SUMMARY KEYWORDS

paranormal experiences, near death experiences, non local consciousness, UFOs, multi dimensional reality, quantum physics, remote viewing, consciousness, holographic projections, Bigfoot, astral travel, spiritual transformation, scientific research, contact modalities, information fields, Near death experiences, altered state, religious experience, flow state, non-dual experiences, meditative protocols, quantum physics, consciousness, reincarnation, artificial intelligence, self-other distinction, paranormal experiences, frequency shifts, holographic theory, scientific research.

SPEAKERS

Speaker 3, Speaker 4, Speaker 2, Speaker 1

00:17

Coming to you from the city of the weird

00:21

exploring topics

00:22

from the esoteric

00:23

and unexplored to dimensions unknown,

00:28

shining a light of truth on the darkest corners of our reality.

00:33

Welcome

Speaker 1 00:34

to the curious realm. You you.

00:48

Well. Happy Tuesday, everybody. I hope.

00:52

Hope you're all doing well out there. Hope you've had a great week.

Speaker 2 00:57

So much going on in the world. The the rain continues here in Texas,

01:02

one day off would be nice.

Speaker 2 01:05

But, you know, as as rescues continue things like that, there's I have been contacting people from cloud seeding companies to have them on because I'd really like to address this issue. As you know, we d, we demystify a lot of things on this show, and that's one that I really want to get into one night. Tonight, we have a great roster of guests. And the second part, we will be joined by Ronald Meyer. He is the author of the new co author of the new book Jesus had a near death experience, and we're going to be going through some of the science behind indies, some of the hypotheses behind them, and and how Indies and how this, how it's a work of fiction, but how the research, the scientific research into indies, led to writing this book, and what some of that research is, and how that really, really speaks to non locality, same way as we talk regularly on this show about the remote viewing that I practice, the fact that it shows a non localized consciousness and a connection on a level that goes beyond the world, like quantum physics just begins to explain it. And that's part of the thing that rom brings up in the pre record spot, is that, you know, it's gonna get to a point where all of these terminologies just break down, much like the speed of light, like, as you approach that, things just like start breaking down in physics, you know, the equation no longer equates, and we it's it's interesting. And our guest in the first segment, I'm very, very happy to welcome tonight, renario Ray Hernandez folks, he is with a great, I'm sorry, a greater reality.com. Is the website his book, one of many books. Part one of six is the mind of God, a spiritual virtual Virtual Reality model of consciousness and contact modalities, that is what we are having Ray on to discuss tonight, is the world of concept modalities. What are concept modalities and how do they relate

to the overall conversation of not just UFO, UAP Ray, but so many other topics of the paranormal. Welcome to the show for the first time. How are you doing this evening? Ray, thank you for the invitation. Absolutely. Thank you for joining us from Columbia tonight. You are. You're literally coming from half a globe away. So welcome, welcome. How are things down there?

S

Speaker 3 03:58

Hot, hot and hot, but it's very, very cheap. I was just telling you off the air that I rent a brand new four bedroom, four bath home in a middle class neighborhood, very nice neighborhood, and I paid \$500 a month. Wow. And then obviously, the food, the taxi rides. I never spent more than \$4 on a taxi ride here in my city. Here.

S

Speaker 2 04:25

Crazy, crazy now. Ray, when, when you began your work and your PhD doctoral work on contact modalities, and began the first part of the mind of God? What? What was it that brought you to this research to begin with?

S

Speaker 3 04:45

Well, I, I started off as a skeptic of all of this phenomenon. Had zero knowledge, zero interest, and then I had a paranormal experience with my ex wife where an energy being appeared in our living room and totally. Heal our paralyzed dog, who we were going to be euthanizing later that afternoon. Wow, and and that was jointly in the experience with my ex wife and I. And then she began to pray outside to the being that healed our dog, and UFOs would show up. So then I started doing it, and UFOs would show up as well very large objects, and most of these were the size of a football field. They were not physical. And then I began having almost every type of paranormal experiences, out of body experiences, astral travel experiences, seeing shadow beams in the house, having precognition of things that are going to happen, yeah? I mean, tons of paranormal related experiences, yeah. And then I've had lots of synchronized, orchestrated events, okay, that's one way you could call them. And I'll skip, skip over a year and a half of these experiences, and go straight to one day where I had driving my car in the middle of a traffic jam, I was taken out of my body into another multi dimensional reality, and I was shown what is consciousness and all of the paranormal, that they're all interrelated, and it's all one phenomenon. So for example, you this guest that you're going to be having in your next session. We have in our great reality book series, we have authors in our various chapters that are the world's foremost authorities under your death experiences. We have articles by Raymond Moody. We have articles by by Doctor Jeffrey long. This is Doctor Rudy shields, professor from Harvard. Doctor Jeffrey long has written three books on near death experiences. He's been collecting data on Mt ease for over 40 years. Michael Grosso is a professor of philosophy from Columbia University and and there's myself and and there's a book, volumes one and volumes two. Each of them are 800 pages. As you can see, this long list of PhD academics and medical doctors, yeah. And if you scroll to the top of this list, for example, a little bit more up. Mm, hmm. Okay, there. Edgar Mitchell Apollo, 14 astronaut, yep. Was one of the co founders of the doctor Edgar Mitchell Free Foundation, and I was one of the co authors of that book, which I'm going to discuss in a couple of minutes. Right next to him is Doctor Bruce

Grayson, and he is one of the world's leading authorities on near death experiences. He just recently retired from the University of Virginia School of Medicine. We also have up there in that list, Dr Raymond Moody. We have Dr Evan Alexander, a professor of neurosurgery at Harvard, who had a profound near death experiences. And I could go on and on with this list. There's Raymond Moody at the end, all the way to the right. So our organization has the world's leading authorities on on near death experiences. And if I could argue, before I begin my session, here is that the NDE is the key to understand the UFO Contact phenomenon. Why? Because consciousness is fundamental. All those people on that list, you go down that whole list, okay, all those people believe that consciousness is fundamental and that our perceived physical reality is an illusion, okay? And that's Raymond Moody, thinks that same way. Doctor Jeffrey Mishlove, everyone that's on that list, okay, and that, that all of the paranormal needs to be viewed as one integrated phenomenon under consciousness. And so from that basic teaching of my out of body experience, I was returned after about an hour, and then immediately, within two days, I was introduced to Mary Rodwell, a UFO Contact researcher in Australia, to Dr woody shields, a professor of astrophysics from Harvard University, and Dr Edgar Mitchell, who's at The home of Dr Edgar Mitchell on the third day where the DR Edgar Mitchell Free Foundation research study began, and after five years of collecting data, because we wound up with over 15 PhD academics in that research study, after Five years, we published an 820 page book titled beyond UFOs, the science of consciousness and contact with non human intelligence. 820 pages. If you go to our website, if you click on Books, you'll see that is one of the books. Now mind you for all your audience members. Years. That's a book of my personal experiences. But there's that's the book right there beyond UFOs, the science of consciousness and contact with non human intelligence. As you can see, the co authors on the bottom is myself, the Harvard professor, Dr Rudy shields and Doctor John clemo, a retired professor of psychology for over 45 years and 820 pages, and that book is the world's first and only comprehensive academic statistical research study on UFO Contact experiences. And the data from that book totally contradicts what is circulating in Main Street, materialist ufology. Now that book is free. It's free. Go to that website. You can download a PDF copy of it, okay, so that book is free, and all the other books that are there, they're all free. Okay, see, download the book right there. You can download and 820, pages of the world's only statistical academic research study. That

S

Speaker 2 11:08

was probably my favorite, as somebody who has a knowledge vault on his website full of declassified government programs, things like that. That was probably my favorite thing about your website whenever you sent it to me, Ray, whenever we first started talking, yeah, it's all

S

Speaker 3 11:22

free. And what it is is that here I'm going to these UFO conferences. I'm asked, I've asked to speak at maybe five or six of them in the last eight years. That's it. Okay. And yet, we have the only academic, statistical research study on UFO Contact experiences that totally contradicts, you know, the field of materialist ufology, why I've never been invited to almost all the major conferences. The reason is because what we found totally contradicts what is circulating in ufology. What we found out was that the phenomenon, yes, there are physical components to it, but the overwhelming majority of the components of the phenomenon are non physical.

