00:16

Coming from the city of the we're exploring topics from the esoteric and unexplored, two dimensions are known. Shining a light of truth on the darkest corners of our reality. Welcome to the curious realm

00:48

Well, hello, everybody how you doing this evening, Chris Jordan here coming to you live tonight. Get ready for some pre records folks, I am on the road for almost the entirety of January thanks to one of the good companies that I work with in Vegas for two weeks with them and covering ces for my beloved talking sound podcasts the week before that. So 21 days in Fabulous Las Vegas, we will be bringing you some fantastic pre recorded episodes. As always, our show is live on Tuesdays in the first segment, followed by a commercial break and then a pre recorded conversation with the guests. I tried doing the two live guests thing whenever we first relaunched, and it would break my heart sometimes we would lose the second guest because the conversation was going really well with the first one and I don't like to cut a conversation if I don't have to, you know, so yeah, yeah, there were a couple of awkward moments. And I was like, you know, if I just did this as a pre record, I'll just sell the commercial space in between. So that's what we do. So our second guest tonight is the amazing Bob spearing. Bob spearing is the Director of International investigations for MUFON one of my favorite organizations in the whole wide world. We talk a lot about MUFON. Here. They were really one of my first forays into the public world of UFO investigation when I was a teenager I found out about MUFON and I am very, very proud to have been a part of logo design and things like that for the upcoming projects. Aquarius, that is what we're talking about tonight. With Bob spearing projects. Aquarius is an amazing endeavor that they have done to digitize the entire MUFON archive. I mean, we are talking in the order of like 10,000 news articles, about UFOs. We are talking case descriptions, sketches, illustrations, everything. And it's all available, whether you are a MUFON member or not. So you can pay for access to all of this even if you're not a MUFON member, if you're just an investigator, or, you know, documentary filmmaker or whatever, you can now have access to all of MUFON documentation and that that is an incredible mass of documentation when you're talking about 1969 to now having a unified intake process and scientific archiving process. It's amazing. So that is one of the big reasons I love MUFON is because they have they have really spearheaded that effort for so, so long and very glad to have Bob spearing on to talk about that. This evening. This evening is actually a special evening. Not only is our friend who we met at MUFON con at MUFON symposium, Terry Ling is

joining us tonight to talk about her work in paranormal investigation and demonology. And in honor of that, oddly enough, don't forget tonight everybody is Trumpist knocked Krampus Not tonight. Yes, that's absolutely true, folks. crumpets, if you were not aware is of course that beautiful, amazing creature from eastern central European lore. That is the adjunct and friend of our good friend, Kris Kringle he is the source of you get switches and coal. You know, if you're a bad kid, that's what Cena leaves in your stocking. That's from Krampus see him there with his switches, and he carries the bad children away in his sack to hell. So thank you to my good friend Billy Stewart from the scary dad podcast. This thing hangs in my studio. He made this word wood burning for me years ago. So gross Vaughn krumpers everybody. Happy crumpets not to all you kids out there hope you're being good all year, or else switches in a hell sack for you. Speaking speaking of hell, sacks and demonology, and things like that, our guest Terry Ling is the host of the amazing show from enigmatic anomalies the there's their channel right there he Enigma thick anomalies, and also the Paris paranormal show I happen to have a chance to be on the Paris paranormal show here recently talking about my work and frequency therapy, things like that making frequency binaural beat music and trying to make music to help experiencers of the paranormal. But welcome to the show, Terry, how are you doing?

05:43

Well, hi, thank you doing great man.

05:46

I am I am excited to have you on as you can probably tell, demonology is one of my favorite topics, one of my favorite topics in the world. As many of my listeners know, as you know, I am a I'm a former Catholic seminarian spent a year in the seminary spent many years in youth ministry after that, I guess the I would be called what many would probably call a recovering Catholic now, you know, I still hold my faith, I still hold many, many things true and dear to my heart. But I am not a practicing go to church every Sunday. Too much of my god is experienced outside of that space. For me to be married to it's only in there. And that's the only way. So aside from that, though, the one thing that I have held with people for years and years and I will I will have any open debate in the world. Terry, when it comes to religion, faith, it used to blow my mom's mind. Like when the when the door to door folks would come by I'd invite him in and make coffee. You know, like, oh, let's talk about 144,000. Come on, let's have a chat. You know, to me that, like it's the same thing as the show, I'm willing to have the conversation because that's how we all grow. But the one thing I've always enjoyed,

07:16

right, you've got to have an open mind. The one thing

07:19

I will tell people all day long is you you can believe in God or not, doesn't matter. You can believe in angels and demons or not. But I'll tell you right now they believe in you. That's right. Whether or not you believe in them, does not matter. Because they're there. They're real. And

they firmly believe in you. And they pay they play by a totally different set of rules. Yes,

 07:47

they do. And they're, they're biblical, in fact, so you know, that's the most famous book in the world.

 07:54

It's a big one, it's a big one. This time of year, it's a good seller at Christmas.

 08:03

Several 1000 years, it's been the number one. But you know, the Nephilim are talked about in the book of Genesis, and that is how Satan got into the realm within men and women. And those the Nephilim actually had sex with women. They it says the daughters of Eve. And so we know that angels and demons are very real. But you know a lot of people in different I guess you'd say religious sectors don't read their Bibles. So they really don't even believe that, which is pretty funny. Yeah, they're not aware that this is all a part of our reality. You know, it's a big big world out there, and even yet bigger in the cosmos. And and these things that were created the naphthalene, you know, as you see right there, the Hebrew Bible, the Christian Old Testament, they were mysterious beings. And they were called Men of thunder. They were a hybrid,

 09:16

renowned

 09:17

of a man and Angel. So they were half and half, half man, half Angel, and half fallen angel. Okay, these were not the righteous angels of God. These were fallen angels. And I've been studying this stuff for over 50 years. And it's been very, very big. For me. I've always been very curious about, you know, what's it all about? You know, what's happening here? Yeah, yeah, I mean, this is all true. This is where we get the Giants. This is where in the biblical account of David and Goliath, Goliath was one One of these giants, and we still have giantism today, and it isn't just a weird gene, it's a DNA issue. You know, so there's scientific fact and proof about these things. And this is why it's interesting to me. You know, I can't just talk about it without getting really passionate about all the things that back up fact. Yes. So I don't know. You know what your belief is, but coming from Catholicism, you usually read the Catechism, not the Bible in Catholicism, and so you're not really in that sect, privy to reading it. But now, once you

 10:51

if you're a daily Mass goer, we have A, B and C cycles. So depending on the time of year and the year, you're gonna hear readings from a different book. But if you go to church every single day, for three years, you will hear the entire Bible read to you. Your entire Bible. And yeah, we we learn from the Bible. I mean, the whole catechism thing is there. True. Absolutely. But, but that is much more the rules and rubrics of the church. Now now, there probably ain't as many sword carrying Catholics out there, as there used to be, you know, but but and that was that was one of the things that whenever I told you on Paris paranormal and I know my audience has heard about my experience, we shadow people, whenever it happened. That was one of the things that I brought to my spiritual director. And they were like, Chris, we don't we don't really have a teaching on that. You know, at least not on shadow people. There's there's a cursory teaching on demons, things like that, like it's not fully there. Hard full on in the Catechism, but it is there and right. Ritual, everything else. Right. And to the point where the churches actively re relaunched the school of exorcism, right back in 2012. So they have even come to the point of seeing that, like, there is something else moving.

12:23

Yes, there's another realm here with there are actually many, many realms here. It's not all about just one thing. But what it is about, I believe, is us finding truth and understanding in the journey. We're all spiritual beings on a human journey, and we're all walking each other home for that matter. And evil is great in the land. It's everywhere. And it comes to us via just things that we're thinking, you know, evil can come at us in so many different ways. You know, just a quick story talking about demonic spirits, please. Kevin and I were sitting in our home in Lakeland, Florida in 2018, enjoying an evening watching TV with my older son, he was about 47 at the time, and the dog was sitting on Kevin's lap. And all of a sudden, as we're watching TV to the right of our TV is a huge fireplace. And Kevin and the dog instantaneously saw a black mass moving right out of the fireplace on to the left of the wall. The dog went ballistic and started growling. Just viciously growling and Kevin, he was like, Oh my God, and I didn't see anything. I was watching the TV. And Jason was watching the TV. And this thing came out. And it was now on the wall. And the dog was losing her cookies. Now this experience is so powerful because not only did it include a human, but it included an animal and they both right they're looking at it well, the darkness disappeared. And then the dogs still saw this thing morphed from a dark shadow to it cloaked itself and but the dog could clearly clearly see it and she was growling and barking and just you know, I picked her up and I thought well I don't see it. So I'll use the dog as my guide. And I picked up the dog and I went towards the fireplace and the closer I got to the fireplace she She started crying and screaming like, oh my god, oh my god, you could almost hear her voice put me down, put me down on, you know, you could almost hear in her scream. And she was clawing at my hands to let her go. But I thought no lovey, I have to hold you. I don't know where this thing is. And her her head immediately turned to the right, and to a chair that was sitting next to the fireplace. And she was literally in a full scream bark. Like she was terrified. And I said, Is this where it is? Lovey? Is this where you see it, and when I started getting close to the chair, she literally was biting me to get out of my hand. She was that horrified all the hair on the back of this little dog's neck. She's a chihuahua was standing straight up, and she was in a full scream. And I'd never experienced a dog screaming. It's like a bark, but it's a complete total scream. And I put her down and she ran over to Kevin and got behind his legs and was whimpering behind his legs. My son saw it. I saw it, Kevin saw it. We were all there shocked. So I said, I don't see you. But I'm sitting in this chair. And I sat in the chair and lovey was so freaked out when I did that, that poor dog it scared her so bad. I literally sat where this demon was. And I said, In the name of Jesus, I cast you out of this house. And lovey was okay. All of a sudden, after casting this demon out of the house, whatever it was, we

never really understood what it was other than it was a black mass that came right out of the fireplace, and then cloaked itself. So are demons real in the 21st century? You betcha. And Can dogs see them? Yes. Can cat see them? Yes. You know, animals, even birds. I mean, people that own birds in cages, those things react when something is in the room. Yep. And this proves it's not just a human seeing it. It's an animal experience. And, and I will say that my dog has never acted that way ever again. You know, she stays far, far, far away from anything in the house when anything goes. We've had a few things happen. Like the first night I was here. How much time do we have? Do we have time? No,

