, or sharing free ebooks or doing post or

1:34:10

Well, we will definitely be adding the eBook that you shared with us for this that I'm showing on

screen right now. I will definitely be adding that to our curious realm. Knowledge vault. So let's go ahead and start off with how did how did you come to these revelations to begin with Joshua.

1:34:34

Okay, so I would say that in the early 1980s, I started my spiritual path. And I just felt like, you know, there's more to life than the life that we all know, you know, the everyday life. There's a spiritual aspect to it. And that caused me to become a seeker of Truth. And when I say a seeker of Truth, it means I want to know just like probably many of you that are watching all of these podcasts that Chris does. You know, we want to understand what's really happening, what's going on. So that started me off and then I traveled on faith to California. And that gave me enough information to write my first book *Journeys of an Aquarian Age networker*. Now, I want to tell you about an interesting experience that came up related to that. So this segment I'm going to be doing, so you already gets used to me, it's gonna be a combination of information. I've discovered with personal experiences and what came up from those personal experiences. So *Journeys of an Aquarian Age networker*, or was just the, like a 400 to 500 page book, I don't know I always write big books. But with different information about the Aquarian Age, you know, what was going on what what I was finding, as I was traveling, talked about UFOs talked about crystals, so ballistic health, all kinds of materials in there, of course, it's out of print. But I'm planning that when we get our center together, we get our publishing department, that dead book will be reprinted, that'll be one of the books we reprinted. But here's where this interesting experience came up on this. So this is one of the this is the minor experience, but it's confirming what I'm doing right now. And it's also incredible, and I can't tell you the whole thing, because I'm still checking out part of it. So there's this couple that contacted me last year and they said, Are you Joshua, who wrote *Journeys of an Aquarian Age networker*? And they said, Yes, I am. I said, we finally found you. Well, there's this woman, a spiritual medium that I learned from and taught, she's passed away. And I'm continuing to share the materials that she channeled, Jesus of Nazareth came through in 1984. And mentioned you by name and a message. What? Are you kidding me? No. Yeah, she did. Would you like to see that message? Are you kidding me? Please send it to me. I'd be very curious. So and I never heard of this lady. So she sends it to me. And I'm reading it and by God, I might Joshua, *Journey seven Aquarian Age networker*, but this is what's the key, one of the key messages I can share here. He was saying to me, Joshua, there's a lot of stuff that you've learned, you're going to have to unlearn that's not correct. And so I'm saying I took 40 years to get this message. And also, the medium was told, You're not allowed to send us to Joshua, you have to wait for the right time. So this is just an example of how for each of us, when something special supposed to come up, it happens exactly in the proper time. So I got from that message that, you know, going into Tartarian, flat Earth, a lot of new things that I've been looking at, since COVID, came out and all of that, that this was already known that I would be starting to explore and do that. So it's kind of confirmation for me that I'm doing what I what I already agreed to do before I was born or whatever you want to call it. So that was the first book I did. And then eventually, you know, in my travels, *Crystal Skull book*, a UFO book, I helped man who had contact with Bigfoot to publish this book, and then start doing all these free ebooks, etc. So I've done a lot of traveling a lot of speaking. And through meditation, through messages, I would say, my first two gifts is I feel energy. And I constantly have conversation, like even before I'm speaking to you, I'm hearing the words inside my head, in my mind's voice, which is a form of telepathy. So this message that I talked about, that we're going to get the truth this year, and it's going to start coming out. That was a telepathic message, which I don't know where it came from. Maybe I was at a meeting, and I heard it, and I woke up and it was still in my head. I can't tell you. I said

before with the other messages, I want to mention a couple of other messages like this I receive, which I think are very interesting. So another message I got like this was when you are spontaneous, is when God or creator, whichever word you want to use, is able to manifest through you in the physical level in the most powerful way. So I'm going to try to make sure in our comp or stations, Chris, that I'm very spontaneous that I'm not like when I'm thinking of stories and things, it's coming to me. So I'm going to trust that that's what I'm supposed to share. So that's kind of what it's like, are like a music. I'm a musician. And another way that I express this you I write songs, okay, but I never, I'm too lazy to put words into it. So what I've done when I performed in public is I said, Okay, I have this song, but I need the words you give me the subjects and I make it up. And they're usually pretty funny. Although there was one time, I performed in a place in Chicago, you know, like a bar, whatever, where they had an open mic, and they gave me some not so nice subjects. And I sang it, and they threw me out. So funny, funny story, but you know, so that's an example of another message. Another message I got is anything that you can imagine, you can only imagine it because it already exists somewhere. So that's pretty profound as well. So it means that you know, any new inventions we come up with, or new philosophies, or new ideas or new realities, we can only imagine it because it already exists somewhere else. And then this is the last one, and I'm pretty sure it came from creator directly, is in 2020. I remember I was sitting here in this house, and I was thinking to myself, God, why would God be interested in each of us? We ourselves are so minut compared to the humongous size of the universe, or universes or dimensions, or realities, etc? And I heard an answer to that. Why? Because of your unique experiences, of course. That's why I love you. Now, I need to explain that a little bit. Chris, I can see you're nodding. So you probably already get it. But what the message is, and, and I really felt like this time this is from creator. I mean, this is from the creation of everything that's telling me that what Creator is saying is, is that it doesn't matter how you live your life, you know, you may think you're living your life wonderfully, terribly. You could do better, whatever it is, however you express it, it's a unique expression of life. And that is what creator receives from us. In other words, creator can imagine every conceivable reality that there is, okay. As a matter of fact, it's through the power of creators mind, I believe that everything exists. If creators stopped thinking about us, we would disappear. Okay. What does create a receive from us? It's our experience, our experience.