They're paranormal in nature. For example, 50% of the people that took our survey had a miraculous medical healing, just like our daughter. Okay, 50% of these people. What we're talking now three No, we're talking about 4250 people. Okay, this is not chump change. 4250

12:33

people from over 125

Speaker 3 12:36

countries, okay? And so that's a hell of a lot of people, yeah, and these are PhD academics that were administrating this and then seeing, for example, having out of body experiences. It was close to 60% of these people were having out of body experiences seeing a ghost. Was like 80% of them saw a ghost. Okay? And being brought to a multi, multi dimensional reality, like I was, I was 50% of the people okay, having seen the dead person. Okay? Huge numbers, yeah. And the reason for all of this is because if you talk to major contact experiences like myself, they will tell you that they've not only seen a UFO, they've had out of body experiences. They've had Malta astral travel experiences. Okay, they've seen that people. They've seen shadow beam. There was a period I was seeing shadow beam, you know, several times a week, squeaking, you know, right across me in the back when I was doing zoom calls. So the and also how these people changed? Oh, my goodness. People that were atheists all have become deeply spiritual, okay? People that fear death, they no longer fear death. People that were humble, horrible odors, all of a sudden, a loving light, and you're not very loving, yeah? And illustrations of this are two well known people, okay? One is Whitney Strieber. Whitney streamer started off with all the horrors of the alien abduction phenomena. Now he prays to the beings that interacted with him. He considers them angels. Okay, that's Whitney Strieber. His last book, last three books have been about God and the afterlife.

14:25

Kathleen Martin, I'm sure you know her name.

Speaker 2 14:28

We are very good friends with Kathleen Martin. Kathleen Martin, right?

Speaker 3 14:33

For our first book was capture. You know this evil, captured alien abduction type of book, right? Her last book was from alien abduction to spiritual transformation, yeah. Okay, so those are just two examples that people know about, but we literally have 4000 Oh, absolutely that went through that transition. And so I also have articles in there of what we learned about the. Whole contact phenomena, we have a summary of that book Beyond UFOs, if you don't want to read 820, pages, we have a summary of the data and a very, very detailed summary. And so naturally, I was never invited to these UFO conferences. All of these articles here are from

volumes one and two of our greater reality book series. Now these are all theoretical articles one and two, and each volume is 800 pages. Now this book the mind of God. That's the introduction to our six volume book series. Uh, volumes one and two are theoretical in nature, and you'll see all those academics that you'll saw those pictures of. Yeah, they wrote articles for volumes one and two. Now, volumes 345, and six are articles written by major experiences of the contact modalities. They're not listed there. They're listed in the in the books, in the book section, okay, yeah, where it says all the way at the top, yeah, where it says books and articles. That's a book about my personal experiences. This is the beyond UFOs. That's the introduction to the great reality book series. And here, here's volumes one and two. This book is 800 pages. And Volume Two, which follows it afterwards, is also 800 pages. These are theoretical. And then if you scroll down, these are now experienter written chapters. These books are also 800 pages. And if you table go to the table of contents. A little bit more at the bottom right there, go there. Table of Contents. Okay, you will see a very brief summary of some of these people go down a little bit more. Okay, right there. Doctor Belinda Greer, go a little bit right there. Okay. She's a recently retired medical doctor. She has seen 14 UFOs. She's seen three Sasquatch experiences, two of them very up close, one of them lasting the entire night. She has had two near death experiences, her second nd, which is totally unbelievable, extremely powerful. She's had out of body experiences. She's been brought to other dimensions. She sees deceased people and a whole boatload of paranormal experiences. So this is a recently retired medical doctor who's been quiet all of her life, and this article is the first attempt for her to come out of the closet. The second person under there is also a retired medical doctor, Dr Joseph Brooks. He's been doing CE five since 1992 we see the whole boatload of UFOs, one of them we discussed, we compared notes, because I told him these were holographic projections. And he told me of an experience where he saw a world war one wooden airplane, but it didn't have the three layers of wings, only one wing. It was bitty, winning wings, a little, tiny wings, not even, you know, five feet across. And he looked up and it didn't have a pilot, and it was running parallel to him on the highway at like, 60 miles an hour. Wow. And so he concluded that this is impossible. A World War one airplane painted in bright fire engine red, with no pilot, with little bitty wings, you couldn't hear a noise, no noise at all. He said, This is not real. This had to be a holographic projection. And I told him, that's the exact conclusion that I reached based upon many of my experiences, one of my experiences, I will go back to my very first UFO that I called down, and that was very, very detailed experience. Lots of stuff happens in that experience, but basically my friends came and they began to try to explain the way of what they were seeing. These are hundreds of oblong streaks of light that formed like a whole huge skeleton. It was like six football fields in length, a football field in height. It was enormous. There's things right on top of us. And so then they began to try to explain it away. And after two minutes, I busted out laughing, and I told the intelligence behind the UFO, because I called it down. In 15 minutes, it appeared after I called it down. So in my mind, I said, and this is verbatim, I said, You better come up with some better bullshit than this, because my friends don't believe you. Instantaneously, what we were watching totally disappeared and now replaced by like, 50 huge orbs the size of Volkswagen Beetles, very, very close to the ground, okay? And they were all going on and off, on and off. The orbs on and off, on and off, like, like, behind the bicycle. You see those bicycles that go on and off like that. Yes, that. These are huge orbs. Okay, so then my friends and me. Easily stop trying to explain it away, because this was, you can't explain that way, and it was a totally different object from what I first said. And so Joseph, Joseph Burks, Doctor Joseph Burks and I were comparing notes, and we both came up with the hypothesis that these are holographic projections that people were saying, Okay, now same thing with the beans that people are seeing, overwhelming majority of people that see these beings, and they're literally 10s of 1000s of different types of beings. There's a friend of mine in Miami. Goodness, my Alzheimer's is kicking in. He's written 16 books. Each book has, like, 300 pages of different UFO Contact, experiential stories with different types of beings. And

they're all different, you know, from robots to elephant heads to like buddy buddy rabbits to fish heads to all the typical UFO beings that people associate with and that's what in our survey, we literally had, in for a book Beyond UFOs, we literally had 10s of 1000s of different responses of beings that people were seeing. Okay, so my question now I'm posing to you, okay, are these 10s of 1000s of different physical beings that appear almost all of the cases for less than a minute? Okay? People out there having a beer with one of these beans for three hours? You know, shoot the greens. You know, it's like you see them. They last less than a minute. Boom, they're gone. Okay? Now, are these beings 10s of 1000s of different beings, coming from 10s of 1000s of different planets, or is this something a little bit more complicated? Now, Jacques valet said that these were multi dimensional experiences. Sure. Okay. Alan Heineck said the same thing before he died. Doctor John Mack, yeah, okay, a professor of psychiatry from Harvard University, in his book passport to the cosmos, he said, these are multi dimensional experiences that these people are having. They're being brought to other dimensions. You're seeing the versatile of different types of beings, sure, again, for less than a minute. Okay, so if these three brilliant minds in the field of ufology saying that these experiences are multi dimensional, that they involve, quote, unquote, what Jack Vale said, a manipulation of space time, okay, the conclusion that we reached in our book, beyond UFOs, was that the UFO phenomenon is a multi dimensional experience involving a manipulation of space time, sure. Now let me ask you another question. Near Death. Experiences, is there a manipulation of space time, obviously, without a body. Experiences, is there a manipulation of space time? With astral travel experiences? Is there a manipulation of space time? If Are you seeing your aunt, Matilda, one week after she died, she's in your living room. Is that a manipulation of space time? Okay? Well, Ayahuasca, okay, you