17:50

no, no, absolutely. Yeah, sure. Well,

17:54

when we first moved here to Tennessee, and we left our home there in Florida, Kevin was still working in downtown Tampa. So we were in Tennessee living but he was working in Tampa, and he had to fly back. It was a Friday night so he had to head back. And I was home alone then. I'm sorry, it was a Sunday night and he had to head back and so I was home alone that Sunday night going into the Monday morning and we were new in this house which happens to have it's an antebellum mansion and it happens to have 10 fireplaces well and so we were never really used our fireplace in Florida it was more for looks and then he it's really not necessary much in Florida indoor barbecue pit basically. Yeah, basically the indoor barbecue pits are indoor smoker. But here in Tennessee, it's a serious deal. Okay, you can have all 10 lit and and be quite happy you've got them all. But we lit one because we had no experience whatsoever with gas fireplaces. And I was petrified going to sleep in a house with with gas on gas. Because I thought oh my god, please please don't let me blow the new house up you know, and and so I thought well, it's 17 degrees out I think I better leave this this downstairs fireplace on. So I left it on and I and I was just really thinking please God keep us safe. But as I went upstairs to go to bed, Jason and his wife were downstairs in their room. And you know, I said good night we locked up lights off and up by when so I'm sleeping for about maybe two or three hours. And all of a sudden I'm feeling my son yanking on my leg pulling me awake and and I thought oh my god, Jason Jason. I'm awake. What happened? Is there a fire and I turned around saying that my leg was still in the air. Jason was not the room. Oh, man. I was in bed in the dark room alone. And my leg was still lifted up from the. And I thought, what? And I thought you gotta be kidding me. And I'm looking around the room and I thought something had the audacity to grab my leg. Touch me while I'm sleeping. This angered me, I had a righteous anger like you cannot believe and I came right about a bit and I was rebuking and binding and casting this thing out. And I thought you get out of this house, how dare you touch me? And I'm thinking to myself, wait a minute. Did he trick me? Was he playing a joke on me? So I got up and I went downstairs when this all happened within a minute. And I noticed the house is very quiet, dead quiet. The fireplace is still in, there is no fire, and I push open his bedroom door and he and his wife are sound asleep in bed. I mean, you couldn't fake it. They were sleeping. And so I thought, okay, I didn't hear anybody run back down the stairs. This thing had the audacity to do this to me. And, you know, you actually become upset once you're in a place where you're going after them. I don't wait for them to come after me. I usually go after them. And this was just a very strange experience. But it happened. And I called Kevin that night before I went back to bed and said, You cannot believe what just happened. I thought it was Jason

waking me up because there was a fire or the the fireplace got out of hand. You know, I didn't know what it was. And I woke up yelling at Jason. I'm awake. I'm awake. And he wasn't there. And wow, yeah, that was a wow moment. For me. It was like these things have power. They do have some authority. They are here amongst us. They can interact with us. They don't always but they can. And when they do, depending on the type of entity you're dealing with is the type of power that they have. That takes a lot of energy for an entity to yank your leg and hold it up. Yeah. And I just thought, what was that? Well, I really don't know. I never could identify what that energy was, but I cast it out instantaneously. You know, I'm not going to entertain that kind of thing. And unlike psychics or mediums, you know, I'm not there to entertain them, ask them questions, play with them. That's a dangerous game. That's a nice, very nice, that's

23:03

a dangerous game with any spirit. And that is one of the things that like you, you have to be. And I'm not saying that there are not people who are adept enough to know the difference? Absolutely. There are. However, for the average person to be walking around it a paranormal investigation, right, asking questions of things that might be there. Right? I don't know. I don't I don't necessarily advise that feel free to record anything you want. You know, but but at that point, and you know, you you brought up something interesting, they do have some authority. Yes. And that is that is one of the things that I bring up regularly whenever we discuss demonology and how they play by different rules is never forget that book of Job. Right? Not Christian in any route, in any right thing that is that is ancient Hebrew. And they are talking quite literally about God giving the rules to

24:06

them. God allowed Satan to have authority to test job do anything you want. Just

24:13

don't kill him.

24:14

Don't kill you may not kill him. You know, at

24:17

first it was you know, you can't touch a hair on his head. And then it was like, Okay, well, you know, he's still kind of like, you're still let me go a little bit further. All right, man, but you can't kill him. Now,

24:30

some of your listeners may not never a punch

24:32

line. Right, right. Like that was that was an actual conversation. And that's the other thing I bring up is don't forget, like God was just hanging out with the angels when Satan popped up in the middle of heaven.

24:49

Because that is still allowed and to this very moment in the 21st century, that is still allowed. We are tested. We are allowed to be, that's what we're freewill agents, we can make whatever choices we desire. And that is what causes this to be applicable to us just like job. It's applicable to us. But it might be a bit different because our situations, whatever God allows us to go through, but you know, like I said, we're spiritual beings on a human journey we are tested. Yeah.

25:25

Well, I mean, it's the same. One of my favorites to refer back to whenever people mentioned they Oh, a lot of bad things happen to good people, you know, is, is George Burns, as God from Oh, God, where he's like, I don't know, why do you let bad things happen to good people? Yeah, like, that ain't me. That's your decision.

25:45

It rains on the good. And the ugly, right? Y'all

25:50

are the ones that are making the decision to be mean to each other, not me. That's

25:54

right. But it rains on the good, the bad and the ugly. The rain does not differentiate between who had hits and hits them all. And so it's, it's that way, and and people say, Well, why would a good would a good loving God do that? And I say he can do whatever he wants, he's got a

26:10

loving God would not make you a puppet. That's because

26:14

you've got to choose. That's where you have got to choose. He's a righteous God, and He wants you to love Him, because He loves you not

26:22

loving father, right? Does it make you a puppet? That's right, absolutely, you have a choice. Like I've told people, my kids, six years old, Terry, and I have told people, since the day it was born, my job is to raise the most independent human being I can as fast as I can. Right? Like, I'm sorry, if I'm not gonna have separation anxiety, or an empty nest syndrome, like that is my job. That's my mission. That's what I'm supposed to do is to raise an individual who is able to make their own decision, that's right and willing to do so.

26:57

Right and not follow a crowd or listen to people but know, in his own heart, what his choices and his decisions are. And that is what I have said, from day one. I believe that each one of us has got to come to that place where we make a decision, either to go this way or that, and God is waiting for us to come to Him. Because we want to not because he makes us you know, so that's a beautiful thing. I think, you know, absolutely

27:29

no, no free will, even though it is a saddle of saddles, man. Right. Like, like, it's a saddle. It's a rough one. Easy. But at the same time, like, I just had somebody today tell me that they realized that they didn't have to be angry at themselves. When they decided to pick something up. That's right, you know, where it was like, Well, you know, I'm angry because I'm cleaning this up. But you know, you're the one who decided to clean it up. Right? You could revoke it, you could revoke your consent from that loop of a system anytime you want. Data, you realize that is huge, is huge. spiritually, emotionally, all kinds of things. It is a beautiful aha moment when it happens. You know, and the idea is that we, we can give consent without realizing that we're giving consent, Terry, right, by walking around inviting questions. We're giving consent.

28:36

That's right. That's right. We make decisions and those decisions have consequences. But we choose that and give it consent. So you're right, you know, back in. Let's see, I think it was 1986. This was pretty profound. I was in my bedroom, folding some clothes, I had a big basket of clothes, and I'm folding the clothes and making piles on the bed. You know, I did it there all the time, because it was just easier to do piles, you know, for the boys for me for my husband. And so as I'm doing it, somebody sits on the bed. No, there was no one in the house, but me. And the indent on the bed is very prevalent. And I watched it with my own two eyes go down. And I backed away from the bed and went white. And I thought you have got to be kidding me and again, I said, I command you OUT in the name of Jesus. And it was still there. And I thought oh, oh, okay, this one wants to fight me. And I thought isn't that interesting? I have

commanded it out and it isn't going out. And I thought oh my god And so I sat down right where it was. And I said, I command you to get out of this room in the name of Jesus. And I got up. And it was about a minute later, my whole bed rose back up. And I thought, now get out. And as crazy as that sounds, that happened, I saw it, it freaked me out, I had never seen an indent, go down like that. And stay down. I rebuke it. And it continued to be there. I'm telling you that because these things do have power, they do have a will. And you have to be stronger and stand firm in your faith, and not be afraid, because we don't serve a spirit of fear, according to the Lord. You know, we don't, there is no fear and perfect love, because perfect love drives out fear. But, um, that was just one, you know, experience that. I gotta say it, it showed me that if you continue to fight the fight, it has to leave. So the only way we can get something like that out of our house, is to continue the fight. Don't just say it once and then give up and run in fear. You've got to continue the fight. And somebody said to me, why do these things always happen to you? You know, why if you cast it out as a comeback, and and the truth is, we get attacked frequently, the stronger we are like Job, he got attacked frequently. Why? Because he was strong and firm. I'm strong and firm. I do get attacked, those things happen. It sharpens my sword, if you will, you know, I

31:54

will put it I will put it in the most human sense possible to Okay. Okay, when I was in the seminary, I don't know if I'd been hit on by more women. Seriously, we had a name for them. They were called cellist chippers. Ah, wow. And they were people that specifically would would try to try to curry the favor of somebody trying to be a man of the cloth. This is, this is just where humans go? Yeah. You know. So imagine where they're willing to go to, to corrupt a man of the cloth. Right? Do you know, if they're working for the other side? So yeah, I mean, that's just where the human side of things go. Like, there is a realm of people out there that are like, oh, yeah, man, I'd cruise for that before, before they're gone and off the market. You know? What is that, but, but those are the kinds of things that you know, if you've got that kind of propensity, maybe you should think about the root of that, where that's coming from,

33:08

that's just equal, it's wickedness, and it's trying to take down and insult you and God, you know, it's really a terrible thing. But you know, Ephesians, and 612 says, where we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in heavenly places. So that would define who these people are. They're sucked into the spiritual wickedness in this realm. And Satan has the realm of the first heaven, the lowest heaven. And you know, He's the prince and the power of the air. And so you know, he's there, and these thoughts will swirl around in the air and these people pick up those thoughts and run with them. And the thoughts they're thinking of, let's ruin this dude that's trying to you know, straighten his life out. Let's go after him. Let's take him down. Hahaha, wouldn't that be fun? How sick is that? Yeah. But that's the thought that comes to people these these thoughts swirl around, you know, and people pick them up. But you know, Isaiah 41 tells us so do not fear for I am with you do not be dismayed. I am your God. And I do totally hold on to that, like in Deuteronomy, be strong, be courageous. And I'm like, Okay, God, you know, again, it's a choice. You have to make a choice. The decision is yours. My decision is for that, and many experiences will come to us in this lifetime. And they all present choices. Yeah.

34:45

Yeah, absolutely. And, you know, make no mistake, everybody. The one thing I don't I don't know where my acorn is. I've normally got an acorn right here. I've carried an acorn somewhere with me since since my time in Rome. When when I just I don't know, I had this I had this amazing epiphany one day about the teaching of potentiality Yes, and an acorn, you know, kind of like, kind of like faith at the mustard seed, you know, one of the tiniest seeds in all of the kingdom, but it'll, it'll break a mountain in half it Sure, well, it's if it's planted in the right spot and cared for properly. So, yeah, it was just this idea of like something so huge and robust, could come from something so small, and the chances of it actually becoming that are so small, that sorry, you know, so but, but inside of that, inside of that thought is the concept of renewal and the concept of, we all have what is called Sufficient Grace. Yes, we are all given so by by the fact that we have a soul, we have sufficient grace, above all other things. So that that is what allows anybody to be able to be saved is the idea that we all we all have that God given grace within us, regardless, so we can all opt out of the system of spiritual attack, right, whether you're baptized or not, right, because of that sufficient grace. And that's one thing that I try to tell people all the time as I hadn't, you know, I'm, once again, probably as close to recovering Catholic as you can get, I am no bible thumper. As far as that terminology goes, right with my air quotes in the air, most of my audience knows that I am open to numerous spiritual paths, right? And it is that beautiful, sufficient grace, which is granted every soul in creation, right, that gives us that chance to go back to creator, whatever that creator may be, you know, and the strength of that creator universe, dog next door, like whatever that greater being is for you. Right

37:16

god? Yeah, for me, it's the Lord. And you know, I'm okay with that. And I think we all have to make our decisions. You know, we're, like I said, we're all walking each other home, no one gets out of here alive.

