SUMMARY KEYWORDS

talking, government, project blue beam, technology, book, put, targeting, point, good, happen, hall, man, cia, telling, topic, experience, fact, realm, brother, people

00:17

Coming from the city of the weird exploring topics from the esoteric and unexplored, two dimensions are known. Shining a light of truth on the darkest corners of our reality. Welcome to the curious realm.

00:52

Well, hello, everybody. Welcome back to live curious realm. hope everybody's been doing great. I am doing fantastic. Tonight, I am more than excited for our show. For all of you tuning in during the second part, please do remember, our second part is always pre recorded. So if you have a question for Dr. John Hall, he is available, as he says all the time locally available on social media. Feel free to find him he will answer any questions, feel free to send us any questions on our website, if you'd like us to ask him privately. But please do remember that. Unfortunately, sometimes people tried to chat in questions during the second part of the show. And I always have to remind them like, Oh, this is this is a pre recorded segment. We tried doing the live two guests thing at the beginning. And it got to where we'd be we'd be having a great conversation with someone like Michael J. S. Carter, but have to be leaving a guest on hold in the background while we were going along with good conversation. And I never want to do that to guests, I never want to make them feel as though they got shorted time or anything like that. So it became an opportunity to sell ad space in the middle and end to have a pre recorded conversation, which makes the first part so much more flowy and gives us time to talk about things like Project Blue Beam tonight. I had been wanting to talk about this topic for a long time. And as many of you know, I try to demystify things on this show. I don't I don't sit like some shows do and just talk about conspiracy theory all day long. I like to talk about facts, figures about the science and the phenomenology of things. But this is a topic that is near and dear to my heart when I first started dudes and beer many many years ago and first began getting guests like John Hall on and covering hard topics. One of the things that we wanted to talk about was this Project Blue Beam. And I remember there was a person that I contacted via social media via LinkedIn at the point my LinkedIn game was insanely strong still is. But when I invited him onto the show, and they were very much in the beginnings of UFO media, UFO coverage, things like that, and they wanted to come on the show but no longer did public appearances or talk shows because they were they were afraid of what had happened to so many of their friends where they would be discredited or where they would be hurt or brought down ill he was very concerned for himself very concerned for his family and very concerned with the fact that what he saw going on in the UFO UAP community was basically a version of

Project Blue Beam. The topic that we will be talking about tonight with Reverend Michael J. S. Carter. And I wanted to bring a reverend in to talk about Project Blue Beam for one very specific reason, folks. The original concept behind Project Blue Beam as given by Serge Manasa will pop that up on screen and we'll go over it before we bring J S Michael J. S Carter on in 1994 Serge Manasa public Project Blue Beam NASA in which he detailed his claim that NASA will help the United Nations in attempting to implement a new age religion with the Antichrist as its head and start a new world order via technology simulated the second coming of Christ through these four steps step one breaking down of the archaeological knowledge by faking earthquakes at precise locations around the planet. Fake new discoveries will finally explain to all People the error of all fundamental religious doctrines, specifically, Christian and Muslim doctrines, we'll be getting into that. Step two, gigantic space show where in a three dimensional holographic laser projection will be beamed all over the planet. The projections will take shape of whatever deity is most prominent and will speak in all languages. At the end of the light show all Gods will merge into one, the Antichrist. Also in step two disillusion of social and religious order will set loose millions of programmed religious fanatics through demonic possession on a scale never witnessed before. The United Nations plans to use Beethoven's Ode to Joy as an introduction to the new age one world religion. Step three which directly relates to our second guest, Dr. John Hall, telepathic electronic two way communication, which involves making people think their God is speaking to them through telepathy, projected into the head of each person individually using extreme low frequency radio waves. And step four has three parts making humanity think an alien invasion is about to occur at every major city, making Christians think the rapture is about to happen, and a mixture of electronic and supernatural forces allowing the supernatural forces to travel through fiber optic coax power, and telephone lines to penetrate all electronic equipment and appliances. That will by then, have a special microchip installed. The goal of this deals with the global satanic ghosts projected all around the world to push populations to the edge of hysteria and madness. And it goes on from there. Welcome to the show. Michael J. Carter.

06:59

This is a nice, this is a nice light topic to start to evening.

07:05

For us to hang out chat about Yes. Um, wow, man. The reason the reason and we've you and I have chatted about this privately before. Yes, we and that is one reason why I wanted to talk about it. But in addition to that, I was I bore witness to something at MUFON symposium where, and I had interviewed this gentleman before this was the first time that I've ever, Michael, that I've ever removed a message from my show ever. I've never done an interview and not aired it. Wow, never done an interview for air and not aired it until this situation and an experimenter and an MUFON member who was there at the show presenting there on a couple panels there is an author who was there with her book was confronted by a reverend who's who was there pretty pretty prominent in the UFO communities, things like that. I will not mention his name. But he went up to her her book is about about her near death experience and about her trip to what she calls the void. How that brought her closer to her God, how it brought her to a deeper point of religion and brought her to a point of acceptance to where she was able to accept that she

she had a UFO experience when she had one changed her life all kinds of amazing things. Now this guy proceeded to come up to her with a list of questions. I mean, scrolling through his phone list of questions my friend

09:04

Wow. Very very very Inquisition going

09:07

and especially about her experience and and her experience in the void and did she think that her experience in the void was by chance demonic? Yeah, she see the light. And when she said no, I don't think it was it brought me very much closer to my God very much closer to my faith made me realize a lot of things. And he proceeded into the very, very deep cut of literal translation of well I'm not questioning your spiritual experience. That wouldn't be for me to do with you that would be for me to do with the head of your household. Oh, and it was like Yo, man Um, wow.

09:54

Wow. Yeah, that's that's kind of old school in

09:57

and that was like it that was That was true literalism at its depot. Yeah. And when I heard him start throwing around the words demonic and dark, and, and I hear that more and more, from many, many who are very, very deep religious, I will not give it a left or a right, because I hear it from both sides. I'm sure. And and I hear that from a lot though, where, where they believe that these things that are coming to us from the sky and everything else are dark in nature, and that they believe that they are demonic and source.

10:40

Yeah, yeah. Yeah. Listen, you know, it's it's, it's, it's the tale of two cities in a way. You have folks like, brother, Steven Greer, who are not unless his position has changed, that all of them. And if I'm overstating, then I'm sure he'll correct me, but that all of these beings are benevolent. And I don't know if that's true. My own studies, and my experiences would not imply that and then you have the other extreme, when you know, the truth is always somewhere in the middle, where they're all demonic. That you know, all the reptilians are bad, all the greys are bad all the DS. And so you know, it's kind of typical. But, but usually, the truth is somewhere in the middle. And so here we have, again, this polarity. I don't know what to say about it, except that it provides a lot of consternation. You know, there are some people who have God's number on speed dial. Yeah. And they kind of know, whatever God is that, you know, they, you know, they seem to be the chosen ones. And anyone who has an experience that doesn't fit their paradigm automatically. You know, it's your suspect. And I think that that

is medieval. I think it's very dangerous nowadays. But this is what we have, you know, we have it in our politics. And of course, we have it in our religions. Now. What I will say, the experiences that I had, you know, I come out on the positive end of it. Did I have post traumatic stress? Yes. Do I still have it? Yes, not as much. But it did change my life for the better. I believe that. And along the way, there were beings I bumped into, I don't know whether they were extraterrestrial, or whether they were interdimensional in some of them. I'll use the word mischievous, was maybe the energy that they had. And so I get it, that people want to be cautious. People want to be vigilant, if you will. But if we take these broad strokes, and just say they're all demonic, just as if we say they're all benevolent. I think you're really missing the mark there. Well, well,

13:19

yeah, absolutely. It puts it there. The way I've been putting it, especially now with the words of grush. And the whistleblower testimony, nonhuman intelligence, things like that. There are a lot of people that don't like that term. I love that term, because it takes all of this work and pulls it out of the box of alien, Mike. Yeah. It's all been thrown into a box that says either Kleenex or Xerox. And there's numerous copy makers. There's numerous tissue makers, but we've put them all inside of this box. And once again, if it doesn't fit inside of the box of alien, we're not going to look at it. And that's no different than put than sciencing. If it doesn't fit inside the box of science. We're not going to look at it.