S

Speaker 2 23:22

all of that presumes that time actively exists, right? Time is literally the only part of physics that's made up. So it's it's agreed upon what it is. But you take that same time, you put it on Jupiter, and it does not apply because it's relative to the observer, which is relative to gravity, relative to all kinds of things. So, yeah, the idea, so

S

Speaker 3 23:46

that's the key that holds the well, in the conclusion that all of the contact modalities, and what I mentioned to you were just some of the contact modalities. Sure, a contact modalities are paranormal experiences involving the manipulation of space time, all of them, it's all one phenomenon. And so that the key to be able to begin to understand that is the concept of a manipulation of space time, where your consciousness is being brought to another dimension. Okay, that's what Ayahuasca does to you as well.

S

Speaker 2 24:19

Sure, sure. Sure. And you know, with all of that, the one thing that we talk about regularly on the show when it comes to space, time, anything like that, especially when it comes to paranormal,

24:34

is the fact that

S

Speaker 2 24:36

frequencies, things, things change when you are around certain types of technology. If you're around something that would warp space time, if you're inside of an alien craft that is able to warp space time or vibrationally shift between realities or dimensions, you would be vibrated at the same rate as that craft. You would be vibrated at the same. Is that technology, in order to make that happen, there are some things that happen in this universe. A magnet and a needle are a prime example. You can use a magnet to find a needle, and it'll move the needle. The thing is, if you leave the magnet near the needle too long, now the needle is a magnet.

S

Speaker 3 25:19

Let me give you a tool that you and your audio audience can utilize, okay? In volume, volume one of our greater reality book series, we have a whole section on non local consciousness, sure, and the quantum hologram, okay, so that's basically it's based upon Doctor Edgar Mitchell's quantum holography, theory of consciousness, which is very intricate, very detailed. And we have his magnum opus article in that book. And that book was published in the Harvard Journal of astrophysics, which is the journal of Doctor Rudy shields. So it's very dense to be able to understand it. But we have about five additional articles that break down that concept of the quantum hologram and non local consciousness, and that is the vehicle of how humans are able to tap into these information fields, because our reality is based upon information fields and these series of five articles, they're written in simple language. They're not written with scientific language and computer codes and quantum physics and things that no these books are meant for the lay person, but they begin to explain the science behind non local consciousness, and how we are able to tap in to information from other realities, like, for example, mission, for example. You know how

S

Speaker 2 26:50

that works, remote viewing, everything else, remote viewing, remote viewing, we talk about that regularly. We'll be at the remote viewing conference this year with Irva.

S

Speaker 3 27:00

We have a chapter written by Stephanie Schwartz, yep. He's one of the main pioneers of remote viewing. He was doing remote viewing before the Stanford Research Center. Okay. His name is Stephanie Schwartz. He's a brilliant man, brilliant. And we have an article that he wrote about the whole early history of remote viewing and what it is and and he ties in the whole aspect, the theoretical aspect of non local consciousness. Oh, how that works.

S

Speaker 2 27:30

Absolutely, just the idea, and it's something that we bring up regularly. Just ninth grade science teaches us that we are 90% empty space. You and I are sharing an electron shell right now by all means of science, you know, so so to think that this isn't an agreed upon illusion, to think that the the reality around us isn't isn't even manipulatable by our own consciousness, is in I mean, that was really the basis of the paper that Hal put off wrote years ago that began the work at SRI was, you know, the idea of, when scientists go home, are they adversely affecting their experiment by thinking about it? You know, the whole concept of if, if you think your iron is on while you're driving to work and you think it long enough or hard enough, will your apartment burn down? You know, because you kind of put it out there.

S

Speaker 3 28:28

I would argue that the pioneers behind non locality were Dr Edgar, Mitchell, Hal put off Russell Targ, yeah, Stephanie Schwartz, and also Dr Dean Radin. Oh, absolutely Noetic Sciences, absolutely. We have articles in our book, volumes one and volumes two from all of these people. Yeah, so, and this is free, folks. This is free and there's not some bullshit conspiracy theory, no type of bullshit. This is real

S

Speaker 2 29:02

science. The thing that we bring up, especially about Hal put off, who's literally in our backyard, working on how to squeeze a vacuum and get energy out of it here in Austin, Texas, in his lab. The thing about why laser scientists like him are involved is because you literally have to know how to take a material, be it a chemical dye, an atom of something, a wafer of semiconductor, a row, a ruby rod, and vibrate it and the atoms in it to such a point that when photons pass through, They come out different, you know, so you understand vibrational science and and the realms in between atoms in a totally different way than the average person or the

S

Speaker 3 29:50

average scientist. Again, I would highly recommend folks to read the articles that we have in a greater reality by. One, they're free, and they talk about the science behind non locality. And if you go to the table of contents, for example, yep, okay. Okay. If we go up a little bit, we have a whole section on the sign of the primacy of consciousness, that means that consciousness is fundamental and not our physical reality. And Michael Grosso was the PhD professor of philosophy that we have as one of the CO editors of our book. Larry Dossey is a medical doctor. Doctor. Bruce Grayson was at the University of Virginia. He's one of the leading academics on MDS. And there we have Peter sturck. Was a professor of physics at Stanford University, yeah. And all the other articles of people like that. And the next section is on non locality. The first one is the primacy of consciousness, all those articles, then non locality. This is what I'm talking about. Edgar Mitchell, the quantum hologram and the nature of consciousness. Glenn Ryan breaks down Edgar's article, yeah, and he discusses his interaction with non human intelligence. Ruby shields talks about the connection between consciousness, our brain, the soul, and God, which is information based, has a very similar article, but, but applies it to the UFO Contact phenomenon. So it's all science based articles in non local county. And it's free, folks, it's free. It's great. It's not conspiracy theory bullshit. You know, it is Roswell crash for like, the 500 time. Okay, yeah,

31:43

well, and, you know,

Speaker 2 31:46

we actively attended and sponsored the International Association of near death studies conference with the Bigelow Institute all of a few years ago in Salt Lake City. And that, that is, that is one of the examples that I give regularly of a group of people. And this is, this is that magnetic example that I'm talking about, where, once you're exposed to that frequency, other things of that frequency tend to happen to you. Paranormal things start happening. Bigfoot things start happening. It's, it's fascinating to see. And a lot of Kathleen's work. Kathleen Martin's work went into the other phenomenon, attached to the experimenter of UFO phenomena,

Speaker 3 32:30

and it really is interesting. That is what our book Beyond UFOs is all about. I will tell I will

Speaker 2 32:35

say this, walking into the room and I'm pretty emotive. I'm pretty connected to my emotions. Jeffrey Mishlev was there. I'd met him at the Irva conference a couple months before when I walked in that room, Ray, it was like I was kicked in the gut with energy from all of these people who had survived near death experience the vibrational rate in that room was, was off the charts, off the chart, like, to the point where I was, I was physically ill for a day. It was, it was wild. One of the only and I've been to psychic conventions. I've been to all kinds of stuff now, like I've been to summoning some all kinds of things in my life. Never have I experienced, I've had religious experiences, nothing like that, where it was like, open the doors and it was like a kick to the gut. Yeah, that energy and consciousness was just on a different level, right?