37:27

Oh, no, no, and that's just it, you know, it's some point, you've got to make a decision. And I'm not saying you have to make a decision to believe in a doctrine, believe a dogma, right, but at some point, we all have to face the decision as to whether or not we believe in something greater than our self, right? Because

37:50

we're going after here, you know, the body is, is a carrier, we're like a, you know, cocoon so to speak. It's, it controls us to a degree, but once the spirit leaves it, it's just a hunk of flesh, you know, it ceases to exist. So the spirit goes on, where will we go? That? That is our question. And we've got to determine within ourselves, where do we want to go? And, you know, how will this work for us? And what's important to us, you know, so I choose love. I choose understanding, you know, I choose God. And we're all free to choose whatever we want. You know, and I've seen so much on the other side of things that, you know, I don't know how much time we have,

but I could share one for us. Well, sure. Well, yeah. In 2016, I was living in New Port Richey, Florida, and I was coming home from a demonic cleansing. And I had been called out to this home because the children were being there was a dark shadow in the house, the children were being taunted by it, they could see it in the hall. And it was really a horrific thing. Many things were happening. A knife flew off of a counter, that kind of thing. And the parents were scared out of their minds. So when I got home after being there, and cleansing and praying for people. I was exhausted. It was a two hour trip to where we were going it was a two hour trip back home. And when we got home, it was like two in the morning Kevin had to get up go to work at five. So you know, I wanted good, so I jumped in the sack and I closed my eyes and don't you know, that's when this demonic attack came. And this face came at me so quickly when I closed my eyes and I knew it was something from where I had just been And I sat up and I thought, oh my gosh, I'm so tired. And I just rebuked it. And I used this very specific word. I said, get out that front door now. And I said, in Jesus name, I command you OUT. And and then I just thought, Ah, thank God, it's gone. And I laid back down, and I fell fast asleep. Well, Kevin had to get up at five o'clock in the morning, because he had a two hour drive to Tampa, from where we were living, and because of the traffic, and so, you know, he gets up and he turns on the porch light, opens the door, he's getting ready to go, I get up and kiss him goodbye with his coffee and everything. And you cannot believe what we saw. There had to be 2000 dead black bugs on the Lanai right there next to the front door. And I looked at those bugs. And I went, Oh, my God. I mean, it was literally I took a picture of it. It was unbelievable. And Kevin goes, what are all these dead bugs. And I went, Oh, last night, before I went to sleep this, this demon attacked me. And I said, get out that front door now. And and don't you know it did. But it killed those bugs, as it exited. There must have been a swarm of bugs out there and answered, exited. Here's why I share that. It's powerful to take authority over these demonic entities, and give them specific directions to get out and be very firm. And when you do, and you use God's name, they cannot deny you. Because I'm not the one in charge. God is I'm not the one sending them out the door. God is if I said it in Terry's name, they die laughing. You know, because I say it in Jesus name, they have to go they have to listen. And all those bugs were proof that they died as he exited this house. But I saw the face come at me. And it was that powerful demon I had fought at that home. And I just share that because those kinds of things can happen. And if your listeners are listening, do not worry about that stand firm in your faith, don't back down, just know that what you're doing is on target. So these things can happen.

42:44

That is that is one of the things that I am I am always prone to warn my audience about as a caveat, for doing any kind of research is a prepare for your ontological world to be shocked or shifted? Number one. And when it does, don't be surprised if you are permanently changed, right? The same way a mechanical watch is changed by a weak magnetic field. That's right. You know, it may it may still function, but it'll lose time here and there. You know, things will happen to it because of that light magnetic field inside of there. And if it's close enough, and long enough, that watch will never work again. That's right. And we our brain, specifically, our brain, specifically Terry is is a transducer. Like quite literally, there was a huge medical study I typically show that whenever we're talking targeted individuals, things like that, and how microwaves things like that can affect your brand and different frequencies students. Absolutely. And yeah, yeah, once once it is exposed, I've said this about UFO experiencers specifically those that are abducted or in close proximity to craft. If those craft are able to cloak hover magnetically things like that, like that is a large RF field. And that will change you. That's like being inside of a microwave. Like it will shift you and don't be surprised if after that

experience, you start seeing big foot that you start seeing spirits or shadow people regularly, things like that because you you are actively shifted now your vibration has has changed and has been shifted the same way as that physical watch in a magnetic field. You know? So yeah, it's interesting how experiencers have the paranormal tend to experience more paranormal, you know, and almost almost to the point of, especially some people being tuned to it. And the one thing that I, that I caveat for my audience all the time is, please be careful, if you're going out and doing any kind of try not to think about things before you go out there, you know, you may very well be charging that area with intent. You know. So aside from fortifying yourself spiritually, or doing whatever cleansing ritual you need to do to get yourself in the, in the headspace to go do that. Try not to let the experience of going out on a paranormal hunt, like occupy the spare space in your mind, you know, because because you may be making yourself a magnet unintentionally, for something that is now just hijacking a trope in your head.

 46:05

Well, if it's a spiritual issue, I think that you do have to not dwell on anything spiritually, you know, and I never do I never do. Things that I'm attacked by, are usually things after I've done something like I've accomplished a deliverance, or I've done something like that, and there'll be more attacks. And I do really, it's funny that you brought up in the beginning of this job, but I do think that as we move forward, and we evolve in this life, the different experiences that we can have, when we do a positive, it seems that many times a negative will try to come against us. And again, it's about the choices. And so, you know, we do try to do that. We try to make all the right choices. And do you have time for one more thing? Okay.

 47:12

Like I said at the beginning of the show, that's why I like doing the live guest followed by a pre recorded guest because I don't have a guest waiting in the chute who's like, Man, I gotta, I gotta go. So Well, let's talk as long as we need to talk to Eric. So please, please keep sharing.

 47:31

In 1998, there was a loud noise on my roof. I was standing at my kitchen sink, I was watching the dishes. And I had two trees out right outside my kitchen window there where I did my dishes, and they were both in plants. And I kept hearing this noise. And it sounded like somebody was running on my roof, literally, like there was a human being that much force. And it was like they were running on the roof. And there that would be impossible, okay, for somebody to have climbed up on my roof. It would literally be impossible. We had floodlights on the house, the floodlights would have come on, if somebody was round, the floodlights were on, so there was nobody on the roof. But I'm sitting there washing the dishes, it's about five, maybe, let me say it was maybe 630 In the morning, it was pretty early in the morning, I was making coffee. I had just gotten up, getting ready for go into work. And it wasn't a breezy day, there was no rain. It was a beautiful day outside in Florida. And I'm just I stopped washing the dishes for a second and tried to listen to this noise. And I thought, it sounds like there is a human being running from one end of my house on the roof to the other. And that's a pretty long run. Okay, it's not, it wasn't a tiny house. And so I thought, What the heck is that? And as I gave up and started washing my dishes, I'm just looking out the window. And one of the trees

in the potted plant started in independently, shaking profusely. Yes. And shaking. Like somebody literally had it in their hand and was moving it back and forth quickly. And I'm looking at that and my eyes are as wide as golf balls going. Whoa. And I backed away from the window. And as I backed away, the tree, picked itself up and threw itself at the window. And now I'm screaming, i That scared me. And window did not break. But all the branches of the this little ficus tree, we're now all on my kitchen window. And I'm like, What the heck? And I screamed, and my husband came running down the hall, what, what? And I said, Look, and he goes, what happened? And I said, the tree, I'm washing the dishes. I'm getting a couple of cups and dishes ready to make breakfast and get coffee. And all of a sudden, boom, the tree I said, I heard all this, this running. He goes, I heard that what was that? I'm like, I don't know. And there was no wind outside. And I said, and then all of a sudden, as I started washing the dishes again, just like I told you, I told him, it started shaking profusely and threw itself at the window while I'm standing here. And he looked at me and he goes, What the heck, I ran outside. I took a camera and took about four or five pictures. This tree had picked itself up and was now leaning against my house dirt from the pot was thrown all over my little patio area there. And and I thought Now why would one tree do that? And I thought, Okay, this is another attack. Why would something like that happen? And again, I didn't know what it was because like I said, no rain, no wind, no storm, it was a perfect night. Tree just decided to go berserk running on my roof. Nothing was there. I could see the tree completely clearly out this huge window. And boom, there it was in my face. Wow. Wow. Yeah. So you know, when you live a life like that, Chris, you know, you just you have to stand back and say, you know, why is this happening? You know, yeah, but I did a lot of preaching the gospel. I did a lot of praying for people I you know, did a lot of things. And that would tend to make the enemy an angry dude. Sure, sure.

52:33

Absolutely. Absolutely. And that, you know, going back to what you were mentioning earlier in that first story, you were talking about your dog. Yes, loving and how the dog has not been the same sense. These things happen to humans as well. And to the point where people's not only exclusive experiences, but mutual experiences can lead them tangentially away from family, friends, things like that. Like one of the people that we spoke with at MUFON. This last year, when we went to MUFON symposium was Linda Zimmerman, who gave to me she was there. She wrote a fantastic book about animals, animal reactions to UFO experiences, things like that, and how animals actively suffer PTSD from some paranormal experiences. Oh,

53:40

I believe that happens. I don't want to discuss any type of UFO No, because that's not what I'm about tonight. Oh,

53:50

no, no, absolutely not. I'm just saying whether whether it's whether it's spiritual things, UFO experiences. What I'm saying is that animals tend to confirm these experiences quite a bit, and even suffer from PTSD the same way that humans do. They do experiences,

54:11

especially with the paranormal and many, many people that I go to their homes to do a cleansing or an anointing. They will tell me I cannot get the cat to stop. You know, the cat will act up and hiss and stare at the wall and go back and forth with its head. Yes, if it sees something but we don't see anything. The dog will growl from the hall and it will not go in that bedroom. It will not go in we can't even drag it in while it's on the leash. And I said, I understand I had lovey in my arms and she loves me. You know, I'm her human, and she was ready to bite me she wanted out of my hands as I approached that fireplace and you know oven initially was clawing at me to get out of my hands because I was using using her as a guide. I was using her ability to see what I could not see. So, you know, it is quite interesting. And she I don't know if she stays away when things like that happens now because she doesn't trust me. She thinks my master is going to pick me up and use. Yeah, yeah, I don't know. They can. very

55:34

judicious with the experience. No,

55:37

I don't think she's too grateful for but, but yeah, but you know, if something weird is happening, lovey will take off and she will go she is a what do you call that we we put her in a pen, she has a pen, evening animal, she doesn't sleep all over the house. And she will run into her pin and get under her covers. And she will not be around if something is cooking in the house. And believe me, there have been many things that we have had attack us here in this house, as well as the homes in Florida that we've had. And it doesn't matter where we go, these things still happen. Doesn't matter what state I'm in, I can be in Florida. I can be. You know, in Wisconsin, I can be in Tennessee and Georgia, it does not matter these things happen. And people that stay with us have things happen. Yeah. No,

56:34

no. Here's a question for you, Terry, that I'm sure that my audience has in their brain as well. How do how do you even as a demonologist and someone who performs cleansings, clearings, things like that? How do you disseminate the difference between spirit with ill intent and lost spirit?