14:05

Yeah, yeah, I don't Yeah, I don't like the word alien. So but but again, yeah, I hear what you're saying. But do you see? Even then we're arguing it's like arguing over God. Oh, absolutely. You know, I don't like the way he says it. I don't like the way she says it. And then you miss the whole. You miss the whole thing. Yeah. So here we are. We're project BlueBee. With brother Manasa, who died mysteriously when he was born in 1945. He was arrested and then I think the next day or something he was found dead on Okay, so that's, that sets it up as something sinister going on. And so, when you were reading this, I was thinking this. This technology in order to be able to carry this off, has to be very Sufis. indicated, it sounds to me, like the technology to carry this off, would probably come from a faction of malevolent star people. Do you see what I'm saying? Yeah, I'm not saying that's true. But in order to pull something off like that, you probably would have to have you know, you probably have to you couldn't do it by yourself is what I'm saying. Yeah. You know, is, you know, what's his name? Brother von Braun. Nazi, though he was he came over to Operation Paperclip. And, you know, he's telling cow rosin. Back in the 70s, I believe were the early 80s, that we were going to, you know, we were going to have all these, he predicted the enemies that we had planned on fighting in the Middle East, Russia, Iran, Iraq. And remember, he told her that the last card to be played would be The Extra Terrestrial card. And he said it would be all based on a lie. Yeah. Yeah. And this, to me, this sounds like this could be a part of that. Yeah. And, again, looking at the technology, and what it would take to, to do this, you know, you'd have to put a dome, you know, over certain parts of the country, certain countries. I mean, that technology would I don't think I think that technology, if government's had it, they must have gotten it from, from offworld intelligence is to be able to pull off something like that.

16:57

Well, and I was popping up some articles on screen while you were talking there. One of them is about, well, here's one of them. Pentagon report investigated lasers that put voices in your head. So there's that one. But also holograms that you can touch and feel most people are not aware of the fact that we are now to the point of holograms where we do not need a surface used to be in order to get a hologram in midair. You had to have some kind of medium, like mist or something like that. In order for them, we don't need where do

17:35

you say, where do you think we got that technology?

17:39

Yeah, yeah. No. And they, yeah, precisely? More than likely offworld. At that point, yeah.

17:48

So so that means that there are some beings? Who would be in cahoots with that? Do you see what I'm saying? Yeah. Yeah. And I think that's what our more orthodox and conservative brothers and sisters are, are, are leery of, that that kind of power is demonic. Or that it is from, you know, some kind of soulless entity or what have you. And I think that's what people are afraid of there.

18:28

Yeah. Yeah. And they, you know, once again, and I get that I'd be afraid to. Well, yeah. And I mean, you've you've got a right to be concerned. Most definitely. We, you and I have had the conversation numerous times on this show. Don't expect the government to disclose anything that's not in their vested interest.

18:47

Exactly. Exactly. I mean, yeah. I'm sorry, but I just don't see them doing it. What I do see them doing is if, let's say, you know, we're, you know, things have speeded up since 2017. Christopher Christopher Mellon, Elizondo, brother grush. I mean, and others who, you know, events have started speeding up, but it's still a slow drip. But my point is this, that, let's say there was an event that could not be explained away. Maybe we saw a pilot get out of a shift, someone had a cell phone or what have you. But because of this slow drip of disclosure, they have a backup because they can always say, Well, yes, but we were trying to tell you about this. Yeah, we're telling you about this. Do you Do you know what I'm saying? Yeah, I mean, he's the powers that be they're always thinking. And so while we're asleep, they're thinking and so this still buys them time. But but but this slow drip of disclosure. i All I've always wondered why We haven't started dealing with the religious implications of this. Obviously being a clergy person, but But it's but right now the narrative is by the government is tech and national

security. Yeah, that that's the narrative. Now we're not we're not touching anything else. We're not touching anything about a change in consciousness. We're not talking about people who've always who are experiences that kind of thing. This is where we are. Yeah. Then Oh, here we go. Yes, I remember.

 20:37

You. Yeah. And granted, you know, there, there were all kinds of headlines out there about this. What happened was that there was a study put forth, and one of the one of the places brought a board had 12 theologians, on their staff. So one of the many places that they went to for data had them. But that that was something that was brought about in the book Brookings Report, like feel free to go to our knowledge vault folks, we have the entire undisclosed Brookings Report there. Back whenever that happened in the early 50s. The whole what are the possibilities of manned spaceflight? One of the things they brought up was what happens if we make contact with something from outside? And they basically said we would recommend you not tell the general public, they are a panicky lot.

 21:28

Right? Exactly. People, people

 21:31

are swear, individuals are smart people are panicky.

 21:37

Yeah, yeah. Yeah. I don't think people would flip out now. But you would have some people questioning their religious beliefs. And you would need some clergy there to kind of guide them through. But the clergy cannot be government appointed? No, because then they will all right. Now they are. I mean, I mean, even the the article you just showed, those are the people who are invited to that. And I don't want to sound like sour grapes. But the people who were invited that with NASA, there are people who are going to tow the party line.

 22:14

Oh, absolutely. Absolutely. And you know, there was with, with all of that, there are going to be people that tow a party line. Whether it's politically whether it's religiously, what have you. And the church came out the Catholic Church came out a good decade ago and said that anything alien related UFOs Alien life, what have you does not in any way, shape or form conflicts with Catholic doctrine? does not conflict with the salvation of Christ. Yes. So that was that was a big one. That was a big one. When it happened. It was

 22:57

11 22:52

a big one. It was a big one. It was a big one, especially when you consider just a few few centuries ago, they were burning people to death. So we've been mentioning, well to turn around

23:05

well, Precisely, precisely. And a you know, now the idea of catalyzing a group of people, which which is exactly what they're talking about. Now, granted, the the UFOs get brought up, eventually, things like that a lot of Project Blue Beam has to do with the religious part of things and basically taking advantage of the fact that those who those who are of the true believers sect, and that goes across the board religiously, folks that goes across the board politically, that goes across the board. Scientifically, if you are of the true believers sect. A, it's hard to convince a true believer otherwise. You're never going to commit like, nobody will ever convince me my prime example you your book initiation. Nobody will ever convince you that those things did not happen to you. Right? They happen to you uniquely. Yes. Nobody will ever convince me that my religious experience did not happen to me. Yes, I agree. I don't care what share you tie me to. Yes. I don't care what you do to me. You ain't gonna convince me otherwise. Exactly. Exactly. And my experience made me the true believer.

24:38

Well, and see, that's that's the thing. It's and this is where, you know, this is, this is what Paul was talking about. With a P with Peter and, John. They were saying we walked with Him Mm hmm. We talk with him. We were in Jerusalem with him. And Paul said, Yeah, but I had the experience of him on Damascus Road. Do you see what I'm saying? Yeah. Whole thing. I had the experience too. Yeah. And you can't make me change that. Yeah, you can just using it.

25:23

Yeah. You can't take that experience away. You're not gonna you're not gonna rescale my eyes. Yeah.

25:31

You can't you can't, you know. And so. But this is what this is what I think is that the crux of all religion? It's not It's what you've experienced? Well, that's a religious experience. Sure, is. It's about what you've experienced. It's not about something you've read. It's not about something that someone told you. It's not about, you know, the knee must bow a certain way. Yeah. That's why mystics have always been at odds with with with their religions, whether you're Sufi, whether you're a Christian mystic, whatever, because they're saying, I don't need an intermediary. Yeah. I don't need you to interpret anything for me. I don't need you to stand between me. And creation. I can have this experience. On my own. Yeah, I

26:24

don't I don't need to pay for a dove at the temple for a burnt offering that yes, yes,

 26:29

yes. And so what I'm looking at this brother, talking about, I wish he was alive. And so many questions, I'd like to ask him, but it does to me it does have a fundamentalist bent to it. Using words like antichrist? Oh,

 26:47

oh, absolutely. No, no. And that's just it like it it?

 26:53

It is. This is a being rediscovered. Yeah. Yeah. And do you see what I'm saying? You know, yeah, that's where I'm going with this. I mean, to me what is wrong with saying that there may be different paths, but we're all caught, we all come from the same source. You may call it God, Allah, the force. And so this, this has a, this has a very conservative Christian overlay to it. That if you're not, if you are not toeing the party line, I'm using that line again, then somehow, you are part of a new age, you are part of demonic possession. So you can see where this is, you can you know, when you watch a commercial, and you see the people in the commercial, and you go with this my target audience right there. Well, that that Project Blue Beam, definitely has a specific target audience.