Speaker 3 33:42

I started off our conversation saying that the end the E phenomenon is the clue to be able to understand the UFO Contact phenomenon. Why? Because these individuals were brought to meet the mind of God consciousness. Yes, yes. And so once you've had that experience, you immediately know, okay, if you go scroll down a little bit down, down a little bit out of body experiences, lucid dreams, yep. And remote viewing is there as well, Stephanie shorts, so. And then volumes two goes into near death experiences the survival of consciousness, and so the end the phenomenon directly kicks your ass and tells you that a physical reality is an illusion. Because everyone that's had a near death experience will tell you that that reality over there is much more real than this physical reality that we're living in. Yeah, see volumes two starts off with near death experiences. You can stop these people right there. Sharon Hewitt Rawlett was one of the running runner up prize winners. Okay? To to. Bigelow contest, yep. Dr Bruce Grayson was one of the two or three pioneers that started the MD movement. Jeffrey Long as

well one of the top three or four MTE researchers in the world. He's a co editor of our book. Raul verde crunched out the data from Jeffrey Long's 30 year statistical database on NDE experiences, and Raymond Moody was the founder of the Near Death Experience movement. So we really got, you know, the top top folks, yeah. But getting back to what I said was that once you've been in that other reality, you understand that this reality, or physical reality is an illusion. Yeah, okay. And that over there, universally, people say that that was more real than this year, yeah. And, and, I mean, the nd is just unbelievably complicated. I won't go, you know, go into it as well. But with the MBE phenomenon, for example, a guest that you need to bring on is yo Roman, R O N, E N, Yosi is Y O S, S i, Yup, okay. He had wrote a book titled One, and in volume three of my book he he wrote a 40 page chapter of his experiences. And let me just tell you very, very briefly, Yossi went to work. He was doing construction work.

36:35

Yes, scroll down. A little

Speaker 3 36:40

bit. Scroll down. That's about Yoshi. Go ahead, yeah, go to the table of contents. Yeah. Go down a little bit.

Speaker 2 36:55

For the listeners out there, we're actively scrolling through the table of contents of the book right now trying to find reference. I

Speaker 3 37:01

think you pulled up volume four, but don't worry about it. I'll tell you listeners. It's a he's in volume three. But basically, Yosi went to work doing construction work. He came home dead tired. He went to bed and he went to sleep. It was like, you know, five or six o'clock in the afternoon, and then he had an out of body experience, his first ever out of body experience. So he sees his body underneath sleeping. He was like, Oh, my God, you know, my dad was going on here. And then all of a sudden, all around him were these short grain aliens, okay, a typical short gray aliens. And they were laughing with him. They were smiling. He was interacting with them. He was having a good ass time with these little gray beings out of body, okay? Then all of a sudden, he goes back into his body, and then he hears noise in his room, and he thought that a burglar, someone had entered his room. So he starts looking around, and it was these five gray aliens, okay, he described this three feet tall, you know, like the typical race. And then he freaks out. Okay, he freaks out. He's got petrified. He was shivering, he couldn't even talk, he couldn't even move. And then the one the beans, came up to him and got close to him, and he became more settled. And then they communicated with him telepathically to relax, you know that they're not going to do him any harm. And then all of a sudden, they put into his mind tons of love. Okay, so with nd, people get the feeling of tons of love that almost everybody has a nd, uh, people communicate with a non human intelligence, mind to mind. Okay? Now, these great beings did something that I've never heard anyone else having. They

allowed Yossi to enter their minds, their consciousness, their thoughts, and what he realized that these five beings were actually one being. Okay? They want one mind, yup. And then he found out that their knowledge was, like unbelievable. It's like the mind of God, that universal knowledge, okay, and very, very deeply spiritual, very loving, very caring. And he describes it in his book and the article, which is in volume three. So get a free copy of folks take advantage before the free offer goes away. It's, it's a volume three is, is his article. And then it got to the point where he was like having so much download. These are downloads of information from these, from this one being that present himself physical body. He asked them, What planet are you from? And they said, We're not from what you think of as a planet, basically saying we're from another dimension. Okay? Then they said other questions, like, you know, are you God? Is it? No, we're not God. But we know of God, okay, the the big Universal Mind, sure. And then it was like, unbelievable information he was getting. Then all of a sudden they said that they cut him off from the that access of that information, of like, remember Doctor spark had that Vulcan mind melt, we would get all the information from someone else. The same thing happened to Yos. So they cut him off on that because they said he was going to do him damage. He's going to do him harm in the future. It's just too much information difficult for him to accept it. So it'd be great if you could get him on your show, because it shows, first of all, that the grays are multi dimensional beings, that the grays are not here to do us any harm. Okay, that drives me deeply spiritual. They're here to help us and that, and that their appearance is not physical. They appear to us like a holographic projection, as very physical, but in reality, they told the OC, he said, Is that how you really look at, you know, from where you're from, the way you appear? As a short break, they said, No, we can actually appear any way we want to, physically, sure, but this is the way that we're appearing to you, okay? And and he said about other beings as well. He said the same thing with other beings that are multi dimensional beings. And so everything that that we've hypothesized, that I have hypothesized here in all of my books, Yoshi is a clear representative of that. But nobody from a UFO conference is going to be inviting Yos to speak, because it has nothing to do with materialist stuff. The only thing that you have about, you know, short Graves is the hypnotic regression bullshit from David Jacobs and but Hopkins and they were they pre selected the people. Okay, at most, each of them worked with at most 100 people over 3040, years, and these are all pre selected people. And if anyone had a positive experience or a neutral experience, they didn't want to talk to them. And it was based upon hypnotic progression. And we have an article in volume three of a greater reality book series by the ex wife of Bud Hopkins, who presented tons of of case studies, of leading questions from these two people. They were very, very close friends, like, for example, David Jacobs had a woman who had a reptilian experience, and before her interview, you're saying, oh, last week, I had someone that I interviewed that had a reptilian experience. The reptilian raped her. Okay, totally abused her this before he's going to be interviewing this woman under hypnotic regression. So what the hell you think is this woman's going to come out with? You know, it was asking one leading questions after another, and she had the actual tapes. The tapes, okay? So, but yet, that's what ufology perceives to be legitimate. You evoke contact. You know, being means research, which is bullshit, you know. So that's what you get in the field of materialist ufology, a lot of distortion,

S

Speaker 2 43:14

well, and you know, especially when it comes to experience to begin with, it's one of those you, you have to believe the experience or until proven otherwise, because otherwise you, you are literally throwing baby out with the bathwater at that point. So

S

Speaker 3 43:30

Well, that's what ufology has done historically with all the major UFO organizations. Okay, for example, Raymond Fowler wrote a chapter for volume five. Raymond Fauci Fowler has written goodness over 15 books on UFOs, and the last you know, 10 of them have been about contact experiences, true. Okay. And he started in the early 1960s writing about this. He's now in his early 90s, early 90s. And he told me that for the first 35 years, they would throw out all the cases that involve the paranormal. Yes, they saw you a vote. Then they started having paranormal spirits throw it out. Okay, absolutely. Same thing with with beings, yeah, anything that had a being in their story, they would throw it out. Yeah. Same thing with Al ninek said the same thing. And so for many, many, many years, these things weren't even discussed, absolutely,