57:01

Well, and a demonic spirit, okay, is something that is coming at you and it is very, it's a deep, heavy, negative. It's something that is controlling, it is fear mongering, literally. I mean, it brings so much fear, a familiar spirit is very different. You can have there are many different types of spiritual attacks, some, some can be so frightening. That, that it it feels as if, like, if you're especially in a night terror or something. And they come on you it can feel like you're being singled out, because you are and you're being traumatized. Because you are. Other

things can be much lighter, they can just be like something falling over or a light flickering or something like that, that can still be an activity of a spirit in the room or in the realm you're in. But there is there is a difference. And with a demonic spirit that somebody actually has, you're going to have an attitude change and adjustment change, you're going to have things happen, that other people are going to look at you and wonder why you're acting the way you're acting now. You know, because it has possessed you it has taken over and it How does it take over it takes over in your personality in your attitude in the way you react with people, you know what you say to people, it's very different than a spirit that is just in the room momentarily. Or it can even even be a type of spirit that is cyclic. It comes once a year at a certain time of year. And I mean, I've actually followed that with people. You know, once a year where there was a very negative energy in the house, somebody was either shot and killed or stabbed or died. And a cyclic kind of thing happens. That's very different. There's so many different ways that we can interact with these things. But there is one way that we can get away from all of them. And that's a good strong rebuke and anointing. And they do leave, they do leave that doesn't mean something else isn't going to come back. It just means that they are going to leave they will not be with you any longer. or two weeks could go by two days could go by, you could be attacked by something completely different. But you can tell, I've always been able to tell the difference. If it's a poltergeist type of activity, you will have very frightening things. Those are more rare. But you can have like that one home had a knife sitting on the counter, and the woman said, I was, you know, over by the refrigerator, and that knife flew off that counter. And I was nowhere near it. And there wasn't any any wind in the room or anything. And she was so scared. She had a little child, which is why we ran right over there drove two hours to get there. She said, You know, that's frightening. A knife flying off a counter and hitting the floor, what if the baby would have been there. And we also had in in the baby's room, we had set up monitors, and we saw the baby standing on the crib, in the pitch dark in the room at night, yelling Now go away. No, go away. No, ugly, ugly. And you know what baby does that? Yeah, who knows that? Wow. So you know something was there. And you could see a little bit in that video of a change in the darkness, but nothing, nothing visualized. So we just went in and rebuked it anointed the crib, anointed the child, anointed the doors, and prayed against it. It never happened again. And they kept a baby monitor on those baby monitors are great, because you can pick up different noises, different things, sometimes voices, you know, those things are very real. What's not real is like the the movie, The Exorcist, the green piece, bitten soup and all that stuff, you know, but they can do things that are frightening. They can rock a chair or they can move something. It depends, they can pick up your leg and yank on it. I've had it happen. I was at a girlfriend's house in Lakeland we had gone there, her mother was having some issues. And she called me a seventh of the people who were tending to her mother that were nurse's aides that would go into the home, refused to go back into the home with her mother. Because weird things were happening. One lady said the drapes would be closed, she would open them leave the room come back, they were closed. And the woman did not do it. She was in bed. And another one said she saw people in the house that she said she knew she was alone. But somebody was in the house. Another one heard voices in the house. Other ones heard walking in the house while they were in that very room, and there was not anybody visible walking. And so all these different nurse's aides refused to attend to her mother. So she asked me called me and said, Would you please come and anoint this place, pray over it and see what happens. And when I went there, I'm standing next to her mother's room up against the wall up against the wall. And something grabbed my left shoulder, which was up against the wall and squeezed my arm very tight, very tight, which aggravated me and I, I immediately said you may not touch me in the name of Jesus, you may not touch me. And then I knew this thing is right here with me, even though I didn't see anything. And we were able to cast it out of the house. And we anointed the house and prayed over the house and her mother and everything was fine. But I mean, seven people would not return to that house. Wow. It's interesting. Yeah,

1:04:19

yeah. Yeah. Hey, you know, I, I know people that have had such experiences I have. I've had a couple of spiritual touches in that way in my life. I was I was sitting at the Menger hotel, actually haunted hotels in America here and just down the road in San Antonio. A friend of mine was staying there. We were both speaking at a conference. Jared if you're out there listening, buddy. Hey, Hey, Dad. I'm hungry. But that was the Nate that's the name of his show. off, but but he was starting a paranormal show and that never launched or anything but we did a test episode, we went to the bar, we had a couple drinks. We went back up with a drink to his room. And when we came back there was there was a single spot of blood in the middle of his bed, which was disturbing enough. We went ahead, we sat down, we did our recording everything else. And about three minutes after we hit stop the door knob behind me for the bathroom. It didn't like move like the door was open, the door knob physically turned, and the door open. Not a conjoined bathroom, nobody in that room. Nothing like that. Then we were just like, hey, whoever you are, like hope? Hope you're having a good evening. You know, don't don't mess with us. We won't mess with you. I went to go back to my hotel that was about like one o'clock in the morning. And as I left, I saw a pretty old security guard probably probably in his, you know, early 70s. Something like that. Stopped asked him about it. And he was like, oh, yeah, yeah, that's that's the hallway where most of the incidents happen. You know, it was like a seventh floor room. Something like that. And yeah, you know, people being seen outside the windows, people knocking on Windows, all kinds of stuff. So on the seventh floor. Yeah, exactly. So all people, it was weird. It was weird. One of the many experiences like that I've had in my life where it's like, once again. I'm pretty well founded in what I believe why believe it things like that. I wasn't scared. But it was definitely a moment where time froze? Oh, yes. Where it was like, wow. Okay. And it like, not everybody would be able to deal with such a thing, as he said. And as you said, the security guard told me of numerous people, just in the lay. He was like, there was one family just about two weeks ago that came down about 3am. And was like, we're out of here now. Right?

1:07:35

Like we

1:07:36

are leaving. There are people in our room, while we are asleep that are moving things

1:07:44

were out. Yes, it is very fearful if you go through it, and you are not accustomed to dealing with this. This is why when I got involved with this, in this 70s 1975 Actually, I was working with a pastor from a local church who needed a female to accompany him to a female's home that was having demonic activity. It was horrific. It was very frightening. And I went and very hesitant. Everything scared me at first, you know, I had to get my sea legs above me if you will. And I had to be able to have an open mind and yet love these people and help these people.

And sometimes that was really hard because they were frightening. And, boy, I've got hundreds of different stories. We don't have the time. But you know, people that were trying to commit suicide. Those are very strong demons that do talk to people. depressions are very strong entities that try to take people's lives, and we're fighting for their life. We're fighting against these demons who have them convinced that they want to kill themselves. So if you can even imagine that, and people

1:09:09

I can I can more than imagine. Yes,

1:09:13

I mean, these are very real situations. So when people say to me, what's the difference between, you know, an entity that's really wicked and evil and just a familiar spirit? There's one answer. Some of them are literally trying to kill you. And so, and they do harm the people, they cause the people to become possessed, and they harm themselves. And it's like when Jesus was in the garrison tombs, and the demoniac came upon him and threw himself into the fire. Jesus looked at the young man and said, Who are you? And out of that young man, he said, We are legion. So what that teaches us Christopher, is that an entire legion of demons can be in one human. And that concerns me, which is why I got so actively involved in demonology. And I took it to heart because I thought, if I am being trained by God not to be fearful, and if I am being intrigued by God to help people, then I want to do that I want to bring help and hope to people that are really suffering from these things. And I am not of any persuasion religiously, I'm a nondenominational Christian, I'm just a spiritual being on a human being that loves God. And, you know, I don't follow any type of religion, you know, I'm just doing what I know to do. Yeah. And that's my relationship with God, you know. And, you know, when my life here is over, I want and hope to hear him say, Well done, thou good and faithful servant. Because I do believe that that will happen in this life. I think that we all make decisions, and my decision is to continue on with him. So, you know,

1:11:13

you know, it's interesting, not too long ago, it was it was Reverend Michael J. S. Carter, in a conversation told me that, no, this was my calling this this is what I was supposed to be doing. And I was like, That is that is an interesting, and I have come to accept that. And in the fact that, yes, as opposed to the way that I used to teach on a Sunday. This is how I teach on a Sunday. Now, this is this is the knowledge that I helped share. And I think, you know, no different than getting up on a Saturday afternoon at a retreat and having people share experiences of of how they have had God touched their life in some way. This show, in the same way helps people share their experiences that they may not be able to share anywhere else. Right. With an open mind and an open heart, you

1:12:14

do have to have an open mind and an open heart. And I think God has led me in many different avenues. I'm not just one thing. I have a plethora, if you will, of experiences and things that He

avenues. I'm not just one thing. I have a plethora, if you will, of experiences and things that he guides me in. And I do not crossover in any of those, each one is independent, and I respect that. And I don't dirty or muddy the waters in one or the other. While I'm in one vein, that's the vein I'm in while I'm in another vein, that's the vein I'm in. And it seems to be that is what God has called me to do. And that is exactly what I'm doing.

 1:12:59

What can add before we do let you go, Terry, what can the average person out there do to identify these forces of evil working in their life? Well, you because once again, quite a bit of my audience, I wouldn't say is atheist, maybe agnostic? I'm sure there are I know, actually, that there are quite a few atheists that listen to the show, that that I have no problem with that whatsoever. Once again, you do not have to believe in them for them to believe in you. They fully believed you exist. So what can these people what can those have no faith or or growing faith do to help themselves, identify friends that are under under demonized torture, that are being targeted by these demonize forces that may be outside of their own control?