1:42:34

Now, that's before we get into and start getting into the messages itself. And, and divisions that you've had that have that have come to you from future self? Let's, let's get into spirit just so people are aware of what you were referring to whenever you say, spirit? And when was the first time that you because there's a creator in spirit here? Yeah. When When was the first time what is spirit? And when was the first time that you receive messages from spirit and started that back and forth communication that has existed? Or let's

1:43:19

go with the first the second part of your question. First. I think I was receiving messages from spirit when I was a teenager. And the reason I say that is because before I would go to sleep, and I couldn't go to sleep, I start thinking about everything about life. And I said something's not right. And I was starting to have this internal dialogue, where I was thinking about, you know how my life was as a teenager because I think it was around 13 years old. So I would

interpret that as the beginning of the first communication with spirit. Now spirit itself represents a level of consciousness, or a level of aliveness something which is alive, but it exists in another plane of existence. So in other words, you know, it's, it's kind of like, they're like our soul or spirit is inside our physical body, which means that we are multi dimensional beings, we exist in many different planes of existence. And so spirit to me, is that level of consciousness or aliveness, which does not exist in the physical, but through telepathy, through our spiritual gifts, clairaudience, clairvoyance, etc. is able to communicate with human beings, if they're paying attention and listening. Now, I think the reason why I paid attention and listened is because in other lifetime I've been following a spiritual path. So that part of me My true essence or my soul is continuing into this life. Also another reason I believe, because I have memory somewhere called Soul Memory, that before I chose to be born as Richard Shapiro is actually my birth name, but Josh was my spiritual name. Before I was born as Richard, I agreed to do all these things to get involved in the studies and everything. And I also knew that I would have spirit guides, which means an intelligence, or a living being, which is not in the physical, but would be communicating with me in some way, which is how I interpret the messages because like the first message that triggered me on this path now, to do the segment's with you, you know, I wasn't thinking this, it was in my head, it was just there. It wasn't something, I was thinking myself, it's just there. And the challenge that's happened to me, as I've grown more with my spirituality, and, you know, getting to find out more about myself is sometimes it's difficult to know, when I'm thinking as the human, and when I'm thinking as my spiritual part, or when somebody is talking to me, as a spirit that's talking to me. So the way we would define spirit is, it's a being that's alive, that could be that is right next to us. But we cannot see or perceive them through our physical senses, but it's very much alive. And when we pass away, when it's our time to leave this life, and we return into spirit, so we could become a spirit guide for somebody else. Okay, so it's kind of like, okay, so I just heard somebody whispered to me, it's kind of like, the true essence of everything that exist, is spirit, but how it wishes to explore, you know, this infinite reality that creates it or can choose different bodies. So you could choose to be in the physical world in a physical body. And it may be, and this is what I think that only a part of My Spirit is here, not my full essence. You know, it's just a piece of me is here. Because and this is one of the key spiritual things is very difficult to understand this, and I can only understand it because I experienced it inside. But when I've talked to spirit through spiritual mediums are I have these conversation. And I say, what's the absolute truth? There is no time there is no space. What? What are you talking about? Here? There's time and space, you know, I move forward. I'm moving through time I'm moving through space. What do you mean by that? On the higher levels, there is no time there is no space, everything happens at the same time, in the same place. It's just different by the vibrational frequencies. The difference in the vibrational frequencies. Example, from Star Trek, there was an episode Star Trek Next Generation warp goes to this back. And then some kind of strange phenomena happens to him when he's going back to the Starship Enterprise. And he starts moving from parallel Earth, not parallel Earth, but parallel universe to parallel universe. It's like Geordi lift, or in his visor, he has some energy that triggers his transformation of moving from one to the other. And so he blacked out and he looks and everything's almost the same. But Captain Picard who wasn't at his birthday, all of a sudden, he's there, you know, so he's traveling. So this is kind of the idea. I'm talking about, that there are parallel Earths that are other dimensions of reality. But the highest highest level is where fair it is. I said this on telegram and I thought, Wow, this blew me away. The ether, the ether, ether, eth er, a eth, er, Einstein would not include ether in his theory. So his theories are not correct, according to some people I've talked to. But that's just a sideline, I'm gonna throw inside lines periodically. But the either somebody said could be where the spirits are, the ether is the energy frequency that creates our four basic energy patterns, fire, earth, wind, water, the ether is the one where they all that's what they're talking about. So like, for example, if I, my father mother had

passed away, I know I'm throwing a lot of stuff out really. But that's, that's my jump. So let's say my father mother, who passed away. So I'm going to Lincoln right now to my dad, okay. He's, he's in spirit. Okay. As a matter of fact, at his funeral, and I had explained this to my family, that I would be talking to the spirit of my father to explain what was going to happen to him next, so he wouldn't be afraid. So my father saying to me, son, now I see why you're doing all that. It's crazy stuff. I didn't get it when I was alive. And I'm really proud of you. And I know what's coming on ahead, because now I'm in spirit, and I see so much. And plus I love the libraries up here. Okay, so that's his common great hybrid. He used to, he used to love going to the library. Okay, so maybe I'm making that up. But that's what it feels like my conversation. So I just link in to him. But it's kind of like a telepathic, they can kind of see what's going on. But my vision, my innervation is not my highest, although there have been like, three or four times recently where my third eye popped open, and I couldn't go to sleep, because I kept seeing these scenes when my eyes were closed. And I'm used to it being totally dark. Go ahead, Chris. Yes, good question I was

1:50:46

gonna say, in addition to this is is the fact of cause like you're saying, Future Past, present, all happening simultaneously. Some of this information comes to you via your future self. And is it is it rise? Is that how it is pronounced?