S

Speaker 2 44:27

and they're barely discussed now. And that that's something that we talk about on the show regularly, is the idea that science is rapidly catching up to paranormal since then, since the last few years when quantum entanglement won the won the Nobel Peace Prize, the conversation has changed. And even I'm one of the folk that is in the camp of I am a fan of the relabeling of UFO to UAP, because it brings science into the. Conversation, kicking and screaming. UFO doesn't, but phenomenon does. I changed

S

Speaker 3 45:07

it to a new name. What's that? C, A, P, consciousness, aerial phenomenon. Okay? Because that more appropriately coins it. What it is? This is the consciousness based phenomenon, because these experiences manipulate space time, and what we're seeing, based upon a lot of data from our recent study that these are holographic projections, okay, okay, now you physically see a beam, sure, yes. But when your aunt Matilda dies, you bury her a week ago, and all of a sudden she appears in your living room. Is your aunt Matilda Real or not real? Is she dead or not dead? Okay, sure. The question is, she's both. She's, is he physical or not physical? She's both. Because these are multi dimensional experiences, sure,

S

Speaker 2 46:11

but we do have and granted those, those multi dimensional experiences are, are real, not imaginary. So that's, that's how physical evidence, trace evidence, things like that, ends up being a part of the equation for Correct,

S

Speaker 3 46:28

correct. There's a, there's a theory in philosophy with doctor. You ever heard of? Dr, Jeff Kripal, yes, yeah. He's a professor at Rice University. Yep, a professor of religion and philosophy, yeah. And he has, has now for three years, sponsored the conference on on the paranormal. Basically,

46:50

it was archives of the impossible, archives

Speaker 3 46:53

of the impossible. That's the one, correct. So he invited me down there just two years ago. And and he and I think exactly the same way. And he wrote the forward to our six volume books, the forward to it. And he has a theory, which is a philosophical theory to explain the physical and non physical. It's called dual aspect monism. Dual aspect, monism and and he's an idealist like I am, that consciousness is fundamental, just like all the major nd researchers, we all hypothesize that, same with Stephanie Schwartz, the remote viewer, Jeffrey mishloff, all of us believe that consciousness is fundamental. And by the way, Jeffrey Mishlove wrote two articles or greater reality book series. They're involved one in Volume One, one, volume two. And so the dual aspect, monism theory, just very, very briefly, very simplistically, please, is that when we get reincarnated into this physical reality, all of our memories of the universal mind. You know, when we're connected with God, okay, that gets wiped away, but we're still connected with the mind of God. We're still connected with that information with as we talk about through my local conscience. We have Latin access to a lot of information, because it's like an Akashic Record downloading too. So once we die, then we get reconnected back to the mind of God. So it's this dual aspect that we're always part, always part of the mind of God, always connected, and that's from our consciousness is primary component of it, okay, but while we're here in this temporary physical reality, we're like blinded, we can't see. So is this dual aspect of reality? That's a very, very simplistic concept of it,

Speaker 2 48:59

sure. And you know, one of, one of the things that we've been talking about with a with a researcher, and that I've been bringing up since, is the concept of, like, night myopia. It's a, it's a prime example of, while you are hyper focusing on something, that something actively disappears. You know, like you can you can take a pencil and put it on the wall and, like, tape it to the wall, and literally focus on that pencil long enough that the pencil will dissipate and vanish, and you'll only see the wall. Then as soon as you blink or shift your focus, the pencil comes back. And that whole concept of, how do we what do we do when that happens and when those things happen, even the idea of non local consciousness when I when I speak about binaural beats on shows, one of the things I talk about is the idea that we go through a good. 70% of our day in a state of rote hypnosis, right? We don't think about getting up or being upright or walking or breathing or anything like that. If you are sitting at your computer and doing your TPS reports the same that you do every day, you may be taking in new data, but your fingers are and your brain are going through a rote state of what to do. You know, they don't they don't have to think about that. The process that I follow after this show to make a post on my website is a flow process. I don't have to think about it anymore. You know when you're driving to work every day and you go, Oh, wow, I'm already at this exit. Um, you're, you are in a state that's a different state of reality at that point, and different things are an option. You know, daydreaming starts happening all kinds of stuff. It's, it's pretty fascinating what your mind will do to a occupy itself and where it will go and actively take you, much like any lucid dream or program dream or or dreaming with intent. You know,

S

Speaker 3 51:13

if I can make a comment about one, he's just stated, please, a lot of people the rational travel experiences, yeah, many of them are yogis and people from the Indian tradition. And Evan Alexander started doing it. All of a sudden, he's popping out of his body and going into other dimensions of the realities, sure, and getting information downloads, okay, similar to what you just mentioned, you're tapping outside of the physical reality, and you're getting information via non local consciousness of these multi dimensional realities and databases. And so I've heard tons of stories of astral travel experiences via meditation, absolutely and so regarding the binary beats, one of the co founders of binary beats, together with

52:12

with

S

Speaker 3 52:15

goodness, the guy who invented the term out of body experiences. Robert Monroe, okay, yeah. Dr Tom Campbell, he wrote an article, which is in our book about out of body experiences. I consider him the world's number one OBE experiencer by far, and theoretician, and hopefully you can get him on your show. Well,

S

Speaker 2 52:41

even the fact of, now, like, I make a lot of electronic circuits. I do a lot of lot of things like that. And just just the idea of even the God helmet and other technologies that actively mimic exactly what an OBE is, you know, and people

S

Speaker 3 52:56

come, you will have a wonderful conversation with Tom Campbell. It's he also thinks like, like we all do, yeah, what consciousness is primary?

S

Speaker 2 53:05

Or our brain is a transceiver. Man, we are constantly sending and receiving data. The only difference is that our subconscious is the thing, processing it, not our conscious mind, 90% of the time. So we are connected to these things. It's whether or not we give them the light of day in our mind. You know, no, no different than all the things that you wrote We go through and do you're going to process in dreams later. You know, because you just, you just karate reflex. Handled that with your body. You didn't, you didn't think about it. You didn't emotionally process it things like that. So yeah, it's a funny mismatch of reality, non reality, mixed with non local reality and reality that we utterly make Ray even the idea, and we talk about this all the time with paranormal investigation, the idea of and we've got you for about five more minutes,

but the idea that when you're going out on a paranormal investigation or a Sasquatch hunt, you should have a rote list of things to check off. You shouldn't be looking at movies about that location, or reading stories things like that, because, hey, you're kind of polishing the filter that you're looking at your data through, but B, you're also in your mind, charging that location you know, so you could actively be manifesting the phenomena that you're trying To catch in the wild like it could utterly be a manifestation of you and your intent when you arrest.