 27:58

Absolutely. And you know, that that is the one thing. Michael, that has disturbed me about the way quieter than I am. I am a huge proponent of the disclosure that is happening. I am a huge proponent of the hearings that are happening. I'm a huge proponent of the conversation that has been started because of the bravery of folks like Lou Elizondo. Yes, yes. However, I still question a lot of it. I still question it, because it's coming from a government that I don't know, maybe it's because every time the CIA has ever gone into that same exact chamber, they've lied, boldface to us.

 28:41

No, I'm you. I'm with you. I'm

 28:46

50. And that's where I'm at with the disillusionment.

 28:52

I mean, because history bears that out. Yeah. But I would say what you do, what you're doing is what I'm doing. I'm aware of my skepticism, but I'm also willing to be open enough to say, Okay, let's see where this is gonna go. Yeah, that's, that's, that's where I'm at, with this. So, so that's where I am. Now. But but, you know, I mean, this, this, this is happening really quickly. You know, and so, and I don't know, I've heard things about their timelines, you know, that, that some of these intelligences have warned the earth governments that if you, you know, you got five years, and if you don't tell them that we're going to tell them and then I've heard just the opposite, where there are some factions, even extraterrestrial factions that say, no, they're not ready yet. Meaning us that they need to know a little bit more about One space is about what this universe is about. So So Only time will tell. But in the meantime, there's always going to be people, organizations, governments, if you will, that are going to try to pull the wool over people's eyes, because there are a lot of people who do not want. Because Because hey, man, if when disclosure happens, what's going to happen to the stock market? What's going to happen to diseases like cancer? You know, what's going to happen with that? What's going to happen? With with Are we still going to be using coal? Are we still going to be using gas? As Do you see what I'm saying? And there are a lot of people were thinking, I don't want this to happen. I'm getting rich off of this. Why do I want this stuff to change?

 31:02

Precisely, precisely, and I mean, even even, you know, looking, looking at the technology that we have things like that, like right here, in step four, they're talking about the mixture of electronic and supernatural forces allowing supernatural forces to travel through fiber optic coax. Like, I don't know, one of the one of the things I've been saying for a long time is Wow, we're all rolling around with a little black mirror in our pocket all the time. Like, I don't have a television in my, in my, in my bedroom, because it's just a big old black mirror when it's not on and I don't want that in my room while I'm asleep.

 31:45

Well, yeah, no, I know. I'm hearing you, man. But what again, I want to get back to you know, this. Okay, I'm looking at Ephesians while I was looking at Ephesians. Right. And, and again, Oh, what did I do with it? Oh, I'm looking at the seasons. Okay. And this is the Greek Hebrew Study Bible. 12. of Ephesians, 612. For our struggle, our struggle is not against flesh and blood. but against the rulers. Yes. Yeah. Then that yeah, just, yeah, I'm just doing this, this the different translation been, our struggle is not against flesh and blood, but but against the rulers, against the powers, against the forces of this world of this darkness, and against the spiritual forces of wickedness in the heavenly places. So there, so even back then, they were dealing with these offworld intelligences, and some of them were benevolent. We can throw Jesus in the air if you want. And some of them were not. And so yeah, whether you read it powers and principalities, but but but the last line is that we're dealing with wickedness in heavenly places. That's just another word of saying. That's just another way of saying offworld. Sure, so yeah, so they're saying the same thing, that they were having our ancestors were having to deal with the same way that we have to deal. Here's, here's, here's something for you. If you go to first Kings 2219, to 23, there's a there's a prophet mkhaya. He remote views and at council meeting, where there's a false flag operation being discussed by Yawei and others, its first games 2219 23 The summit up Yawei wants a war started. And he's asking, then this council, in some places, they

call it the heavenly hose, but I call this allowing. So there's a council and they want to start a war. And Yao Wei is basically saying, but I need a lying spirit to put in the mouths of one of the prophets. And a spirit describes the spirit steps forth and says, I will do it. Now I'm summing it up, but the viewers can go if they can pull their Bibles.

34:31

I've got it right here. Okay. Okay. And you can see right yeah,

34:36

the Elohim there, they're sitting around talking. And okay, wherever you see the word of the Lord, hello, RD, just put that to Elohim. Yeah, I saw the Elohim or Yahweh, who was one of the Elohim sitting on his throne, and all the hosts of heaven, which is the council standing by him on his right hand and on His left and Yawei says, Who shall persuade a that he may go up and fall at Ramoth Gilead, and one said on this manner and other settle in that manner. So they're debating it. And they're came for the Spirit. Now we don't know if it was an energy being if it was another et, but they came for the Spirit who stood before Yahweh and said, I will persuade him that yeah, now we have a word for that. Okay. And your conversion. Well is called, we call it. We call it a false flag. Yeah, yeah, that's what we call that. So even our ancestors were having to deal with these offworld intelligences. Some of them that we're we're we're here to help. Like when dad when Daniel was in the lion's den, and angel comes in, and some of them, they come to Mary, they come to Elizabeth, and some of them like Yawei. And like these characters sitting around talking, some of them are up to no good. Yep, it's right there. You see, I'm glad you pulled it up. I didn't make it up. Now. mkhaya. Not to be confused with the prophet Micah. He is remote viewing this, he's seeing this. Yeah. So he says, And Yahweh says, well, he says, wherewith, he said, I will go, and I will put I will be a lion spirit in the mouth of all His prophets. And he says, Thou shall persuade him and prevail also go forth and do so in other words, go to go and realign spirit. And so we can we can make this false flag operation happen. Yeah.

36:55

Now we we've had a listener that has has given an account that they have an ended with the question of, they are not sure how religion can be a part of UFOs, things like that. The main thing that we are talking about here is a if you go back at the beginning of the Bible, Let us make man in our image, things like that the plurals that are used, we're talking about a group of people, it ain't even refers to them as the watchers, later on. Genesis. And the reason that we are bringing this up, dear listeners is because there are a great group. I mean, believe it or not, big group now of fundamentalist Christians who fully believed that UFOs the presence of UFOs everything that is happening, proves and confirms the Bible literally. That is that is what we're talking about. And the reason we're talking about that is because those are the people that at least I believe, I think the good Reverend might believe as well, that that are that are prone for and rife for this type of manipulation. that are that are there that you're once again, the true believer, it can be hard to be a true believer and not, and still be critical. Still be a critical thinker.

38:25

Yes, yes, it is definitely more difficult, because any type of thinking outside the box is suspect. It's the reason that though, you know, you couldn't ask certain questions when you were going up, and if you know about the Bible or about religion, because if you did, you were a troublemaker, but you were just asking. And I remember what I did, the anger I had at religion was because the answers were given me before I can even ask the questions. Yeah. So yeah, paradigm.

38:59

It's a paradigm of thought that is laid out before you.

39:02

Yes. Yes. Me them. If you question it. You are suspect. So you cannot think you cannot ask questions you you just set up to so you either for us or against us. Yeah, there's no middle ground. And for the reader and for the for the listener. I would suggest go back and reread, reread somewhere or read some of the Sumerian creation stories because that's where Genesis came from. And they clearly, they clearly read some of Zacharias Hitchens were their

39:39

creation stories woven together at the beginning of Genesis.

39:43

Yeah, yeah. Yeah. Yeah. And so and there, they are clearly talking about, I'm talking about when you go back to the Epic of Gilgamesh and which is what Genesis was was where the Hebrews got their creation stories from They are clearly talking about beings coming from the heavens, it's we, they, they're they're using the language of their day. Oh, they use no uncertain terms. You know, they were trying to describe what they were saying. But we have a word for it. And those are called extraterrestrials. Yeah.

40:18

Yeah. And once again, it's it's the sub sect of Christianity that is that is not only targeted in Project Blue Beam and the and the idea and the concept that they will be catalyzed into action. As as their revelation occurs capital, our revelation like apocalyptic revelation occurs before them the Second Coming. The the imagined. Second Coming through through holographic means which, once again, like I posted up a while ago with MIT is now able to talk to dreamers. Now, to talk to people in dreams, there are companies that are actively looking at putting ad space into dreams. Yeah. Being able to pump a Mountain Dew add into your dream. Yeah,

41:15

yeah. So you can so they can make some money because you're gonna get up and want to buy Mountain Dew. Yeah,

41:22

yeah. And, yeah, it's. It's wild. It's about but at the same time, that is the science that actively exists. It's no longer the realm of science fiction. It is the realm of science fact. Like, here it is from MIT Media Lab, like dream shaping tech from MIT channels, suggestions into your dreams. I was telling you about the article that I posted the other day, where they have reconstructed A Pink Floyd song from people's memories. Yeah.