1:51:08

No, it's called arduous, arduous. arduous is the name. Okay, so this is what Chris is asking about. And it's going to lead me into my two experiences. So that's why I know what our future well. I have a sensing of the future. And I share it with people. I can't prove this. But this is where it comes from. So when we when I talk about this, your listeners understand, and

1:51:34

that's why I wanted to preface that so.

1:51:37

Yeah. Okay, so this did not happen first. This happened second. No, actually, I'm wrong. It happened first, and I didn't realize it. But let me talk about what happened when artists communicate with me and who are just is, so one day, you know, again, it's a telepathic communication and minding my own business. And I liked this name art, just because it represents Richard, Joshua, Illinois, Shapiro. Okay, that's where it comes from. And Illinois Shapiro is kind of my fun name. Because you know, you can see my picture there. I wear an Indiana Jones hat. So I call myself Illinois, Shapiro, because I'm traveling around the world, and I'm doing investigation, and I kind of feel like that spirit. So all of a sudden, our just comes, and he starts talking to me. And he said, You know, when you were in Brazil, and you received information about the future, that came from me, oh, now the information that came from the future is in the free ebook. It's called messages from our just, so you can either get it through Chris or you can get it from me. And it basically talked about a future where, you know, all the

parents are, I'm sorry, all the adults, our parents taught. total peace and harmony. It's not nations to its community. We have extra terrestrials walking among us, we have fantastic technology there. You know, it's like, whatever any of any of your listeners could dream about a future with total peace. That's what I was being told about. It was being described to me. So are just as I'm the one who gave it to you. So does that mean you're in the future? Arges? Yes. But Joshua, I am you in the future? What do you mean, you're me in the future, I'm who you're going to become. Um, you're going to change your name to arches. So this is part of the reason why I talked about that there is no time. Because if there is no time, it means that, like, for example, you could communicate with a future part of yourself, whether it's a future life, or a future part of yourself in this life, it means that you could talk to people you've been in the past, like, you know, my music ability. I didn't really have somebody teach me, okay, it just came, I picked up the guitar, I learned the basics. And all of a sudden, I'm writing songs. And I started to do that a little bit on the piano, or the or the keyboards to I can't tell you where it comes from. I'm playing spontaneously, and I hear a song. So are just is the future me an arduous is part of the reason that I know, any tells me these years 2037 to 2040. The earth is going to have total peace. I know this because I'm living it right now. I'm here. Really? Can you tell me how it all happens and everything so I can let everybody know. No, I'm sorry. I cannot tell you any of the circumstances that bring this future I can show you in your mind's eye because you're me. So part of what I was describing to you. That's what I see in my mind's eye from him, but I cannot I'll tell you how you become me. You have to go through all those experiences. Otherwise, you wouldn't become me it would change everything I can. The only thing he would tell me, which was kind of funny. So I said, are just where you are? Is the Center for the Advancement of humanity still there? Are you kidding me? It's all over the world. What are you talking about? So that's the answer he came. Now, for some of your listeners, this kind of conversation could be, oh, you know, this is like people who write science fiction stories or whatever, they make it up. And it's not real. But for me, when he's talking to me, this is extremely extremely, very real sure. I either have to

1:55:42

trust it, or I don't Well, well, and you know, a lot of my a lot of my listeners would probably be like, Chris, didn't you recently do an episode about Corey Goode? Yes, I did. However, Corey Goode claimed his experience to be something that he lived, that they like, this happened to me, they took me this is what happened. And now he is saying that it was all all channeled. That's a totally different situation. They really, is he saying that now? Yes. Literally, in deposition, Joshua.

1:56:15

Because there are other super soldiers. Oh, sure.

1:56:19

No, there. There are numerous other people. There were people before Corey Goode. That's the thing. There were people before. But he's saying that everybody after who is claiming the same thing that he said, is delusional. That everything that he had the Avians, everything else, the Avians are his meditation guides, not something he ever said. This all came out in an eight hour

long deposition that he and his lawyer tried at the beginning to say like this is going to be sealed, right? Like, it's, it's remarkable to go hear it from his own mouth, calling it intellectual property. And it's like, Hey, if you had said from the get go a decade or so ago, that all of this is channeled information, this is all what came to me through meditation sessions. And that is what I am practicing here. This is all stuff that has come to you through channeling through talking with artists, everything else. So this, this is not something that it's a different situation here, folks. And that's why I am giving it the credence and the do that I am giving it because I am interested in this conversation. And I think it's something that we should at least court and talk with, as a side to giving that any more bandwidth than what it needs. You

 1:57:45

know, this is the this is the challenge that we all have. Yeah. Is that when we have an Enter, Enter experience. It cannot be proven physically. No, no, no, no, the crystal skulls is a little bit different. There are people who have experience with that. And I've actually been able to do some tests with them that show but I have to have the PERT I have to measure the energy from the person. Sure. I haven't found a device specifically that can measure what energies are coming from the skull themselves. So we've worked with we've done tests where a person is sitting with this girl and we use like a meridian stress test system that measures the acupressure points. And we saw that when a crystal skull that has been activated or is alive is introduced, the energy of the person shifted. So we were able to measure it through the device. Okay, but an experience like what I'm talking about, or the next one I'm going to be talking about, you know,

 1:58:51

I have an unquantifiable.