S

Speaker 3 54:47

Just think of CE five. Yeah, yeah. I've called down many, many UFOs with witnesses. Okay, yep, the last, the last time I stopped doing it because it's just to me. It's not that. Stimulating. But the last time was with a an attorney. He was a Princeton graduate, Mike murber, and I detailed that experience in my book, a greater reality, one man's journey of experience. And so just think of CE five here is Ray Hernandez outside of his house or at the Mike's Mike's case, he has a huge land and and here I am calling a UFO. And 15 minutes, this huge object appears. And in Mike's case, what appeared was this huge medical metal cylinder. Oh, wow. I'm very close to us. It's in my book. It's free, incredible, downloaded, and it has hundreds of my other experiences, and not just the UFO stuff, but, you know, all the other paranormal experiences. And so imagine that, yeah, here you are a human being talking to this non human intelligence. I want to see you again. I want to see you again. Yeah, and within 15 minutes, usually it's non physical objects appear to me, but they're huge. They're like the size of a football field, yeah? Couple and a conglomeration of lights, light patterns interesting, very close to the ground, not we're not talking about stars. We're talking like right on top of your damn house. Okay, yeah. Now imagine that, okay. Within 15 minutes, this thing appears, okay. It's all dealing with your not your brain, but with non local consciousness, your spirit, interacting with the Akashic fields, which are then tapping into, okay, to the fields associated with UFO intelligence. Yeah. I mean, it's absolutely mind blowing. But yet you think ufology talks about C, e5,

S

Speaker 2 56:56

well, and you know, we talk about it regularly on the show

S

Speaker 3 57:01

I am. That's your show, to your credit. We're talking about a UFO conference. Most the International Association of UFOs, whatever that major conference is called, yeah? Talk about that. No, yeah, yeah.

S

Speaker 2 57:14

You know it's, it's fascinating to me, once again, the different modalities, the different way and how these things are related. Once again, because we, we hold on this show that they are, they are all fully related, 100%

S

Sneaker 3 57:28

Speaker 2 57:22

related. We only got a few minutes, I guess, on Yes, I just want to get folks to understand that what I'm marveling is free information. I'm not charging up any for these things. That's right. These are academic work, and it's all about the paranormal, about UFOs and the ease out of body experiences, okay, astral travel experiences and all the information in here is written by academics, and we all argue that it's all one phenomenon based on the consciousness for the UFOs, for example, UFO section that's in Volume Two, we have 13 articles, 13 articles on UFOs, arguing that UFO is a consciousness based Phenomenon. Guess what? They're all written by PhD academics. Okay, so please take advantage of the information that I'm offering to you. It's all free, and that book that you have right there, beyond UFOs, that's the world's first and only comprehensive academic statistical research study on UFO Contact experiences and almost all of our data contradicts what is circulating in mainstream materialist ufology. So this is not woo woo science, yeah, this is hardcore science written by real freaking PhD academics,

S

Speaker 2 58:58

right? I want to, I want to thank you for your candid words tonight, for your candor, as well as your incredible body of research with this amazing team of Dream Team researchers, it's absolutely incredible. Thank you so much for your time tonight. Thank you so much for everything that you were doing. And

S

Speaker 3 59:18

say hello to you, to your next guest, uh, tell them I also am a PhD researcher and PhD publisher with all my colleagues, absolutely, all interrelated UFOs and

S

Speaker 2 59:31

the East Absolutely. Thank you so much once again, for your time, Ray, we will be sharing links to the show with you. Everything else. You have a great night. Thank you so much for everything. Take care. Have a great day. Thank you. Bye bye, bye bye. Man. What an incredible conversation with Ray folks while you are online, checking out and getting your copy of beyond UFOs by Ray Hernandez, make sure to over. At a greater reality.com, make sure to stop on by Curious Research. Curious research.com or.org curious research.org, is where you can only your copy of the field observation and encounter log, but also the all new, oh, where is it? There? It is the all new remote viewing session journal. If you're a remote viewer, stop on by and get your copy of the Remote Viewing Session journal. It's a great way to keep all of your sessions in one place. Be able to call the data, put it all together, database things, and have it in one bound collection. So stop on by check that out, everybody. When we come back from this quick break. We will be joined by Ronald Meyer. We will be talking about his brand new book, Jesus had a near death experience. We will be talking about that and so much more right after this, you

S

Speaker 2 1:01:12

the key to good science is good research. At the heart of good research is a good data set with the field observation and encounter log from Curious Research, you can easily keep track of

your investigative information all in one place, making it easier to review cases and readily see comparisons and contrasts between them, whether out in the woods, watching in a back room, gathering EVPs or using high tech gear to track UFO, UAP activity this easy to carry, pocket sized scientific data log is the perfect companion for any field researcher. You can find your copy of the Curious Research field observation and encounter log@amazon.com or visit the official curious realm store at curious realm.com forward slash store, to reserve your copy for yourself, your family or a mind that you want to open that website again is curious realm.com forward slash store, you

S

Speaker 2 1:02:44

Well, hello everybody, and welcome back from that quick commercial break. Thank you so much for staying tuned. Also. Thank you so much to our sponsors. Especially true, him, science. If you are a user of CBD products, like I am for anxiety, travel anxiety, other health reasons, stop on by and check out all of the great products from Christopher Lynch and true hemp science. Truehempscience.com, provides some amazing CBD products made through a spider process. They use every part of the plant, stems, seeds, roots, leaves, buds, every part of the plant is used, reused, combusted and reused to create an amazing full spectrum CBD product that is complete with terpene profiles. And all stop on by and check them out. Truehimsience.com. Is the website that you want to go to. Curious seven is the code that you want to use to save 7% off your entire cart of \$50 or more while you're there, while you are online, checking out of everything from true him science, stop on by and check out some of the stuff from our guest in this segment, Ron Meyer. He is the producer of the amazing film the mysteries of Bradshaw Ranch, as well as the awesome new book with co author Mark reader, Jesus had a near death experience. Now Ronald is the science part of this mark is the history part, but I wanted to have Ronald on to talk about some of the science that inspired this amazing work of fiction. Because the idea that Jesus had a near death experience, I would almost have to say, like, yes, and absolutely, Ron, even, even if you're talking the concept of, did Jesus completely die and come back? So welcome to the show, Ron. How are you doing this evening?

S

Speaker 4 1:04:37

Great to be here. I'm happy here in Colorado. It's that tricky Western weather type weather right now, and who knows what we'll get. Maybe we'll get a thunderstorm to accent my thoughts,

S

Speaker 2 1:04:51

right? Well, how long have you been studying the paranormal things like that? Because once again, you are the founder of sitter communication. You have had some great success with some of your Bigfoot film in the past, as well as mysteries of Bradshaw Ranch, which is available on all kinds of platforms right now. How did you first come to the world of paranormal and extreme science investigation and research. Ron, so,

S

Speaker 4 1:05:24

pre COVID, you know, that's kind of the way a lot of people define things. Yeah, right. Is that I was hired by one of the companies I produce series for to do something on Bigfoot, and my daughter actually was more interested in it than me, so I said, Okay, let's go ahead and do it. And it became known as chasing Bigfoot. It's available on all the streaming platforms. But in the process of doing that series, I encountered a lot of people that told their stories of encounter with something called Bigfoot, and it was clear to me that they were being truthful about their experience. They weren't lying. They weren't making it up. Sometimes you could see that they went back and had such a profound sense of feeling for them that, you know, moved them back to a state that was sometimes exciting, sometimes terrifying, absolutely, depending upon what your framework was at the time, but it was usually life transforming in some way. So one of the last people I talked to said, Well, I'm not in the school. I'm a minority right now, and that is, I think Bigfoot is something parapsychical, just to be simple, that it's and I had sort of agreed that this could be some sort of a biological form, either connected to large apes or some version of us that's roaming around. Just didn't make sense to me. I have a strong background in biology and ecology, and it just didn't seem possible to me. This idea of something parapsychical kind of fascinated with me and as a filmmaker, sometimes I use my way of learning things is to do a movie about it. So I decided to do a movie that would become the Bigfoot alien connection revealed, and it's, it was really transformational for a lot of people. It's right now on YouTube, it's got like, 4.7 million views, and it's similar. Ah, there it is. It validated for people. Many people have a feeling something that happened to them that they were unwilling to talk about, usually either some kind of UFO phenomena or Bigfoot encounter. And the fact that I was bringing them into under one umbrella seemed to be strangely reassuring to them, and it just became this huge success and, and that's those are the two things that took me on, the further investigations that I've done such subsequently.