42:03

Yeah. I mean, yeah, just like you said, science fiction has now become science fact. And I think again, the middle ground, I'm not trying to give folks an out. No, but I think that a lot of our more fundamentalist Stickleby inclined brothers and sisters, they, they know that when human beings get together, there's always going to be some type of skullduggery. And and so, you know, I think part of that fear is, they know that we don't have the spiritual maturity to handle the technology that we have.

42:50

Well, I think it's more that we don't have the spiritual cohesiveness as a humanity. Reverend. We're aware once again, though, one of the things I bring up regularly never, never forget, we we killed almost twice as many people in our civil war than we did in World War One or World War two combined, we're fully ready to kill each other. Our family, our friends, because of what we believe. Yeah, yeah. And

43:21

that's what I mean. Yeah. I mean, I mean, color. Well, we will, but it's the maturity that we're not evolved enough yet to, to, you know, instead of this technology that we're looking at, wherever we got it from, you know, we could feed probably everybody on this planet, we could probably do like they did in Genesis when they TerraForm. You know, we can separate the land, from the water and the freshwater. I mean, we could do what these beings did. Yeah, but what are we doing? We're going to make we're going to put a Coca Cola ad in your dream. Yeah, yeah. We're going to put a make a hologram. So we can deceive you, and lead you off a cliff somewhere that that that's not that those are not the actions of an evolved species. This is not it. It's just not it. Well, and so we have to be conservative straight, not straight, blue state red state. We have to have a healthy dose of skepticism about our leaders today. We may not agree on how to do that. But we do agree that it is definitely needed.

44:17

11 44:42

Absolutely. Absolutely. And, you know, you've you've got to have the perspective as well, that perspective is what is so entirely important. And, and I think that unfortunately, And this in no way I am not trying to subtract for anybody's faith, none whatsoever. But distillation mentalities? Only thing you get from distillation is something volatile. You know. And when you get to the distillation mentality of it's not this. It's evil.

45:25

Yeah. When you get I don't understand when you get

45:28

to the hard black versus white, there is no gray. Yeah.

45:33

There's a problem. Yeah. Yeah, it's a problem. And so as we go forth, there, you know, no matter what one's beliefs are, we we have to have a spirit of discernment. Because if you don't, every new thing that comes along, and whether it's social media or you're on television on the news cycles, 20, it's going to throw you. Yeah. Because you're going to be getting a lot of disinformation, misinformation, a lot of confusion. And why is that because a confused populace, or less educated populace, of fear fearful populace is easy to control.

46:16

Well, and almost more dangerously Reverend, it's the single sided information. It is the it is the loss of dispassion, when looking at a point of datum. And just seeing is a point of data not not a challenge to your paradigm, or the what you believe, or the way that the world works for you. It's just a point of datum. Look, yeah, looking at dispassionately add it to your data set, you know, like I get into some, I get into some issues in some online communities, Rev. Because people, people see me as a skeptic in a dirty way. And I try to remind them, that skeptic with a capital S is a beautiful thing. I am a believer of believers, I have had my experiences that have steeled my belief in life. Despite any religious leanings, what have you. However, I still want evidence like, I'd love to have evidence of mine. I wish I wish I could quantify it for so I hear

47:23

you. I hear no, I know. I hear you. I mean, even Buddha said that, allegedly on his deathbed, you know, don't believe anything, because I told you, you know, you believe it, because you've experienced it. I'm paraphrasing. Yeah. And that's, and that's it. And I think that we need to be able to have a laugh out. I wasn't TS Eliot, but I forget who it was that said, the mark of a mature mind or mature mind is that you can listen to other evidence. That's right. And you

know, you and not shun it and still have, you know, hold onto your belief, but you can listen to another perspective. And a lot of people cannot do that. Yes. And a lot of people don't want to do.

48:10

Yeah. And I mean, my job as a capitalist skeptic, is to be looking for the chance that the evidence does change my mind. I'm looking for the evidence that I go, Well, damn, there it is. Where's that been heightened?

48:29

Which takes us back to this, this this manufactured. Second common gather the Second Coming. Some people may jump right in and believe it. And some people may say to you, or I if we say well, I'm no, no, let me wait and see, then automatically we are demonic. Automatically. We are outside of the box. If we're not. We're against. Yes. Because because we're saying let's not let's not jump to conclusions yet. So it's six to one and half a dozen in the other. Yeah. Yeah.

49:13

And, you know, we talk about it all the time on the show, Michael, the fact of that, that hardline division infrared ultraviolet instead of the happy white light in between, you know, it, it causes so many issues like we can we can look just politically at what it has done to our country and to our families in this country over the last year. Yeah. Yeah. The hard line of politics instead of the, the soft negotiation of topics in between, you know, yes, and I think that polarization once again, that I mean, the the polar causation is what what keeps us off kilter and keeps people in control and in power? Absolutely. You're really hard pressed to build a third wall, when you're when you're busy keeping the two walls of the lien two from blowing over in the wind. You know, yeah, that's pretty much what we politically live in is a lien to, because nobody considers putting a third wall on the house, you know? Yeah, yeah. And because of that, because of that, we ended up in a lot of situations where it is an us versus them mentality, you know, and we set ourselves up for that. And we have to wonder, even religiously how much we are setting ourselves up for that. Michael, even even philosophically, when it comes to the debate of UAPs. How much are we setting ourselves up for that?

50:59

Well, I think it's all intertwined. Do I know what as I was saying to you before the start of the show, you know, I mean, it's a civilization. You know, we don't have to we don't debate facts. Some things are true now. And there'll be true 5000 years from now. And we've come to a point where we can't even agree on what is true. What is real. And that's that that's kind of troubling. But I remember you right before the show, we were talking about, you know, as we get more and more into, I'm not afraid of artificial intelligence, oh, no, these things coming down the pike. I just know that you but you've got to be able to handle them. You've got to be steady and wise how you use them. But again, technology is the new god here. Yeah, in my mind that and

money. And so the more whether you're looking at a Star Trek world, the more the more technological a civilization becomes, the more secular, it becomes. Because you're dependent on the technology, you're so dependent on even when you read the literature, about other ET races, whether, you know, a lot of them say, Well, we were where you guys are now in our evolution, and we destroyed ourselves or we almost destroyed ourselves, or we you know, but you know, so we, we live on our ships now or what have you. But But But they you when you have that kind of technology, you're always dependent on it. You have to find resources, whether you're, whether you're a spacefaring civilization coming here, and maybe you want to help us out, or you may say, you know, we've helped create these people, let's kind of stick around, or you may be coming here because of earth's resources. But when you when you have a high technological society, how do you sustain that? You know, you have to have, you have to have more technology?

 53:15

i Oh, yeah. Yeah, absolutely. And And what's interesting, while I was at the remote viewing Association, at a private conversation with a pretty well known remote viewer, that was telling me that yes, in fact, there are reverse engineering programs. Absolutely. And, and a lot of the reason that those programs exist is because the grace, specifically little grace, or a hive mind, and in order to achieve that, they had to give up individuality. You know, they had to, they had to sacrifice that part of them. And with that comes the sacrifice of creative creativity.

 54:00

Yeah. Exactly. So

 54:02

you said they have amazing technology, but they have no ingenuity in which to re apply that technology in new ways. So there because he has to engineer new ways to compare technology.

 54:15

So so so that's conformity? It's like, wow, but wow. But what what we're looking at I think, Chris, is we if let's say that document is true. There's a lot of let's say it's true. Well, that's almost the same thing. We want you to conform. Yeah, we want you to conform as and the state becomes the God. Yes, the state becomes the new world order. The state becomes, you know, the the be all end all. And so this is so resales. see where this takes us? Fascinating.