 1:14:06

You know, I would, I would say, a good friend. If you are a good friend to somebody and you do see a personality change, you do see some form of aggression. You do see some form of depression. You see aggravation, anger, you see changes in your friends, take note, keep an open mind. If you think they need help reach out, get help help them. Sometimes agnostic. Whatever you are, it doesn't matter. You know, these beings don't care. These entities couldn't care less what you think or who you think you are. They don't care. There's one thing there Looking for and that's to destroy you, and to take you down. So that's a fact, whether we want to acknowledge it or not, it is a fact. And nothing good ever comes from these entities. So I would say that keep an open mind. Look at these people, make decisions to help them, help them help themselves, talk to them, be their friend, tell them you're noticing these difference, communicate, you know, we don't communicate in love the way we used two years ago, I don't think towards each other. But if if we would just take the moment to care, and caring is what it's all about Love is the answer. And however love looks like to you wherever you're coming from, you know, love one another and help one another, be friends to one another? How can you be a friend? You know, how can people be a friend to you as if you're a friend to them, they will be a friend to you, and reach out. But if you do need help, I'm here, Terry lynda.com, you can always reach out to me, I will definitely chat with you. I will send you information if you you know need help. I've recently been on coast to coast. And I've been talking about, you know different things that have happened here other things much, much deeper things, there was a skinwalker we had here on the property. And it was it was seen by three different people. And then it embedded itself on the side of the wall and a vine of vine grew on the wall and embedded itself there. And we have pictures of that. So many strange things happen in this life. I want people to be aware of the things that can happen. And when they do happen. You've got to know what to say when you talk to yourself. And if you don't know what to say, when you talk to yourself about these things, get help reach out.

 1:17:12

Yeah, yeah, absolutely. Terry, I want to thank you for your time tonight. I want to thank you always for your time and conversation and your friendliness to begin with. Love you

always for your time and conversation and your friendship to begin with. Love our conversations. Fair. Everything else. Thank you so much for all that you do for the communities that you are involved in. And especially in the world of demonology and paranormal research. Thanks a lot for the time tonight. I appreciate it. Thank

1:17:39

you for having me. I totally enjoy you as well. You know that big love to you and your wife have a good night and Hey, Merry Christmas.

1:17:49

And happy crumpets not

1:17:54

I'm gonna have to deliver somebody from that. I'm sure I'll get a call.

1:18:01

Yeah, that's it. That's it. Take care, Terry. I'll be sharing links with you here in a bit. All that kind of good stuff. Take care to it. Bye bye. Bye bye. Well, you're online everybody checking out all of the amazing work of Terri Lynn Cal make sure to stop on by curious round curious round.com is where you can find all of our episodes. That's also where you can find our videos. Our videos are embedded in two places there is the video vault which has not only all of the episodes, but also has all of our guests YouTube's as well. So if you'd like to follow enigmatic anomalies, all that kind of stuff, you can find their YouTube channels right here on curious round.com forward slash VIDEOS. And then we also have the Events page, which is where we have our event calendars, all that kind of stuff for all of our live things like MUFON and everything else. But that is where you will find the divided playlists for all of the events that we not only sponsor but that we go out and cover and provide live coverage for things like that, like the recent stairway to the stars, paranormal roundtable, all that kind of stuff. And before we head out to commercial everybody I would like to make a personal message out there in prayer in solidarity with our good friend Josh Turner, of paranormal roundtable. He has been going through some things if you have a moment in time to spare in thought and prayer. Send that his way folks, for he and his family. So we will be right back after these commercial messages. When we come back. We will be joined in our pre recorded conversation tonight. With Bob spearing. Bob spearing is the Director of International investigations for MUFON On and he is also one of the heads of project Aquarius. Project. Aquarius is the all new effort from MUFON to share the the entire MUFON archive of files, videos, pictures, witness reports, witness statements, witness sketches, everything with the public. So we will be talking about that Herculean effort and what it took to make it happen and how you can actively take part in that and go look at all those archives as a general person of the public, you do not have to be a member of MUFON to make that happen. So when we come back from our commercial break, our conversation will be with Bob spearing from MUFON right after this.

 1:21:26

With the rise in attention to the health benefits of cannabis and cannabinoids including CBD, drew him science has become one of the premier providers of full spectrum CBD and CBD related products using a proprietary spideroak process. Through him science extracts maximum benefit from the whole plant buds, leaves, stems, seeds, even roots, every part of the plant is used and then reused to formulate a rich, complex profile of CBD, CBD derivatives and terpenes guaranteed to provide the relief and benefits you need daily. Visit true hem science.com to experience the best CBD oils, edibles and topicals on the market today and use code curious seven to save 7% off your entire purchase of \$50 or more and get to 25 milligram CBD cookies or brownies for free. That website again is drew him science.com and the code is curious seven.

Have you considered starting a podcast? Looking for a way to make your business a voice of authority in an industry? The podcast Cadet is the solution for you. Whether starting a podcast for yourself your brand Business School church are just plain fun. Podcast Cadet is here to help you navigate the waters of the podcast and specializing in one on one consultation and training with industry professionals in fields ranging from podcast technology and editing to distribution monetization and even social media strategies. Podcast Cadet tailors their services to the specific needs of you and your podcast. Do you already have up podcast in trying to find ways to engage and grow your audience. Sign up for your podcast Cadet audit today. And let us help you explore new and exciting ways to leverage your content and elevate your podcast brand a whole new level. From consultation and workshops to affordable podcast production and maintenance packages podcast Cadette is your one stop shop for everything podcast related on the internet? Visit podcast cadet.com today to sign up for your consultation or training and use code curious wanting to save 20% off your entire purchase. That website again is podcast cadet.com Well, hello everybody and welcome back from that commercial break. Thank you so much to all of our sponsors, especially web works wireless, they are out there providing no credit check, no data cap, internet for your home, your camp, your business, your car, your mobile show, like mine, whenever we are live streaming every week. Our live stream on the website comes to you via our router from web works wireless. So stop on by check them out everybody, web works. wireless.com is the website. Amazing, amazing service. Our guest in this segment is Bob spearing. He is the director of international investigations for MUFON as well as heading up a new project for MUFON that we will get into a little bit later in the show

called Project Aquarius. It's a it's a brand new project by them going through MUFON archives. And one of the things that I have said on the show regularly Bob, especially over the last year is I cannot wait until MUFON starts using AI to rifle through MUFON archives and the things that AI will be able to pull out of 50 plus years of UFO archives.

 1:27:04

It will be amazing when we get to that point, the initial thing that we want to do as far as when we get an AI system is to take all of the symbols that people have written to us and drawn for us and claimed we're on the outside of objects that they saw. And we want to crunch it to actually see if it's if it's truly gibberish or if there might really be you know, patterns and discernible language within those symbols. So that's probably going to be our first foray into AI when we get it.

 1:27:37

Wow, that is that that's incredible. And that is a beautiful, beautiful leveraging of that technology. I mean, especially since there are so many interpretive AIS out there now the one that the one that just finished transcribing cuneiform tablets, like almost instantaneously. I just saw

 1:27:57

that article yesterday, they have 1000s and 1000s of tablets they've never ever translated. Yeah, but now with the AI system instead of x rays, there'll be able to do it much more efficiently and quickly and the AI learns as it goes along. Yeah, it's

 1:28:11

pretty remarkable stuff. How did you how did you first come to the world of you ufology? Bob, I mean, one of one of the things that we discuss regularly on the show is the fact that nobody at MUFON gets paid. That is that is one of my favorite things about MUFON is that everybody there is a volunteer. Everybody is doing this, for the benefit of not only the knowledge but passing the knowledge on and for the cause of disclosure. It's a beautiful thing. How did you first come to be involved with the cause of UFO ology to begin with?

 1:28:48

I go back a long way. I'm going to be 65 years old, and I can tell you that on November 9 1965, I was six years old, and we had the Great Northeast and blackout from Quebec down to Virginia. And I was living in Jersey at the time, you can see the New York City skyline was all blacked out. And the next morning my uncle came running over saying they think that they the UFOs did it and I didn't know what a UFO was. But eventually they discovered several cases of UFOs near the clay power station at Niagara Falls seconds before the blackout, and I was hooked. And my uncle used to buy me the old gold key with old comic books. When I was in

fifth grade, Chariots of the Gods came out which really caught me. And then in the 80s I had a UFO sighting up at Round Valley reservoir in New Jersey. I was camping very remote. And I saw what I knew today is called an orb, an orange orb and it basically was doing maneuvers over this lake in the middle of nowhere at three o'clock in the morning under heavy cloud cover with rain. So I know it wasn't a star. And when it was done making these bizarre maneuvers it just shut off. It had to be the speed of light it was gone. It's streaked across the sky. Later on, I was up in Quebec. And this is about 2012. And I was driving through the Adirondacks, I used to call it The Dead Zone going back to Pennsylvania from Quebec. And I came to a clearing. And I'm the only one on this road in the middle of winter. And there was a clearing and a sheer cliff. And I saw this object that was the size of two tractor trailers, combined with like triangular wheels climbing up the side of the cliff, and I, I made a U turn, I went back to see it, but it was gone. Whatever this thing was, was massive. It was unlike any other machine I ever saw. It was climbing straight up a sheer cliff wall. And there wasn't any civilization until you got to Lake Placid, maybe 50 miles away. So that was the most bizarre when I had in 2014, I saw a book written by Terry Ray about orbs. And I said, My God, these, these are the people who've seen this thing that I saw. You know, in 1986, I met him. He was a field investigator at MUFON. He joined MUFON as a field investigator. And I eventually got involved with a lot of different projects. Because of my background, I went to Fordham University for film production journalism. I was a railroad investigator, rail traffic controller for a while. And I decided to join MUFON. And I went to the first convention in 2014, in Florida. And that's where that's where I met Marchetta and all of the other people there at the time. And I just worked my way up, they found that I had a lot of unique skill sets. Yes, that's the book the complete story of the worldwide invasion of orange orbs by Terry Ray. I never would have remembered how to say that unless you put that up. And the rest is history. I started working with people like Katie page on redacting our Mars files. We did we develop the social network I was involved in and my most recent project has been project Aquarius that we're going to be releasing soon. Well,

 1:32:03

the Mars files in and of itself is pretty incredible. The fact that you there, there's huge access and public access to the archives that you guys have. That is the one thing that I have held that I love about MUFON more than anything is that they they have had probably more than anybody the most unified reporting process. Since their inception. There's nightcap things like that, that have had a reporting process. Things have changed over the years but move on. They have a fantastic process for taking in a witness statement and processing data, through field investigation, things like that. It is it is a beautiful field of data that you guys have assembled there. And to be able to give access to that not just to average people and non members but to members as well as is incredible. It's awesome. Yes,

 1:33:07

the the current system that we call it the CMS the case management system has 100 135,000 computerized cases, prior to the CMS everything from 1967 till 1995 were paper reports. And basically what MUFON did was we investigated them filed them. And eventually we got around to scanning them. And then the last person who was in charge of the project Katie Paige, the Colorado State Director for MUFON. She put together a team to start redacting them. And basically there's about 6000 Plus pages of old paper reports that the world has never seen. And they're going to be coming out very, very shortly. And it's going to be part of the larger project

Aquarius library. The interesting thing about MUFON compared to say, nightcap or Koufos, or new fork, we're the only organization right now that actually investigates the reports that we get, Peter Peter Davenport, new fork, he has about 170,000 cases, but he doesn't do an investigation, and Koufos. And nightcap really are legacy groups at this point that just have an older reports. So what you're looking at right here is what the interior of the project Mars library is going to look like room one will be the 6000 Plus pages of our old paper reports. If we go to the right in March, the final room that we'll be doing will be a multi level UFO map it will have the MUFON cases on top 135,000 pegged to a global map with GPS coordinates, plus all of the attachments such as videos and photographs when you click on a location where it's citing is the next level of the map, it will be the nightcap chronology, which Fran Ridge has graciously given us access to, to turn into a map level, we have another, we have another US soul level map, we're gonna have a new fork map. And we're working with the archives for the unexplained in Sweden to actually use some international databases they have. So it's going to be a multi level, map, nothing else like it. We also took 7000 illustrations that witnesses sent us from the 135,000 case database that MUFON has, and CMS, some of these drawings, Chris, are works of art. And we have over 7000 of them from cases one through 135,000. What's really interesting about the drawings are that you begin to see patterns over and over and over again Chevron's with blue lights triangles with pink lights, it's not one offs, the there is a recurring pattern in all of these Turing's also free to the public as the other parts of the project Aquarius library will either be by subscription or by a membership level, we will have a free public domain library of literally 10s of 1000s of newspaper articles including the first file cabinet of appro files, oh, wow, warrantless. Yes. And I have to give kudos to David Mahler at this point for getting hold of that legendary third file. Right? That family wouldn't give up for like 50 years. I can't wait to see what what's in that. And so I'm very, very happy about that. And kudos to him. The library is also going to have all of our historic journals from 1967, up until 2010. We're also going to have launching in stages the collections of Pratt, Colonel Rupert, which Colonel group it will be first and Leonard Stringfield, which we still have to redact because there's some very, very sensitive stuff there. But we have 65 of his notebooks scanned, and they just need to be redacted. No,

1:37:21

no. I've got to ask because my audience would ask me why didn't ask Bob why the redactions.