S

Speaker 2 1:08:13

You know, the fact that you got into all of this through Bigfoot, is fascinating to me, because there, there's so many other angles. Of course, paranormal, paranormal, haunting TV, things like that, have been hugely popular in the Content Market and especially UFO UAPs over the last many years. But the fact that you came to this world of research and filmmaking through documentary, Bigfoot work is fascinating to me because it, it really is one of those, one of the mottos of this show is that we will believe the experimenter until proven otherwise, Ron. And even with Curious Research. When I founded that, it the idea that even if data or images are examined and something else comes of your experience, that does not mean that your experience has been removed. You know, it doesn't. It doesn't change that moment in time that changed who you are and how you view the world and universe around you and your place in it.

S

Speaker 4 1:09:26

Yeah, I ran into that phenomena quite frequently, and I actually had my own Bigfoot encounters, hardly, really. Yes, it was, I don't know. Do you want me to talk about this?

S

Speaker 2 1:09:37

Please go ahead. This is, this is all back material.

1:09:41

Okay, so

Speaker 4 1:09:44

there's a there's this place called Bailey, Colorado. It's a small mountain town. And there's a fact, the person that told me that Bigfoot was probably something parapsychical Has the Sasquatch outpost there. And. Um, but by the way, interestingly, my my son in law, was putting on a Bigfoot family weekend in Ohio, and my and my daughter was part of the film team that went there to to film that. And as a result, they eventually got married, and now that Bigfoot weekend is held here, and it's held at this wonderful resort, old time resort, that's been renovated in Bailey, Colorado. Oh, wow. And in the process of doing another series called The Paranormal highway, we had experiences with people touching trees, you know, kind of embracing them and getting some sort of contact feedback sort of thing through the tree. You know, some are quite profound. So interesting. The Bigfoot weekend was was going on, and I was asked to come up and do a meditation with a group. And before the evening night ops for the people occurred. I was looking around and talking to the person who was running the little gift shop, and she she said, Oh, would you like to hear about an alien abduction I had when I was a kid? And I said, Well, sure. And so I listen. This is what I do. I listen to people kind of validate their story. She says, I got something interesting I want to show you. So she took me outside on the grounds. It took me to this tree, which we could call it a prayer tree, or a sacred tree. It's a place where the ute Indians, by the way, the same Indians that surround Skinwalker Ranch, Native Americans would come to this tree and take out little pieces of bark. You can see where that was and when they were young trees, they shaped them like bonsais. And it was confirmed by you shaman that this was one of those trees. And I found that quite fascinating. So when I did, when I did the meditation for the group of about 40 people, I said, you guys want to try something like, there's this tree over here. And if you go over there in small groups of three and four, lean up against it, close your eyes and, you know, see what happens. And pretty much everybody has some sort of interesting experience, including a young teenager said she traveled in the astral plane. I said, would you want to do the catch? Said, No way. I never want to do that again. But when everybody had moved away, Allen, my son in law, at that time, we decided to try it ourselves, and I had my hand up on the tree, and my eyes were closed, and then I opened it up, and behind Alan was a shadow figure in the shape of a Bigfoot, slightly orange in color. And of course, the brain struggles with making that make sense. Yeah. And at the same time, Alan was kind of waffling in and out of existence. And finally, I said to Alan, there's a there's a creature behind you. He said, Oh, I know very well. And he had felt it, oh, wow. So that's my Bigfoot experience.

1:13:22

Wow. And you know,

Speaker 4 1:13:25

subsequently, that place has become a place of pilgrimage for people to come and and touch

the tree and give whatever experience they might be available to them. Yeah, yeah, there you go. You got a picture of one of them on the property. Very

S

Speaker 2 1:13:39

nice. And you know the idea of the Utes making these ceremonial, those locations, these, these locations like that, for gift giving to spirits, that kind of stuff. It's it's interesting, because one of the things that we discuss regularly on the show

P

1:14:00

is the idea of

P

1:14:03

connection between

S

Speaker 2 1:14:06

literally other dimensions, the idea that even even Bigfoot, something like that, maybe, maybe an animal that exists just on another plane, that is adjunct to ours. And when, when you start looking at science in the modern age, when you start looking at things like quantum entanglement, stuff like that, it's fascinating to see the fact that, yeah, we are like suds in a tub. Ron we are, we are adjunct to numerous other dimensions and realities.

S

Speaker 4 1:14:41

Yeah, I might look at them slightly different way, which maybe can lead me to near death experience. Sure. Please. Have you had, have you had guests on speak about that? Oh, absolutely. Please. Go ahead. So you know that it's, it's, in some ways, what happens is that through some accident or medical. Trauma, or whatever, their their body begins to shut down so that they're clinically dead, and at that particular time, from their perspective, and then they're brought back to medical procedures, yeah, and, and they come back with with stories, reports of what they experienced when their brain had shut down. And right now, it's pretty clear that that the brain, turning the brain off is the key to getting these experiences. What they experience is is another kind of non it's a non physical world. The body is left behind. But there's communication. People have such a variety of experiences. Sometimes they see dead relatives, sometimes they see something like angels. A lot has to do with, you know, their cultural background, their worldview, their language skills and so on. And so there seems to be this other domain, which you just call the non physical. The same time, people have reported that that during those particular travels to that place, they get the idea for like I was told voice by somebody who worked with Steve Jobs that he had, he had that experience of the cell phone, and then from there he'd be decided to go forward and create it. So there's this technological aspect, and there's a group of people that have used that technique in some way or another to to get inventions that become high tech inventions. But they keep very secret,

and it's called the invisible college. And a couple people come out who are part of that, but most of them stay anonymous, but they're high part highly placed people in the world, usually well respected, good good science people. And the book is somewhat based on a group of people like that that are using a medical induced near death experience, to go to that non physical world and gain the other thing they get sometimes is kind of superpowers, powers that allow them, they give them pre capabilities or Remote viewing capabilities, and a few other ones. And so the idea of the book is that some people learn how to do this, and maybe through who listen. So should I go back historically now maybe, oh,

S

Speaker 2 1:17:34

absolutely, yeah, let's, let's start doing that as

S

Speaker 4 1:17:40

as so there was this place outside of Athens called Alicia, where all the great thinkers of the of the Greek philosophers and thinkers, you know, traveled to a kind of pilgrimage, and it appeared that they would have These, what we might call hallucinogenic or near death experiences, although nobody's ever been able to figure out what that drug might have been. Maybe it wasn't a drug, but they would come back, and they formed the foundation of all our science or government or our republic mathematics. They all came out of their trips to elusive and one of the premises of the novel is that Jesus, a lot of people confuse this, that the death on the cross is not his, his his enlightenment experience or his near death experience. It's when he went into the desert after being baptized for 40 days, yeah, and he came out enlightened, and then he talked about all these revolutionary ways that you two are the Son of God, and these high philosophical concept concepts that got him into trouble and got him killed. So most people kind of confuse those two things. So the big event was the the event in the desert where he got became enlightened, and his teachers teachings were based on that. Then, of course, later on. You know, it's very hard to base to scale experience, but belief is easy to scale. Does that make sense to you?