 55:05

It really is. It really is. And we I have been saying it the past many episodes we are beyond the point of even boiling a frog man like we we pass the putting of a crawfish boil like this put this pot is roiling over right now all of these things are roiling to the top, we're talking, paranormal,

all all kinds of things are roiling to the top. And all of this stuff. I was just talking about it on a panel at the Texas dog man convention. And the idea that experiencers specifically Michael, people, people like yourself, people who have been taken aboard craft, people who have been in proximity of craft are shifted vibrationally no different than a than if you get a magnet near a needle. You don't have to touch that needle to the magnet. You just have to get it near it for long enough. And it's magnetic. And it's like that forever. Yes. You know, yes. Yes. And yeah, you you you are prone to revisiting No, no different than somebody who was once possessed is, is now more prone to being possessed. Like you are now on the watch. Yeah, yes. Because you're on the watch list. Yes.

 56:39

Yes, exactly.

 56:41

It's interesting to once again, see that tie of demonic and alien being brought together.

 56:52

Yeah, yeah. Because Because basically what they're saying is you are other Yes, you are other. Yeah. That's why I don't like the word. You know, and, and because, you know, if we go what's his name? Brother, Charles Wright, who wrote who was the Charles Wright? The brother, the the Air Force guy who wrote those books about the Tall Whites? What's his name? Charles. Anyway, I mean, these these people have families, man. Yeah. These people have families. These are these are these are sentient beings. And so, but this is where the exopolitics comes in. We are up to our eyeballs in it. I was on someone's show the other night. And he said, I don't really get into politics. He I said, well, brother, when you start talking about disclosure, you can't do this. That's exopolitics. Yep. Okay. And you can we can trace it back to Eisenhower. When he signed those treaties. This is exopolitics. Yeah, who's going to represent us? How are we going to, to navigate and negotiate with with beings who are off planet? That is the heart of politics? So this is exopolitics we're talking about?

 58:08

Oh, absolutely. And here we go. I'll bring it up right here. It's the Wikipedia page about the United States Office for Outer Space Affairs. Just in case you didn't realize, folks, yes, there is a UN General Assembly advocate. And, and contact. So come the time that anything happens? Yes, absolutely. The US is, yes, a representative in place whenever it first started, like back in 2011 2012. It was a nice lady from South Korea. I'm not sure who the representative is now. But this is already consideration.

 58:47

And no one has no one has talked to planet Earth. The rest of us to say who's going to represent us? Yeah, you probably need more than one person

represent us? Yeah, you probably need more than one person.

58:56

Yeah. You want to talk about selected not elected. Geez. Yeah.

59:02

Who gives the right up? And maybe that's also one reason why so many people are being visited. Because even maybe some of these, some of these are people who are saying, well, no, we can't go to the government's too much. Let's let's go to the people. Yeah. Let's see how that's gonna work out for us. But we'll see. We'll see brother

59:23

well, and a you know, once again, the whole reason that I wanted to have this episode was was to discuss mentalities, Michael to and specifically with somebody in a religious context and with somebody who is in in the world of spiritual movement because I, I find it spiritually concerning for the true believer to think that your movement may be usurped people. This this right now, it ain't even a read for lag This is a fireworks display, man. Yes. Yes beware be Be alert. Yeah. And he yes

1:00:09

i Be Aware Be alert. But Be Not Afraid that Yeah.

1:00:13

Amen to that not

1:00:14

afraid.

1:00:15

Amen to that, you know, and we all have to worry about the fact that our mentalities can be so easily hijacked our paradigms can be so easily hijacked and used used against us. So, we all have that due diligence to not only look look out for ourselves, but to look out for each other, you know, yes. Have the open conversations don't blow somebody off just because they're what you consider to be right wing religious. Don't cut somebody off just because you believe

them to be far left wing political. That's that's not how the conversations happen. That's not what how we advance as a humanity. So we have to be ready to do those things. At this moment, so thank you so much for taking the time tonight.

1:01:13

You know that Brother, you know that. And I will talk to you soon. I got a book coming out. Oh, sermons. Oh, it won't be out till Christmas. I'll send you a copy.

1:01:24

Well, let let everybody know where they can get their copies of, innit. Oh,

1:01:28

oh, thank you. I'm sorry. Listen, for those of you listening that first of all, thanks for tuning in. And you can go to Amazon, or Barnes and Nobles. You can write me at Michael J. S. carter@gmail.com. My website is right up here. Reverend Michael J. S. carter.com. I have a fanpage on Facebook, Reverend Michael J. Carter. And listen, keep the faith whatever that faith is for you. And don't let them take away your joy. Brother Jordan, we will be in touch.

1:02:02

Absolutely. Thank you. As always, I love our conversations on and off.

1:02:06

Brother. Take care of yourselves blessings to the family and your family man.

1:02:11

Absolutely. Take care of yourself. I'll be in touch with links all that kind of good stuff. Alright, brother. Take care. Bye, man. Always an amazing conversation with the good Reverend while you are online. Checking all that out. And folks believe me like I was saying no, nobody i The one thing that I will never do is defame somebody's faith or belief. I believe what I believe because of the experiences I have had, I have come to my world of belief in this world, because of the spiritual paths I was put on by both my mother thank you for tuning in tonight mom, as as well as the seminary and after the seminary and and my exploration of world religion. And reading all of these texts and being willing to question my faith, being willing to question the sources of my faith, things like that. So be willing to question yourselves be willing to accept beliefs that you may not really Kinder too, because that is that is what helps make the world go round. That is what helps our fates grow stronger, regardless of what they are. So keep your eyes out. Keep your ears out, folks. Stay tuned through these commercial messages. We will be right back with our good friend Dr. John Hall talking, carrying this conversation a little bit

further into the technologies of control through his book guinea pigs technologies of control and the world of targeted individuals in the technologies that can actively put voices in your head as discussed in Project Blue Beam. All of that coming up right after these commercial breaks with our good friend Dr. John Hall right after this. Well hello everybody and welcome back from that commercial break. Thank you so much to all of our sponsors, especially web works wireless their stuff has been pumping hard this last month here in the studio with over 30 hours of content going out. And man to know that that is going out over a wireless network with that kind of quality is absolutely amazing. Stop on by check them out folks. Web works wireless.com is the website they are your home for credit check free absolutely amazing internet quality for your camp your mobile home. Mobile mobile productions like mine, our guest in this segment is our good friend the indomitable Dr. John Hall, author of guinea pigs technologies of control we are talking with him of course is all always about the horrifying topic of targeted individuals. Welcome back to the program. Dr. John Hall. How are you, bud?

1:05:09

Good, Chris. Good to be on.

1:05:11

Absolutely, man. It's I wanted to have you on tonight because our guests in the first segment the Reverend Michael J. S. Carter, one of the things that I have been bringing up numerous times over the last many years, even in our dudes and beer incarnation was the concept of Project Blue Beam and the idea of basically controlling masses on mass through a Luzi airy means be it holograms, what have you, to help push a paradigm and to help push a population past a certain point. And I truly believe that that is, that is one of the one of the reasons behind targeting and targeted individuals is using this technology to bring a certain population to to that point of either breaking or ridicule.

1:06:15

Yeah, I would agree with, you know, when I wrote technologies of control, you know, it's, it's really not just about the, you know, the voices in the head, or, you know, the targeting with weapons, you know, basically control someone by okereke conditioning, which is basically hurting them until they do like you do. But, you know, control comes with a lot of factors. And, you know, we're now you know, I was talking with some friends the other day, we're now in a society where, you know, we were kind of spoon fed the news that we're allowed to. And in that goes across the board with all the major media sources, most of the internet sources. I mean, you can you can find some truth out there when you're listening to podcasts like yours, and, you know, and some other ones, and then you have to kind of filter that out to make sure it's not sensationalized. That, you know, the general public is watching, you know, CBS, ABC, FOX News, MSNBC. They're, they're basically kind of being forced by the narrative. On one side or another. They're in, you know, you have, if you remember, Obama had the nudge squad, where they were basically weaponizing, the Internet to basically do psychological operations on the masses with that. So there's a bunch of different ways to control people and through misinformation, or disinformation, is one of the best ways. I mean, it's amazing that the technology I wrote about, you know, going on 20 years ago, that was my first book. And when

that book came out, people said, This is insane. This doesn't exist. There's no way this exists. They can't listen to your thoughts in real time. You know, they can't, you know, bombard your brain with neurologic weapons. Well, then all of a sudden, you know, another 10 years later, and a little more came out about it and around. Okay, well, it's feasible that, you know, it's probably not being done to us, it's a weapon of war for use abroad. You know, well, you know, then all of a sudden, you have the diplomats from Cuba and China and everywhere. Well, you know, we are being attacked like this. And it does seem to be microwave based weapons. Well, then you have the CIA going for the Congress. And so, you know, we don't know what it is, but we think it's just anxiety. Yeah. Yeah. I mean, I

1:08:39

think it's people's loss of sleep from crickets.