 1:58:53

Right, I experienced it inside of me. And I just share the information. That's why I'm saying for these talks, we're having each listener you have to decide exactly, exactly your discernment that you have to say this this work for me

 1:59:10

that is, that is exactly what I'm saying. He claimed his as absolute fact. And that's not you, and you just prefaced exactly what I wanted to prep as Joshua. The fact of this is information that has come to you through through channels of your own meditation through channels of the future, and everybody needs to judge this on their own merits spiritually.

 1:59:40

Right. Like one of the books I've written is called journeys to the Crystal Skull explores travelogue number two search for the blue skull in Peru. Another 400 page book. I just got an email from a lady in Australia who got the book she got it through Amazon because it's an

email from a lady in Australia who got the book she got Get through Amazon because it's on Amazon to where they can get it through us. And she loved it. But again, the whole book is about looking for a blue skull, which I have never physically seen. But yet, as I'm talking to you right now, in my intervention, it's floating above my head, on my left side about at a 45 degree angle, I would say about 10 feet up eight to 10 feet above. It's always there. I always experienced it. It showed itself to me in vision, when I was in Peru, near what's the name of God, when you get to be 67? As much as you start for? No, not Machu Picchu. It's near the central part of Peru. No, sorry, the northern part of Peru. And I can't remember all the Black Lagoon. That's right. Laguna negros, what it is in Spanish, it's up in that area. So it's near the border with Colombia, Ecuador, Ecuador, and Peru. That's where I saw a vision of it, it literally came to me. And I saw it, and I saw that it was the sky blue color. And I don't see color, usually. And, you know, so this is part of, I think, what's starting to happen though, as the vibration of Mother Earth is getting higher and higher, more and more people are having their own inner experiences. And then they're afraid to talk to members of their family, because they'll think they're crazy. Or they're not sure how to discuss them at all, because they don't understand the experience, why am I having the experience. But what I would say is that these kinds of experiences are the veil being lifted over the other realities that are always around us, whether it's in another dimension, a parallel Earth or spirit. Now speaking of parallel Earth, we have what are called the quantum computers, which is a real thing. You can see pictures of them, they're very expensive, they use a qubit. But according to a video that I saw, a couple of years ago, where it was from one of the guys, I guess, who's making them, he said that the way they work. Now, this is crazy, because these computers are extremely fast. And I expect him in this future Arges was talking about that we have access to these kinds of computers, is that they're communicating with the other selves, the other aspects of themselves in parallel Earths, and that's how they're able to see every conceivable possibility. Because that's what these computers can do. You can say, Okay, I want to create this situation, what might happen? And these computers can show you every conceivable possibility, where are they getting it from? They're getting it from the other part of themselves in the other parallel Earths project looking glass, which is another thing that's becoming quite popular, where they're saying, this is a device that came from the Stargate that that Galactics brought to the earth and created, it's based on the similar technology, a person can sit with that. And they want to see the future. And again, they're seeing parallel Earths as the possibilities. However, I have to look at my sheet here, because I keep forgetting her name, Kerry Cassidy interviewed this person named Bill Wood, or Bill Woods, who claims that he worked with Project Looking Glass. And he made an interesting comment, which goes along with what Arges is talking about. He said in 2012, the other side, whatever you want to call him, the leader, whatever, who is using this device to see the future, it stopped working for them. Because no matter what situation or possibility they wanted to create in the future, project, looking glass would only show them the same future reality. And it was not the one they wanted to see. Okay, so you can imagine what it probably was that they were seeing, which was telling them that no matter what you do, you cannot change this future, this positive future, this future where we love each other. And we have cooperation and co creation. And we work with our galactic brothers and sisters. And we are able to create our dreams and all of that. This is what I see through artists eyes. And this is why project Looking Glass was showing the future of what's happening. So this that was pretty interesting. So should we get to the other experience that I had the Coleman experience?

2:04:46

Yes. Yes. I think that that is important. As far as the how this came to be a normality for

2:04:57

you. Okay. All right. So this is what I'm going to tell everyone, all this positive stuff on talking about, which I'm, which is living inside of me, and I'm sure it's going to happen. So I'm not just saying this to give people hope. I'm trying to be as truthful as possible, based on my experience. This next one I'm going to tell you is going to explain to you how I recognize like, when I go on Telegram, how do I recognize what is the most important things there? Like, I see Tesla, the numbers, three, six, and nine is very important. And I know that that's true, or about the med beds that they're talking about for the future, where I see pictures of it on telegram. And I know that this is correct, where where is this confirmation coming from? Your audience may not believe this one, but this is absolutely correct. So we go back to when I'm living in Las Vegas. So I helped to create a nonprofit group, a spiritual center in Las Vegas, and there was actually a Hispanic gentleman I met in Las Vegas who had a very interesting crystal skull that was going to be part of our research, which had Mayan symbols carved on it that was found in Mexico. And it came up when he was on a archeological trip for his school when he was like a teenager, I guess, or whatever. And there were two skulls they found under a rock and he kept one. And this girl had my n symbols carved on it. So it's kind of different from other ones. So and we were going to do a crystal skull movie to connect it to this nonprofit group. But of course, it wasn't the right time. Everything fell apart. So I think this happened to me in 1991. So I went to a meeting for the center. And then nearby was to McDonald's. I was very foolish at this. At this age, I guess I was in my mid 30s, that I would still be eating McDonald's. But you know, areas are lazy. I don't like making my own food. I will freely admit that to your audience. Thank God, I have Katrina whose Capricorn debt loves to make food. So it balances out so I thank God every day for that. Or if I say it in the Jewish thank you guys very much for giving me Katrina. But anyway, well, I'm in Las Vegas. And you have to understand on the streets of Las Vegas, you can drive 55 miles an hour, which is not normal. But this is Las Vegas. So I'm walking to McDonald's minding my own business, and I hear this loud screech behind me. And I always think I'm protected. Because there was another time when I was in Berkeley, where I was at another restaurant and somebody threw a napkin holder through the window and just missed me. So I always think I'm protected. But what happened to me is the next thing I know, my vision went from light to dark. And I passed out. And now we'll go with the, the earth part of it. So two days later, I wake up, and I'm strapped to a hospital bed. And there's this doctor talking. Do you remember the truck that hit you? And um, and I remember I talked to him, like, what is he talking about? Then I passed out again. And then I came back the third day, and they finally released me. So I tried to find out what how did I get here and what happened? So this is what they told me. So apparently, while I was walking on the street, and I heard the loud screech a band struck the curb went out of control, and hit me. And after it hit me it hit a metal light post. But in the meantime, I flew up in the air, and I landed unconscious in a gravel area. Okay, now I went back to the area where this happened and that light posted a dent and so something saved me because this is something that somebody could be killed but, but I think what saved me was, is that something took me out of my physical body. I was not there. My soul my spirit, my true essence. I was not there when I was hit. Because if I was my subconscious would go oh, I mean, take a drink here