1:37:30

It's the protect people, some of the people in string fields, notebooks, they're still alive. Some of them were in very sensitive, you know, positions. So it's just like we do with all of our witnesses in the CMS, it will not allow anybody to see any witness contact information at all. Well,

1:37:49

and no different I was just about saying no different than any remote viewer pool where you were your viewer, 189 dash two, you know, so that nobody will come and like try to try to have reprisals against you. Right, what you view things like that you don't you don't want anybody from somebody's notes or journals, getting in trouble losing jobs, families losing pensions,

things like that. Which, which, yes, those those things definitely happen, especially whatever you talk about folks that have been involved with industrial military complex contracting, things like that. There is yeah, it's out there. So I it's just one of those due diligence as a host. I could if I just went on, I could hear everybody go, Whoa, I heard the word redacted. Why did I ask about that. So it's not like you are redacting information such as UFO information, information regarding materials, things like that. It's that your redacting people's actual physical names, addresses that kind of stuff. As a matter

 1:39:00

of fact, with the rubric files, he he left them to be for the public one day, okay. And there are very few places where he actually says, Please do not ever release this otherwise, we have he had 120 folders and two, three by five file cabinet cards, index cards worth of material, we have the two boxes of index cards scanned, and we have found 96 of the 120 folders that he left behind. And I'm actually traveling to Cincinnati Monday to see if I can find the remaining Rupert files that may be on disks. They they misplaced a lot of stuff when he moved from California to Cincinnati a couple of years ago. So I'm going to be trying to straighten out the collection system that they have there on Monday. Well,

 1:39:53

not just that I mean, people people forget Bob, how volumous dispute times, it's a different day and age now when you're dealing with digital data when you're when you're dealing with things like the little note tablet that I have in front of me, you know, where I can take notes all day and then make it into a PDF and send it. It's, there are stacks. And so like a case file used to be like a finger thick to finger stick by the time you're done with it, you know, so So you start getting into hundreds of 1000s of case files. That is, that's that's a warehouse full of data quite literally.

 1:40:34

Just for example, in the Moore's files, there's over 6000 cases, just the cash Landrum affair. John Schussler was the investigator on that, that I was the one who redacted that file. Witnesses, it was 81 pages. Wow, one file at a 6000 was 81 pages. So you can imagine how much stuff here's the other issue. Some people have complained that why did it take MUFON, 20 years, you know, to release all of this stuff. And basically, part of it was the technology wasn't fully developed yet. We move on. While we have the big name, we actually have very, a very small manpower team at the office, it's essentially for people. And over the years, since World volunteers, volunteers come and go, the people who began scanning stuff 25 years ago, they're they're no longer with MUFON, some of them are even dead. And things get misplaced over two or three decades. And then part of what we've been doing is putting it all back together so that we can finally get it out to the public as part of our mission.

 1:41:39

And this is this is just I mean, much like we discussed with Mindy top fest about about MUFON University, and the move of turning, turning training into virtual training, you know, to be able to get this information out to a larger audience to be able to basically Usher things into into the

to get this information out to a larger audience to be able to basically bring things into into the modern Millennium when it comes to this kind of data dissemination. This is this has been a massive undertaking for you guys. Not just the Mars project, but project Aquarius, in and of itself. It is it is incredible what you guys are doing with all of this data.

 1:42:18

Yeah, I'll tell you I was involved with Mindy working for Mindy on MUFON. University also, when MUFON University came out like Oman, I guess 12 years ago, it was a fairly for the time it was good. But today, it would be considered a fairly primitive product. The new MUFON University is fascinating. The videos, the lectures, the slide presentations, it's all state of the art modern up to date information, the photo analysis segments done by Mark Dantonio It is a beautiful product for field investigators. Yeah,

 1:42:55

it really isn't a fabulous not just a fabulous, fabulous resource of data. That is that is what I love about MUFON more than anything. And I have known about MUFON God since I was 14 years old, something like that. I'm almost 50 Now I am I am more than proud and happy to be a lifelong sponsor a MUFON to help out with conferences, things like that. Because I think that the work that you guys have done and are doing for cataloging data, the actual scientific process of taking this in is such a massive and yet still beautiful undertaking Bob. And especially whenever you're talking about international things, even going to symposium this last year and meeting Thiago Thiago T ECI. Who, who's in charge of Brazil? To know that there is an Cingular MUFON investigator in Brazil is is mind numbing. Like that is that's one of the largest countries in the world for sightings. You know,

 1:44:09

that's, that's a very interesting point. We do not get many people who wish to apply to MUFON. Even his field investigators in Brazil, and that is always perplexed me because Brazil's population is over 200 million. And they're fascinated by UFOs

 1:44:24

and pretty accepting of them culturally had been for decades. But

 1:44:29

yet a country like Canada and England, we're inundated with people who want to be field investigators, from those countries Australia to as a matter of fact, last year, we had Thiago from Brazil. We had a gentleman from France field investigate from France and we had at least three presidents and former directors of Canada London symposium this year. We're trying to get our Australian national director to come up Yes. So and we're going to be in Irvine, Texas, this is coming.

 1:45:02

I can't wait. Right my back right my backyard.

 1:45:07

And registration opens up February 1. I just thought I'd throw that out. No,

 1:45:12

absolutely. And you know, interestingly enough, when we when we spoke with Thiago, this last year at at the symposium during our coverage, one of the questions I had was how many, how many reports he gets from, you know, out, out away from the city out in the jungle, the remote areas, things like that. And he was like, number one, well, it would take a good day and a half for them to get to me. So we don't get too many. But aside from that, the reason we don't get so many is because it's nothing strange for them. Right. And I think that may kind of be the same case with Brazil, whereas, whereas it's something that is intriguing to us and might even be new in in some social circles in our countries. Once again, Brazil, this has this has been a regular, ongoing thing for decades.

 1:46:07

You know, it's interesting, you know, what's interesting about Brazil like last year, I saw a map of where there's a very large magnetic anomaly that's moving basically along the southern hemisphere. And for the past 100 years, it's literally been under Brazil, heading west. And I've often wondered if that had something to do with a tremendous amount of UFO sightings in that part of the world?

 1:46:33

Yeah, no, I mean, there it is. Right there geomatic geomagnetic phenomenon in the South Atlantic Anomaly region in Brazil, from Science Direct and that's just it you know, there are so many things like that, that I'm not going to say are, you know, like the the marsh gas concept, things like that. But would they be something that would possibly make interdimensional travel easier would probably make slipstreaming amongst, amongst parts of our universe easier? Oh, absolutely. Or

 1:47:08

maybe it's like a recharging station for the propulsion systems using the magnetic field somehow? Yeah.

 . . . . .

 1:47:14

Yeah, it's, it's remarkable. And especially now seeing all of the exotic technologies that we have, I mean, we cover a lot of them on this show. We have a whole section on our website called the knowledge vault full of patents, things like that declassified government programs, patents, all kinds of things. The fact that, you know, Lockheed Martin came out with their and released their patent two years ago for a nuclear reactor that fits inside of an F 16. You know, like, but most common people are not aware of such things, Bob. So whenever they see these amazing technologies that are out there, and that are in our skies, I think the first thing that they jump to, is alien. Of course, you know, I am a big believer in the fact that there is a cadre of this stuff. That is, we are not sure that's why it is full on anomalous. We aren't sure if it's future tech, if it's adjacent dimensional tech, or if it's intergalactic tech, you know, but there is there's definitely a slice of things that are beyond our realm that are out there right now.

 1:48:35

You know, I'll be honest with you, when you mentioned interdimensional time travel and aliens I, I've always leaned towards time travel. All right, that it possibly is us, right. But one of the interesting things you mentioned before was about patents. I mean, they had patents in the 1960s for black triangles, okay, type. But what's really interesting is that when you go back to say, 1900, people like Charles Ford, were writing about black triangles in the sky in 1900. And that had to be long before a patent on an American technological craft, like a black triangle. So what were people seeing in 1898? Yeah, yeah, precisely,

 1:49:20

much like even right up the road from I was I was going to talk to marquette about it. Right up the road from Irving. That an hour or so away is Aurora, where it was correct where the Aurora crash happened in 1897. Like that would that was well before the time of the Wright Brothers, you know, and, yeah, yeah. They're their tails of this stuff going back a long, long way. And I am one of those. I say it regularly on the show, Bob, I will believe the experimenter until proven otherwise. Because of the because of the unbelief Even experiences I have had in my life where it's one of those like, unless you were there. And even if you were there, you may not have had the experience. You know, and

 1:50:11

I'll tell you as far as experiences, the the main argument against them is that there's no physical evidence left. And I don't think that's always true, right. But one of the things, and I'm a patterns guy, I'm always looking for patterns. If you really analyze, experience or reports, it is the same phenomenon over and over and over again, just the other day, I was going through reports, and the amount of people who claim that they're paralyzed in bed, a hooded figure comes in or a figure with a glowing head and begins drilling behind their left ear. I mean, I have a dozen of the same scenarios. So you can't say that these people are all just making it up out of whole cloth. These people are experiencing a similar phenomenon where they believe an entity is actually drilling into their skull on the left side, it's always the left side too.