1:08:43

Yeah, yeah. So I mean, you know, when you're trying to control the population, you know, you can you can control it with the technology, or you can control them a lot. And, and we're getting a lot of both.

1:08:55

Well, and one of the things that I brought up on screen just a second ago was the Smith and Smith Mundt act, and not many people are aware of that that is actively actively the act that was put before Congress many, many years ago up around World War Two area that prevents the dissemination of propaganda to the American people. However, not many people realize that the Smith Mundt Act was modernized. And actively all been repealed. There it is from foreign policy.com talking about us repeals propaganda band spreads, government made news to Americans. That was let me see let's let's see, when that was I want to say that was 2012 that that that that came out 2013. So as of 2013, the Smith Montag, As we know, it has been gutted. And as part of the NDAA, and you know me, Dr. Hall, my audience knows me, I am not a politically motivated, dude. I'm not one to be like, Oh, it's all that guy's fault. However, when you're talking about not fully repealing, but gutting an act that prevents propoganda, coming to the US people through their media, and then you go off and found an office of anti propoganda propoganda.

1:10:37

It it's starting to sound like oh, well Oh, William book, isn't it? Well,

1:10:42

it was it was funny when that happened, because it was like, Well, wait a minute. That was that was there it is Office Office for anti propoganda propoganda. And it's absolutely strange to know that, yes, our government put that forth in the NDAA of 2016. And it passed through it

went through and it's like, why don't you just call it a propaganda office?

1:11:11

Well, and propaganda pretty much is all we're getting from our major media sources now. You know, especially with the current state department, and I'm probably a little more political, a political animal than, than you are, mainly because at least the way I see it, the only solution, you know, the problems that I had, that I write about is going to be political.

1:11:32

Absolutely. I firmly firmly agree with that. Dr. Hall. Absolutely. I believe that it's going to be I mean, it's the only way that we as a citizen regain protection is through the law. And through the Constitution,

1:11:49

because I know, I work with a lot of people who are constantly looking for ways to shield from it or devices they can use to, you know, to intercept or or, you know, break up signals that are being beamed out of it. And ultimately, it's going to be political solutions, where basically, it's just the there's laws passed against domestic use and oversight. And unfortunately, that means oversight over intelligence agency. Oh, right. Right now, intelligence agencies control everything, including our politicians.

1:12:21

You get to write Yeah. People don't realize that books like this, like, I guess this was written. This exists because the technology exists. I'm holding guinea pigs in my hand right now, Doctor, I know you're on the phone. And you can't see that. But this book exists because you submitted a manuscript to government offices, and they approved it. Like, this was approved by the federal government to come out people.

1:12:55

But you know, the interesting thing. Interesting thing is they're not wanting my third book out. And I'm not really sure what that is, but because I do have a third manuscript that is pretty much ready to go with the books called the fourth branch, obviously about, you know, the fourth branch of government that's actually controlling everything. And they do not, I mean, they have stopped me at every pass to get that thing published. I mean, it's looking like it may end up having to be self published, which I hate to do, because you don't get the exposure to the people who really want to read it. Yes. Yeah. But you know, and even though, my first two books were approved, after they went through some of the documentation, stuff that I used to write them, you can't buy either one of those books on a government computer, they are banned from my computer. So

1:13:49

yeah, it's not like you can go to like, a bookstore on base and find it.

1:13:57

And I and I, actually, there was a colonel at Fort Bragg, who was working with the, the psychologic psychological operations group there. And, you know, he had called me this was right after guinea pigs came out and, and had a soldier that had been charged with rape. And it had no memory of actually raping anybody. His CEO actually said, You know what, I believe this guy, you know, he's a good guy, and not in within his personality to do this, and, and has no recollection of doing it. And I said, Well, I said Europe for bragging rights. And he is yeah, he as I said, you know, that's one of the psychological operations. He's idea and that's my worry. And right about then after I have that conversation, they banned my books are being purchased off the government computers. Wow. Wow. And

1:14:51

and, you know, for those of you out there who may be listening, I know we have quite an audience of targeted individuals. They are listening, God bless every one of you. And what you are going through this is a horrible, horrible chain of events, once it starts happening to people there, there are ways as, as we've talked about, with Dr. Hall with, with Robert Duncan before, to mentally help strengthen yourself that will that will help fend some of that off and eventually may even make you a disinterested subject to their technology, where where it's the fact of like, well, they're no longer giving us a cortisol response. So like, we can't, we can't ride that sine wave anymore. You know, which is, which is truly a lot of what it is, it's interesting, once you start digging down that rabbit hole, and really seeing the fact that yeah, once you get inside of that, not only the victimized mental set doctor, but the the the weakened mental set of loss of sleep, things like that, it makes it easier for that technology to lock in.

1:16:11

Well, and that's the you know, the unfortunate thing with this type of targeting is your best opportunity to help someone who's being targeted is at the very beginning of the targeting when it when it really is mostly physical stalking. But, you know, that's done so professionally, that not many people realize they're being stalked. And when when they finally do all that, you know, you're being stalked, and by all means, they're letting you know, I mean, they can continue to stalk you surreptitiously. And they decide, okay, we're going to start zapping them with energy and making them hear voices. And we're going to let ourselves be known because that's still part of the operation. Once you once they let you know, then you're already, you know, the electronic harassment part of it is right around the corner, and then it's a little harder to stop. But if people were a little more cognizant of the physical stalking the very beginning, that's probably the best time to nip it in the bud. Because we do have laws against stalking, and if you can get some photos and pictures of the same people following you around, you

know, going to your work. And that would be the time to stop it once you're once you're in the throes of true remote electronic harassment, because it doesn't have to be somebody within line of sight. Yeah, so yeah, it's a little bit a little harder to deal with. So

 1:17:37

well, and once again, the fact that it's going to have to be illegal means at least to start the dominoes falling is is hugely important. And people do not understand that. Right now, I mean, one of one of our other huge movements that we're behind as anti human trafficking, and even trying to get people to understand the legal definition of human trafficking. And how to enact those laws that are finally on the books, it took him two decades of advocacy to get human trafficking, recognized, and an actual law written decades. So this is stuff that at least as far as the general public, Dr. Hall is just hitting the radar with things like Canadian whenever I bring it up at bars, when I'm traveling and talking and I bring up a vantage syndrome, there's probably a good probably a good 40% of people that are like, Havana wet. Like they aren't aware of it, there's a good 40% of the populace that is still fully unaware that this stuff is going on.

 1:18:50

Well, and you got to remember, we were talking about propaganda, and you know, all of our major media sources or propaganda sources now. So once the CIA said, No, it's crickets, it's crickets, and it's anxiety. You guys need to stop covering it, they stopped covering it.

 1:19:07

If whoever you want,

 1:19:09

the Canadian victims are suing over that. Oh, yeah. But yeah, but you know, so far, the victims that were US citizens are having a little harder time, you know, and, and that if you're a targeted individual, and you're being victimized by this technology experimentally, then that kind of tells you something, too, that the government is actually turning their back on their own employees to so yeah, you can imagine what they think of you. Yeah, yeah,

 1:19:33

Precisely. Precisely. And I mentioned earlier before I got before we hit record that there was a clip that I wanted to play. A couple of weeks ago, I went to the second annual dog man encrypted conference, spoke with a researcher there. Lance, it was Lance Hightower and his whole presentation at the end The conference was about the stalking and following of paranormal individuals, people who have had paranormal experiences people who investigate these things, whether it be Bigfoot national parks, what have you, I want to play that clip out real quick. And let you hear what he has to say. Because the echoes of this are so huge Dr. It's wild, check this out.