S

Speaker 2 1:19:17

Sure? Sure explain that for the audience, though, real quick. Ron,

S

Speaker 4 1:19:21

so we've been talking about, you know, people having these altered state experiences, whether it's barefoot or UFO or so on. How can you create a group of people who now understand that and grow it into something that's important for humanity to exist, but if you believe that you're going to be saved by, you know, basically accepting that the son of that Jesus was the Son of Man on that belief, that's easy to scale. And the Romans figured that out and turned what was Jesus saying? Come and experience what I experienced. Instead, they said, Well, you can't do that. You need a priest or two to help me along with that, but if you believe that, you'll go to heaven. So that's the difference between a belief and experience, sure, sir. And you know, all our politics, all that stuff, is based on beliefs, yeah, not so much on on experiences, yeah. Well,

S

Speaker 2 1:20:19

and that, that's a statement that we echo regularly on this show, Ron a lot of this show, but though we have conversations things like that, it is to demystify that's why we're here, and to get to the root of where these beliefs, where these things, come from. And yeah, one of the one of the phrases that we use regularly on the show is the idea of, I don't believe in UFOs. Belief implies faith, and I don't have faith that UFOs exist. I'm pretty certain UFOs exist, you know, like I'm positive that, at the very least, an unidentified flying object exists to science, something that they cannot explain in the air. So I don't believe UFOs exist. UFOs exist, you know, and very much the same thing, like you're saying, that idea of amplifying belief and taking it to a larger scale, scaling belief to the masses is much easier to do as a means of control than, than an esoteric teaching that allows for individuality, or, you

S

Speaker 4 1:21:26

know, people telling it's talking about experiences that you too can have those experience, yeah,

S

Speaker 2 1:21:32

yeah. No, precisely, locking that, locking that behind the keys of the priesthood.

S

Speaker 4 1:21:38

So, you know, one of the the movie that I'm doing on near death experiences like I make a movie on everything can kind of interest me, as my way of exploring is that they all come away with one thing for certain, that they know they know for certain, that they're immortal. And so they their attitude towards death is totally changed. Some come back with, you know, some idea that they have something to do on this, this plane. But others, you know, are kind of confused by it all, but they all know for certain that death is not the end of things.

S

Speaker 2 1:22:19

Yeah, and you know, with that, especially that personal revelation there, that is something you really have to take into account, the idea that there, there is that teaching from the from the Gospel of Thomas, of you know, God is under every stone. He's in every tree, things like that. So the idea that we, we co creatively, take part in that creation, and that we are a part of that creation means, means that we are a part of God. And once again, to to lock that behind kind of a paywall, so to speak, in modern terminology, when it comes to religion, is a, again, an easy means of control for such messages.

S

Speaker 4 1:23:10

Yeah, that's kind of the paradox of the one and the many, right, yeah. How can the one in the

many

1:23:18

somehow be the truth of it all.

Speaker 2 1:23:21

Yeah, yeah. And, you know, especially when it comes I mean, religious belief is one thing,

1:23:28

but when you're talking about

Speaker 2 1:23:31

something like near death experience, I have, I have personally sponsored the ions conference. The ions conference is actually coming up in not salt lake city this year. I cannot remember offhand where it is. I want to say it's in Illinois, but it's coming up in August. I ends as the association, or international association of near death studies, and I sponsored that conference with the Bigelow Institute, who is now actively putting on a contest for, basically a grant for whoever can prove Contact with The Other Side, whoever can prove contact with intelligence that has passed on from this realm. So the idea of consciousness after life, you know, and when, when that happened, when that was announced. It was, it was very interesting to see the number of scientists out there that were that were actively on that Ron, that were that were applying for that grant and putting forth research papers, that kind of stuff. It is. It's an active thing, and even even the individuality of near death experience itself. Only recently has I am started a support group for people who have gone to the quote, void, to the other, not to heaven, not to hell, but people who have just. Gone to the other side, and it's black. We have a guest, Mindy tout fest, good friend of the show that Mindy

Speaker 4 1:25:07

is in my new near death experience,

Speaker 2 1:25:11

exactly, exactly. And there's, there's, go ahead.

Speaker 4 1:25:16

You do not have to have a near death experience. You can have what's called mystical experiences. I, for example, had two, two experiences of the black light, the boy and it's, it's

not. And experience is probably not quite the right way to say it, but it, it's a way of being, sure, the the there's no me, there's no structure to that void or being, but it's everything at the same time. Yeah, it's kind of strange thing to say. So the first time I experienced it was just the void, the the infinite thing with with no structure, no no edge, nothing, no me. But the next time I had that experience, it was it included something that I would say is the potential for all which, again, goes back to the one and many Sure. And I wasn't dying either. I was doing a kind of retreat called enlightenment intensive that so there was some preparation and kind of a desire to have something like that happen. But, you know, I didn't have to die to do that. I think many people over the many of the great authors and writers and musicians have had that same kind of experience, some kind of mystical experience. And they didn't have to die either. So I think it's open to everybody. Yeah, everybody can have that. If it's it seems to happen somewhat spontaneously. Sometimes,

S

Speaker 2 1:26:54

yeah, there is. And, you know, I do a lot of work in the world of binaural beats and binaural beat therapy. Ron, I'm busy formulating an album for people who've had near death experience to help get over their trauma, things like that. But just the world of frequency and and sound frequency, you know, it's it's been interesting over the last many years, with things like the God helmet coming out of MIT, that kind of stuff, just to see how people are using resonant frequencies, magnetic frequencies and other electronic means to basically induce a near death State. Almost almost identical symptomology of everything going dark, hearing voices, a tunnel of light, a feeling of well being, a feeling of other people on the other side, all being induced in the laboratory through electronic means. So it's interesting. What's that you said? Very cool. Yeah, yeah. And it's, it's really, really interesting when you start looking at the way that is, especially how our brain operates to begin with. Because once again, we are, we are a transducer. We're we're 90% empty space. We're always picking things up. So the idea of us slipping into an altered state of consciousness. We we almost exist in an altered state of consciousness. Most of what we do throughout the day is rote hypnosis, like if, if you are, if you are used to filling out the same form all day, every day at work, you may be looking at some new data, but your fingers in your brain are going through the rote hypnosis of where that tab belongs. You know, as you're typing things like that, no, no different than driving to work five days a week, and three of those days, you go, Oh, dang, I'm I'm at my exit already. You know, our brain would much rather live in that altered state where it doesn't have to make a decision, aside from breathe, be upright, digest food, you know, that kind of stuff. So so the idea that a near death experiences are not extraordinarily uncommon

S

Speaker 4 1:29:22

with medical technology now they're, they're really quite common,

S

Speaker 2 1:29:25

yeah, yeah, yeah. And, and, not only that, but the idea that, once again, Jesus is transformative experience, because, like, you're saying, the the near death experience is very, very akin to religious experience, things like that, like I didn't have a near death experience, but I've definitely had religious experience like that. Is, that is what brought me to join the seminary as

I went into college. Was, was an event where I was physically at mass with a few 100 people, and while. I was in prayer, transported to kind of a gelatinous orange world where I could still see everything, still hear everything, but I was I was in another presence that was there simultaneously, and I'll never forget it. It is still to this day what, what I ascribe to be God when I feel it, um, but, but nobody else in that church saw that. Nobody like I literally live right down the road from a guy that was serving at the altar with me, and he was like, Yeah, I didn't see anything like that. I didn't feel anything like that. I was awake. I wasn't asleep, I wasn't coming out of surgery. I wasn't I don't know maybe I was being affected by something electronically, but I was in a church in 1992 so it's not like we had the internet or a lot of things like that, you know, and it, it really is the fact that, once again, yeah, those those experiences are very, very individual, and they're very life changing when they happen.