1:51:06

Interesting. Interesting. And is anything left behind in these cases? Any any physical evidence? No,

1:51:16

you know, there was one case recently Mindy was just telling me about it, where an entity left its its palm prints on a window, and, and they couldn't get the palm print off. And he ended up throwing out the window. And we were like, Oh, well lit up, we could have had that evidence because, you know, under a black light on the certain frequencies of black light, you can pick up the residual, you know, oil or whatever left behind by the entity. But those cases are few and far between. Well,

1:51:48

even even bat being able to swab the window pane and genetically test things that like that is that is one of the we we speak regularly about cryptids and Bigfoot on their show and Alba vernix. Right now, if you look that up is one of the big discussions in in the Bigfoot community. And the idea of actively using forensic lifting techniques to lift hand oils off of alpha of Sasquatch handprints, something you're talking about, and being able to actively genetically test the oils and those prints, as

1:52:29

a matter of fact that we also have a MUFON laboratory in Missouri. And we just we just got in equipment that's going to be able to analyze DNA. So that's, that's one of our major achievements. So we still have to get it up and running. But that's our newest piece of technology.

1:52:46

Well, and that's just it. The that's another one that people do not realize about MUFON is that you you hold the maintain your own research lab, your own research facilities for these materials, so that now granted, you will send things out for verification, that kind of stuff for the repeatable science, but yeah, it all it all starts under the roof. It's It's so fantastic to know that there there is an organization like MUFON out there that is done everything from collecting the data to analyzing the data, and even even helping provide questions for the the Senate panels that have been going on on the topic. That's

1:53:32

correct, we actually more fun, we'll be the first to say we don't work with the Pentagon or narrow. But we do work with Congress, the People's part of the government. We're especially close with Congressman timber shed, and Congressman Andre Carson, who we consider friends

of MUFON. And we send them quarterly reports basically statistical reports of what our reports over the course of the year may show as far as shapes, locations, is there any connection to where things are going on. Just for example, if the Chinese balloons shoot down in February, the follow up the following week, several objects were shut down, including one over Lake, your rod, which was called in an octagon shaped, and we actually went into the MUFON CMS which is searchable. And what we found was startling the amount of octagon shaped objects or with similar light patterns on their bellies, including one that was seen in exactly the same place as Lake you're on shoot down only two hours earlier. So that's the type of research we're doing at this point in time and providing the Congress Well,

 1:54:47

and that's just there's so much research that is happening on the sidelines. Bob that is not in the headlines that that does not unfortunate only science is typically not sexy, to the media, and this topic especially, has just become sexy over the last few years before, I mean, even even the topic of MUFON symposium, not this last year, but year before it was MUFON or UFOs. In the media, you know, and and how the media switch happened even even to the point of using terms like UFO deniers, and news stories, stuff like that there has been almost a hard pivot when it comes to the way that the media is covering this and even now with Steven Bassett and people like Earl Grey, starting up the Hollywood Disclosure Project, bringing in people from Hollywood and producers, things like that, because yes, they as well are a part of the media.

 1:55:58

That's right when I became a lowly field investigator in 2014. I did not ever think what is going on now would be going on that would go from just 10 tinfoil conspiracy hat theorists to, you know, hey, MUFON we need your information. Do you want an episode dedicated to you on Ancient Aliens? Do you you know, do you want to work with Congress? And it's just amazing. It's been a sea change what's happened in the UFO world? Wow. It's

 1:56:31

been incredible. And I mean, just this show was going on in its previous incarnation in 2017. When Lou Elizondo hit the news, all that kind of stuff. It was coming right up, actually, just within a couple of weeks. That was December 17, was that date. So like, that's literally within two weeks of this airing. It will be five years or six years since since Lou Elizondo went on CNN with at the time, not really declassified for media release footage, you know, it was pretty pretty hutzpah to do. And I never thought that even with that, Bob, that we would be this far in the conversation. People but people like Steve Bassett had been spending 20 plus years advocating for disclosure. And we are I think a whole lot closer. I think that we're still numerous very large moon like steps away from Big D disclosure, though. And

 1:57:40

I do think that there are competing forces that a wants to release the information and be not to release the information. And I'm also, you know, cautious when suddenly the government is

release the information. And I'm also, you know, cautious when suddenly the government is becoming cooperative and NASA is looking into it and you have arrow. And then suddenly, Shawn Kirkpatrick resigns, you have to say, you know, Mission complete, or look at the magician's other hand, because you know, what else might be going on? Then all of a sudden is the sudden change this pivot? Yeah.

 1:58:13

Yeah. And once again, as he leaves office, the conversation is Danger, danger, danger.

 1:58:24

When he started, we have not We found nothing in these 800 reports to suggest there's UFOs. And he leaves saying they're on our doorstep, basically, you know, to paraphrase. So what was that change of opinion in him?

 1:58:37

Yeah, yeah, they're on our doorstep. They're over our neighborhoods. They're in our flight pads. They're they're a danger. And, you know, that is that is one of the things that we've discussed regularly on the show is the idea of that, sadly, Bob, that is one of the fastest ways to get Congress to write a check, is to say that there's a danger. Now, there's a reason to have a panel and a research study, and everything else because well, people are in danger. We, the people and communities have been crying out for this for decades. But it took the red flags of danger for senators to perk up and actually actually discuss it.

 1:59:28

Yes, I mean, without doubt this is we're talking big money. We're talking billions. All right. But one of the things that's very curious to me and this is why I always harp on that week following the Chinese balloon shoot down. They have never never released any fighter jet footage of the three objects shot down over North America, February 10 11th and 12. And I find that very, very curious that on one hand, you have David grush in a hearing saying yes, we have non human biologics and off world crash debris, but then they never showed you anything of the footage of the three shutdowns over North America. It's I don't understand the disconnect.

 2:00:11

Well, and not only that, but the the recent article that was released talking about the actual CIA department that was assigned to crash retrievals across the globe.

 2:00:26

Like a Black Parade type operation there.

2:00:29

Give me one second because I've got my fast fingers here. CIA department of crash retrievals and I guarantee you it will pop up here it comes right here. Hey, news nation, NDTV mirror, all kinds of fun things. But yeah, CIA had secret office talking about crash retrievals from nine sites around the world. Wow. It was a report that just came out a few days ago. And yeah, yeah. So even the CIA has had people that respond to such situations, apparently, for decades.

2:01:17

All the more reason we have to redact the Leonard Stringfield. Before releasing to protect people, because apparently Leonard was right, all along.

2:01:26

I use it many, many years ago, Bob, this was way back in the days of dudes and beer. When we first started having guests on in this way, moved away from just Open Table discussion around a microphone with four people. I contacted somebody who was pretty, pretty seminal in the world of you know, UFO media, things like that, and asked him to come on the show. He was like, you know, I've checked out some of your guests. It's great, but I don't really do appearances anymore. I've had too many friends who, in the UFO investigation community have died of strange circumstances, things like that. They don't speak for fear of their families. And I don't speak for the same fear. And he basically at that point laid out what I have come to know as Project Blue Beam. And the idea that the dialogue will be moving toward as we're discussing right now military threat military threat. And, and the technology will be used to deceive a certain group of people into into motion, which which will cause a clamp down for internationally. Pretty, pretty wild out there theories. But, you know, there, there is a lot of a lot of truth to what grush has come out and said, when it comes to hidden projects, hidden monies, people people being told to be quiet and sometimes by force.

2:03:14

Right? It's very peculiar that you just mentioned Project Blue Beam. I just read the book last week. It's a very short book. It's like 50 pages I've written in a half an hour. And some of the stuff I thought he was sort of like making up but he was really on target, about like the digital currency calming. And, you know, I have always suspected that if they were going to start using the atmosphere to create these huge slideshows that makes it look like Jesus is coming back, whatever the perfect vehicle to do that would be 60,000 Starlink satellites around the yard.

2:03:54

Like you're, you're building a huge holo projector.

2:04:00

You really need 60,000 satellites for internet. I don't know, maybe it's a little maybe you don't. Yeah, yeah.

2:04:05

Yeah. And they, you know, the thing is, though, Bob, the the things that go up that the average person is not aware of, it cracked me up when Trump came out, and people are like, Oh, he's crazy talking about the Secret Space Force. Talking about a Space Force, like, What are you talking? It's like we've had a Space Force for years. That's the training for Cheyenne Mountain does. As

2:04:30

a matter of fact, in the project Aquarius files that we're releasing, there are numerous mentions of Space Force back in the 1970s.

2:04:38

Yeah, yeah. And once again, Cheyenne Mountain like that's all that they do is monitor space. They they monitor all the satellites, all kinds of stuff. But at the same token, the x 37 B, which, you know, SpaceX is getting ready to relaunch and put back up when it first moved when it landed, the first time it was like, oh record, like 280 days in space unmanned, like nobody ever even knew it went up. We heard about it after it successfully had its mission and landed.

2:05:15

Do you know that I have what I believe is evidence that Starlink was launching long before May of 2019. Really? Yeah. 1996, possibly 1958 near sac base in Omaha, that the same type of phenomenon that people see now with Starlink. When people see Starlink, like a pilot at 60,000 trails of satellites, it looks when they first launch and if it's ahead of them, it looks like one long cylindrical object with a dark spot on one end. And what it actually is, is the Falcon nine and the separately the trail, the train that's 60 satellites, but from far away, it looks like one object when snow, but the pilots would report that there were satellite objects rotating around what they thought was a UFO. And that was actually the tension rods that popped off. When the starlings are released, it wasn't a mothership with satellites, it was the tension rods that needed to be popped to let the trail of satellites out. I have evidence of this going on back in 1958. Wow.

2:06:19

Wow. And and I mean, 58 That that's right up around the time that you know,

2:06:29

oh, my god, we're only like, they're only like two things in space at the time.

2:06:32

Yeah, exactly. We had Sputnik and that that pretty much a Brookings Report was what was on the tip of my tongue. That was right up around the time of the Brookings Report, when they straight up said, if we find anything out there, and maybe we should keep that quiet, you know, because they were they were at that point, expanding on the idea of space travel and what we would do because yeah, we we didn't know what to do when we heard a Bing Bing Bing come by from from Sputnik. You know, that was that was a scary, scary moment, at that time. And I mean, to the point that many wonder if many of the successes especially from the Russian side were utterly faked to to just win moral battles within the Cold War.

2:07:23

Well, I'll tell you an interesting story about there wasn't a UFO scare. When Sputnik was launched, there was a scares in the panic that the Russians were ahead of us. But it was in no, it was in the November flap of what was it 57? When Sputnik two I think was lunch with lack of a dog. Ya know that that same night, there were two reports of small alien entities on opposite ends of the United States trying to kidnap dogs. And one of the entities said to a boy, we are civilized people. We don't mean you any harm. We just want your dog. Okay. And nightcap chronology. Look it up. There's two reports. The thing that that's interesting about that, to me, is that that shows you that the aliens or whoever they are, they got tricked that night, they must have thought, Whoa, we've been looking at humans. Maybe dogs know how to fly rocket ships, too. So we got to kidnap a couple

2:08:25

why they are a little bit more enlightened. One of my favorite memes lately has been the one of the aliens locking their doors they passed my earth met Earth. Yeah. And that's something that I've mentioned numerous times is imagine being that that intelligent civilization approaching Earth with with zero context, Bob, you would be bombarded by all of our transmissions long before you got here, right long before your ranging system ever said like biological entities on the planet. Anything like that? You know, maybe maybe you saw something like we do where it's like, oh, you know, there's co2 in the atmosphere, something like that. But you you would be getting all of our radio transmissions, our radio dramas, our news, everything else that would that would be the only frame of reference that you have of our civilization. That's

2:09:29

what that movie, Galaxy Quest, the comedy. That's basically the premise. Yeah, they thought these exact TV actors were actually superheroes. Yes. Yeah.