 1:20:28

So how do you actually bastardize the truce, or you have infiltration, and you know, how you keep secrets secret is on their side, you do it by threats. And when I say threats, it's what I call the what their acronym is, which is cript, which is terminate with extreme prejudice. Well, I like to call it what they do to these paranormal people that have these sometimes horrible encounters. I call it DWeb. devastate with extreme prejudice. So they will close accounts, they will offer very soft threat. It depends on the circumstance at the intensity of the encounter. And it's in so many words how they say what they say more. Now,

 1:21:11

interestingly enough, Lancer, we have a great number of people who listen to our show. And one of the topics that we talk about is targeted individuals. Not a topic that a lot of people are aware of not many people know that people out there had been suffering Evanna syndrome type symptoms for decades, and been called crazy. And a lot of what you were talking about my man, which is perfect rings, because right into the world targeted individuals, the idea of being able to read brainwaves at a distance, being able to EEG heterodyne somebody and get what their physiology is from a distance. Yeah. And

 1:21:51

if those people that label those people have crazy, then this corporate group has done their job because the primary emotion that they try to inflict on you is ridicule.

 1:22:04

One of the documents I have in my knowledge vault is we have Dr. John Hall on regularly talking about this stuff. And it is a paper called the Hall effect, where literally a group of scientists have gotten together and said that the people who come to Dr. John Hall and say that they are experiencing this are the same people who say that they are hearing voices and experiencing ghosts in their house, that, you know, they're they're just as crazy as those people. And this This is in the realm of paranormal things like that. And it's funny to me that you were saying this, and that that paper actively exists. That is an active research paper that is out there. Once again, the Hall Effect paper, I've got it up on screen right. There there is the actual paper folks about Dr. John Hall story, a case study in putative haunted people syndrome, basically, once again, ridiculing every one of these people ridiculing the work, and and publicly trying to put that face on it.

 1:23:15

And you have to ask yourself, why would it be so important for a group of scientists, you know, to basically take apart a book I wrote a decade ago to try to help people that came to me voicing this problem. So I mean, you have to look at those kinds of things. If someone is so

threatened by something, that they have to counter it with a counter action, then you're usually pretty close to the truth. Yeah, yeah, precisely. So I've actually at first, I was a little upset about that, you know, especially using because, you know, those scientists never did reach out to me. Not once. Oh, absolutely.

 1:24:02

There probably should, should have been some remuneration that they were going to use my name on a new you know, new DSM being Tim disorders.

 1:24:11

Yeah, yeah. Well, and especially the fact of like, your name is in the title. And you think that have to contact you somehow

 1:24:26

was what the wasn't that that was Australian or UK, wasn't it?

 1:24:31

That was out and let's see. I'm trying to see do I? So I'm trying to see mental health, religion and culture. Looks like Taylor and Francis group. I don't know.

 1:24:56

Because I was thinking that the main author at the time in London,

 1:24:59

you Can you repeat? Yeah, Department of Psychology, Buckinghamshire, new University London, UK? is where that came out of. So, yeah.

 1:25:14

Well, and they're having a lot of problems with targeting, you know, like there's technology in the UK. There's a ton of individuals in the UK, because I hear we're handling quite often. Yeah. So I mean, I guess that's one way there may be trying to get underneath it. There is saying, well, these are just a bunch of people who somehow got calls books and given streaming the whole effect. But yeah, there's there's a lot of targeting going on in the UK. Wow. Wow.

1:25:48

And once again, I have I have always held the fact that it is it is contractors, testing equipment, doing that kind of stuff, whether or not you can say it is like the CIA directly or anything like that as a different story. But as contractors, they're of who are making the equipment, testing the equipment, everything else. Sure. That that absolutely makes sense to me.

1:26:19

And well, you know, ever since they got CIA got kind of busted with MK Ultra, you know, my really shredded everything, but financial records, they've kind of changed the MO and the way, the way most research is done there is black budget is kind of done through independent contractors or, you know, false companies, you know, the ecological group and stuff like that, that org or just actually pumped into blackout funding of research the universities. That way, when people do kind of find the financial records, it traces back to, you know, a CIA created company or, you know, a university that is where the funds have been lumped in with other legitimate research. But what we found early on was, most of this was being done by third party contractors that were former CIA, former NSA, former FBI running private investigative services.

1:27:20

Yeah. Yeah. And even even when you are considering the fact because I am hugely happy. I mean, I think most of us in these communities are hugely happy with the, with the congressional hearings going on right now with UFO UAP. What I am more happy with about anything, is the revelations of black money, Dr. Hall, because once we and that's what I've been telling people, you know, like my dad, who were like, Are you a little green man? Come on? Hey, you want to get past little green men? The question is, Are you cool? Are you cool with the Pentagon Papers? Are you cool with Iran Contra, because this is telling us that we have had something far beyond that into the trillions of dollars since 1939. And that there is an infrastructure specifically built to obvious skate these technologies to obvious skate these companies that are built out of companies and out of out of projected funds. So that that, to me, is more than anything, what will help even bust bust all of this wide open when it comes to targeted individuals, targeting technologies once once we get a lock down on black monies. I think I think we'll start seeing a lot of things kind of start getting choked off.

1:28:55

Well, and you're we're we're at a point where politically, they're just about done, there has to be some change to come around to a political system that's, you know, a little more ethically sound than what we've had. And that is the problem. I mean, look, what's happening with Mitch McConnell. You know, he's having these moments like seizures, or

1:29:18

somebody's hitting the reset button. Yeah,

1:29:21

yeah. Feinstein, that one of her aides is having to whisper in her ear to tell her how to vote. And, yeah, we need, you know, we need these people out. We got to go back to a form of government where maybe there's term limits, maybe there's age restrictions.

1:29:36

Nobody over 55 Nobody over 12 years.

1:29:40

Well, hey, I can't be 55 because I may I may run here a couple of years. But yeah, some agent there was some experience and with some wisdom is probably not a problem. But I don't know if a solid age restriction would be more cognitive jesting, but

1:30:00

I don't know that we necessarily need 80 year olds running the joint.

1:30:04

Yeah, exactly. You know, I

1:30:06

mean, we don't really have a generation positive viewpoint on things much less a huge grasp on the technological aspects of what's going on in the world around us

1:30:21

to jump on my political soapbox for just a second, but you do need to, we need term limits. You know, we need cognitive testing. And right now we have a country that's being ran by a Senate leader who's blacking out, a president that has dementia, you know, we'll be Pelosi, you know, rough good argument to be made, that she's suffering from Feinstein is just barely alive. You know, and we've got, you know, video of her being told, by her staff, I mean, you reach a certain age and a certain level of impairment, where it's the people around you that are not elected that are making decisions, and we can't have that there was our governor was never meant to function that way. And that's what we have in the State Department right now, Biden's not really making the decisions, it's the cronies that he has around them. And they may not be making decisions that are in the best wishes, the majority of the populace, whether it's Democrat or Republican, in the problems on both sides, but at least, you know, Ramaswamy probably does have some good ideas. I mean, you know, put the intelligence agency agency

back under some oversight, where they're not running the show or controlling, you know, politicians through threats, some term limits, so you can't spend 40 years there until you're suffering from dementia, and still expected to sign legislation that affects us all. And, like I said, some cognitive testing there, there needs to be some changes, you know, including changes in the IRS, you know, your your, your financial freedom is a basis for every other freedom. You know, if you're not basically free to work in the best of your ability, and try to make a living without the government taxing most of it, you know, then that's difficult to lay now, I'm a physician, and I can't do my taxes, you know, their taxes, if we're going to have an income tax should be so simple that anyone can do it. Not so complex that you have to hire an accountant or a CPA to do your taxes, you should have never come. So, I mean, Ramaswamy does seem to have some good ideas. You know, I don't know how electable he is. But you know, he's on the he's on the right track. And hopefully, the people that are kind of in his generation, late 20s, to late 30s, you know, we'll step forward and kind of start, you know, voting, you know, to where we're heading in a different direction, and not a globalist direction, because that's where we're headed down so

1:32:56

well, and that was honestly, a lot of the talk in our previous conversation before commercial break was the idea of control of the masses through a paradigm doctor, the idea of, you know, Project Bluebeam. And, and, sure, there may be a realm of the populace that needs something beamed into their head, via via targeted means, however, there's a large swath of the populace that don't need that at all to be catalyzed into action. You know, and it doesn't take a lot to catalyze people into action. It really doesn't. January 6, there's a prime example of that. You know, no, it didn't take a whole lot. It really didn't. And, yes, I will agree the fact folks, there are questions on both sides of that equation. I'd like to know why the why the public gallery was shut down. You know, that's pretty interesting to me. But it's kind of overshadowed by the fact of well, that other thing happened, you know, and as long as we continue this, infrared ultraviolet, read Red vs. Blue, without looking at the purple in between, we're going to continue to have this problem. It really is the fact of and like you've said before, like we were saying just a few minutes ago, it doesn't sound like it's a political solution. That that it's going to take to stop targeting. But it is whether it whether it's a panel to find out funding, like we're talking about right now with UFOs, UAPs and dark money. Dark parts of the government compartmentalised parts of the government compartmentalized parts of contractors that work for the government on numerous levels to The fact of the didactic, that keeps getting pushed and keeps us against each other keeps us distracted from being able to get things taken care of from from getting things proposed. Either way, yes, the solution is political.