2:09:18

I would have gotten Oh, either I'm going to be dead or I'm going to be seriously injured. And if you look at me No, I'm perfectly fine. So when I came back, and a friend picked me up from the hospital, and they didn't know who to contact for me, because I hadn't changed my California

license yet. So they didn't have my Las Vegas address or or phone number or anything to call. So I had a friend pick me up and I saw that on my left. He not my heel my What do you call it the bone on your foot on the side? I had a bruise your ankle my yeah my ankle Thank you, Chris. Yeah, my shoulders were were stiff. But energetically, I was very low. Like, when I came back, I could only go to like maybe one or two o'clock in the afternoon. And then I had to rest I had to fall asleep, I couldn't, I didn't have any energy to continue for the rest of the day. And then over time, I would get stronger and stronger. Now, what was really interesting about this period of time is a couple of months after this, I got invited to speak at a spiritual conference in Brazil. And that's the largest audience I've ever spoken to. In public 5000 people, and they talked about crystal skulls and UFOs. And then an ex wife, I met there, too. And when I was in Las Vegas, you know, I talked to her and then she, when I moved to Chicago, because my father had heart surgery, then we got married there. So but that's, that's a different story. But anyway, Brazil is a very special place for me. Because sometimes Portuguese just comes in my head. And I don't know how that happens. You know, I want to talk to someone and I hear the Portuguese words. So it's really cool. Okay, so that's the human. That's what's happened to me on the physical level. Now, over time, I'm wondering what the heck happened here. Something saves me. And I feel like I went somewhere. I remember I went on a plane to shortly after that, and it felt like I had been on some kind of spaceship. Okay, I, during this accident, I was taken on board a spaceship or something like this. So here's my understanding. So this is like, what 3232 years later, or whatever, here's my understanding of what happened. And it keeps growing, is I agreed, before I was born, that I had to attend a meeting on a dimensional level, the only way I can describe what I see of this meeting again, my inner vision isn't good. All I can see, it's like, you know how in a movie, the film, you have single frames of film, I only see a couple of single frames of where I was. So that's all I can talk about. So if you remember, the first Star Wars movie, not that came out, but in the series, Princess Amidala, goes to trend store. And she's talking to all these representatives from all over the universe, I was at a meeting like that, that's what I see. I'm in the back of the room. And I see all these different beings there. And in the front of the room, they have kind of like, you know, a 3d type of screen, where they're able to show things real. And my understanding is, is I'm there and there are other people that are there, too. I Katrina, my wife, she think she was also there, when I talked to her about this. The reason that we're at this meeting, is because these are our cosmic brothers and sisters, and they're very concerned about what's going on on Earth. And they can see the future. Okay. And so they're talking about how can we help our brothers and sisters on Earth, because part of the problem that we have here, and this is part of the information that's going to be absolutely come out as the truth and be approved, is whether we like this or not, probably the elite are being helped by, I don't know how to how to phrase a dark galactic Stark, aliens, conquering type of aliens, who are already supporting them that are causing all the problems are interfering in this spiritual evolution of humanity here, okay. This is part of the truth that I believe is going to come out. So what, what these beings are talking about is all these problems we have on the earth, how can we help and they needed to hip like people who are alive so I'm not there in my physical body, obviously, I must be there in my spiritual body, my theory body, my astral body, I don't know, but I'm present, you know, and I feel like I have a body. Like when you know, when a person dies and have a near death experience. They have a body that they they see or feel themselves in floating out of their physical body. So they're asking us for advice, you know, how will humanity respond if we do this? You know, because they're very concerned. Because right now, even though we have all this science fiction, stories and about extraterrestrials, and traveling through space and all of that, if extraterrestrials show up, it's still a big shock for humanity. You know, they can't just, you know, boldly come here probably if they're extraterrestrials walking here. They're in disguise. They look like us. Like, ya know, some bright like you've probably heard that they're shapeshifters of the reptilians which are the ones helping the league. They can make them So look like human being. Or I think,