2:09:39

Precisely. And you know, that that could lead to very much a situation of wow, you know, do we really want to stop there? They don't seem too enlightened. You know, and that's a conversation that we have regularly with people like Keith Sealand, author of the Human Verse who I met at MUFON symposium, one of the amazing authors, they're talking about whether or not we are even evolved enough for them to want to have the conversation with us.

2:10:12

Right, right. Yeah, I personally, I don't think we're evolved enough for them to want to have the conversation. Wait a

2:10:19

minute, at the same token, I am one of those that I, I am a firm believer that we are we are an ingenious, ingenious species, and many of the things that we have, we have lost our knowledge numerous times. You know, many of the things that people I think attribute to alien, or alien influence, I think, are fully our our ingenuity as humanity, you know, be at the pyramids, what have you. So I, I'm a big believer in, we are able to do a lot of things and numerous times, we have lost knowledge, even now. You'd be hard pressed to go out and find a hand drawn wood craftsman to make you like a spiral wooden column by hand. You know, that's something that Jesus and my grandparents generation, you probably could have gone out and gotten a couple quotes.

2:11:26

Right, right. I still think 95% of our ancient history is buried when I was growing up at school, it was the ancient Samaria was 5000 years ago, the oldest civilization, right? Then they find Gobekli Tambay. And then you have that pyramid in Indonesia, that might be as old as 25,000 years old, as well as the monolith in the Sea of Japan. So, you know, let's say there was a flood, let's say a civilization was wiped out that was as advanced as ours, we'd have no clue and we'd be liking that human existence. And that's basically what I can't think of his name. Not Grant Cameron Grim. Yes, yes. That's one thing. No, that's basically his gig. His theory. Yeah.

2:12:11

And the funny thing is the thing that I love about him more than anything, Bob is the fact that he'll say it again. And again, like you, you can say whatever you want about my research, I'm not a researcher. Right. I am an analyst. Right? I am just following the story and the facts where they take me these are the facts. Like I I'd love to say that they aren't. I'm not out to change your paradigm. I'm not out to destroy science. I'm just journalistically following things where they take me and I, this is where they're taking me.

...

 2:12:44

And that's basically what Charles Fort did in my 20s. It's like, hey, explain how, you know a Hebrew artifact was found in an Indian mound in Arizona. You know what I mean? Yeah.

 2:12:54

Explain how how a viking sword gets tilled up in a field in Minnesota. You know, if Columbus was the first dude here, who never actually made it here, even just even as a Knight of Columbus, sorry, folks. Never made it to mainland not here. And on the on the fact of a lost civilization like I'm holding in my hand right now, this is this is a one terabyte thumb drive. Like, this is more data than you could fit on a ream of disks when I was a kid, Bob. No bigger than my thumbnail. Now. Go lose this on a beach and find it 80 years from now. Is a thumb drive even still used? Right? Do we even still know? Like, Go show a kid an eight track? You know, go show a 12 year old right now an eight track player and let them go? Like what the hell is that thing? As a form of music entertainment class, you know,

 2:14:02

I used to have one in like my first car. And right in the middle of the song it would change to the next channel. Yeah. Yeah, it would, it

 2:14:09

would just flip over. I've said for years, it was the death of the album. Because after that you had singles and 40 fives. You know, it was like you at least had to listen to the to to the song before your favorite song. Because they always put it in the middle of the track. So you had to learn like, oh, well, I'm done listening to that. No, I have to flip it over and listen to a song so that it rewinds and goes back to that spot. Then I can flip it over and listen to it again. But yeah, like even the idea of that. You know how fast our technology moves would something like a thumb drive even be valid in 50 years. On that thumb drive sit schematics for computers, like information that can help you rebuild a society Ready, but can you access it? And do we know how to access it?

 2:15:04

I actually have a cousin in Toronto who works for the Canadian government. She's an archivist. And that's basically what she does is they look for alternative forms of storage, based on the anticipation of the storage type of system they're using now becoming obsolete. So how do you transfer data from one system to another over decades? That's our job.

 2:15:27

Yeah, yeah. And and I'm trying to find the article right now about the quartz disk with with storage on it. Be because there it is. xiami science posted the article a few years ago, but small quartz desk can store over 360 terabytes of data, wow, we're talking about the same exact

thing I'm holding, in my hand, no different, like, quartz in and of itself can be programmed with data. So So to think that there are crystals out there that maybe don't have data on them, might be a little silly. You know, there's been people who have said it for years. But who knows, Bob, it opens up a whole nother realm of hypothesis. So when you're talking about all of this stuff, whether whether it's this ancient civilizations, how we got to where we are MUFON, what have you, you've got to be open minded and open hearted enough to have the conversation. That is, that is one of the reasons why the the experiencer resource team exists with MUFON. And whenever I have people that are like, oh, you know, MUFON if it's not nuts and bolts, they don't want to know about it. I'm like, I don't think so. I don't think the work of Kathleen Martin and self talk and people like that with the with the experience or resource team would be there. If that was the case. You know,

 2:17:03

I'll tell you this. Every year at the symposium, I do the MUFON cases of interest in this case is from it's so popular with people that when we got suggestions back from the attendees last year, they actually wanted a second cases of interest presentation of only er T cases. Yeah. And we're going to do it, we're gonna have Earl Grey and George minich present the best er T cases of the Year at the symposium. That is great.

 2:17:30

That is great, because the work of the ER T is so entirely important, man. So people do not realize like I am right now even even as somebody who writes binaural, beat and therapy music, my next album that I'm working on is an album for experiencers and an album to help soothe experiences because then once that, onto logic shock happens to you. There is a rocking of your reality boat that a lot of people do not realize. And and that can be very hard to come back from. And that can be very hard to move forward with.

 2:18:14

I guess some of the reports I've read, the person's absolutely traumatized and they're reaching out to move on going, I need help, I need help. And, you know, we can only help them to a certain extent by listening to them, but we do provide resources for those people to go to outside of MUFON

 2:18:32

precisely precisely and that that's what I love is that there you guys are full of nothing but resources for this community. It's it's absolutely amazing. In our last couple of minutes, Bob, how can how can people become involved? What can they do because once again, one of the most beautiful things I love about MUFON is a nobody getting a bonus this Christmas. Nobody getting paid, which means you ain't really having a whole lot of corruption of data. You ain't you ain't having a whole lot of stuff swept under rugs, stuff like that. It's very hard to get claws into a system like that. Because there's no vested interest for in writing.

2:19:20

I truly, truly believe that. As the field gets more complicated when you have the government involved, private corporations love you. You still need grassroots organizations like MUFON Koufos. New fork, David Marlar. The way we do things is we have memberships and we sell products that's how we support ourselves. The project Aquarius library is going to be available for only \$50 a subscription and knowledge is power. Wow. You don't have to become a MUFON member to get the project Aquarius have a package and be a yearly subscription. But I also want to say is that one The most rewarding things I ever did in my life was to take the test and become a MUFON field investigator. Because it has literally changed my life, it opened up my eyes to the reality, speaking with these witnesses, hearing the stories, getting these drawings, doing photo analysis on the videos, it's it's an astonishing career that you'll never make money on. But you it will change the way you look at the universe. So I highly recommend people always, if you're thinking about becoming a MUFON, field investigator, you have some sort of background that could help you but we take anybody try it out, I really think it will be a rewarding experience

2:20:41

that that's why I want to do it. Not necessarily that I have a volume is knowledge about craft or experiences, things like that, like I've talked with tons of people, however, Bob, I have years of experience as an audio engineer, as an audio editor, as an audio reclamation specialist, as a video reclamation specialist as a photo reclamation specialist, recovering people's old photos, things like that. doctoring photos, making doctored photos, all kinds of things. So I have a great realm of knowledge when it comes to breaking down things like that. Which Yes, that is that is one of many cogs in the machine of investigation. So if that is something that I can bring to the table, that's what I want to be there for. And that's what it's about is what what talents can you bring to the table? Because not everybody is a field investigator in the same way. Right? You know, and not everybody fulfills that that physical need, like that. Some, some fulfill the need of like, Hey, can you look at this footage for me, things like that. So there's there's a ton a ton that can be done. When it comes to volunteering with MUFON. And and becoming involved. I want to thank you for your time, I want to thank you, personally, Bob, for the opportunity to be involved with Project Aquarius,

2:22:10

I thank you for helping us I really appreciate it, we can no longer

2:22:14

than an honor, I cannot wait to keep helping, helping helping anytime and as much as I can. MUFON is one of the causes that we have definitely heavy gotten behind with our show. I think that it is a mission. That is hugely important. Specifically the the charge of investigating these for the good of mankind, you know, and bringing this knowledge forward. So thank you so much for all your work with MUFON. And everything that you have done in the world of international investigations, things like that. We'd love to have you back on again, Bob to talk more about that and more about everything that MUFON does.

2:22:56

Well, thank you very much. And I hope I see you in Irvine, Texas in July. Well,

2:23:01

you will I guarantee you you will and we will definitely be talking with Sam Soon. All that kind of stuff we'll be having you guys on before the before the upcoming conference, everything else to help promote it. So please do hold the line while we close things out with the audience. And thank you so much for your time. I appreciate it, Bob.

2:23:22

Thank you.

2:23:22

All right, well, you are online, checking out everything from MUFON folks. [mufon.com](http://mufon.com) is the website. This upcoming July is the MUFON symposium right here in Texas. While you're online registering for that joining MUFON becoming a field investigator everything else make sure to stop on by curious realm, curious realms where you can find our knowledge vault [curiousrealm.com](http://curiousrealm.com) forward slash knowledge. That's also where you can find our store [curiousrealm.com](http://curiousrealm.com) forward slash store where you can buy not only our gear, but books and videos and movies from all of our guests. Thank you so much, everybody, for tuning in. Thank you so much for tuning in every week. Take care of yourselves take care of each other and remember open minds open hearts. That's what makes the conversation folks stay curious. We'll talk to you soon. Baba. Thank you for tuning into this episode of The Curious realm. Stay tuned for more guests forbidden topics hidden hidden truths. Download the official curious realm app and view the knowledge vault on our website [curiousrealm.com](http://curiousrealm.com) Follow us on social media by searching curious realm. Curious realm is available on your favorite podcast services as well as YouTube, Roku, Amazon Fire an Apple TV through the APR TV app. Available on all app Martians. Curious realm is a proud member of the HC universal network family of podcasts. For more read content or to become a sponsor of curious realm or other podcasts, visit [HC universal network.com](http://HCuniversalnetwork.com) today. Thanks for listening. Stay curious. And remember the other side is always watching