1:35:21

Well, and especially when we're all dealing with a government that we really can't trust, you know, as a physician, you know, I see people every day someone will come in wearing masks, still, some of them aren't wearing masks. And I'm sitting here right now doing this interview video with COVID. For the second time, my daughter contracted it. And I've had the vaccine, and I've had it before, and Rob got it again. So unfortunately, we're sick because we have a government that partially funded a lab, they created this thing in unlisted on Virgin below that, you know, killed a bunch of people. Cause shutdowns, you know, so we're going to basically

trust the government that did that to us to begin with, you know, to tell us to mask up again, and, you know, keep getting boosters for this. I don't think so. I think, you know, we're done trusting the government, that gives us nothing?

 1:36:16

Well, and you know, it's interesting, I was having that conversation with somebody just the other day at a conference. And it was the thing, that's exactly what they said was like, if I could trust the government at all, maybe I would go to them for an answer on this. And yeah, you know, I've said it, you could probably go back and search the phrase. Throughout dudes and beer and throughout curious realm, I would challenge you to find one time that any of these alphabet agencies have been called before Congress, and have not been found to be lying in some way, shape, or form. Specifically, the CIA. Yeah, I don't know of a single time that they've ever been called before Congress. And we're not just bald faced lying, which which granted is their job. So they're obviously good at it. Good enough to not only lie publicly, but for people to be like, hey, you know, what's, what's going on with that?

 1:37:25

Well, you remember, the last congressional hearing on the diplomats of Havana syndrome, that the CIA came forward with? This is after researchers at UPenn, and researchers in Florida and researchers in Canada all came to the conclusion that these people were attacked and had white track matter damage, on imaging, from microwave based weaponry, and we're pretty conclusive about those decisions. And then the CIA came out. So no, we disagree with that. And, you know, all these can be attributed our own research has attributed it to stress and anxiety, possibly permethrin poison to spray crickets and cricket, making sound themselves, you know, and that's just basically, we now have a government and the propaganda system, or what's that comes out to the press? They're like, here's your lie, we expect you to take it and believe it, you know, you were lying. We know we're lying. But here's the answer that we're going to give you. You know, so I mean, to come right out and disagree with the exact researchers that they sent these people to to be evaluated I thought was pretty rich, because they weren't expecting those researchers to come to that conclusion.

 1:38:45

Well, yeah, and I mean, a specific I just brought up the pin medicine news article about the brain mat or alterations in in the victims so and that was something that because of the realm of technology that they claimed they they were not expecting to find whatsoever

 1:39:11

indicator for the fact that it was something along the lines of microwave weaponry or, or something that would shake your brain inside of your skull.

 1:39:19

Well, I My gut feeling is that when they sent these diplomats to us, they you know, because you can get a lot of government funding. And I think their expectation was that these researchers were going to do basic tensor imaging which is the burden you have to do to find white matter damage and unexpected they would do some basic you know, one and a half t MRIs on their brains and go No don't see anything here. You know, there's no physical damage on the outside and let it go without I don't think they were expecting them to delve deep like they did. You know, in some of these, I'm sure some of these It was probably went to the researchers it said, Well, this guy seems to know what it is. And you read this book, because I did have a couple of people reach out to me. So that may have led them a little better in either direction. But, you know, for two separate research facilities and a bunch of physicians to come to that decision, you know, that it's possibly microwave energy and for the CIA to just straight out poopoo and go, Well, no, we don't agree with that our research points towards anxiety. You know, why would anybody believe that?

1:40:35

Yeah, yeah, it was pretty remarkable to see. And once again, the, the rapid changes all the time, I remember. I remember when I first contacted you about the lead on this story back in 2015. To see the changes that have happened between then and now are remarkable. And I think it holds good hope for the fact that we may get hearings on this. It would be fantastic if we did.

1:41:16

Because I mean, I don't think anybody's expecting this technology to go away. It's only going to worsen, you know, especially when they're looking at wanting to control vassals, but you know, if we can get on the ethical form of government, and I mean, there can be some oversight. I mean, we're gonna need oversight over the intel community anyway. Because right now, you know, there's no oversight. I mean, you know, when, when Trump was, you know, head office in a Schumer was pretty succinct when he said, you know, you don't mess with the Intel agency, they have six ways to Sunday to get your back, you know, in our government shouldn't operate that way.

1:41:51

Yeah. Yeah. True that true that it's interesting to see how they get us the alphabet agencies against each other. And against their opponents. It's, it's always a case, never, never hasn't been, the FBI is basically just the strong arm of numerous offices. So hopefully, one day we will wrestle that control back from things and be able to bring about some change in this what can what can individuals do, doctor if they think that they are one of those that are possibly targeted?

1:42:40

First, I would read guinea pigs, because it's gonna save you from making a lot of pitfalls that a lot of targeted individuals make. You know, like I said, if you're noticing, you're being stalked

take that seriously. You know, you're trying to get plate numbers, trying to get pictures, go to your local police, if you can nip it in the bud, when it's actually just physical stalking. That's the time to do it. And then there are, you know, groups online, you know, you know, if you if you Google targeted individual, you know, this is one of the most reported crimes online, that there is, I mean, that we're now at a point where he used to be a relative rarity of people that you would see, but you know, we're at a point now, where just about anybody you talk to will tell you, you know, what, I've got a son, or I've got a cousin, or I've got a niece, or I've got a nephew that was complaining about this, we're at a point where just about every family has somebody that has voiced these complaints. And now, they may not always be believed, you know, and certainly, you have to distinguish it from the reality of mental illness, you have to make sure that it is targeting and not something that's treatable. But I mean, it's, it's more more common now. For anybody to do a Google search. I mean, you can certainly educate yourself on it. But if somebody is feeling like they're being targeted, there are groups that you can get into where you can totally compare notes and you know, and learn from other people's failures.

 1:44:10

Yeah, yeah, exactly. And a, you know, once again, I always love having you on to talk about this. It is not an easy topic to discuss. It's not an easy topic, to even broach with most people. Because of the depth to which it goes and the fact of it gets into pretty nefarious things pretty quick. You know. And, as, as you said, you're, you're surprised I haven't hit the list. Well, we'll see if that doesn't change someday. I've definitely been asked to join the Illuminati in the last month. So we'll see how that goes. But let everybody know where they can go to get your books doctor where they can go to keep up with your research, all that kind of good stuff.

 1:45:08

There is a guinea pigs technologies and control Facebook page. When I'm able to keep it up and running. It gets it gets hammered quite a bit. And then Amazon for both of my books can be ordered there. And then look out for the fourth branch. That'll be the next book coming out. We'll probably need a break that news on your show. So yeah,

 1:45:34

I cannot wait for that book. Oh, my God, it's been at least a year or so that I know of that I've known of it. And I have been anxiously awaiting. So I look forward to it. Thanks. As always, for the time, Doctor. Take care of yourself, man.

 1:45:49

Get well okay. All right. Thanks, Chris. All right. Thanks

 1:45:53

so much. Hold the Line real quick. While we close things out with everybody while you were online. Checking out the amazing work of Dr. John Hall and guinea pigs technologies of control

online. Checking out the amazing work of Dr. John Hall and guinea pigs technologies or control make sure to stop on by curious round curious realm.com is where you can go and find our store. That's where you can find all of the amazing books from all of our guests. That's where you can find the knowledge vault full of declassified government documents, and even medical studies like the Hall Effect. Go go by there. Check that out, everybody. Thank you, as always, for tuning in. Thank you as always for being there for these conversations. It is because of your open hearts and open minds that we are making this world a better place. Take care of yourselves take care of each other and remember, stay curious. We'll talk to you soon. Bye bye. Thank you for tuning into this episode of The Curious realm. Stay tuned for more guests forbidden topics hidden hidden truths. Download the official curious realm map and view the knowledge vaults on our website curious realm.com Follow us on social media by searching curious realm.