again, going back to Star Trek, Voyager, where they see a, they run into a simulation, by the species that come from fluidic space, they made themselves look like, you know, the human beings and the other beings from our universe. So they can infiltrate it. And when the doctor and Voyager gives this specific medicine or eight to one of them, he reverts to what he looks like, which is species 8472, I think they call them, they never give them a name, they just call them a number, because the bar calls them the number. So anybody that watches Star Trek, they'll know what I'm talking about. So. So anyway, at the meeting, I see what is going to happen to our world. I see the future from 1991, I see what's going on. Now. When it's my time to return. I remember there's a kind of a man and I know this man, I don't know who he is now. But I just felt like you know, it was like a friend, a brother family. That was in the mansion. And I'm yelling at him. Please, I beg you Don't do this to me, don't blink my memory. There's so much good information I saw, excuse me that I can tell people, You can't do this. I'm sorry. But I will tell you this, I will tell you this to ease your mind. As these events that you saw start happening, you're going to know you're going to know what's going on. So let's look at because you're showing this on rumble, right. Let's look at can we look at called COVID. And, and the backs as an example. I saw those things before they happened. That's how I knew when it started coming out in 2019. And then came here to the United States in 2020. Do not believe it, do not follow what they tell you to do the mask. Now they're talking about the mask did nothing to help with COVID. Or like you were saying before, doctors are coming out and really talking about what's going on with the vaccine. I knew all this stuff. And I also understood that, like the city Wuhan in China, they had already given them some vaccine when they turned on the 5g. That's why there were so many people in Wuhan, they had had serious problems with COVID when it happened, which I have never seen anybody else talk about. Although I have seen people talk about that they think 5g does do something with the COVID. And plus, plus the fact the idea of virus is an accurate according to doctors, you cannot get sick like this from a virus it has to be something else. Well,

2:18:01

sure, sure. Let's let's start getting into the messages from orgeous. Regarding regarding the future,

2:18:10

okay, so we'll change that. So basically, what our gist is telling me for the for the future, is that the children in the future will not understand and our experiences that are happening now. Because the chaos, the wars, all this type of activity, it will no longer exist on planet Earth. So the children of the future will not understand it, we will be able to go visit our galactic brothers and sisters, they will freely be walking amongst us, it will be perfectly normal during that period of time. People will have the freedom to study whatever it is that you want. Like whatever makes your heart sing, you'll have the ability and freedom, you will not have to worry about money, everything will be free. Everything will be barter and exchange, which is kind of like what Star Trek shows in the 24th century. Literally, it will be a golden age, it will be totally paradise. Now, the thing that I get from him is is that even if the message I gave you is correct it the truth is going to start coming out. Probably not exactly. We all have it but a good enough portion of it that people are going to start waking up and finally understand where we live in and what this what this world is about. I can't use the word planet anymore because I believe in flat Earth but we'll get into that in the future. That it's going to take about 15 years, let's say for

us to adapt and accommodate it. Because in where he is. There's a very advanced technology which we have been gifted by galactic are created by advanced civilization in the past, like Atlantis or, or Terraria. There's going to be the spiritual philosophy, it'll be very apparent to everyone, like I've received messages from Pleiadians, who are in five d or higher that say, in their reality, there can be no disharmony whatsoever. It cannot happen. So this is what artists is kind of talking to me about. So this is kind of the future, as he has presented it to me. And this meeting that I attended, which I talked about is where I saw all the help that we're going to get to create this future. Now, Kerry Cassidy was interviewed with by Gene decode. And I've been able to talk to Gene decode four times. And she made a very interesting comment, which help helped me to understand kind of like, what's going on right now. And she said the following, she was talking about the aliens, you know, that the the Cortijo said that the AI really took over these aliens, and it's guiding them in, it's what is hungry for data to do the same to our world. But other comments that she made beyond that was the positive Galactics, like Pleiadians Arcturians. These seem to be two of the races who are very interested in our center. And they've told me by the way, when we have our center and the extraterrestrials are walking amongst us, we will be doing public events with them. And we will be sharing their knowledge and information, we will be one of the centers to do that. But she said the positive Galactics are very concerned about what's happening to Earth, because they don't want this taking over without permission really, and interfering in the spiritual evolution of a race to keep continuing everywhere. And so this is the reason they're participating. Now I have to move into a document that I saw, this is very important, this will explain a lot to people about what's been happening, and why the elite are losing, and have already lost. This is an I don't know what this document was called. And there was another interview I did when I the the interview stopped, okay, because your recording is going to get through this time. So I saw this document on telegram. And actually, I told you that I had a link to a video where you could actually read it that links not valid anymore. So that should tell your listeners something that somebody doesn't want you. To notice, supposedly, this is a document you have to sign if you want to work with the elite on any of their projects. And there were two key points that I remember from reading this document that I thought were significant. So number one is they said, Everything we do is about poison. So if we look at COVID in the vaccine, you see that this is an example of how they do things. So they create a poison for humanity, which creates a challenge or a problem. And then they come up with the solution, which is another poison. So they create COVID In this lab in Wuhan, which is what they're talking about. editing this now, the Republicans, this is what you mentioned to me before, and then they fix, which is totally untested. And they offered this to do this. But if you go on Telegram, you can see people who have taken a vaccine, all of a sudden, like if it's a politician, a sports person, like that Buffalo Bill, in the game of Cincinnati, which was canceled, where he had this heart attack, the way that he fell was exactly the way I watched on telegram. Other people have taken the vaccine falling down. It was exactly the same. So I think that buffalo person died. And you know, what they're talking about on telegram is that they have cloning, I think they cloned him, because now he's like running around, and he's great and everything. You know, how does a person go from having a near heart attack to being in physical shape just a couple of months later. So as Cory Cory Cassidy was talking about this process of this interference has to be stopped. And so this is kind of what I think is happening with these positive Galactics. And this is another reason why there's like One Direction star people who are galactic beings that say, Okay, I'm an incarnate into the earth as well be a spiritual teacher and healer, whatever, or during this period of time of truth. When it comes out to help people, you know, to build this golden age or the Great Awakening, or the New Dawn is what artists has called it to me. So that's, that's kind of some of the messages are just as talked about. And what I'm thinking now again, I hit a whole bunch of things right now. And I don't have a whistleblower, although gene decode, when I talked to him has talked about some of these things with me, especially talk to me about the

Ukraine, that's really important. So I don't know if we have time to get into that. We can wait for another time. But that seems, seems to me to be the key thing that's going on right now that everybody focusing on, but they're not telling us the truth of what's really happening there.

 2:25:45

Oh, well, I think more than that would be especially whenever you're talking about because that that's political things that have been boiling and roiling in the background for years that have literally gone unchecked and untouched. And they really should have been checked and touched by a lot of people. And, but but when you're looking at situations going on sociologically, when you're looking at situations going on like the one of the things that we talk about regularly on the show is UFO UAP. Disclosure. Now granted, once again, the conversation has been open. It's fantastic. It's great to see, we now have congressional panels on it. But once again, it seems like a lot of the comm conversation coming out of those congressional panels is money, money, money. And what what do we do about national security? And and how do we how do we take care of this problem, man, is what we're seeing on video. Things like that? I don't I don't think 80% of it is of extraterrestrial origin at all, more than likely, US Red Team Blue teaming our own non quantitative against each other, or a foreign entity. And once again, are they using this trope of humanity? To bring around a militaristic end, you know, when you when you start looking at things like Project Blue Beam and the concept behind it, and granted, there is no actual document for Project Blue Beam, folks, believe me, I'd have the document. But it has been it has been a theory that has been out there for a long time of will they use an alien invasion or some sort of trope like that, to push humanity to a panic as a means of mass control. And and the rollout of a of a one world what have you. And

 2:28:07

it was a there was a woman I saw on telegram that I was very impressed with what she had to say.

 2:28:13

It's interesting, because once again, like we talked about on the show all the time, it does not take the great majority people think that it takes the great majority like Oh, you'd ever get like 70% of people behind something for for things to happen. No, no. What you need is a five or six percentile to really just rock the boat and make things unstable enough.

 2:28:42

Right. Okay, back to what this woman said, which I thought was very profound. She said, the mass COVID to vaccines, they're not working anymore. People aren't going for it. They're starting to wake up and realize that this is not for the betterment of humanity. So the fake et evasion Project Blue Beam is what they're trying to roll out. Which makes sense because they're talking about that there's UFOs in the sky, and they're shooting them down. But Alex Collier, who is very well respected UFO, you know, speaker who worked with the Andromeda

and that's his contact his group he works with said that their shifts are so advanced, there's no way a fighter jet is going to take any of them down. So this is just false flag event, are trying to prepare people.

 2:29:33

Yeah, we're talking we're talking UFOs that in the 1950s and 60s we're hovering over nuclear installations and disarming nuclear capabilities. But a heat seeking missile can slap it down. Yeah, no, don't.

 2:29:51

I really don't think so. Magnetic force field would take it out or they could just disintegrate

 2:29:57

and granted it's come out that those were or balloons, research balloons, what have you, but the the important thing I think here is the conversation and and the litmus test, and what will people accept? What will they not accept? What will what will they demand? What actions? Will they demand that we take? You know, and and how far can we push that? No different no different than what I believe the Patriot Act was, you know, whenever, whenever that came about, not that we didn't need to do something, to to save things to stop things from happening and further actions. But the Patriot Act was really far reaching and set up for the fact of even now, you know, like, it's just a couple of years ago, before the narrow toe run on area 51. The FBI added the term conspiracy theory to the terrorist watchlist.

 2:30:59

Right, so they knew the truth would start coming out and they needed to label for it, you know, so they did that spirit reminded me I didn't finish about that document before there was a second piece of this is what shut down the other interview. By the way, this point, this is like one of their most greatest secrets. So they talked about Prime Creator, I can't believe this in their document. These people who purportedly I don't know how any other way to say, are basically Satanists. That's what you hear all over telegram. That's what you see on the Grammy Awards. It's what you saw in the in the foot candy Super Bowl. They're talking about Prime Creator, and this is what they said, This is our greatest secret. We only are allowed to have this so called power over the world. If the people living here, give us that power. In other words, they're giving their power away. Yeah. If they say no, if they do not agree, that's why you constantly hear

 2:32:03

Yeah, revoke your consent from the system. Right.

2:32:06

But the comment that I constantly hear is, if we are a lot more than them, so if we ever came together, this is their greatest fear. But this is their greatest fear. Because creator says to them, if the majority of people and I think we're already past that point. Now I think that COVID indirectly got people so frustrated, and upset and protesting. And now what's happening with the vaccine that where more than 50% do not approve of what's going on? They will lose everything. That's why I know the undeclared war is over. They've already lost. But there are still some of them that are doing whatever they can to bring down like what are all these crazy explosions with trains and chemicals that are going on here in the US? Why? Where is that coming from? What is that about? That seems to be some form of an attack on the US. Because there are other things are no longer working. So this one point that I just said, and by the way, one of my new family I just met from Florida where we're moving, she sent me this video with. Okay, gotta go to my notes. Again, David Wilcox, who I'm sure most of your listeners know, she sent me a 12 minute interview. And he said the very same comment. He said that the greatest thing they fear is that people will wake up and not be willing to do what they do. And they lose everything. He said the very same thing. So this is something that is commonly known. So it's probably we need to come to conclusion here since we've been talking for about an hour and a half. So let me conclude and say there is this undeclared war that's happening now the prophecies that we would reach a time and ultimate challenge where they are no, but I believe that if you morally or spiritually, or you don't feel right about something, just say no, don't do that. Don't follow it, or go out and seek the truth. Okay, it's like, I'm gonna give you the names of the books here in a moment, like books like this or try to watch videos or whatever, try to understand the truth, then you do not have to give your power away. They're losing, just be patient. And I believe that this year, major truths have to come out. And some of the things we're going to have a hard time dealing with a lot of people are going to be in shock. But that's why we're doing this site, the segments to help three groups of people, either you're like Chris and I, you already know this stuff. And we're just maybe filling in a couple of new pieces for you. Or you suspect that this is going on, but you couldn't figure out how it goes, or the last group is to begin a very beginner, something's not right. You're not sure what it is, you know, we're just trying to offer some perspectives. But there are so many people out there right now that are sharing this. I'm just another person absorbing and sharing. It's like there's this puzzle. But the puzzle is starting in the middle, and that the puzzle we all agree is how is life on the Earth? You know, we have the sun, we have the moon, we may not totally understand how they exist there will be talking about that. We have the stars, we have day nine, this is common for all of us. So the puzzle is starting in the center, but it's growing and growing and growing. It's all out there. So let's go over the eight free ebooks that are available for all of you. Yeah, obviously Crystal Skull free eBook comes from 2018. Pure curious about what the crystal skulls are about this one that he was just showing you. It's the messages from arches, which talks about those two key experiences, if you want to really read in more detail, what it's about. And I think it also talks a little bit about Project Looking Glass, because it seems to support the message that are just gives me the third book is about that we're in a computer simulation. I just looked at that one. There's a man. thing from that book, a physicist named James gates, I send you to a video where he talks. He says, based on his research, our reality is based on binary code, which means we could be in a computer simulation. So you may want to take a look at that and check out some things. Are we in a computer simulation, or as some people say on telegram is the matrix really a documentary of our reality? We don't know. The next book was influenced by speaking to Gene decode. That's where I talk about kind of like what's happening behind the scenes. But that's only up to 2021. I have a free ebook on tar, tar, teria and fled Earth. So but Tartarian Flat Earth is for the future, where we will talk a little more about that. But what Tartarian represents is that we haven't been given the right history and

flat earth represents that they have not shared with us what is the true nature of our Earth. And I will discuss in that next segment, a simple proof how I can show you we're not on a globe. And that's what started me on that process. The other two books I am James W. Lee, is another writer like me, who's done a ton of different books. So he has a book called I'm trying to find it here in my notes. I think I wrote it right here. So I can give you the title. Where is it? Where is it something like nothing is true, everything is alive. So that's the name of his book, very interesting. That book really will get into a lot more detailed than I am to what's been happening behind the scenes by the elite. And some of the stuff they've been doing is really horrific. And I don't even want to talk about that kind of stuff. And the last ebook I got, and I'm going to just share it, I found it for free on telegram until the source tells me not to because I can't get a hold of them. MJ 12 Majestic 12 connected with Truman and covering up on UFOs in the 1940s when they had Roswell. Apparently there's this book where they're answering people's questions. But basically the reason why I think it's important that book, and if you don't know that book, I'll get it to you, Chris. Yeah. You said they're saying that why Q anon. If you've heard about not q not q, which is helping to get Planet Earth back to this peaceful future that I'm talking about? MJ 12 is involved in disclosure with the galactic contact. That's what their thing is. And they acknowledged Q and Q Anon, that they are real, and they're doing things. So whether JFK is q and Trump is q plus, I don't know, I don't have any touch with them. But I do know that there is whiteheads in the Alliance, which would be the positive groups that are working working for the positive future. I've not been contacted by anybody by them. But there has to be somebody working with the positive galactic so those are the ebooks not to get those ebooks you just need to send me an email whichever one interest you or you can say, Josh, I want them all. That's Crystal Skull explores@gmail.com. And happy I've been that's what I've been doing. I haven't been lecturing. So I do the ebooks and I've been sending them out to people for free as we can do it. Fortunately, during this period of time, I know a lot of people had trouble financially trying to exist for some reason for Katrina and I we were blessed. i Nature Plus with Social Security. So we're not wealthy. But we've basically 1000 We have not had a month where we've really struggled, okay. And I've been able to actually invest in some things which again will be future that's connected to the new financial system coming, which we'll also talk about. I've been making investments waiting for that to happen, so that I can have resources to help our center also.

2:40:30

So, I want to thank you for your time. As always, Joshua, it's always great to chat with you on air and off air. Please do hold the line while we close things out here with our audience for this episode while you're online, checking out all the amazing work of Joshua and the Center for the Advancement of humanity. Make sure to stop by CSC dot crystal explore Crystal Skull explorers.com. to contact him make sure to step on by curious realm that is where you can find all the episodes that's where you can find the documents that we're talking about tonight. Curious rome.com is our website. You can stop on by curious realm.com forward slash store to purchase Joshua's books. You can also stop on by curious realm.com forward slash story to share your experience with curious realm if you're an experienter if you have channeled information. If you have had an experience with UFOs UAPs Bigfoot, we would love to hear about it. We would love to pose your questions and your experiences to our professionals and our researchers here on the show and maybe get you some more information. So stop on by curious realm.com forward slash story and share your story with us. Thank you so much as always for tuning in everybody. Take care of yourselves take care of each other. And remember, stay curious. We'll talk to you soon. Baba.
